Journal Office, House of Commons, 18 February 1836.

PUBLIC BILLS.

RETURN of Public Bills presented to this House since the Year 1801; and referred to Select Committees.

(*Mr. Bernal.*)

Ordered, by The House of Commons, *to be Printed,*
22 *February* 1836.

BILLS IN PARLIAMENT.

RETURN to an Order of the Honourable The House of Commons, dated 5 August 1836;—*for*,

A RETURN of the NAMES and TITLES of all BILLS, PRIVATE as well as PUBLIC, which have passed The HOUSE of COMMONS in the present Session, and have not been returned from the other HOUSE of PARLIAMENT;—also, of all BILLS, during the same period, which have been returned from the other HOUSE of PARLIAMENT with AMENDMENTS, but which have not afterwards received the ROYAL ASSENT.

—1.—

A RETURN of the NAMES and TITLES of all BILLS, PRIVATE as well as PUBLIC, which, during the present Session, have passed The HOUSE of COMMONS, and have not been returned from the other HOUSE of PARLIAMENT.

YEAR	NAME.	TITLE.
1836	Trinity (North Leith) Harbour and Docks.	- - For constructing and maintaining a Harbour, Dock or Docks, Piers and other Works, at Trinity, in the Parish of North Leith, and County of Edinburgh.
	Dundee Waterworks - -	- - For supplying the Royal Burgh of Dundee and Suburbs thereof with Water.
	Durham Railway - - -	- - For making a Railway from Frosterley to the City of Durham Branch of the Clarence Railway, with various Branches therefrom, all in the County Palatine of Lancaster.
	London and Brighton Railway -	- - For making a Railway to join the London and Southampton Railway near London, and to form a Communication between London and Brighton by way of Shoreham.
	Edinburgh Poor Rates - -	- - To regulate and equalize the Assessment for the Maintenance of the Poor in the City of Edinburgh, and ancient and extended Royalty thereof, and to render Members of the College of Justice and others liable in the said Assessment.
	Manchester and Cheshire Railway.	- - For making a Railway from Manchester to join the Grand Junction Railway near Crewe Hall, in the County of Chester, to be called the Manchester and Cheshire Junction Railway, with two several Branches therefrom.
	Charitable Trustees - -	- - For the Election of Charitable Trustees in certain Boroughs.
	Cinque Ports - - -	- - For the better administration of Justice in the Cinque Ports.
	Civil Offices Declaration -	- - For the Relief of Persons elected to Municipal Offices, and entertaining conscientious Objections to subscribe the Declaration provided and enjoined by an Act made in the ninth year of King George the Fourth, for repealing so much of several Acts as imposes the necessity for receiving the Sacrament of the Lord's Supper as a Qualification for certain Offices and Employments.
	Common Law Courts - -	- - To abolish certain Offices in the Superior Courts of Common Law, and to make Provision for a more effective and uniform Establishment of Officers in those Courts.
	Bribery at Elections - -	- - More effectually to prevent Bribery and Corruption and unnecessary Charge and Expense in the Election of Members to serve in Parliament.

(*continued.*)

YEAR	NAME.	TITLE.
1836.	Fisheries - - - -	- - For the better Regulation and Protection of the Fisheries on the Coast of England and Wales.
	Jewish Civil Disabilities - -	- - For the Relief of His Majesty's Subjects professing the Jewish Religion.
	Lunar Months - - -	- - To remove Difficulties which may arise from the confusion between Calendar and Lunar Months, in the computation of Time, and to remedy certain Grievances which have already been occasioned thereby.
	Municipal Elections - -	- - To provide for certain cases in which Elections have not been duly made according to the Provisions of the Act to provide for the Regulation of Municipal Corporations in England and Wales.
	Oyster Fisheries - - -	- - For the Regulation and Improvement of the public Oyster Fisheries in England and Wales.
	Poole Corporation - - -	- - For avoiding the late Election of Councillors and other Corporate Officers for the Borough of Poole.
	Post Office Commissioners -	- - To enable His Majesty to appoint Commissioners for executing the Duties of His Majesty's Postmaster General.
	Registration of Voters - -	- - For the more effectual Registration of Persons entitled to vote in the Election of Members to serve in Parliament in England and Wales.
	Roman Catholic Marriages -	- - To repeal so much of an Act of the nineteenth year of King George the Second, as makes void all Marriages celebrated by any Popish Priest between Protestant and Papist.
	Shire Halls - - - -	- - To explain and amend an Act of the seventh year of the Reign of his late Majesty King George the Fourth, to provide for improving and rebuilding Shire Halls, County Halls, and other Buildings for holding the Assizes and Grand Sessions, and also Judges' Lodgings throughout England and Wales.
	Stafford Disfranchisement -	- - To exclude the Borough of Stafford, in the County of Stafford, from sending Burgesses to serve in Parliament.
	Steam Carriages - - -	- - To repeal such Portions of all Acts as impose prohibitory Tolls on Steam Carriages, and to substitute other Tolls on an equitable footing with Horse Carriages.
	Bankrupts' Estates (Scotland) -	- - For regulating the Sequestration of the Estates of Bankrupts in Scotland.
	Court of Session (Scotland) -	- - To make certain Alterations in the duties of the Lords Ordinary, and in the establishment of Clerks and Officers of the Court of Session and Court of Commission for Teinds in Scotland, and to reduce the Fees payable in these Courts.
	Small Debts (Scotland) - -	- - For the more effectual Recovery of Small Debts in the Sheriff Courts, and for establishing Circuit Courts for the trial of Small Debt Causes by the Sheriffs in Scotland.
	Personal Tithes - - -	For the Abolition of Personal Tithes.

—2.—

A RETURN of the NAMES and TITLES of all BILLS which, during the present Session, have been returned from the other HOUSE of PARLIAMENT, and have not afterwards received the ROYAL ASSENT.

YEAR	NAME.	TITLE.
1836.	Inns, Alehouses and Victualling-houses.	- - To amend the Act of the 9th Geo. IV. c. 61, and for the better Regulation and Management of Inns, Alehouses, and Victualling-houses in England.
	Grand Juries (Ireland) - -	- - For consolidating and amending the Laws relating to the Presentment of Public Money by Grand Juries in Ireland.
	Municipal Corporations (Ireland)	- - For the Regulation of Municipal Corporations and Borough Towns in Ireland.
	Church of Ireland - - -	- - For the better Regulation of Ecclesiastical Revenues, and the Promotion of religious and moral Instruction in Ireland.
	Municipal Corporations Act Amendment.	- - To explain and amend an Act to provide for the Regulation of Municipal Corporations in England and Wales.
	Stamp Duties - - -	- - To consolidate and amend the Laws relating to the Stamp Duties.
	Poor Rate - - - -	To regulate Parochial Assessments.

Public Bill Office,
20 August 1836.

BILLS IN PARLIAMENT.

A RETURN of the NAMES and TITLES of all BILLS which have passed The HOUSE of COMMONS in the present Session, and have not been returned from the other HOUSE of PARLIAMENT;—and, of all BILLS returned from the other HOUSE of PARLIAMENT, but which have not afterwards received the ROYAL ASSENT.

(*Mr. Ewart.*)

Ordered, by The House of Commons, *to be Printed,*
20 *August* 1836.

605.+

BRITISH MUSEUM.

RETURN to an Order of the Honourable The House of Commons, dated 2 August 1836;—*for*,

AN ACCOUNT of any PROCEEDINGS adopted by the TRUSTEES of the BRITISH MUSEUM, with reference to RESOLUTIONS passed by the Select Committee of this House on the subject of that Institution.

AT a Committee of the Trustees of the British Museum, July 20th 1836, the Resolutions passed by the Select Committee of the House of Commons, appointed to inquire into the Affairs of the Museum, as printed in the Votes of the 14th instant, were read to the following effect:

1. *Resolved*, That the great accessions which have been made of late to the Collections of the British Museum, and the increasing interest taken in them by the public, render it expedient to revise the Establishment of the Institution, with a view to place it upon a scale more commensurate with, and better adapted to, the present state and future prospects of the Museum.

2. *Resolved*, That this Committee do not recommend any interference with the Family Trustees, who hold their offices under Acts of Parliament, being of the nature of National Compacts.

3. *Resolved*, That though the number of Official Trustees may appear unnecessarily large, and though practically most of them rarely, if ever, attend, yet no inconvenience has been alleged to have risen from the number; and the Committee are aware that there may be some advantage in retaining in the hands of Government, a certain influence over the affairs of the Museum, which may be exercised on special occasions; yet if any Act of the Legislature should ultimately be found necessary, a reduction in the number of this Class of Trustees might not be unadvisable.

4. *Resolved*, That with regard to the existing elected Trustees, the Committee think it very desirable that the Trustees should take steps to ascertain whether some of those whose attendance has been the most infrequent, might not be willing to resign their Trusteeships;—That in future, it be understood, that any Trustee hereafter to be elected, not giving personal attendance at the Museum, for a period to be fixed, is expected to resign his Trusteeship; being however re-eligible upon any future vacancy.

5. *Resolved*, That in filling up vacancies it would be desirable that the electing Trustees should not in future lose sight of the fact, that an opportunity is thus afforded them of occasionally conferring a mark of distinction upon men of eminence in literature, science and art.

6. *Resolved*, That the extension of the Collections which has taken place, and the still greater extension which may be looked for, render a further division of Departments necessary; and that at the head of each Department there be placed a Keeper, who shall be responsible for the arrangement, proper condition, and safe custody of the Collection committed to his care.

7. *Resolved*, That it is desirable that the Heads of each Department shall meet once in three months, for the purpose of consulting with reference to any matters of detail relating to the internal arrangements of the Museum, which they may desire jointly to submit to the Trustees in writing.

8. *Resolved*, That whenever there may be a vacancy in the Office of Principal Librarian, or in that of Secretary, it is desirable that the distribution of the duties now discharged by those officers respectively, including the Expenditorship, be reconsidered, and that the Office of Secretary be not combined with the Keepership of any Department.

9. *Resolved*, That it is desirable that the hours during which the Museum shall be open on public days, be hereafter from ten o'clock untill seven throughout the months of May, June, July and August; and that the Reading-room be opened throughout the year at nine o'clock in the morning.

10. *Resolved*,

10. *Resolved,* That it is desirable that the Museum be hereafter opened during the Easter, Whitsun and Christmas weeks, except Sundays and Christmas-day.

11. *Resolved,* That it is expedient that the Trustees should revise the salaries of the Establishment, with the view of ascertaining what increase may be required for carrying into effect the foregoing Resolutions, as well as of obtaining the whole time and services of the ablest men, independently of any remuneration from other sources; and that when such scale of salary shall have been fixed, it shall not be competent to any officer of the Museum paid thereunder to hold any other situation conferring emolument or entailing duties.

12. *Resolved,* That it is desirable that the Heads of Departments do consult together as to the best method of preparing, on a combined system, an improved edition of the Synopsis of the Museum; that each officer be responsible for that part which is under his immediate control, and attach his signature to such part, and that the work be prepared in such a manner as to enable each part to be sold separately, which should be done at the lowest price which will cover the expenses of the publication.

13. *Resolved,* That it is expedient that every exertion should be made to complete, within the shortest time consistent with the due execution of the work, full and accurate Catalogues of all the Collections in the Museum, with a view to print and publish such portions of them as would hold out expectations of even a partial sale.

14. *Resolved,* That it be recommended to the Trustees, that every new accession to the Museum be forthwith registered in detail, by the officer at the head of the Department, in a book to be kept for that purpose; and that each Head of a Department do make an Annual Report to the Trustees of the accessions within the year, vouched by the signature of the Principal Librarian, of desiderata, and of the state and condition of his own Department.

15. *Resolved,* That it be recommended to the Trustees to take into consideration the best means of giving to the Public a facility of obtaining Casts from the Statues, Bronzes and Coins, under competent superintendence, and at as low a price as possible.

16. *Resolved,* That the Committee are well aware that many of the alterations, which they have suggested, cannot be carried into effect, except by increased liberality on the part of Parliament, both with respect to the Establishment of the Museum, and also to a much greater extent, for the augmentation of the Collections in the different Departments; but they confidently rely on the readiness of the Representatives of the People to make full and ample provision for the improvement of an Establishment which already enjoys a high reputation in the world of science, and is an object of daily increasing interest to the people of this country.

17. *Resolved,* That the Committee, in the alterations which they have suggested, do not mean to convey a charge against the Trustees, or against the officers of the Museum, whose talents, good conduct and general and scientific acquirements are universally admitted; and they are aware, that where imperfections exist in the Collections, those imperfections are mainly attributable to the very inadequate space hitherto available for their exhibition, and to the limited pecuniary means at the disposal of the Trustees; and they are of opinion that the present state of the British Museum, compared with the increasing interest taken in it by all classes of the people, justifies them in the recommendations contained in the above Resolutions.

18. *Resolved,* That the Committee having taken into consideration the Petition presented to The House by Mr. Charles Tilt, and referred to the Committee, which Petition prayed for public assistance in the preparation of a work from the Medals in the British Museum, and having taken Evidence on the said subject, consider that in no way can they more satisfactorily discharge the duty confided to them by the reference in question, than by simply laying before The House the Minutes of Evidence so taken, and ordering the Petition of Mr. Charles Tilt to be placed as an Appendix to that Evidence, and to these Resolutions.

The Trustees proceeded to consider these Resolutions, and having adverted to each of them in order, Resolved as follows:—

1. With respect to such matters in the first five Resolutions as appear to call for the intervention of the Trustees, this Committee recommends the several points to the serious consideration of the General Board of Trustees, whenever the occasions arrive for giving practical effect to these Resolutions.

2. With respect to the 6th Resolution, this Committee advises the immediate appointment of a Sub-Committee of Trustees to make a Personal Survey of the Museum, and in conjunction with the Heads of the existing Departments, and with such other Gentlemen employed in the Museum as it may be thought expedient to consult, to take into consideration and report to the General Board the best mode of giving effect to the said Resolution.

3. With

3. With respect to the 7th, 9th, 10th, 11th, 13th and 14th Resolutions, the subjects matter of which appear to be connected together, and have reference to new internal arrangements which may be immediately necessary, this Committee is of opinion that the consideration of these Resolutions, and of the best practical mode of giving effect to the Recommendations which they involve, should be referred to the same Sub-Committee to which the 6th Resolution is referred.

4. That a special Memorandum be made of the Recommendations contained in the 8th Resolution with a view of ensuring the attention of the Trustees to them on the first opportunity of Vacancies.

5. With respect to the 12th Resolution, this Committee understands that measures have been already taken for giving effect to the Recommendation contained therein.

6. This Committee is further of opinion that a General Meeting of the Trustees should be convened at the earliest practicable period for the purpose of deliberating upon the Recommendations contained in the 15th Resolution, and of entering into such communication with the Chancellor of the Exchequer as may appear advisable, with reference to the Financial Considerations connected with the Report of the Select Committee, and particularly with the 16th Resolution of that Report.

Extracted from the Minutes.

J. Forshall, Secretary.

BRITISH MUSEUM.

PROCEEDINGS adopted by the TRUSTEES of the BRITISH MUSEUM, with reference to RESOLUTIONS of the Select Committee of The House of Commons on that Institution.

LONDON UNIVERSITY AND UNIVERSITY COLLEGE.

RETURN to an ADDRESS to HIS MAJESTY, dated 19 August 1836;—*for*,

COPY of the DRAFT CHARTERS for the UNIVERSITY of LONDON and the UNIVERSITY COLLEGE.

Whitehall, Treasury Chambers,
20 August 1836.

F. MAULE.

COPY OF THE DRAFT CHARTER OF THE UNIVERSITY OF LONDON.

WILLIAM THE FOURTH, by the Grace of God of the United Kingdom of Great Britain and Ireland King, Defender of the Faith: To all to whom these presents shall come, Greeting. WHEREAS we have deemed it to be the duty of our Royal Office, for the advancement of religion and morality and the promotion of useful knowledge, to hold forth to all classes and denominations of our faithful subjects, without any distinction whatsoever, an encouragement for pursuing a regular and liberal course of education; and considering that many persons do prosecute or complete their studies, both in the Metropolis and in other parts of our United Kingdom, to whom it is expedient that there should be offered such facilities, and on whom it is just that there should be conferred such distinctions and rewards as may incline them to persevere in these their laudable pursuits: Now, know ye, that for the purpose of ascertaining, by means of examinations, the persons who have acquired proficiency in literature, science and art, by the pursuit of such course of education, and of rewarding them by academical degrees, as evidence of their respective attainments, and marks of honour proportioned thereunto, we do, by virtue of our prerogative royal, and of our especial grace, certain knowledge, and mere motion, by these presents for us, our heirs and successors, will, grant, declare and constitute

during our royal will and pleasure, and all the persons whom we may hereafter appoint to be Chancellor, Vice Chancellor, or Fellows, as hereinafter mentioned, one body politic and corporate, by the name of the University of London, by which name such body politic shall have perpetual succession, and shall have a common seal, and shall by the same name sue and be sued, implead and be impleaded, and answer and be answered unto in every court of us, our heirs and successors. And we do hereby will and ordain that, by the same name, they and their successors shall be able and capable in law to take, purchase and hold to them and their successors any goods, chattels or personal property whatsoever, and shall also be able and capable in law, notwithstanding the statutes of mortmain, to take, purchase and hold to them and their successors, not only all such lands, buildings, hereditaments, and possessions as may be from time to time exclusively used and occupied for the immediate purposes of the said University, but also any other lands, buildings, hereditaments, and possessions whatsoever, situate within our United Kingdom of Great Britain and Ireland, not exceeding the annual value of 10,000*l.*; such annual value to be calculated and ascertained at the period of taking, purchasing or acquiring the same; and that they and their successors shall be able and capable in law to grant, demise, alien, or otherwise dispose of all or any of the property, real or personal, belonging to the said University, and also to do all other matters incidental or appertaining to a body corporate. And we do hereby further will and ordain that the said body politic and corporate shall consist of one Chancellor, one Vice Chancellor, and such number of Fellows or Members of the Senate as we shall from time to time appoint under our sign manual; and that our trusty and well-beloved the aforesaid be the first Chancellor the first Vice Chancellor, and the said be the first Fellows and Members of the Senate thereof.

That whenever a vacancy shall occur in the office of Chancellor of the said University, either by death, resignation or otherwise, we will, under our sign manual, nominate a fit and proper person to be the Chancellor instead of the Chancellor occasioning such vacancy.

That the office of Vice Chancellor of the said University shall be an annual office, and the Vice Chancellor hereinbefore named shall, at the expiration of one year from go out of office, and the said Fellows or Members of the Senate shall, at a meeting to be holden by them for that purpose, on some day within a month before the expiration of the said office, of which due notice shall be given, elect one other fit and proper person to be the Vice Chancellor of the said University, and so from time to time annually; or, in case of the death, resignation or other avoidance of any such Vice Chancellor before the expiration of his year of office, shall, at a meeting to be holden by them for that purpose as soon as conveniently may be, of which due notice shall be given, elect some other fit and proper person to be Vice Chancellor for the remainder of the year, in which such death, resignation, or other avoidance shall happen; such person to be chosen from among themselves by the major part of the Fellows present at such meeting, and to be approved of by the Chancellor of the said University for the time being.

That we reserve to ourselves to be the visitor of the said University of London, with authority to do all those things which pertain to visitors as often as to us shall seem meet.

That the Chancellor, Vice Chancellor, and Fellows for the time being shall have the entire management of and superintendence over the affairs, concerns, and property of the said University; and in all cases unprovided for by this our Charter, it shall be lawful for the Chancellor, Vice Chancellor, and Fellows to act in such manner as shall appear to them best calculated to promote the purposes intended by the said University; and the said Chancellor, Vice Chancellor and Fellows shall have full power from time to time to make and also to alter any bye-laws and regulations (so as the same be not repugnant to the laws of our realm, or to the general objects and provisions of this our Charter) touching the examinations for degrees and the granting of the same, and touching the mode and time of convening the meetings of the Chancellor, Vice Chancellor, and Fellows, and in general touching all other matters whatsoever regarding the said University; and all such bye-laws and regulations when reduced into writing, and after the common seal of the said University have been affixed thereto, shall be binding upon all persons members thereof, and all candidates for degrees to be conferred by the same, all such bye-laws and regulations having been first submitted to one of our principal Secretaries of State, and approved of and countersigned by him.

That all questions which shall come before the Chancellor, Vice Chancellor, and Fellows, shall be decided by the majority of the members present, and the chairman at any such meeting shall have a vote, and in case of an equality of votes, a second or casting vote.

That no question shall be decided at any meeting, unless the Chancellor or Vice Chancellor and five Fellows, or, in the absence of the Chancellor and Vice Chancellor, unless six Fellows at the least shall be present at the time of such decision.

That at every meeting of the said Chancellor, Vice Chancellor, and Fellows, the Chancellor, or in his absence the Vice Chancellor shall preside as chairman, or, in the absence of both, a chairman shall be chosen by the members present, or the major part.

That the said Chancellor, Vice Chancellor, and Fellows for the time being, shall have full power from time to time to appoint, and as they shall see occasion, to remove all necessary examiners, officers, and servants of the said University.

That once at least in every year the said Chancellor, Vice Chancellor, and Fellows shall cause to be held an examination of candidates for degrees, and on every such examination the candidates shall be examined either by examiners appointed for the purpose from among the Fellows, by the said Chancellor, Vice Chancellor, and Fellows, or by other examiners so to be appointed; and that on every such examination the candidates shall be examined in as many branches of general knowledge as the said Chancellor, Vice Chancellor, and Fellows shall consider the most fitting subjects of such examination.

And whereas it is expedient to extend the benefits of colleges and establishments already instituted, or which may be hereafter instituted for the promotion of literature and science, whether incorporated or not incorporated, by connecting them for such purposes with the University created by this our Royal

royal charter: We do hereby further will and ordain that all persons shall be admitted as candidates for the respective degrees of Bachelor of Arts, Master of Arts, Bachelor of Laws, or Doctor of Laws, to be conferred by the said University of London, on presenting to the said Chancellor, Vice Chancellor and Fellows a certificate from any of the institutions hereinafter mentioned, to the effect that such candidate has completed the course of instruction which the said Chancellor, Vice Chancellor and Fellows by regulation in that behalf shall determine.

That such certificates as aforesaid may be granted from our college called London University College, or from our college called King's College, or from such other institution, corporate or unincorporated, as now is or hereafter shall be established for the purposes of education, whether in the metropolis or elsewhere within our United Kingdom, and as we, under our sign manual, shall hereafter authorize to issue such certificates.

And for the purpose of granting the degrees of Bachelor of Medicine, and Doctor of Medicine, and for the improvement of medical education in all its branches, as well in medicine as in surgery, midwifery, and pharmacy, we do further hereby will and ordain that the said Chancellor, Vice Chancellor and Fellows shall from time to time report to one of our principal Secretaries of State what appear to them to be the medical institutions and schools, whether corporate or unincorporated, in this our metropolis, or in other parts of our United Kingdom, from which, in the judgment of the said Chancellor, Vice Chancellor and Fellows, it may be fit and expedient to admit candidates for medical degrees, and on approval of such report by our said Secretary of State, shall admit all persons as candidates for the respective degrees of Bachelor of Medicine and Doctor of Medicine to be conferred by the said University, on presenting to the said Chancellor, Vice Chancellor and Fellows a certificate from any such institution or school, to the effect that such candidate has completed the course of instruction which the said Chancellor, Vice Chancellor and Fellows by regulation in that behalf shall determine; and it shall be lawful for the said Chancellor, Vice Chancellor and Fellows, from time to time, with the approval of one of our principal Secretaries of State, to vary, alter and amend any such reports, by striking out any of the said institutions or schools included therein, or by adding others thereunto.

That the said Chancellor, Vice Chancellor and Fellows shall have power to confer the several degrees of Bachelor of Arts, Master of Arts, Bachelor of Laws, Doctor of Laws, Bachelor of Medicine, Doctor of Medicine, and that such reasonable fees shall be charged for the degrees so conferred as the said Chancellor, Vice Chancellor and Fellows, with the approbation of the Commissioners of our Treasury, shall from time to time direct; and such fees shall be carried to one general fee-fund for the payment of the expenses of the said University, under the directions and regulations of the Commissioners of our Treasury, to whom the accounts of income and expenditure of the said University shall once in every year be submitted, which accounts shall be subject to such examination and audit as the said Commissioners may direct.

That at the conclusion of every examination of the candidates, the examiners shall declare the name of every candidate whom they shall have deemed to be entitled to any of the said degrees, and the departments of knowledge in which his proficiency shall have been evinced, and also his proficiency in relation to that of other candidates, and he shall receive from the said Chancellor a certificate, under the seal of the said University of London, and signed by the said Chancellor, in which the particulars so declared shall be stated.

Provided always, that all bye-laws and regulations made from time to time touching the examinations of candidates and granting of degrees shall be submitted for the consideration of one of our principal Secretaries of State to be approved of by him.

And lastly, we do hereby for us, our heirs and successors, grant and declare that these our letters patent, or the enrolment or exemplification thereof, shall be in and by all things valid and effectual in law, according to the true intent and meaning of the same, and shall be construed and adjudged in the most favourable and beneficial sense for the best advantage of the said University, as well as in all our courts as elsewhere, notwithstanding any non-recital, misrecital, uncertainty or imperfection in these our letters patent. In witness, &c.

COPY OF THE DRAFT CHARTER FOR LONDON UNIVERSITY COLLEGE.

WILLIAM THE FOURTH, by the Grace of God of the United Kingdom of Great Britain and Ireland King, Defender of the Faith, To all to whom these presents shall come, Greeting: WHEREAS our right trusty and right entirely beloved cousin, Edward Adolphus Duke of Somerset, and our trusty and well-beloved John Smith, Esquire, and Stephen Lushington, Doctor of Civil Law, have presented their petition to us, setting forth that they, together with divers others of our loving subjects, had founded in the neighbourhood of London an Institution for the general advancement of Literature and Science, by affording to young men adequate opportunities for obtaining literary and scientific education at a moderate expense, and that they had subscribed and collected considerable sums of money for the purpose of carrying on the said undertaking, and with the same view had purchased a piece of land in the parish of Saint Pancras, in our county of Middlesex, and had caused to be erected thereon a building, comprising halls, schools, and lecture-rooms, together with museums, libraries, and other buildings, and offices proper and suitable for conducting the said Institution, and thereby facilitating the instruction of youth; and further setting forth that for better prosecuting the same design an indenture or deed of settlement, bearing date the 11th day of February 1826, had been duly made and executed by and between the several persons whose names are therein expressed to be parties thereto, and which indenture or deed hath been duly enrolled in our High Court of Chancery, and contains the several regulations and provisions under and subject to which the said Institution was proposed to be conducted; and it was further alleged by the petitioners that they had been advised that the success of their undertaking and the advancement of sound learning and science would be more effectually attained and promoted were the same to receive our royal sanction and confirmation, and they therefore most humbly besought us to grant to them, and to the other persons who had already contributed, or should thereafter contribute any sum or sums of money towards carrying on the said Institution, our royal charter of incorporation for the purposes aforesaid: Now, Know ye that we, highly approving and being desirous of encouraging so laudable a design, have for the better carrying on the same, of our especial grace, certain knowledge, and mere motion, willed, granted, constituted and declared, and do by these presents, for us, our heirs and successors, will, grant, constitute and declare, that for the purpose of establishing and maintaining the said Institution, the said Edward Adolphus Duke of Somerset, John Smith and Stephen Lushington, and all other the persons who, according to the terms of the said indenture of the 11th day of February 1826, are or shall be proprietors thereof, shall for the time being, and all the persons who, according to the terms of the said indenture, are or shall be "donors" thereof, shall during their lives, and all persons who shall at any period hereafter become proprietors or donors, according to such bye-laws as shall be hereafter made or established as to such proprietors, shall for the time being, and as to such donors shall for life be, and they are by virtue of these presents constituted one body politic and corporate for the purposes aforesaid, by the name of London University College, by which name they shall have perpetual succession, and a common seal, with full power and authority to alter, vary, break, and renew the same at their discretion, and by the same name to sue and be sued, implead and be impleaded, answer and be answered unto, in every court of us, our heirs and successors. And we do hereby will and order that by the same name they and their successors shall be for ever able and capable in law to take, purchase, receive, possess, hold, and enjoy to them and their successors any goods, chattels, or personal property whatsoever, and also be able and capable in law (notwithstanding the statutes in Mortmain) to take, purchase, hold and enjoy to them and their successors, not only the said piece of land so already purchased as aforesaid, together with such other lands, buildings, hereditaments and possessions as may be from time to time exclusively used and occupied for the immediate purposes of the said college, but also any other messuages, lands, tenements or hereditaments whatsoever, the yearly value of which, including the site of the said college, shall not exceed in the whole the sum of 10,000 *l.*, computing the same respectively at the rack rent which may have been had or gotten for the same respectively at the time

time of the purchase or acquisition thereof, and to act in all the concerns of the body politic and corporate, for the purposes aforesaid, as fully and effectually to all intents, effects, constructions and purposes whatsoever, as any other our liege subjects, or any other body politic or corporate in our United Kingdom of Great Britain and Ireland, not being under any disability, might do in their respective concerns. And we do hereby grant our special licence and authority unto all and every person and persons, bodies politic and corporate, otherwise competent, to grant, sell, alien, and convey in mortmain unto and to the use of the said college any messuages, lands, tenements or hereditaments, not exceeding such annual value as aforesaid. And further, that the council for the time being of the said college shall be empowered, and they are hereby empowered in like manner, but only within the extent aforesaid, to accept gifts and endowments for promoting particular objects of education, or otherwise in aid of the general purposes of the said college, on such terms and conditions as may be agreed on for the purpose, between the council and the person or persons bestowing such gift or endowment; provided always, that the said terms and conditions be not inconsistent with any of the provisions of this our charter, or with the laws or statutes of this our realm. And our will and pleasure is, and we further grant and declare, that there shall be general meetings of the members of the said body politic and corporate to be held from time to time as hereinafter mentioned, and that there shall always be a council to direct and manage the concerns of the said body politic and corporate, and that the general meetings and the council shall have the entire direction and management of the same in the manner and subject to the regulations hereinafter mentioned. But our will and pleasure is, that at all general meetings the majority of the members present, and having a vote thereat respectively, shall decide upon the matters propounded at such meetings, the person presiding therein having, in case of equality of numbers, a second or casting vote. And we do hereby also will, grant and declare, that the council shall consist of a President, Vice-president, Treasurer, and not more than 24 and not less than 16 other members, to be elected out of the members of the said body politic and corporate; and that the first members of the council, exclusive of the President and Treasurer, shall be elected within six calendar months after the date of this our charter; and that our right trusty and well-beloved Councillor Henry Lord Brougham and Vaux shall be the first President, and our trusty and well-beloved William Tooke, of Russell-square, in our county of Middlesex, esquire, the first treasurer of the said body politic and corporate; and the said Edward Adolphus Duke of Somerset, John Smith and Stephen Lushington, shall be members of the first council of the said body politic and corporate. And we do hereby further will, grant and declare, that the members of the said body politic and corporate hereby established shall hold one general meeting at the least in each year, for the purposes hereinafter mentioned; namely, That the said body politic shall at a general meeting choose the President, Vice-president, Treasurer, and other the members of the council, and shall have full power, at any general meeting, to make and establish such bye-laws as they shall deem to be useful and necessary for the regulation of the said body politic and corporate, for the admission of members, for the management of the estates, goods and business of the said body politic and corporate, and for fixing and determining the manner of electing the President, Vice-president, Treasurer, and other the members of the council, and the period of their continuance in office, as also of electing and appointing professors, tutors, and such officers, attendants and servants as shall be deemed necessary or useful for the said body politic and corporate; and shall have full power from time to time at any such meeting to alter, vary or revoke such bye-laws, and to make such new and other bye-laws as they shall think most useful and expedient, so that the same be not repugnant to these presents, or to the laws and statutes of this our realm; and shall or may also enter any resolution, or make any regulation, respecting any of the affairs and concerns of the said body politic and corporate, that shall be thought necessary and proper. And we further will and declare, that the regulations, clauses and provisions contained in the said indenture or deed of settlement of the 11th February 1826, and all other the existing regulations of the said Institution, made in pursuance of the said indenture or deed of settlement, are and shall be (save in so far as they may be inconsistent with the provisions of this our charter, or the laws and

statutes of our realm,) and the same are hereby declared to be existing bye-laws of the said body politic and corporate, but subject to be altered, varied or revoked in like manner as any other bye-laws of the said body politic and corporate, to be made by the general meetings of the members of the said body politic and corporate, may, according to the provisions of this our charter, be altered, varied or revoked. And we further will, grant and declare, that the council shall have the sole and entire management and superintendence of the said college, as well relating to the income and funds thereof, as to the teaching of the various branches of literature and science therein, and the appointment of professors, tutors, and other masters and instructors, and all other the affairs and concerns thereof; and shall or may, but not inconsistently with or contrary to the provisions of this our charter, or any existing bye-law, or the laws and statutes of this our realm, do all such acts and deeds as shall appear to them necessary or essential to be done for the purpose of carrying into effect the objects and views of the said body politic and corporate. And we further will, grant and declare, that the whole property of the said body politic and corporate shall be vested, and we do hereby vest the same solely and absolutely in the members thereof, and that they shall have full power and authority to sell, alienate, charge, or otherwise dispose of the same, as they shall think proper; but that no sale, mortgage, incumbrance, or other disposition of any messuages, lands, tenements or hereditaments belonging to the said body politic and corporate, shall be made, except with the approbation and concurrence of a general meeting. And we declare it to be our royal will and pleasure, that no resolution or bye-law shall on any account or pretence whatsoever be made by the said body politic and corporate, in opposition to the general scope, true intent and meaning of this our charter, or the laws and statutes of our realm; and that if any such rule or bye-law shall be made, the same shall be absolutely null and void to all intents, effects, constructions and purposes whatsoever.

In witness, &c. Witness, &c.

4.—An Account of the Applications sanctioned by the Treasury, stating the Name of the Place, the number of Scholars, and the respective Amounts applied for and contributed - p. 19

I.—SCHOOLS (ENGLAND.)

RETURN to an Address of the Honourable The House of Commons, dated 29 February 1836;—*for*

COPIES of TREASURY MINUTES, showing the Application of the Sum of £.20,000 granted in 1835 towards the Erection of Schools in *England*; stating the Name and Population of the Place in which the School is situated, and the respective Amounts applied for and contributed; together with a Statement of the Applications now before the Treasury *which have not been complied with*, the Amount granted by Parliament being exhausted.

Copy of TREASURY MINUTE, dated 11th September 1835.

My Lords read the Report of the Resolution of the House of Commons of 16th July last, by which the sum of 20,000*l.* was voted in aid of the Building of Schools in England.

My Lords have before them the numerous applications which have been made for assistance, and they consider it would be equitable to give priority to the claims of those parties whose applications were laid upon the Table of the House of Commons on the 25th May 1835, and with whose wishes My Lords have not been able to comply until the vote for 1835 had passed. My Lords therefore propose, in those instances where the sum required by the parties does not exceed 1*l.* for every two scholars, to grant the several amounts set against their respective names (*vide* List A.) on the principle which their Lordships adopted by their Minute of 11th July 1834, in the distribution of the grant for that year; and their Lordships are prepared to grant to those schools where the assistance required exceeds the sum of 1*l.* for every two scholars, the amount set against their respective names, in part of the sum applied for (*vide* List B.) upon the understanding that the conditions of their Lordships' Minute of the 30th August 1833, be duly complied with, and the several Schools completed according to their respective estimates, by further subscriptions which their Lordships trust may be raised by additional exertions of the parties.

Transmit copies of this Minute to the Secretaries of the National and the British and Foreign School Societies, together with copies of the Lists showing the amount appropriated to the different schools.

Write to the Trustees of the schools (List B.), to whom a sum in part of the amount required is to be offered, and request they will state to My Lords, with as little delay as possible, whether they are prepared to accept the grant upon the terms proposed, in order that My Lords, in case of their declining the proposal, may make similar offers to other parties.

Write to the Trustees of the schools in List (A.) that My Lords have agreed to grant to them the sums set against their respective names, upon the fulfilment of the conditions specified in their Lordship's Minute of 30 August 1833.

LIST (A.)

Referred to in the foregoing Minute, being the Schools which are allowed the full amount asked for, not exceeding £.1. for every Two Scholars.

National School Society.

The Schools mentioned in List (B.) appear in the following Minutes.

COPY

Copy of TREASURY MINUTE, dated 12th November 1835.

My Lords read their Minute of the 11th September last, relative to the distribution of the sum voted by Parliament, 1835, for Building Schools in England.

My Lords have also before them the Replies from the several Schools, to which a proposal was made of a Grant, in part of the sum required by them, at the rate of 1 *l.* for every two Scholars, from which it appears that the following Schools have accepted their Lordships' offer without any reservation; and My Lords are therefore pleased to direct the Paymaster of Civil Services to pay to the several Schools undermentioned the sums set against their respective names, on production of the usual Certificates from the Secretary and Treasurer of the Society.

National School Society.

Acquaint the parties, that My Lords have given directions for the payment of the sums offered to them on production of certificates from the Society, on the principles of which the School is to be conducted, as to the outlay of the local Subscriptions, and desire that if they should require any further information on the subject, they will apply to the School Society.

Copy of TREASURY MINUTE, dated 22d December 1835.

Read Letter from Mr. Wigram, Secretary to the National School Society, dated 10th instant, enclosing Reports relating to Sunday Schools, which are recommended to favourable consideration.

Read also Letter from Mr. Wigram, dated 17th instant, on the subject of Grants for the Schools at Modbury, West Bergholt, and St. Peter's in St. Alban's.

Read also Letter from the Secretary to the British and Foreign School Society, dated 11th instant, requesting that an Order may be given for the issue of the sums offered for the Schools at Shelf and Templeton.

My Lords read their Minute of the 11th September last, relative to the distribution of the Grant of Parliament, 1835, for Building Schools in England.

My Lords read also the Replies received from several Schools, accepting their Lordships' offer of 1 *l.* for every two Scholars proposed to be educated.

Direct the Paymaster of Civil Services to pay to the several Schools undermentioned the sums set against their respective names, on production of the usual Certificates from the Secretary and Treasurer of the School Societies.

National School Society.

Acquaint the Secretaries of the National and British and Foreign Societies with the directions given in regard to the Schools on the principles of their respective Societies, and request they will make the necessary communication to the parties.

Copy of TREASURY MINUTE, dated 22d February 1836.

My Lords read again the Letter from the Secretary to the National School Society, dated 10th December last, with Reports relating to Sunday Schools.

Write to the National School Society with reference to the application of Camden Town and Stratford West Ham for an increase of the Grant, in the proportion of 1 *l.* to every two scholars, in consequence of their proposing to increase the number of scholars to be accommodated. Inform them, that My Lords will not object to such increase, and are therefore pleased to set aside 250 *l.* to Stratford West Ham and 100 *l.* to Camden Town, in lieu of the Grants previously awarded to these parties.

Request that the National Society will make the necessary communication accordingly.

Give the necessary directions to the Paymaster of Civil Services.

My Lords read again the Letter of the Secretary to the National School Society, dated 17th December last, with reference to increasing the Grant to Modbury School, &c.

Write to the National School Society, that My Lords are pleased to accede to their recommendation for the increase of the Grant to the School at Modbury from 50 *l.* to 100 *l.* in consequence of the increase of the number of children proposed to be educated.

Request that they will communicate My Lords' decision to the parties.

Let the necessary directions be given to the parties.

The Particulars of the Grants to the Three Schools in the foregoing Minute are—

NAME OF PLACE.	Population.	Number of Scholars.	Estimated Expense of Building.	Amount Asked for.	Amount Granted.
			£.	£.	£.
Camden Town - - -	8,000	200	400	200	100
Stratford West Ham - -	6,686	260	400	130	130
Modbury - - - -	2,116	200	235	100	100
	16,802	660	1,035	430	330

Copy of TREASURY MINUTE, dated 22d February 1836.

Read Letter from the Secretary to the National School Society, dated 8th instant, transmitting Memorial from Bexley, Richmond and Wadsley, praying that certain Grants apportioned by their Lordships may be applied to the building of School-rooms in situations somewhat different from those which were at first proposed.

Write to the National School Society, that My Lords will have no objection to the alterations proposed in the cases of Richmond and Bexley.

Request the Society will make the necessary communication to the parties.

	Population.	Scholars.	Expense.	Amount asked.	Amount granted.
Richmond - -	4,000	100	170	70	50

The Grant for the School at Bexley appears on page 3; and Wadsley is not yet complied with, *see* page 17.

Copy of TREASURY MINUTE, dated 9th April 1836.

Read Letter from the Secretary to the National School Society, dated 2d instant, transmitting a Petition from the Trustees of the National School of Wootton-under-Edge, and requesting that a grant of 110 *l.* for 220 scholars, instead of the larger sum of 175 *l.* for 350 scholars, may be made to that school, the applicants being unable to accomplish their original intentions.

My Lords are pleased to accede to this recommendation.

Write to the National School Society accordingly.

Let the necessary direction be given to the Paymaster of Civil Services.

Copy of TREASURY MINUTE, dated 17th March 1836.

My Lords resume the consideration of the several applications before them for portions of the Parliamentary Grant for building Schools in England.

My Lords have before them their Minutes relating to the distribution of the grant of last Session.

In conformity with the course which My Lords have pursued with respect to the above Grant, they propose to distribute this remaining sum to those Schools whose applications were laid before the Board subsequently to those included in the Minute of 11th September last, and previously to the 1st of July 1835.

My Lords are therefore prepared to make a Grant at once to those Schools mentioned in List (A.), where the number of scholars proposed to be educated is in the proportion of two to every 1 *l.* applied for; and to those Schools where the assistance required exceeds that proportion, My Lords are prepared to grant the amount set against their respective names (*vide* List B.), in part of the sum applied for, upon the conditions of the Minute of 30th August 1833 being duly complied with, and provided the parties are willing to complete the School as proposed by them from other means.

By this arrangement a balance will remain to be provided for from any sum which may be voted by Parliament during the present Session for building Schools.

Transmit copy of List (A.) to the Paymaster of Civil Services, and authorize him to pay the several Schools contained in it, the sums set against their respective names, on the production of the usual certificate from the Secretary and Treasurer of the School Society.

Transmit copies of this Minute to the Secretaries of the National and British and Foreign School Societies, together with copies of the Lists referred to, containing the cases of the Schools reported on by the respective Societies, and request they will make the necessary communication to the several parties.

Inform them at the same time, that My Lords will take into consideration the applications which still remain undisposed of as soon as a further sum shall be placed at the disposal of their Lordships.

LIST (A.)

Referred to in the preceding Minute of 17th March 1836.

National School Society.

The Schools mentioned in List (B.), referred to in the preceding Minute of 17 March 1836, appear in the following Minutes.

Copy of TREASURY MINUTE, dated 2d May 1836.

My Lords have before them their Minute of 17th March last relative to the distribution of the Parliamentary Grant of 1835 for building Schools in England.

My Lords read the Replies of the National and British and Foreign School Societies, dated 25th and 19th ult., from which it appears that the following Schools have accepted the offer of this Board.

Write to the Paymaster of Civil Services, and desire he will pay to the undermentioned Schools the sums set against their respective names, on production of the usual certificate from the Secretary and Treasurer of the School Society.

Acquaint the Secretaries of the National and British and Foreign School Societies with the directions given in regard to the Schools on the principles of their respective Societies, and request they will make the necessary communication to the parties.

Extract of TREASURY MINUTE, dated 5th May 1836.

Read Letter from the Secretary to the National School Society, dated 16th ultimo, transmitting Memorials which the Board recommend for an increase in the Grants offered to the parties; viz. 65*l.* to Skelton, and 40*l.* to Swindon.

In the case of Swindon, My Lords will make a further Grant of 40*l.* in addition to the sum of 45*l.* already appropriated, by which accommodation for the education of 226 children will be secured.

To the School in the Chapelry of St. Mark's, Skelton, in the parish of Stoke-upon-Trent, My Lords will not object to a further Grant of 65*l.*, in consequence of an increase in the number of scholars proposed to be educated.

Write to Mr. Wigram accordingly.

Give the necessary directions to the Paymaster of Civil Services.

Copy of TREASURY MINUTE, dated 7th July 1836.

Read Letter from the Secretary to the National School Society, stating that the following Schools are prepared to accept the Grant of 1 *l.* for every two Scholars, as offered by the Minute of this Board, of 17th March last; —viz.

Write to the Paymaster of Civil Services, and desire he will pay to the above Schools the sums set against their respective names, upon the production of the usual Certificate from the Secretary and Treasurer of the School Society.

Acquaint the Secretary of the National School Society with the directions given, and request he will make the necessary communication to the respective parties.

Copy of TREASURY MINUTE, dated 30th March 1836.

Read Letter from the Secretary to the British and Foreign School Society of 25th instant, calling their Lordships' attention to the peculiar circumstances of the parish of Bethnal Green, with regard to the education of the children of the poor; and earnestly soliciting that this may be considered a special case, and further aid granted.

Upon a full consideration of the circumstances of this case, My Lords consider that it may fairly be considered as a special case, and that they shall be justified in affording additional assistance: they will therefore be prepared, in case any Grant shall be made by Parliament for the building of Schools for the ensuing year, to appropriate to the Schools at Bethnal Green such a sum as, together with that already promised, may make up one half of the expenditure, as estimated in the original applications.

Write to Mr. Dunn accordingly.

DEAN FOREST.

RETURN to an ADDRESS of the Honourable The House of Commons, dated 14 June 1836;—*for*,

A COPY of all MEMORIALS, PETITIONS, or PUBLIC DOCUMENTS, addressed to and received by the Government, whether at the Treasury, the Home Office, or the Board of Woods and Forests, from Persons being, or representing themselves to be, Inhabitants of the Forest of Dean, and the Hundred of St. Briavel's, either in favour of, or opposed to, the five Reports of the Dean Forest Commissioners, or the Dean Forest Bill, lately passed into a Law.

MEMORIAL from sundry HOLDERS of LAND in *Dean Forest*, for FREEHOLD RIGHTS in those Lands so long held and enjoyed by them.

To the Right Honourable the Lords Commissioners of His Majesty's Treasury.

This Memorial humbly showeth,

THAT your Memorialists are the holders of Lands within the Forest of Dean, coloured respectively, in the Map referred to in and accompanying the Second Report of the Dean Forest Commissioners, red, blue and yellow.

That, without disputing the title of the Crown to these lands, and its consequent right to dispose of them or regulate them as it may think proper, they beg leave most respectfully to offer to your Lordships the following remarks upon the recommendations of the Commissioners with respect to these lands.

In the first place it is to be observed, that the red and blue lands are held for the most part by the same proprietors; the great majority of those who are holders of red land being at the same time holders of blue land. By the distinction of estates recommended by the Commissioners, the Memorialists would be exposed to the very great inconvenience of holding their small properties by two different tenures, having perhaps a freehold title to one acre, and a lease only to a small remnant. Both descriptions of land, moreover, are so mixed up together that it is almost impossible for your Memorialists to distinguish which is red and which is blue, and consequently it would be equally difficult for any one of them in future to make out a title to their estates so as to satisfy a purchaser; a circumstance which would of itself reduce the value of the red land to that of the blue, and render the grant of freehold to your Memorialists in the former practically of no benefit. They would therefore submit that it would be more consistent with the generosity of the Crown to raise the blue land to the value of the red, rather than to lower the red land to the value of the blue; the more especially as the red lands form three-fourths of the whole quantity, and the blue lands only one-fourth; the red lands comprising 1,510 acres, the blue only 573 acres.

Large, moreover, as may at first sight, appear the quantity of land (amounting to 1,510 acres) which, as red land, the Commissioners recommend to be alienated for ever from the Crown, and to be granted to your Memorialists as freehold, they hope they shall not be considered as unthankful in observing, that by this grant the Crown would be yielding up what is of little, if any, value, to the nation at large, while it is of the utmost importance to your Memorialists. The total amount of the encroached land is 2,100 acres, and if they lay contiguous so as to form one compact spot, adapted either for agricultural purposes or the growth of timber, some objections might be fairly

raised to the permanent severance of so large a portion of valuable property from the Crown. But this quantity is divided into nearly 1,000 small patches, separated from each other, and scattered at various intervals over the 23,000 acres of which the forest consists. Were they to be all resumed, it is difficult to imagine what use could be made of them, except to sell them again to other or the same proprietors. But the Crown, deeming it impolitic to dispossess the present owners, is, in granting them a legal title, surrendering only a nominal right of which it has long practically abandoned the claim.

The Crown, also, having thus determined to abandon for ever the larger quantity of this land, and to convert 1,510 acres of it into freehold, there would appear still less motive for it to retain a right or property over the smaller quantity of 573 acres, which is the blue land.

In granting to the Memorialists an estate in the blue lands of leasehold for three lives only, it is conjectured that the Crown may have two objects in view: the receipt of rent, and the resuming of the lands at the expiration of the lives for which they are to be held.

It is, however, hardly to be supposed that the Crown could contemplate any advantage from the value of the rents to be imposed. Taking these rents at the highest rate proposed, viz. 2*s.* per acre, they would, on 573 acres, produce not 60 *l.* per annum, payable by 500 different persons; an emolument which must be counterbalanced by the expense and trouble of collection, if such expense and trouble are to be borne by the Crown, and which would be still more obnoxious in its exaction from the renters if these burdens were additionally to be imposed upon them.

Still less can your Memorialists discover any advantage to the Crown likely to result from the other plan, of its taking possession of the blue lands at the end of the lease. Independent of the confusion and distress which would be occasioned by dispossessing those few families who held only blue land, and by claiming from the owners of red land the small portions of blue which would have been so long joined and mixed up with the red, the land so reclaimed would be utterly worthless to the Government for all purposes of planting or cultivation, and would probably fall again into the unproductive waste.

While, therefore, no advantage appears likely to result to the Crown by the proposed limitation of leases, and so much inconvenience would be inflicted on numerous individuals, your Memorialists would further submit to your Lordships the consideration, that all, even the blue lands, have been enclosed more than 20 years; that very few of your Memorialists were the first encroachers; that many of them have bought their holdings, by public auction or private contract, for valuable considerations; that they have paid on the conveyances and the sale all the proper legal duties; that many of them have inherited these lands from their ancestors; that all of them have bestowed upon their lands great labour and expense; and that, if the Crown has not thought it expedient to interrupt your Memorialists in their possession during so long a period, it would scarcely be consistent with its usual liberality now to interfere with your Memorialists in the enjoyment of property so sanctioned, and to reduce into leaseholds what your Memorialists have hitherto held and always considered to be freehold, subjected, moreover, to the payment of a vexatious rent, and to other harrassing restrictions.

Your Memorialists also venture to submit, that the proposed restrictions with regard to building, whether on the red or the blue land, are not expedient, as they must diminish the value of all descriptions of forest land. Independent persons will not willingly purchase lands which they cannot improve by the erection of dwelling-houses without having recourse to Government for a licence. In proportion as the property of your Memorialists will be lessened in value, so will their endeavours to advance in society and to improve their station be counteracted.

As the yellow lands consist only of 24 acres, your Memorialists also would urge the consideration, whether so insignificant a portion is deserving of a separate arrangement or set of regulations from the red and blue lands, and whether this portion may not, at all events, be more commodiously incorperated with the blue lands.

Your Memorialists, therefore, most humbly pray your Lordships, that in any Bill which your Lordships may cause to be introduced into Parliament for the purpose of regulating the encroached lands in the Forest of Dean, your

Lordship's

Lordships would reject that part of the plan proposed by the Dean Forest Commissioners, which would make a difference for the future in the tenure of such proposed lands, and impose restrictions with regard to building; but that your Lordships would be pleased to recommend to the Goverment and to Parliament, the granting to your Memorialists of freehold estates in those lands which they have so long uninterruptedly held and enjoyed.

And your Memorialists shall every pray.

MEMORIAL of FREE-MINERS and QUARRYMEN, praying that their Rights and Privileges be not Abolished, as recommended by the Dean Forest Commissioners.

To the Right Honourable the Lords Commissioners of His Majesty's Treasury.

This Memorial humbly Showeth,

THAT your Memorialists are Free-miners and Quarrymen of the Forest of Dean, in the hundred of St. Briavel's, in the county of Gloucester, claiming for themselves, and all persons who now are, or hereafter may lawfully become, free-miners, the exclusive privilege of working and holding mines and quarries under the Crown in the said forest, according to their ancient laws and immemorial custom, and to the regulations from time to time prescribed at their mine law courts.

That a Commission having been appointed by Parliament to inquire into, and report to your Lordships upon the rights and privileges of the free miners, the Commissioners have (as appears from Papers printed by order of the House of Commons) concluded their inquiry, and reported accordingly to your Lordships, in two reports called the Fourth and Fifth Reports of the Dean Forest Commissioners, and dated the 25th August 1835.

That your Memorialists had for a long series of years suffered great grievances from the intrusion into the mines of the Forest of Dean, of persons not being free-miners, and had made repeated applications to the officers and ministers of the Crown for protection and redress, it having been with the knowledge and sufferance of the Government that such a violation of the rights of the free-miners had been effected.

That, among other things, your Memorialists had repeatedly supplicated the Ministers of the Crown to direct the holding of the ancient mine law courts, which had fallen into disuse by the neglect of the proper officers in convening the same.

That your Memorialists having now perused the Reports which the Dean Forest Commissioners have laid before your Lordships, perceive with feelings of the greatest disappointment, that the Commissioners have not proposed any measure of relief to your Memorialists, but, on the contrary, recommend that His Majesty's Government should bring into Parliament a Bill for the purpose of entirely destroying the rights and privileges of the free-miners, and of depriving them and their children of the customs and franchises which have been exercised by the free-miners from time immemorial.

That in acting upon such recommendations, it will be necessary to repeal the statute of 20 Charles 2d, c. 3, by which were saved "to the miners and persons using the trade of digging for iron ore, coal and oker, in the said forest, their lawful rights and privileges in all lands and grounds lying within the perambulation and regard of the said forest."

That as the rights and privileges thus solemnly saved and confirmed to the free-miners by the Act of the King, Lords and Commons, have, moreover, since been recognised by subsequent Acts of Parliament, particularly those relating to the Forest of Dean Railroads, your Memorialists most humbly submit to your Lordships, that it would be a violation of the rights of property to abolish their privileges without their concurrence.

That while your Memorialists beg leave most respectfully to state to your Lordships that they cannot consent voluntarily to the arrangements proposed by

by the Commissioners, they would most humbly represent to your Lordships, that the restoration of their mine law courts, under proper modifications, would be an effectual means of checking the further growth of those evils which they have so long been suffering.

That these evils arise principally from the illegal intrusion into the mines of foreigners, and are amply detailed in the Commissioners' Report, which, in reference to their practices, contains the following words: "We consider these practices to be illegal, and the foreigners have exercised the free-miners' rights and privileges in a manner contrary to, and unauthorized by, ancient custom;" and in another place, "a fraud is practised by the working of the mines by foreigners under the cover of free-miners' rights."

That the mine law courts were efficient in the prevention of these practices also appears from the testimony of the Commissioners, who say "that during the existence of the mine law court, injunctions under the name of 'Forbids' were granted, and damages recovered for the breaches of the laws and customs."

"That such laws regulated the title to, and enjoyment of, particular gales, the working of coal by headings of a proper breadth and level, prohibited the interference or employment of foreigners either in working or carrying coal, and exercised jurisdiction as well in recovering the rents or gales due to the Crown, as in settling debts and disputes between the free-miners themselves."

* * * * * * * *

"So long as the mine law courts existed, foreigners were not permitted to possess mines, and all persons possessing them were obliged to work according to the custom of the forest, and were not permitted, by narrow headings, or unfair working, to disturb or interfere with the right of neighbouring miners."

* * * * * * * *

"That free-miners rarely, if ever, before, but frequently since, the discontinuance of the mine law court, have leased, mortgaged and sold their works under their gales to foreigners."

That your Memorialists submit that the clear testimony borne by the Commissioners themselves, as to the "illegality" of the practices of the foreigners complained of by the free-miners, and as to the effectual prevention of them by the mine law courts while in operation, is sufficient to justify your Memorialists in claiming the restoration of their courts, not only as their legal and indubitable right, but also as the most expedient tribunal for again exercising jurisdiction over the complicated interests now at variance in the Forest.

That your Memorialists cannot but feel surprised that the Commissioners, having so clearly explained the evils complained of, and detailed the working of the court by which they were formerly checked and corrected, should, nevertheless, instead of recommending the restoration of the mine law court as a matter alike of justice and expediency, content themselves with vaguely observing, that "the mine law courts probably could not now be renewed or made available to oust the common law jurisdiction, at least where foreigners are concerned."

That totally differing, as your Memorialists do, with the Commissioners on this subject, and deeming their conclusion inconsistent with their own statements, your Memorialists cannot but consider the measures proposed by the Commissioners to be substituted, as unjust to your Memorialists, and subversive of their rights.

That the compensation recommended, as far as it applies to those who hold large and valuable gales under the present system, proposes merely the confirmation to them of their gales for the future, being, in fact, nothing more than proposing to secure rights already legally and practically acquired and enjoyed.

That this compensation, moreover, does not extend to the whole body of the free-miners, who consider that the offer of a grant of land, or of a sum of money, is not sufficient to make amends for the sacrifice of their own and their children's rights for ever.

That for these reasons, thus briefly stated, and which they humbly hope to be allowed to state more fully if required, your Memorialists beg leave most respectfully to express their dissent from the proposals of the Commissioners, and to declare that they cannot feel that they can be induced voluntarily to consent to them.

That, as the adjustment of the present claims of the foreigners appears to be an obstacle to reverting to the old system, and to the restoration of the mine law courts, your Memorialists trust that they may be allowed to say, that they perfectly acquiesce in the justice of the remark of the Commissioners, that the foreigners should not be deprived of their property which they have invested in the mines without remuneration; but they do not consider it to be consistent with justice, that the foreigners, whose title is at all events acknowledged to be illegal, should be protected in their usurpations by destroying the rights and privileges of the free-miners.

That your Memorialists cannot but persevere in their solicitations for the restoration of their mine law courts, when they find that the Commissioners propose, that for the future regulation of the forest mines, a board of commissioners should be appointed, "with power to define the limits, and regulate the working," a power which your Memorialists have shown is already legally vested in the mine law courts, and was formerly exercised by them; and which could as easily be wielded now by the mine law courts, as by any commission that could be appointed.

That any powers necessary for the regulation of the mines, could much more conveniently be grafted by Act of Parliament on the ancient constitution of the mine law courts, than granted to a commission hereafter for the first time only to be appointed.

That it would be easy to remodel the mine law courts, so as to suit the circumstances of the times, and to confirm and extend their jurisdiction with a due regard to the existing rights and property of free-miners and foreigners.

That your Memorialists are ready to consider any arrangement founded on this basis; but that they cannot give their consent to any measures which, like those proposed by the Commissioners, involve the destruction of the rights and privileges of the free-miners in the mines and quarries.

That your Memorialists have been exposed to great hardships and inconveniences by the great length of time during which their claims have remained unadjusted.

That these inconveniences are now increased by the vacancy at present existing in the office of the constable of the Castle of St. Briavel's, and warden of the Forest of Dean, as your Memorialists are thereby deprived of the chief judge of their mine law court.

That your Memorialists therefore most humbly pray your Lordships not to sanction the introduction into Parliament of any Bill for the abolition of the free-miners' rights and privileges, or for any alteration in the mode of holding mines and quarries by free-miners in the Forest of Dean, as proposed by the Commissioners; and to recommend to His Majesty to appoint a constable of the Castle of St. Briavel's, and Lord Warden of the Forest of Dean, and to direct the proper officers to convene the ancient mine law courts, according to the legal rights and privileges of your Memorialists.

James Smith Clarke,
Coleford, 4th January 1836. Secretary to the Meeting.

Mr. *Machen's* REPORT on MEMORIALS of FREE-MINERS and QUARRYMEN of *Dean Forest*, relative to Mine Laws; and of the Holders of Land encroached from *Dean Forest* for Freehold Rights.

My Lord and Gentlemen, Whitemead Park, 23 February 1836.

I RETURN the two memorials from the occupiers of encroachments, and from the free-miners and quarrymen, to the Lords of the Treasury.

Upon the first, that of the holders of encroachments, I would remark, that their observations with respect to the intermixture of the red lands with the blue, and the consequent inconvenience that would ensue from their occupation under different tenures, is perfectly true. This was not unobserved by the Dean Forest Commissioners; but there was so strong an impression upon the minds of some of the Commissioners from the very first that nothing less than freeholds should be given to those who had occupied for 60 years, or indeed before the survey of 1787, which was almost synonymous, that no discussion took place with reference to those lands, and the only question was as to the terms to be offered to the blue. Now I do not think the terms proposed for the blue were in themselves hard; and it seems too much to expect that, because of this inconvenient intermixture, the whole should be given up; for although the value of the rents to the Crown, or the probability of resumption, are but small, it may be a question whether the giving a title as a matter of course is not bad in principle, and whether the check to encroachment is not so far weakened. Whether any intermediate course could be taken, by which a perpetuity could be given to them in the whole by giving them three lives at first, and then a power to keep the lives full by payment of perhaps a year's rent on the value, and without any annual payment, I do not feel competent to give an opinion upon, not knowing whether such a holding may have any precedent, or be in conformity with the law. As I consider resumption to be out of the question, I need not remark upon their observation, that from the scattered situation of the patches they would be of no use; this is not so, because they might be planted with advantage. The restriction from building I find is very strongly objected to; but I really think it absolutely essential from the peculiar circumstances of the forest; and I cannot agree that it will retard their advance in society, but that it is equally probable that free permission for building would lead to still more minute subdivisions of property, and have just a contrary effect. The smallness of the quantity of yellow land might be a reason with the Crown for not making a separate arrangement; but it is hardly an argument for the memorialists to urge, and the principle is the same as in the case of the blue. In dealing with these persons also, the effect with reference to the common rights on the uninclosed parts of the forest should not be lost sight of. At present the exercise of these common rights is principally in the possession of the holders of encroachments, although the legal right is admitted to be in the owners of land within the hundred of St. Briavel's and a few other adjoining parishes. I do not know the legal effect of making them freeholds in this respect, or whether it would have any; but it would be inconvenient to create or strengthen a claim that must be dealt with hereafter, when all rights in this forest must be defined or commuted, which, sooner or later, I think, will be found absolutely necessary.

With respect to the memorial of the free-miners and quarrymen, I have very few remarks to offer. The whole of their reasoning proceeds upon the assumption that the introduction of foreigners into the forest is not only illegal, but injurious to their interests; whereas my opinion is, that it is highly beneficial, and that employment to a great extent is afforded, that could not have been by the miners themselves, and that the chief part of the coal now in the forest could not be worked according to their ancient customs, and is inaccessible by them for want of capital. I believe great numbers of the miners are now aware of this, and want the restoration of their mine law courts, not for the purpose of enforcing their former laws, but of making new laws, by which they would admit foreigners to have works and prescribe the terms; but I cannot think that such a tribunal would avail for this purpose, or to decide questions of the magnitude that the present altered system of working would give rise to.

I am, &c.

(signed) *Edward Machen.*

The Commissioners of Woods, Forests, &c.

REPORT of Messrs. *Buddle* and *Sopwith*, on MEMORIAL of FREE-MINERS and QUARRYMEN of *Dean Forest*, relative to the Mine Laws.

Sir, Newcastle-upon-Tyne, 7th March 1836.

IN compliance with your letter of the 2nd instant, we have perused the memorials of the free-miners and quarrymen of the Forest of Dean, together with a report from Mr. Machen thereon.

From the consideration which we have given to the subject of the mining operations in Dean Forest, after carefully perusing the several documents submitted to us, and from our knowledge of the local circumstances of these mines, we have arrived at the following conclusions:

1st. With reference to the ancient mine law regulations, we are of opinion that they are quite inapplicable to the present mining operations of the forest, inasmuch as they have been framed solely with a view to land-workings of a very limited depth.

2nd. As regards the privilege of holding and working mines claimed by the free-miners in their memorial of the 4th January 1836, addressed to the Lords of His Majesty's Treasury, we are of opinion that the ancient laws and customs have been greatly violated by the irregular practices of the free-miners, especially the selling of gales to parties not being free-miners.

3rd. The violation of rights complained of by the free-miners in their memorial appears to us to have solely originated in their own acts; and the receiving of gales and granting steam-engine licences in the case of strangers by the Crown seems not to have been intended as an infringement of the privileges of the free-miners, but rather as an indulgence for their accommodation. We do not, therefore, see any just ground of complaint on the part of the free-miners against the Crown, as regards the violation of their rights.

4th. We are of opinion that any grievances resulting from the introduction of strangers have been more than counterbalanced by the investment of capital in the forest, mines and railways, and extensive employment afforded to a great number of the free-miners, who, as a body, are without capital commensurate to the working of the deep coal of the forest.

5th. We are led to believe that the mine law court fell into disuse from the disorderly conduct of the miners at the court; and we are decidedly of opinion that the revival of this court would not be attended with any beneficial result, but would tend to perpetuate the imperfections of the present system of mining.

6th. We are of opinion that the privileges of the free-miners extend only to those portions of the veins of coal which do not require the aid of steam-engine drainage, the greater part of which will probably be exhausted in 30 years.

7th. As we consider that the mining customs have reference to this portion of the coal only, and that much difficulty and many cases of individual hardship have resulted from the defects of the present system, we think it essential, as well for the interests of the Crown as for the welfare of the free-miners, that an amended system of regulations should be established, under the authority of an Act of Parliament, as recommended by the Dean Forest Commissioners in their Report.

8th. Previous to framing such an Act, we submit, that it will be requisite that information on several local details should be obtained, as well for the guidance of His Majesty's Commissioners in preparing such Act, as for the adjustment of existing disputes, and the relief of cases of peculiar hardship.

9th. As regards the patches of ground, we concur in opinion with Mr. Machen, and we think it important, whatever course may be ultimately taken, that all the requisite easements and privileges of mining should be reserved by the Crown, and that the conferring an additional value on these patches may possibly form some part of an adjustment of the claims of the free-miners.

We have, &c.

Alex. Milne, Esq. (signed) *John Buddle.*
Thomas Sopwith.

LETTER from Mr. *J. S. Clarke*, relative to the Revival of Mine Law Courts in Dean Forest.

My Lord, Coleford, Forest of Dean, 14th April 1836.

I HAVE the honor to address your lordship in your capacity of constable of the Castle of St. Briavel's, and Lord Warden of the Forest of Dean, at the desire of the persons known by the appellation of Free-Miners of the Forest of Dean.

Your lordship is perhaps already aware, that you are, as constable and warden as aforesaid, also the chief judge of the Mine Law Courts, and empowered to appoint deputies to preside therein. Although these courts have not been in practical operation since 1777, the free-miners have never ceased to claim them as their legal and indubitable right, and they conceive that nothing more is wanting to their revival and legitimate existence than the summoning of such court by your lordship, to meet under the presidency of your deputies, according to former custom and precedent.

Allow me to state to your lordship, that the free-miners in making this application, utterly disclaim all idea of offering any unreasonable opposition to any measures which Government may be prepared to bring forward respecting their claims in the Forest of Dean. They address your lordship on the present occasion solely as constable of the Castle of St. Briavel's and Lord Warden of the Forest, without reference to your high station as a Minister. I can assure your lordship, that a similar application was made to your predecessor, the late Duke of Beaufort, as such officer, so late as 1834, and it would have been renewed to him last year, but for his Grace's decease; and it was always the fixed intention of the free-miners to address the constable and warden appointed in his place, as soon as ever he should have been so appointed.

Allow me further to refer your lordship to a letter addressed to his Grace the Duke of Beaufort, by Mr. Milne, dated 17th July 1834, in reference to this subject, and to explain the reasons why, notwithstanding the receipt of that communication, the free-miners venture most respectfully to state that they do not think it states sufficient grounds to make them desist in their application.

The Secretary of the Woods and Forests, in that letter, refers his Grace to an opinion of the law officers of the Crown, communicated on 8th September 1829, stating "that the traces of the existence of the Mine Laws Court, and of its jurisdiction, are too obscure to justify any attempt to revive it without the authority of Parliament." Having been favoured with a perusal of the case on which this opinion was grounded, I must observe, that it was an *ex parte* case drawn up for the Crown, and omitted all reference to a most important series of documents, which have, perhaps, been *since* brought to light, viz. the original records of the Court from 1668 to 1777, which are now to be seen at the office of the Woods and Forests. It is obvious that a case, so imperfect in its information, never can produce a satisfactory opinion.

The Secretary of the Woods and Forests also discourages his Grace's complying with the request of the free-miners, on the grounds of the then pending inquiry by the Dean Forest Commissioners, into the practice and jurisdiction of the Mine Law Courts. That inquiry having now terminated, and the reports having been published, the free-miners are compelled most respectfully to state how very much they disagree in opinion with the commissioners, and to take, as they have already taken, the earliest, and every opportunity, of recording their dissent from the commissioners' recommendations, or rather hints, respecting the Mine Law Court. They feel more especially compelled to use every means to procure the restitution of their Mine Law Court, and to make known their wishes on the subject, in consequence of the recent proceedings connected with the Dean Forest Bill, which, it seems from the statements of its introducer, was brought forward under an impression that the inhabitants were desirous of the measure. At the risk, therefore, of appearing impatient and intrusive, finding that incorrect representations have been made of their opinions, they are in self-defence compelled to take the step of addressing your lordship, on whom, by the recent Act of Parliament, the duties of chief judge of the Mine Law Court have devolved.

I have, &c. (signed) *J. Smith Clarke*,
Agent for the Free-miners of the Forest of Dean.

The Right Honourable
Lord Duncannon, &c. &c.

LETTER to Mr. *J. Smith Carke*, relative to the revival of Mine Law Courts in Dean Forest.

Sir, Office of Woods, &c. 26th April 1836.

THIS Board having had under their consideration your letter of the 14th instant, addressed on the behalf of the free-miners of the Forest of Dean, to Lord Duncannon, in the capacity of constable of the Castle of St. Briavel's and Lord Warden of the Forest of Dean, and as chief judge of the Mine Law Court, having for its object the summoning and revival of such court by his lordship, to meet under the presidency of his deputies, according to former custom and precedent, I have to acquaint you, that it appears to this board, that the subject has been fully considered, and that it is not deemed expedient to attempt a revival of the Mine Law Court.

I am, &c.

(signed) *A. Milne.*

TRIGONOMETRICAL SURVEY,
GREAT BRITAIN.

RETURN to an Order of the Honourable The House of Commons, dated 26 February 1836;—*for*,

COPY of the MEMORIAL of the BRITISH ASSOCIATION for the Advancement of Science, in relation to the present state of the TRIGONOMETRICAL SURVEY of *Great Britain*, presented to the Chancellor of the Exchequer in May 1835; and Copies of any CORRESPONDENCE thereon between the Chairman of the Council of the British Association and the Chancellor of the Exchequer.

MEMORIAL presented to the Chancellor of the Exchequer by the British Association for the Advancement of Science, upon the state and progress of the Ordnance Survey of Great Britain.

AT the Meeting of the British Association for the Advancement of Science, held at Edinburgh in September 1834, attention was directed to the state and progress of physical geography in Scotland, and the north of England. Upon inquiry it appeared that the prospect of the publication of a correct Map of North Britain was exceedingly remote, owing to the slow progress of the Trigonometrical Survey in England, and the following resolution having been proposed, was unanimously adopted.

> *Resolved*,—"That the progress of various branches of science is seriously retarded by the want of an accurate Map of North Britain and the north of England, and that this opinion be represented to His Majesty's Government, with the view of expediting the completion of the unpublished or unfinished parts of the Ordnance Survey.

In pursuance of that resolution, the Council of the British Association for the Advancement of Science begs to solicit the attention of His Majesty's Government to this statement and memorial.

The Trigonometrical Survey of Great Britain, conducted by men of high scientific attainments, commenced its operations in 1798, with a view to the construction of a general Map, and in 1805 the first sheets of that work were published. Of 108 sheets required to form the whole Map of England, 65 only have yet been published, at which rate of progress 30 years would elapse before the survey could reach the banks of the Tweed. Now although from the exertions recently made in this department the rate of publication has been accelerated, yet, on reference to the highest authorities on this subject, no prospect is held out, even upon the present improved system, that the desired result can be attained in less than 10 years, after which the entire Map of Scotland will remain to be constructed!

Your Memorialists conceive that this simple statement of the condition and future prospects of the survey, might in itself be a sufficient reason to induce Parliament to increase the grant allotted to this branch of public service. But to place the evils of the want of these Maps in a clear light, they venture to put forth the principal grounds upon which this appeal is founded. Urgent calls for this Map are made by many proprietors of land and mines, both in the north of England and in Scotland, who contend that in the construction of railroads, canals or other public works, that portion of the kingdom is subjected to great expenses and difficulties, from which the southern parts of the island have been *already* exempted. Without multiplying cases they point to the Western Railroad from London to Bristol, in which an outlay of several thousand pounds in surveying has been saved by the possession of these Maps, whilst the correctness of the physical features laid down upon them has enabled the engineer at once to select his line, and thus to

gain at least a year of time in the commencement of the work. Similar results have been obtained in Ireland in forming the Ulster Canal, in consequence of the publication of the Ordnance Map of that country. Another important benefit will be conferred upon the public by the completion of this Map, in the correction of the coast surveys, determining the precise position of headlands, and the more accurate form of bays; a point of considerable importance in the northern parts of this maritime country, where the outline of the coast is so broken and dangerous; in illustration of this it may be mentioned, that in the progress of the yet unpublished parts of this survey, errors of position in the most accredited charts of this coast have been detected to an extent in one instance of 11 miles!

Your Memorialists particularly invite attention to the fact, that although a very large portion of the expense relating to the Scottish survey has been incurred, not only in establishing the great triangulation, but also in minutely and accurately surveying a large portion of the south-west of Scotland, the materials so collected are now merely laid up in the archives of the Map-office, without the prospect of their being made available for many years; whilst it must be observed, that the knowledge thus locked up relates to one of those tracts of the empire where its diffusion would prove of singular advantage. Upon this head indeed it can be shown that the suppression of this knowledge is not only a negative but a positive evil, inasmuch as without the conviction that so many years could not elapse between the execution of this survey and its publication, the inhabitants themselves would have endeavoured to make good maps. Such attempts however have been entirely stopped, in the trust that as Government had at the public expense acquired the information sought, and had attained it in a manner scarcely within the reach of local enterprize, such knowledge would long ere now have been communicated to the public.

In this untoward condition of a national geographical survey, Great Britain stands almost alone among the civilized nations of Europe, whilst it is obvious that in no country can the production of such Maps be more imperiously called for. The Trigonometrical Survey of Austria is completed as respects the Tyrol, the Eastern Alps, Bohemia and Austria proper.

Prussia has nearly completed her survey.

France, though possessing the elaborate Maps of Cassini, has still deemed it essential to institute a new survey of her whole dominions, which is now going on in so vigorous a manner, that though only commenced in the year 1828, there is every reason to suppose that the whole will be finished long before the British survey (at its present rate) will have been completed.

Bavaria holds forth an example highly worthy of imitation. Her survey, commencing in 1819, has made such rapid progress, that out of 100 sheets to illustrate her territories, 63 have been already published, and the whole work will be terminated in six years, and this too upon a scale of three inches to a mile.

Now in none of these countries is there the hope that such expenditure of public money can be repaid, whilst in England and Scotland there are many districts, where the sale of the Trigonometrical Survey will go far towards repaying the cost of production.

Though keenly alive to the advantages which must accrue to physical science from the diffusion of these Maps, seeing that the published portions of them have already enabled the geologist to develope with precision the mineral structure of large tracts of England, your Memorialists solely avoid dwelling upon this important point because the subject requires more explanation than can be well condensed into a short memorial.

Rejoicing in the progress of science, and its application to national uses in every portion of the United Kingdom, your Memorialists hence had their attention the more powerfully attracted to the languid condition of the Ordnance Survey of Great Britain, by the contrast which it presents to the active manner in which the survey of Ireland is now conducted; for whilst they rejoice that the well-directed efforts of science are there so munificently supported as to admit the rapid publication of a Map constructed upon a scale of six inches to a mile, they must at the same time deplore, that some of the most valuable tracts of England and Scotland are so neglected, that a survey upon a scale of only one inch to a mile is making such feeble progress.

Your

Your Memorialists, therefore, trust that His Majesty's Government will suggest to Parliament the propriety of an adequate Grant for the promotion of an object in which so many public interests are involved, and they feel confident that enlightened men of all political parties will unite in the support of such a truly useful and national measure.

By order of the Council of the British Association
for the Advancement of Science, May 28th, 1835,
R. J. Murchison, Chairman.

Sir, Office of Ordnance, 15 June 1835.

With reference to your note dated the 1st instant, transmitting, by desire of the Chancellor of the Exchequer, a Memorial addressed to him by the British Association for the Advancement of Science, upon the state and progress of the Ordnance Survey of Great Britain, on which subject he wishes to receive a report from this department, and to be informed more particularly what would be the sum required to produce a given acceleration of the rate of publication of the Maps.

I have the honour to acquaint you, the Master-General and Board of Ordnance have taken the above Memorial into consideration, and they beg to communicate the following particulars on the subject for the information of the Chancellor of the Exchequer.

Arrangements for advancing the progress of the Survey were made by this department at the end of last year, by which arrangements the number of surveyors will be gradually augmented, and the annual grants will require a progressive increase.

The present annual expense is 10,500 *l.*, but the arrangements for employing additional surveyors are now coming into operation, and larger sums will soon become requisite to bring the Map of England and Wales to a speedy conclusion. It is, however, necessary to premise, that the employment of additional surveyors will not begin materially to increase the quantity of Maps annually produced to the public, until about one year and a half from the present time; and thus an additional outlay will at first appear to have been made without corresponding progress.

During the last two years nine sheets, containing some of the most intricate and difficult parts of the country to survey, have been published, but a much more rapid progress is, the Master-General and Board conceive, required, and to attain this, without diminishing the accuracy of the work, every surveyor must be regularly trained, and the numbers cannot be suddenly augmented in any great ratio.

An opinion has prevailed that many unpublished Plans are ready for engraving in the Ordnance Map-office; but this opinion has arisen from a very large number of Plans having been made in a hasty manner during the late war.

These Plans were made when the Map was considered principally with a view to military purposes, and the rigid accuracy required in a Map for making canals, railroads, and other local improvements (for which purposes the great advantages to be derived from the Survey are pointed out in the Memorial) was not attained in those Plans.

Their revision to fit them for engraving on Maps possessing the accuracy of the present Ordnance Maps, has been a work of severe labour, and the engraving has been made to keep pace with the correction of the documents, so that no delay whatever has arisen in the publication from the Engraving department.

The Master-General and Board consider that it is certainly desirable the Map of England and Wales should be completed as early as it can be, without sacrificing accuracy, both as a matter of economy in diminishing its total cost, and also in leaving the department free to commence the Map of Scotland, the want of which is dwelt upon by the British Association.

A very small part of Scotland was surveyed by the late Lieutenant-colonel Hobbs about fifteen years ago, but as the English Map has been gradually advancing towards perfection from its commencement up to the present time, and

new uses requiring more perfect maps are almost daily arising, the Master-General and Board would feel reluctant to commence engraving a Map of Scotland until the scale on which the survey should be engraved, and the uses to which it is to be applied, had been thoroughly considered.

In the English survey and in the Irish survey the necessity for this previous consideration has been clearly felt. If the degree of detail, and the rigid accuracy required by the valuators, had been known at the commencement of the Irish survey, it would have been commenced with the same perfection in all its details which it now possesses, and both time and money would have been saved: but in this case the detailed valuation of every part of a kingdom was so new a subject, that nothing but experience could point out the detail requisite with certainty.

This experience has been gained, and the Master-General and Board cannot but feel anxious that no step which shall guide the future Map of Scotland be taken, until the subject has undergone a thorough consideration.

The Master-General and Board find there is a sufficient balance on the account of the Survey of Great Britain from former years, to enable the Survey to proceed with preparations for increasing rapidity during the present Parliamentary year, without calling on the Lords Commissioners of His Majesty's Treasury for any advance. In future years, however, as before intimated, some gradual increase of Votes will be required to carry on the Survey expeditiously; but as their amount must be guided by the number of eligible surveyors who can be trained on moderate terms, (that is without increasing the total cost of the Survey,) the Master-General and Board cannot predict what the Votes of future years ought to be respectively, but they do not think it likely that more than 13,000 *l.* will be required for 1836–37.

The Master-General and Board being anxious to put the Chancellor of the Exchequer into possession of the fullest information on the subject, command me to transmit herewith the Copy of a Report from Lieutenant-colonel Colby, Superintendent of the Survey, containing some further particulars; and they request to be favoured with instructions whether the increased expenditure contemplated is to be allowed, and the work proceeded with accordingly.

13 June 1835.

They beg to express it as their decided opinion, after the fullest consideration of the question, that every possible means, *consistent with accuracy*, should be taken to advance the progress of the Maps. They are persuaded that in the end it will not only save the public money, but that the advantage to the country, from the facility it will afford in laying down lines of railroads, canals, &c. without incurring the great expense now required, will be immense; it appearing (as has already been stated in this letter) that the Plans are now made with the rigid accuracy necessary for such purposes.

I have, &c.

T. Spring Rice, Esq., &c. &c.
Downing-street.

(signed) *R. Byham.*

P.S. I return the Memorial from the Association.

Sir, Ordnance Map-office, 13 June 1835.

In reply to the Honourable Board's letter of yesterday's date, T/168, I beg to state, that under the authority of the Honourable Board's Order of 5th December last, permitting me to hire surveyors for expediting the progress of the survey of England and Wales, I have employed Lieutenant Bailey, of the Royal Engineers, with five surveyors who had been trained on the survey of Ireland, to commence an outline survey in the county of Suffolk, and that I propose gradually to increase the number of surveyors under Lieutenant Bailey's direction as fast as those he has in employ become expert, so as to require less of his personal superintendence, and as other eligible assistants to form surveyors can be obtained.

These surveyors under Lieutenant Bailey's direction to lay down the roads, rivers, buildings, and other matters which require to be laid down from actual measurement. And those assistants who have been trained under Mr. Dawson, and who, having higher qualifications, must necessarily receive higher rates of pay,

to

to be employed in delineating the hills, woods, and ornamental matters on the Maps; in the course of which they can hardly fail to detect any errors in the outline survey.

Proceeding on this system, the annual expenditure will gradually increase, and after the first year and a half has elapsed for training, &c. the progress of the Maps will increase in a much higher ratio than the annual expense.

It is evident that the principal cost will depend on the number of eligible assistants who can be obtained and trained for the survey as the work proceeds, and that this is a contingent which does not admit of any accurate calculation. I beg also to premise, that I do not include the cost of the Geological Survey, or of the Triangulation which Captain Henderson is carrying on (out of its regular course) for the Admiralty, in my estimate of the cost of carrying on the Maps with rapidity.

With these provisoes, I should not think that more than 11,000 *l.* could be advantageously expended on the regular progress of the Maps during the present year; and probably about 13,000 *l.* next year. After which, I should hope not only to be able to make a more accurate calculation for the future, but also to lay before the Honourable Board such a number of Maps of the best quality, as would enable them to judge of the accuracy of my expectations.

I have, &c.

(signed) *Thomas Colby*,
Lieut. Col. Royal Engineers.

R. Byham, Esq.
&c. &c. &c.

Sir, Office of Ordnance, 5 October 1835.

Adverting to the communication I had the honour to make to you on the 15th June last, in reply to your note of the 1st of that month, signifying the request of the Chancellor of the Exchequer to be informed what sum would be required to produce a given acceleration of the rate of publication of the Ordnance Survey of Great Britain,

I have it in command to request you will move the Chancellor of the Exchequer to favour the Master-General and Board of Ordnance with a communication on the subject, apprising them whether it is the intention of His Majesty's Government that the increased expenditure contemplated for the above service is to be allowed, and the work proceeded with accordingly.

I have, &c.

(signed) *G. Butler*,
For the Secretary.

T. Spring Rice, Esq., &c. &c.
Downing-street.

Copy of TREASURY MINUTE, dated 13th October 1835.

The Chancellor of the Exchequer lays before the Board the correspondence which has passed between him and the Board of Ordnance on the subject of a Memorial from the British Association, praying for an acceleration of the present rate of publication of the Ordnance Survey Maps, together with a copy of the Memorial.

Mr. Spring Rice states to the Board, that it appears to him, on consideration of the numerous and important interests which are concerned in the publication of the Ordnance Survey Maps with as little delay as possible, and the very strong representations made by the Council of the British Association, that the anticipated benefits fully warrant the increased expenditure; and Mr. Spring Rice further draws the attention of my Lords to the fact, that though the immediate expenditure is increased, it does not appear that there will be ultimately any additional charge, in consequence of the reduction of the time for completing the survey.

My Lords concur and direct a letter to be written to Mr. Butler accordingly.

Write to Mr. Butler, and request him to inform the Master-General and Board of Ordnance that my Lords are of opinion that the arrangements contemplated in Mr. Byham's letter of the 15th June should be carried into effect forthwith.

The result of this official correspondence was communicated to the Chairman of the British Association by the Chancellor of the Exchequer, accompanied by a private note.—Some further communications passed, which were also private, and were not preserved, but they are not material to the subject. In order that the views entertained by the British Association may be fully stated, a copy of the last communication made by the Chairman of that body is subjoined.

My dear Sir, 3, Bryanston-place, June 24, 1835.

In acknowledging the receipt of your letter of the 17th June, I am desired by the Council of the British Association for the Advancement of Science, to request you to return their best thanks to the Chancellor of the Exchequer for his courteous communication, by which they are happy to learn that the Board of Ordnance have recently taken measures for the acceleration of the geographical survey of Great Britain.

The Council would at the same time have been glad to be informed, that by such measures it is proposed to accelerate the work in a greater degree than is anticipated in the Memorial of the British Association, which assumes on good authority that even upon the present improved system, the English Survey will not reach the banks of the Tweed in less than ten years.

In stating that a portion of the south-west of Scotland had been accurately surveyed, with a view to the construction of a Map, the Memorialists did not allude to Plans mentioned in the Report from the Board of Ordnance, made in "a hasty manner for military purposes during the war." They had particularly in view the operations conducted by Captain, afterwards Lieut.-Colonel Hobbs, R.E., officers and assistant surveyors, who, in Ayrshire and the adjoining tracts, not only determined the great triangulation, but were for several years (it is believed from 1818 to 1826) employed in also drawing detailed Maps of that part of Scotland, thus creating a hope in the minds of the inhabitants that a finished Ordnance Map of their country would soon appear.

That the publication of materials carefully collected so long ago may be expedited the Council still venture to think, and they trust that as far as regards these at least no necessity will appear for waiting till new surveyors shall have been trained up.

Of the merits of the officers and surveyors of the Map-office employed by the Board of Ordnance, the Council are fully aware; and they conceive that the slowness, so detrimental to the public interests, with which the Maps of England have been produced, is exclusively owing to the too limited means allowed, not only for the surveys, but also for the work of preparing them for publication.

I remain, &c.

R. J. Murchison.

Circular to Consuls.

CIRCULAR to His Majesty's Consuls Abroad.

Sir, Foreign Office, November 26, 1833.

I AM directed by Viscount Palmerston to transmit to you the enclosed Queries relating to the state of Agriculture, and the condition of the Population within the district of your consulate; to which I am to desire you to return the most accurate and comprehensive answers which it may be in your power to furnish, accompanied by any further statistical information which you may be able to collect, and which may appear to you likely to be interesting to His Majesty's Government.

I am, &c.

(signed) *John Bidwell.*

To His Majesty's Consul at ——

Enclosure in No. 1.

QUERIES RELATING TO THE STATE OF AGRICULTURE, &c.

(Enclosure.)
Queries on the State of Agriculture.

1. STATE the names of the parishes or districts within your consulate, respecting which you are able to supply any information as to the state of agriculture, and the condition of the population.

2. What is the number of inhabitants in such parishes or districts; distinguishing the rural population from that of the towns?

3. What is the quantity of land in each; distinguishing waste land, wood land, and land in cultivation?

4. Is there any, and what, portion of the uncultivated land, which might be rendered productive?

5. What proportion of the cultivated land is arable, and what pasture?

6. What are the general qualities of the soil; and if various, what is the extent of each variety?

7. What proportion is cultivated by the proprietors, and what in general is the extent of such properties?

8. What is the general size of the larger farms which are rented, and under what conditions is the land usually let?

9. What is the average rate of rent of each of the several qualities of land?

10. What are the descriptions of stock fed on the pastures, and in what proportions?

11. In what proportions are the different kinds of grain cultivated?

12. What is the average quantity of wheat, and of other grain, produced on a given extent of each quality of land?

13. In what rotation are the different kinds of seed usually sown?

14. In what value is the rent paid? What proportion of it is usually paid in labour, or in kind?

15. To what tax is the proprietor of the soil subject, and how is it levied?

16. To what taxes or rates is the farmer subjected?

17. What proportion of the taxes levied on the proprietor or the occupier is for the relief of the poor, and what for religious purposes?

18. To what tolls are articles of consumption subjected on entering towns?

19. What is the average price of butcher's meat, and of other principal articles of food?

20. In what proportion to the extent of the land are servants and labourers employed on each farm?

21. What wages do they receive, and in what value are they paid?

22. Do they receive higher wages in time of harvest?

23. Are they usually boarded and lodged by the farmers?

24. What is their usual food; and in what proportion does it consist of butcher's meat?

25. Do the women work on the land, or have they other and what profitable employment, independently of the care of their families?

26. What proportion of the men are annually called upon for military service?

27. What is the price of a substitute for the army?

28. What fuel is principally used; whence is it derived; and at what cost?

29. What

No. 1.

FRANCE.

— No. 2. —

Mr. Consul *Marshall* to *John Bidwell*, esq.

Sir, Calais, 26 May 1834.

I HAVE the honour to forward to you, for the information of Viscount Palmerston, Answers to the Queries relating to Agriculture, &c. proposed in your circular despatch of 26 November last, which I hope will be satisfactory.

There being no official source from whence I could obtain the necessary information to enable me to answer the greater number of these questions, I have found great difficulty in the task, and have only been able to obtain the answers by going out into the country on such days as I could spare three or four hours from the duties of my office. By this mode I have succeeded in answering the agricultural questions correctly, particularly those relating to the employment and payment of the agricultural labourers and farmers' servants, and their mode of living.

I am, &c.

(signed) *Sam. G. Marshall.*

First Enclosure in No. 2.

ANSWERS to QUERIES relating to the State of Agriculture, &c., in the Districts of *Calais*.

(Enclosure 1.)

Answers to Queries.

Answer 1. THE cantons of Calais and Guines, the former containing 12, and the latter 16 communes.

2. The population of these two cantons is, according to the last census, as follows:

CANTON OF CALAIS.		CANTON OF GUINES.	
Names of Communes.	Population.	Name of Communes.	Population.
Calais	10,437	Alembon	544
Boningues	275	Andres	873
Coquelles	443	Bouquehault	658
Coulogne	595	Boursin	285
Escalles	352	Caffiers	334
Fréthun	507	Campagne	424
Marck	3,044	Fiennes	1,037
Nielles les Calais	230	Guines	3,859
Peuplingues	382	Hames	877
Sangatte	905	Hardinghem	1,402
St. Pierre les Calais	6,002	Herbinghem	378
St. Tricât	357	Hermelinghem	302
		Hocquinghem	104
TOTAL	23,529	Liques	1,581
		Pihen	912
		Saughem	378
		TOTAL	14,548
The town population of this canton is:		The town population of this canton is:	
Calais	10,437	Guines	3,859
St. Pierre les Calais	6,002		
	16,439		

The

The remainder of both cantons being a rural population, with the exception of some families at Sangatte who live by fishing.

3. The canton of Calais contains 36,947 mésures de tenc, which corresponds to the same number of acres English measure. Of this quantity there are about 6,000 measures or acres of waste land. The wood land is inconsiderable, not exceeding 500 acres. The remainder, above 30,000 acres, is in cultivation.

The canton of Guines contains about 32,000 acres; but as I have not been able to procure from any source within my reach the superficies of several of the communes, I cannot state the exact number of acres. The waste land of this canton is principally turf morass, whence fuel is derived, and may extend to 2,000 acres. The wood lands are extensive, consisting of the Royal Forests of Guines and Liques, extending to about 4,000 acres. The remainder of the land, about 26,000 acres, is in cultivation, with a greater proportion of arable land than in the canton of Calais.

4. In the communes of St. Pierre les Calais and Marck there are about 2,000 acres of the waste land which might be brought into cultivation; but being of a very light sandy nature, could not be rendered very productive or good land.

5. The proportion of pasture land in the canton of Calais is about 8,000 acres; the arable about 22,000 acres.

In the canton of Guines the proportion of pasture is much less, not exceeding 3,000 acres; the arable about 23,000 acres.

6. In the high lands, which in extent may be stated at full half the total extent of the two cantons, the land is various in point of fertility, consisting generally of reddish earth, but in many places poor and stony, improving as it recedes from the coast. It is mostly arable, with the exception of the forests. The low lands, which are more extensive in the cantons of Calais than Guines, are generally sandy or light earth; but being well watered afford good pasture, and where mixed with clay the arable is very productive.

7. Through the two cantons the extent of the land cultivated by the proprietors may be stated at one-half, the general size of farms being from 100 to 200 acres; but there are a few farms cultivated by proprietors of much greater extent, even as much as 1,000 acres.

8. The general size of the larger farms rented are from 150 to 250 acres. They are almost invariably let on lease for three, six and nine years, the tenant having the option of giving them up at the end of each of these terms on giving six months' notice; the farmer paying all taxes.

9. Land generally pays from 3 to 4 per cent. The average rent of the first quality of land is 45 francs, or 1 *l.* 18*s.*; of the middling quality, 30 francs, or 1 *l.* 5*s.*; and of the inferior quality, 15 francs, or 12*s.* 6*d.* per acre, or mésure.

10. The stock fed on the pastures are oxen and cows and horses. The sheep are chiefly fed on the wastes, and on the uninclosed corn lands when there is no grain sown or corn standing on them. Every farmer who keeps sheep has the right of feeding them on all lands of this description in his commune.

11. So great a portion of the land being arable, all kinds of grain are cultivated; but I do not think there is any one kind cultivated in an extraordinary degree above another. Flax, clover and rape-seed are grown much more than in England. On the high grounds, where there is little or no pasture, the farmer depends on clover for winter food for his cattle. Turnips are not cultivated.

12. The average quantity of wheat and other grain produced on a mésure, or acre of land, is in the following proportion:

	On the Best Land.	Middling Quality.	Inferior Land.
Wheat - - -	10 to 12 hectolitres	8 hectolitres	4 hectolitres
Oats - - -	16 to 20 ditto -	12 to 16 ditto -	8 ditto
Barley - - -	16 to 20 ditto -	12 to 16 ditto -	5 to 7 ditto
Beans - - -	10 to 12 ditto -	9 ditto -	4 ditto

The hectolitre being 22 gallons, or 2¾ bushels English imperial measure.

13. The usual rotation in which grain is sown is:

1st year, wheat, and sometimes rape and beans.
2d year, rape, oats, beans, rye, peas, barley.
3d year, clover, flax, potatoes, &c.

The land is kept in continual crops, being seldom left fallow more than once in eight or nine years.

14. The rent is always paid in money.

15. The proprietor of the soil is not subject to any taxes, which are always paid by the tenant, the farms being let with that agreement. The proprietor would otherwise be subject to the foncière, or land tax.

 16. The

FRANCE. No. 2.

(Enclosure 1.) Answers to Queries.

16. The taxes to which the farmer is subject are:

1. The foncière, or land tax.

2. The personel et mobilière.

3. The doors and windows.

4. In the low lands there is also a rate amounting to one franc per mésure levied on the farms, for the expenses of draining the country, the repairs of canals, dykes, &c. The foncière, or land tax, is fixed in this department by dividing the land into five classes, as follows:

The first class pays per mésure -	-	3*f.* 50*c.* - -	2/11
The second - ditto -	-	2*f.* 50*c.* - -	2/1
The third - ditto -	-	2*f.* - -	1/8
The fourth - ditto -	-	1*f.* 50*c.* - -	1/3
The fifth - ditto -	-	1*f.* - -	/10

The taxes on a farm of 200 mésures, or acres of land of middling quality would therefore be:

Foncière - - -	400 to 500*f.*	
Personel et mobilière -	- 100	
Door and window tax	- 20	
	620 - -	£.25 16*s.* 6*d.*

In addition to this, on the low lands the farmer would have to pay the wattringue, or tax for draining, as before-mentioned, which would be 200 francs more, or, in English money, 8 *l.* 6*s.* 8*d.*; but the farms on the high lands are not subject to this tax.

17. No taxes are levied for the support of the poor, assistance being afforded them only by voluntary subscription, no poor laws being in existence. No rates or taxes are levied for religious purposes.

18. Almost all articles of consumption are subject to the duty of Octroi on entering towns. The following list will show the duties on articles, the produce of the surrounding country, on entering the town of Calais:

Oxen - - - - - - - - -	per head	15*f.*	12/6
Cows, heifers, bulls - - - - - - -	do.	10*f.* 50*c.*	8/9
Calves - - - - - - - -	do.	3*f.*	2/6
Sheep, goats, lambs - - - - - - -	do.	2*f.*	1/8
Pigs - - - - - - - - -	do.	5*f.*	4/2
Beer brewed within the circle of the Octroi -	per hectolitre	1*f.*	/10
Hay, clover, sainfoin and all other forage used as food for cattle, whether green or dry, per 100 bundles, the 100 bundles weighing about 1,100 lbs. English - - - - - -		2*f.*	1/8
Straw - - - - ditto - - - - - -		1*f.*	/10
Wood, for burning, the stère, about 36 cubic feet English -		2*f.*	1/8
Large faggots - - - - - - - -	per 100	2*f.* 20*c.*	1/10
Middling do. - - - - - - - -	do. -	1*f.* 20*c.*	1/
Small do. - - - - - - - - -	do. -	80*c.*	/8

For further information on this head, and for other articles subject to similar duties, I enclose a printed copy of the Regulations and Tariff of the Octroi of Calais.

19. The average price of butcher's meat is 11 sous, or 5½ per lb. in the country.

The average price of poultry is, according to the size and quality:

Couple of Fowls - - - - -	2*f.* to 3½*f.* - -	1/8 to 2/11
A Turkey - - - - -	2½*f.* to 6*f.* - -	2/2 to 5/
A Goose - - - - -	3½*f.* to 4½*f.* - -	2/11 to 3/9
Couple of Ducks - - - -	2½*f.* to 3*f.* - -	2/2 to 2/6

The price of bread is:

The loaf of white bread, 4 lb. - - - -	12 *sous* - -	/6
Ditto - - mixed - ditto - - - -	10½ - - -	/5¼
Ditto - - ditto - ditto - - - -	10 - - -	/5
Ditto - - brown bread, 5 lb. - - - -	9½ - - -	/4¼

20. The number of hired labourers employed on the land depends much on the number of the farmer's family, also on the nature of the land, but it may be stated generally, that five or six labourers are sufficient on a farm of 200 mesures or acres of land.

21. A ploughman is always hired by the year, and on the larger farms three are kept. The wages of the first are from 180 francs to 200 francs, that is, from 7 *l.* 10*s.* to 8 *l.* 6*s.* 8*d.*; of the second, 120 francs or 5 *l.*; and of the third, who is an apprentice, 75 francs or 3 *l.* 2*s.* 6*d.* They are all boarded and lodged by the farmer. A thresher and other labourers earn 15 sous or 7½*d.* per day, and their victuals. I consider 18 sous a day the maximum that a labourer can earn, taking the year through, and supposing him to be in constant work.

A shepherd has 60 francs (2 *l.* 10*s.*) a year, with liberty to keep 10 sheep of his own with

with every hundred sheep of his master's, 250 sheep being about the average of the flocks; he has also his board and lodging and food for his dogs. If the shepherd keep no sheep of his own, he receives 300 francs (12 *l.* 10 *s.*) a year wages.

A female servant, hired by the year, has 75 francs (2 *l.* 2 *s.* 6 *d.*) board and lodging. The above wages are always paid in money; it is, however, customary for the farmers to contract for the cutting of their corn, and in that case the wages are paid in kind, the reapers who contract receiving seven sheaves in the hundred.

22. Labourers hired during harvest have 30 sous (1 *s.* 3 *d.*) per day, besides their victuals.

23. Labourers have their victuals as above stated, but are not lodged by the farmers unless hired by the year.

24. The general food of the agricultural labourer in this part of France consists of bread, potatoes and vegetables, and soup made of bread, vegetables, and a small portion of bacon or salt pork. On this head they are certainly not so well found as the English labourer, having very rarely, if ever, any kind of butcher's meat.

25. During the spring and summer the women are a good deal employed on the land, particularly in weeding the corn and flax, and planting potatoes, and in pulling the flax when gathered, which is always done by the hand. In the autumn they are employed in getting in potatoes. In these employments they can earn 10 to 12 sous (5 *d.* or 6 *d.*) per day. In the winter they go out to spin. A woman hired during harvest has 15 francs (12 *s.* 6 *d.*) a month and her victuals; if hired by the day during harvest, 15 sous (7 ½ *d.*) per day, and her victuals. When they go out to spin, they have from five to seven francs a month, with board and lodging. When not hired during the summer, they go out to cut grass on the wastes or in the woods, which they collect for their cow in the winter; almost every cottager who has a family having his cow.

26. The number of men taken for military service varies according to the wants of the army; the general number is, for the canton of Calais, 50; and for the canton of Guines, 35, annually, making a total of 85 on a population of 38,077.

27. The ordinary price of a substitute for the army is, from 1,000 to 12,000 francs, that is, from about 40 *l.* to 50 *l.*

28. The fuel used by the farmers in this neighbourhood is turf and wood, the former is procured from the turf marshes near Guines and Andres. The price of turf is 2 ½ francs per 1,000, or 2 *s.* 2 *d.* English. The wood is derived principally from the forest of Guines, and costs five francs, or 4 *s.* 2 *d.* per somme, a measure of about 18 cubic feet English.

29. The working dresses of the labouring population consist generally of coarse linen stuff, and costs about 24 to 30 francs (1 *l.* to 1 *l.* 5 *s.*) The better clothing, worn on holidays by such as can afford it, costs from 60 to 75 francs (2 *l.* 10 *s.* to 3 *l.* 2 *s.* 6 *d.*), and is something of the same material as that worn by the English people of the same class, though I think the English labourer is the better clothed. With respect to the comparative cost of the clothing of labourers of the two countries, I am unable to judge, having had no opportunity of making the observation in England for the last 30 years.

30. The manufacture of cotton lace is carried on at Calais, and in the vicinity to a very considerable extent, employing 800 machines. It was first commenced soon after the peace by English people, who came from Nottingham, and has since greatly increased. At this time it is by no means so prosperous as formerly. Workmen who formerly earned 90 centimes the rack (9 *d.*), can now obtain only 30 centimes (3 *d.*) the rack. For some years the manufacture of lace was almost entirely in the hands of the English, but at present the French are at least equally concerned in it. Five or six machines is the average number worked and owned by a single proprietor. The thread of which the lace is made is mostly smuggled from England. In consequence of the present depressed state of the lace trade, there is considerable distress amongst the workmen, and a number of the English workmen have lately gone to England, being unable to obtain work. Several machines have been obliged to stop working within this month in consequence of the low price of the lace.

31. From 700 to 800 persons receive assistance from the "Bureau de Bienfaisance." This assistance consists in the distribution of bread, meat and clothing, and sometimes in payment of lodging, but never in money. The sick poor are visited by the physicians of the establishment, and have proper medicines delivered to them.

The revenue of the Bureau de Bienfaisance, is derived from an appropriation of 9,000 francs from the budget of the town, and 7,000 to 8,000 francs derived from voluntary contributions, collections at the houses and in the churches, and a per-centage on the receipts of the theatres, balls, &c.

32. I consider the occupiers of land in this part of France to be on the whole in a fair state of prosperity, and in general contented as to their condition.

Calais, 26 May 1834. *Sam. G. Marshall,* Consul.

N.B.—In calculating the relative value of French and English money, the exchange has been taken at 24 francs, or par, as giving the fairest criterion.

FRANCE.
No. 2.

(Enclosure 2.)
Réglement et Tarif approuvés par Sa Majesté, le 31 Décembre 1830.

Second Enclosure in No. 2.

RÉGLEMENT de l'OCTROI de la Commune de *Calais.*

Departement du Pas-de-Calais, Arrondissement du Boulogne, Commune de Calais.

Population totale - - - - - - 9,459 habitans.
Population agglomérée - - - - - 9,459 id.

(Récensement du 21 Octobre 1820.)

CHAPITRE PREMIER.

§ Ier.—*De la Perception.*

Art. 1er.—L'OCTROI municipal et de bienfaisance établi dans la commune de Calais, département du Pas-de-Calais, sera perçu conformément au Tarif ci-annexé, et d'après les dispositions du présent Réglement.

La perception se fera sur tous les objets compris au Tarif et sur tous les consommateurs, sans aucune exception.

La surveillance immédiate de l'Octroi appartient au Maire, sous l'autorité de l'Administration supérieure.

La surveillance générale sera exercée par la Régie des contributions indirectes.

N°. Le total de la population assujettie à l'Octroi, d'après la détermination des limites exprimées au présent article, est de 9,459 habitans.

Art. 2.—Le rayon de l'Octroi comprendra: la ville, le Courgain, le port dans toute son étendue, et la Citadelle. Des poteaux portant cette inscription, *Octroi de Calais,* seront places aux limites dudit rayon, savoir: aux extrémités Est et Ouest du Port, á l'extérieur de la première barrière de la Porte Royale et de la Porte de la Citadelle.

Art 3.—Les déclarations et la recette des droits se feront aux bureaux ci-après désignes: Savoir:

1. A la Porte Royale.
2. A la Porte du Port, dite du Hàvre.

Aucun objet soumis à l'Octroi ne pourra être introduit que par ces deux points; toutefois, lorsque des travaux nécessiteront la fermeture de la Porte Royale, elle sera suppléée par celle de la Citadelle, où le bureau sera transféré, et toute introduction sera interdite par la Porte Royale.

Un troisième bureau est en outre établi dans l'intérieur de la ville, pour la perception des droits sur les objets entreposés, et ceux fabriqués dans le rayon de l'Octroi.

Ces bureaux seront indiqués par un tableau portant ces mots: *Bureau de l'Octroi.* Ils seront ouverts tous les jours; savoir: pendant les mois de Janvier, Février, Novembre et Décembre, depuis sept heures du matin jusqu'à six heures du soir; pendant les mois de Mars, Avril, Septembre et Octobre, depuis six heures du matin jusqu'à sept heures du soir; et pendant les mois de Mai, Juin, Juillet et Août, depuis cinq heures du matin jusqu'à huit heures du soir.

Les presens Tarif et Réglement seront affichés dans l'intérieur et à l'extérieur desdits bureaux.

§ II.—*Perception sur les Objets venant de l'Extérieur.*

Art. 4.—Tout porteur ou conducteur d'objets assujettis aux droits d'Octroi sera tenu, avant de les introduire, d'en faire la déclaration au bureau, de produire les congés, acquits-á-caution, passavans, ainsi que les lettres de voiture, connaissemens, chartes-parties ou toutes expéditions qui les accompagnent, et d'acquitter les droits, si les objets sont destinés à la consommation du lieu, sous peine d'une amende égale à la valeur de l'objet soumis aux droits.

Toute déclaration devra indiquer la nature, la quantité, le poids et le nombre des objets introduits.

Art. 5.—Après la déclaration, les Préposés pourront faire toutes les recherches, visites et vérifications nécessaires pour s'assurer de l'exactitude des déclarations; les conducteurs seront tenus de souffrir et même de faciliter toutes les opérations relatives auxdites vérifications.

Tout objet soumis à l'Octroi, qui, nonobstant l'interpellation faite par les Préposés, serait introduit sans avoir été déclaré, ou sur une déclaration fausse, sera saisi.

Art. 6.—Il est défendu aux employés, sous peine de destitution et de tous dommages et intérêts, de faire usage de la sonde dans la visite des malles, caisses et ballots annoncés contenir des étoffes, linges, et autres objets susceptibles d'être endommagés.

Dans ce cas, comme dans tous ceux où le contenu des caisses et ballots serait inconnu et ne pourrait être vérifié immédiatement, la vérification en sera faite dans les emplacemens à ce destinés, et déterminés par l'autorité locale.

Art. 7.—Les objets arrivant par mer ou par eau, ne pourront être déchargés qu'après avoir été déclarés par écrit au bureau des portes le plus voisin, et en outre à celui de l'intérieur, s'ils sont susceptibles d'être admis en entrepôt.

Art. 8. Toute

Art. 8.—Toute introduction d'objets soumis à l'Octroi qui aura lieu par d'autres points que ceux indiqués par le Réglement, sera considérée comme frauduleuse, et punie comme telle.

§ III.—*Perception sur les Objets de l'Intérieur.*

Art. 9.—Toute personne qui recolte, prépare ou fabrique dans l'intérieur du rayon de l'Octroi des objets compris au Tarif, est tenue, sous peine d'une amende égale à la valeur de l'objet soumis aux droits, d'en faire la déclaration et d'acquitter immédiatement le droit, si elle ne réclame la faculté de l'entrepôt.

Les Préposés de l'Octroi reconnaîtront à domicile les quantités récoltées, préparées ou fabriquées, et feront toutes les vérifications nécessaires pour prévenir la fraude.

Art. 10.—Les animaux destinés à être abattus seront, s'il y a lieu, marqués au feu, au moment de leur introduction. Ceux introduits morts ou abattus dans l'intérieur des limites seront marqués au noir sur les extrémités des quartiers. On ne pourra, dans l'un et l'autre cas, se servir d'autres marques que de celles déterminées par le Maire.

Art. 11.—Les objets compris au Tarif que l'on ferait sortir de la commune pour être conduits à des foires ou marchés, pourront, à défaut de vente, y rentrer en franchise; à cet effet, il sera délivré au propriétaire ou conducteur un permis de sortie indiquant le nombre et l'espèce des objets, ainsi que les points par lesquels il devra sortir et rentrer, et le délai dans lequel la rentrée devra s'effectuer. Ces objets seront reconnus et vérifiés à leur sortie et à leur rentrée, et il en sera fait mention sur le permis.

Art 12.—Les droits sur la bière seront acquittés d'après les quantités prises en charge par les employés des contributions indirectes, sauf déduction de celles dont l'exportation aura été justifiée, conformément aux dispositions du chapitre de l'entrepôt.

Chapitre Deuxième.

§ I^er^.—*Passe-debout, Transit et Entrepôt des Objets soumis aux Droits du Trésor.*

Art. 13.—Les formalités du passe-debout et du transit des boissons seront les mêmes pour l'Octroi qui celles qui sont observées par la Régie des contributions indirectes.

L'entrepôt des boissons aura lieu, pour l'Octroi, d'après les mêmes formalités, conditions, et pour les mêmes quantités, que celles qui sont fixées à l'égard des droits du trésor.

Les exercices chez les entrepositaires seront faits par les employés des contributions indirectes, en conformité de l'art. 91 de l'ordonnance du 9 Décembre 1814.

§ II.—*Du Passe-debout des Objets non Sujets aux Droits du Trésor.*

Art. 14.—Le conducteur d'objets soumis à l'Octroi qui voudra traverser seulement la commune, ou y séjourner moins de vingt-quatre heures, sera tenu de se munir d'un passe-debout.

Art. 15.—Pour jouir de l'exemption résultant du passe-debout, les propriétaires, conducteurs ou porteurs d'objets portés au Tarif, seront tenus de faire les déclarations prescrites par l'article 4, et d'indiquer, en outre, le lieu du départ et celui de la destination.

Art. 16.—Les droits seront consignés ou cautionnés. Ces droits seront rendus, ou la caution déchargée, lorsqu'il aura été justifié de la sortie des objets. Lorsque les conducteurs ne pourront cautionner ni consigner les droits, il leur sera accordé une escorte dont les frais seront à leur charge, et sont réglés de la manière suivante: dix centimes par chargement. Le produit qui en résultera sera porté en recette sur un registre destiné à cet effet, lequel sera coté, paraphé par le Maire, et tenu par chaque receveur.

Art. 17.—Toute substitution, et toute altération faite dans la nature ou la qualité, pendant la durée du séjour, fera encourir la saisie des objets, ou une amende égale à la valeur de la quantité soustraite ou altérée.

Art. 18.—Les caisses et ballots accompagnés d'acquits-à-caution et portant les plombs et marques des contributions indirectes ou des douanes, sont affranchis des visites et vérifications, si les plombs et marques sont reconnus sains et entiers, et dans le cas seulement où les objets resteront sous la surveillance des employés.

Art. 19.—Dans le cas où, par accident ou par force majeure reconnus par les autorites locales, un conducteur sera retenu dans le rayon de l'Octroi, au-delà du délai fixé, le passe-debout sera, sur sa déclaration, converti en transit, et les objets seront mis sous la surveillance des Préposés de l'Octroi, jusqu'à leur sortie. Les frais de loyer ou de garde, s'il y en a, seront à la charge des déclarans.

Art. 20.—En cas de changement de moyen de transport, ayant pour effet de rendre plus difficile la vérification à la sortie des objets introduits en passe-debout, les employés devront y être appelés.

FRANCE.
No. 2.

(Enclosure 2.)
Réglement et Tarif approuvés par Sa Majesté, le 31 Décembre 1830.

§ III.—*Du Transit des Objets non soumis aux Droits du Trésor.*

Art. 21.—Les déclarations et formalités prescrites pour les objets en passe-debout (excepté en ce qui concerne l'escorte) auront également lieu pour le transit. Les droits seront consignés ou cautionnés. Les objets admis en transit resteront sous la surveillance des Préposés jusqu'au moment du départ.

Art. 22.—La durée du transit est fixée à trois jours. Nulle prolongation au-delà de ce terme ne peut avoir lieu que sur l'autorisation du Maire, d'après l'avis du Préposé principal de l'Octroi, et dans le cas d'une nécessité dûment constatée.

Art. 23.—Les droits seront restitués, ou la caution déchargée, au moment de la sortie. S'il n'était représenté qu'une portion des objets introduits, les droits seraient acquis sur la portion non représentée; à moins toutefois que la vente n'en eût été faite à un entrepositaire, et les objets pris en charge à son compte.

Art. 24.—Les objets amenés aux foires et marchés sont assujettis à toutes les formalités du transit.

Vingt-quatre heures après le délai fixé par l'article 22, ou après l'expiration des foires et marchés, les droits consignés seront définitivement acquis à l'Octroi, s'il n'a pas été justifié de la sortie des objets.*

Art. 25.—Les voitures et transports militaires chargés d'objets assujettis aux droits, sont soumis aux règles ci-dessus prescrites pour le transit et le passe-debout (article 40 de l'ordonnance du 9 Décembre 1814). Toutefois, dans le cas où l'emploi de ces formalités pourrait apporter un retard nuisible, les Préposés se borneront à surveiller ou à escorter le convoi.

Art. 26.—Les diligences, fourgons, fiacres, cabriolets et autres voitures de louage sont soumis aux visites des Préposés de l'Octroi.

Art. 27.—Les individus voyageant à pied, à cheval, ou en voiture particulière suspendue, ne pourront être arrêtes, questionnés ou visités sur leur personne, ni à raison de leurs malles ou effets.

Tout acte contraire à la présente disposition sera reputé acte de violence; et les Préposés qui s'en rendront coupables, seront poursuivis correctionnellement et punis des peines prononcées par les lois. Tout individu soupçonné de faire la fraude à la faveur de cette exception, pourra être conduit devant un officier de police, ou devant le Maire, pour y être interrogé, et la visite de ses effets autorisée, s'il y a lieu.

Art. 28.—Le courriers ne pourront être arrêtés à leur passage, sous prétexte de la perception; mais ils seront obligés d'acquitter les droits sur les objets soumis à l'Octroi qu'ils introduiraient pour être consommés dans la localité; à cet effet, les Préposés de l'Octroi seront autorisés à assister au déchargement des malles.

Des Bestiaux entretenus dans le Rayon de l'Octroi.

Art. 29.—Les propriétaires des bestiaux entretenus dans le rayon de l'Octroi devront faire leur déclaration au bureau. Il leur sera délivré un permis de circulation indicatif du nombre, de l'espèce et du lieu de passage affecté à la sortie et à la rentrée de ces animaux. Ceux qui seraient introduits au-delà du nombre fixé par le permis, et sans déclaration préalable, seront saisis.

Art. 30.—Les propriétaires des bestiaux dont il s'agit souffriront les visites et exercices des Préposés de l'Octroi dans leurs étables et bergeries. Il sera fait inventaire de leurs bestiaux, lequel sera suivi de récensemens aux époques déterminées par le Maire.

Art. 31.—Ils sont aussi tenus de déclarer d'avance le nombre et l'espèce des animaux qu'ils livreront aux bouchers et charcutiers, ceux qu'ils feront venir du dehors pour les remplacer, et ceux qu'ils abattront pour leur consommation personnelle.

Ils déclareront également toute diminution ou augmentation dans le nombre de leurs bestiaux, et pour quelque cause que ce soit.

Art. 32.—Les bestiaux morts naturellement, ou exportés hors de la commune, ne sont passibles d'aucun droit. Il sera fait déclaration des premiers, dans le jour de la mort, et des seconds, préalablement à leur exportation. Ces déclarations seront vérifiées par les Préposés. A l'époque des récensemens, les propriétaires sont tenus d'acquitter les droits pour bestiaux reconnus manquans à leur charge.

§ IV.—*Entrepôt à Domicile des Objets non soumis aux Droits du Trésor.*

Art. 33.—Les propriétaires et commerçans sont, en justifiant de leur qualité, admis à recevoir chez eux et dans leurs magasins, à titre d'entrepôt, et sans acquittement préalable des droits, les marchandises soumises à l'Octroi.

Les

* Dans les communes où l'affluence des bestiaux à un marché ou une foire est considérable, et dans les communes encore où l'on se sert de bêtes à cornes pour attelage, on pourra se dispenser d'exiger la consignation où le cautionnement des droits. Dans ce cas, le réglement doit indiquer les formalités et les dispositions nécessaires pour prévenir l'abus de cette exemption, afin que les Préposés puissent avoir une connaissance exacte des bestiaux qui seraient vendus pour rester dans l'intérieur, et de ceux qui en sortent pour toute autre destination.

(Enclosure 2.) Réglement et Tarif approuvés par Sa Majesté, le 31 Décembre 1830.

Les admissions à la qualité d'entrepositaire seront prononcées par le Maire. Toutes les contestations qui s'élèveraient relativement à l'admission au bénéfice de l'entrepôt, seront portées devant le Maire, qui prononcera, sauf recours au Préfet.

Art. 34.—Sont désignés ci-après les objets admis à l'entrepôt à domicile, ainsi que les quantités au-dessous desquelles la faculté de l'entrepôt ne pourra être accordée.*

CHAPITRE de PERCEPTION.	OBJETS ASSUJETTIS AUX DROITS.	QUANTITÉS au-dessous desquelles. La Faculté de l'Entrepôt ne peut être accordée.	La Décharge du droit ne peut être accordée.
Liquides	Vinaigre	deux hectolitres	un hectolitre.

Objets divers	Savon blanc	100 kilogram.	25 kilogram.

Art. 35.—Les conditions pour l'entrepôt sont de faire une déclaration par écrit, au bureau de l'Octroi, avant l'entrée des objets entreposés; de permettre les visites et exercices des Préposés; de leur ouvrir, à toute réquisition, les caves, magasins et autres lieux de dépôt, et de faire, de la manière et dans les formes voulues par le présent Réglement, les déclarations d'expédition pour le dehors et pour l'intérieur.

Art. 36.—La qualité de détaillant exclut la faculté d'entreposer, à moins que le détaillant n'ait, pour la vente en gros, un magasin particulier qui n'ait aucune communication avec celui de la vente en détail.

Art. 37.—Toute expédition d'objets entreposés ne pourra avoir lieu qu'aux heures indiquées par l'art. 3 du présent Réglement, et devra, avant l'enlèvement desdits objets, être déclarée au bureau de l'Octroi. Les droits seront acquittés sur-le-champ pour les objets destinés à la consommation locale. Quant aux objets expédiés pour l'intérieur, ils seront représentés aux Préposés de l'Octroi, lesquels, après vérification des quantités et espèces, délivreront un certificat de sortie.

Art. 38.—Les Préposés de l'Octroi tiennent un compte d'entrée et de sortie des marchandises entreposées. A cet effet, ils peuvent faire à domicile, dans les magasins, chantiers, caves, celliers des entrepositaires, toutes les vérifications nécessaires pour reconnaître les objets entreposés, constater les quantités restantes, et établir les décompte des droits dus sur celles pour lesquelles il n'est pas représenté de certificat de sortie. Ces droits doivent être acquittés immédiatement par les entrepositaires; et à défaut, il est décerné contre eux des contraintes, qui sont exécutoires, nonobstant opposition et sans y préjudicier.

Art. 39.—Tout refus de souffrir les visites et vérifications et exercices des Préposés de l'Octroi sera constaté par procès-verbal. Les prétextes d'absence seront réputés refus formel. Les Préposés, après avoir déclaré procès-verbal, pourront requérir l'assistance d'un officier de police, faire ouvrir, en sa présence, les caves, celliers ou magasins, et procéder aux vérifications prescrites par les articles précédens.

Art. 40.—La durée de l'entrepôt est illimitée.

Art. 41.—Un dépôt de bois de charpente et de construction venant de la Norwège pourra être toléré dans la partie ouest du port, comprise dans le rayon de l'Octroi, et à la charge, par le consignataire, de ne laisser enlever de ce dépôt aucune quantité de bois que la déclaration écrite n'en ait été faite par lui ou ses agens au bureau de la porte du Hâvre.

L'entrepôt fictif ou à domicile lui sera refusé, et ce dépôt sera soumis au régime de l'entrepôt

* Aux termes de l'article 41 de l'ordonnance, les réglemens doivent déterminer les objets pour lesquels l'entrepôt est accordé. D'un autre côté, il est du principe constitutif de l'Octroi, que les droits ne peuvent peser que sur les objets destinés à la consommation. (*Art.* 11 *de l'ordonnance, et* 148 *de la loi du* 28 *Avril* 1816.)

En conséquence, les conseils municipaux ne peuvent exclure du présent article que les objets du Tarif qui, dans la localité, ne donnent pas lieu à réclamer la franchise des droits, pour cause de réexportation.

France. No. 2.

(Enclosure 2.) Réglement et Tarif approuvés par Sa Majesté, le 31 Décembre 1830.

l'entrepôt réel. Seront admis, en outre, à l'entrepôt réel, tous les objets compris au présent Tarif, provenant d'échouement ou d'accident de force majeure, à charge, par l'entrepositaire, de subvenir à tous les frais qui en résulteront.

Chapitre Troisième.

Contentieux.

Art. 42.—Toutes contraventions aux dispositions du présent Réglement seront constatées par des procès-verbaux, lesquels seront dressés à la requête du Maire, et seront affirmés devant le juge-de-paix ou son suppléant, dans les vingt-quatre heures de leur date, sous peine de nullité. Ils pourront être rédigés par un seul Préposé, et feront foi en justice jusqu'à inscription de faux.

Art. 43.—Ils énonceront la date du jour où ils seront rédigés, la nature de la contravention, et, en cas de saisie, la déclaration qui en aura été faite au prévenu; les noms, qualité et résidence de l'employé verbalisant et de la personne chargé des poursuites; l'espèce, poids ou mesure des objets saisis; leur évaluation approximative; la présence de la partie à leur description, ou la sommation qui lui aura été faite d'y assister; le nom, la qualité et l'acceptation du gardien; le lieu de la rédaction du procès-verbal, et l'heure de la clôture.

Art. 44.—Dans le cas où le motif de la saisie porterait sur le faux ou l'altération des expéditions, le procès-verbal énoncera le genre de faux, les altérations ou surcharges. Lesdites expéditions, signées et paraphées, resteront annexées au procès-verbal, qui contiendra la sommation faite à la partie de les parapher, et sa réponse.

Art. 45.—Si le prévenu est présent à la rédaction du procès-verbal, cet acte énoncera qu'il lui en a été donné lecture et copie. En cas d'absence du prévenu, si celui-ci a domicile ou résidence connue dans le lieu de la saisie, le procès-verbal lui sera signifié dans les vingt-quatre heures de la clôture. Dans le cas contraire, les procès-verbal sera affiché, dans le même délai, à la porte de la mairie.

Art. 46.—Les saisis ne s'étendront qu'aux futailles, caisses, enveloppes, paniers et sacs renfermant les objets en fraude ou en contravention.

Art. 47.—Les objets saisis seront déposés au bureau le plus voisin. Ils pourront néanmoins, s'il y a lieu, être mis en fourrière.

Art. 48.—Si la partie saisie ne s'est pas présentée dans les dix jours, à l'effet de payer la quotité de l'amende encourue, ou si elle n'a pas formé, dans le même délai, opposition à la vente, cette vente sera faite par le receveur, cinq jours après l'apposition à la porte de la mairie et autres lieux accoutumés, d'une affiche signée de lui, et sans aucune autre formalité.

Art. 49.—Néanmoins, si la vente des objets saisis est retardée, l'opposition pourra être formée jusqu'au jour indiqué pour ladite vente. L'opposition sera motivée et contiendra assignation à jour fixe devant le tribunal, suivant la quotité de l'amende encourue, avec élection de domicile dans le lieu où siége le tribunal. Le délai de l'assignation ne pourra excéder trois jours.

Art. 50.—Dans le cas où les objets saisis seraient sujets à dépérissement, la vente pourra être autorisée avant l'échéance des délais ci-dessus fixés, pas une simple ordonnance du juge-de-paix, sur requête.

Art. 51.—L'action résultant des procès-verbaux, en matière d'Octroi, et les questions qui pourront naître de la défense du prévenu, seront de la compétence exclusive du tribunal de simple police, pour la saisie des objets d'une valeur de quinze francs et au-dessous, et du tribunal correctionnel, lorsque l'amende, ou la valeur des objets de fraude, s'élèvera à plus de quinze francs.

Art. 52.—En cas de nullité du procès-verbal, et si la contravention se trouve suffisamment établie par d'autres preuves, ou par l'instruction, la confiscation des objets saisis ne sera pas moins encourue.

Art. 53.—Le Maire sera autorisé, sauf l'approbation du Préfet, à faire remise, par voie de transaction, de la totalité ou de partie des condamnations encourues, même après le jugement rendu.

Toutes les fois que la saisie aura été opérée dans l'intérêt commun des droits d'Octroi et des droits imposés au profit du Trésor, le procès-verbal devra être rédigé à la requête du directeur des contributions indirectes. A cet employé superieur appartiendra aussi, dans ce cas, le droit de transiger dans les règles propres à son administration.

Art. 54.—Le produit des amendes et confiscations pour contraventions au réglement de l'Octroi, déduction faite des frais et prélèvemens autorisés, sera attribué, moitié aux employés de l'Octroi, pour être répartie d'après le mode qui sera arrêté, et moitié à la commune.

Art. 55.—S'il s'élève une contestation sur l'application du Tarif, ou sur la quotité du droit réclamé, le porteur ou conducteur sera tenu de consigner, avant tout, le droit exigé entre les mains du receveur; faute de quoi il ne pourra passer outre, ni introduire l'objet qui aura donné lieu à la contestation, sauf à lui à se pourvoir devant le juge-de-paix du canton. Il ne pourra être entendu qu'en représentant la quittance de ladite consignation au juge-de-paix, lequel prononcera, sommairement et sans frais, soit en dernier ressort, lorsque la somme demandée ne s'élèvera pas au dessus de cinquante francs, soit à la charge d'appel pour les autres affaires.

Art.

Art. 56.—Les contraintes pour les recouvremens des droits d'Octroi seront décernées par le receveur, visées par le maire, et rendues exécutoires par le juge-de-paix.

Les oppositions auxdites contraintes seront instruites et jugées conformément aux dispositions prescrites par l'article précédent; et la partie opposante sera également tenue de justifier, avant d'être entendue, de la consignation entre les mains du receveur, du montant de la somme contestée.

Art. 57.—Toute personne qui s'opposera à l'exercice des fonctions des Préposés de l'Octroi, sera condamnée à une amende de cinquante francs. En cas de voies de fait, il en sera dressé procès-verbal, qui sera envoyé au Procureur du Roi, pour en poursuivre les auteurs et leure faire infliger les peines portées par le code pénal contre ceux qui s'opposent avec violence à l'exercice des fonctions publiques.

Art. 58.—Les propriétaires de tous objets compris au Tarif sont responsables du fait de leurs facteurs, agens et domestiques, en ce qui concerne les droits, confiscations, amendes et dépens, lorsque la contravention aura été commise dans les fonctions auxquels ils auront été employés par leurs maîtres, conformément à l'article 1384 du code civil.

Les pères, mères ou tuteurs seront garans des faits de leurs enfans ou pupilles, mineurs non-émancipés et demeurant chez eux.

Sont également responsables les propriétaires ou principaux locataires, relativement à la fraude qui se commettrait dans leurs maisons, clos, jardins et autres lieux par eux personnellement occupés, s'ils sont convaincus de l'avoir favorisée, ou d'y avoir participé.

Chapitre Quatrième.

Personnel.

Art. 59.—Quel que soit le mode de perception, toutes personnes dirigeant l'Octroi seront tenues de permettre le concours des employés des contributions indirectes dans tous les cas où il doit avoir lieu, de leur laisser faire les vérifications et opérations relatives à leur service, et de leur donner communication de tous états, bordereaux et renseignemens dont ils auront besoin.

Art. 60.—Les Préposés de l'Octroi seront tenus, sous peine de destitution, d'exiger de tout conducteur d'objets soumis aux contributions indirectes, la représentation des congés, passavans, acquits-à-caution, lettres de voiture et autres expéditions; de vérifier les chargemens, de rapporter procès-verbal des fraudes ou contraventions qu'ils découvriront; de concourir au service des contributions indirectes, toutes les fois qu'ils en seront requis, sans toutefois pouvoir être déplacés de leur service ordinaire; enfin, de remettre, chaque jour, à l'employé supérieur des contributions indirectes, un relevé des objets soumis aux droits du Trésor qui auront été introduits.

Les employés des contributions indirectes concourront également à la surveillance du service de l'Octroi, et rapporteront procès-verbal pour les fraudes et contraventions relatives aux droits d'Octroi qu'ils découvriront.

Art. 61.—Les Préposés de l'Octroi se serviront, pour constater le volume et le degré des liquides, des instrumens dont les employés des contributions indirectes font usage.

Art. 62.—Les Préposés de l'Octroi devront toujours être porteurs de leur commission, et seront tenus de la présenter lorsqu'ils en seront requis.

Art. 63.—Le port d'armes est accordé aux Préposés de l'Octroi dans l'exercice de leurs fonctions. Ceux qui abuseraient de cette faculté seront destitués, sans préjudice des poursuites judiciaires auxquelles ils auront donné lieu.

Art. 64.—Les Préposés de l'Octroi ne pourront ni faire le commerce des objets tarifés, ni s'intéresser à ce commerce, soit comme associés, soit comme bailleurs de fonds ou commanditaires.

Tout Préposé qui favorisera la fraude, soit en recevant des présens, soit de toute autre manière, sera mis en jugement et condamné aux peines portées par le code pénal contre les fonctionnaires publics prévaricateurs.

Art. 65.—Les Préposés de l'Octroi qui seraient signalés comme remplissant mal leurs fonctions, ou comme ayant donné lieu à des plaintes graves, pourront être suspendus par les Préfets, ou même révoqués par eux, sur la provocation du Directeur-général des contributions indirectes.

Art. 66.—Les Préposés de l'Octroi sont placés sous la protection de l'autorité publique. Il est défendu de les injurier, maltraiter, et même de les troubler dans l'exercice de leurs fonctions, sous peine de droit. La force armée est tenue de leur prêter secours et assistance, toutes les fois qu'elle en sera requise.

Dispositions Générales.

Art. 67.—Tous les registres employés à la perception et au service de l'Octroi seront fournis par la régie des contributions indirectes. La dépense lui en sera remboursée par la commune. Les perceptions ou déclarations y seront inscrites sans interruption ni lacune.

Les expéditions qui en seront détachées, seront marquées du timbre des contributions indirectes, dont let prix, fixé par la loi, sera acquitté par les redevables, et le montant versé dans les caisses de cette administration, aux époques et de la manière qu'elle indiquera.

Art. 68.—Nul changement ne pourra être fait au présent Réglement, non plus qu'au Tarif qui y est annexé, qu'en suivant les formes prescrites par l'article 3 de l'ordonnance du 9 Décembre 1814.

FRANCE. No. 2.

(Enclosure 2.) Réglement et Tarif approuvés par Sa Majesté, le 31 Decembre 1830.

Art. 69.—Tous les registres servant à la perception des droits d'entrée, sur les vins, cidres poirés, esprits et liqueurs; aux déclarations de passe-debout, de transit, d'entrepôt et de sortie pour les mêmes boissons: ceux employés pour recevoir les déclarations de mise de feu de la part des brasseurs et distillateurs; enfin les registres portatifs tenus pour l'exercice des redevables soumis en même temps aux droits d'Octroi et à ceux dus au Trésor, seront communs aux deux services.

Art. 70.—Dans tous les cas non-prévus au présent Réglement, on se référera à l'ordonnance du 9 Décembre 1814, aux lois des 28 Avril 1816 et 25 Mars 1817, ainsi qu'aux dispositions non abrogées du décret du 17 Mai 1809.

TARIF.

FRANCE.
No. 2.

(Enclosure 2.)
Réglement et Tarif approuvés par Sa Majesté, le 31 Decembre 1830.

Octroi de Calais, Ordonnance du Roi, 4 Décembre, 1832.

LOUIS PHILIPPE, Roi des Français,

Vu l'ordonnance du 9 Décembre 1814 et les dispositions des lois des 28 Avril 1816 et 24 Juin 1814, relatives aux Octrois ;

Vu la loi du 12 Décembre 1830 et le tarif y annexé, pour la perception du droit d'entrée sur les boissons ;

Vu les tarif et réglement de l'Octroi de Calais, approuvés le 25 Juillet 1830, et modifiés le 31 Décembre de la même année ;

Vu la délibération du conseil municipal de la commune de Calais, en date du 27 Juillet 1832, par laquelle il a émis le vœu de porter les droits d'Octroi sur les boissons, au taux de ceux qui se perçoivent à l'entrée pour le compte du trésor ;

Vu l'avis de notre préfet du Pas-de-Calais, en date du 1 Octobre suivant ;

Vu les observations de notre ministre secrétaire-d'état du commerce et des travaux publics ;

Sur le rapport de notre ministre secrétaire-d'état des finances ;

Nous avons ordonné et ordonnons ce qui suit :

Art. 1. Les taxes sur les vins en cercles et en bouteilles, les cidres et poirés et l'alcool, seront désormais perçus, à l'Octroi de Calais, département du Pas-de-Calais, conformément au Tarif Supplémentaire ci-annexé.

Art. 2. Sauf les dispositions qui précèdent, les tarifs et réglemens actuellement en vigueur continueront à recevoir leur exécution.

Art. 3. Notre ministre secrétaire-d'état des finances est chargé de l'exécution de la presente ordonnance.

Fait à Paris, le 4 Décembre 1832.

(signé) LOUIS PHILIPPE.

Mr. Consul Hamilton to John Bidwell, Esq.

Mr. Consul *Hamilton* to *John Bidwell*, Esq., British Consulate, *Boulogne.*

Sir, 15th July 1834.

I HAVE the honour to transmit to you, for the information of Viscount Palmerston, the Answers to the Queries inclosed in your circular of the 26th November last, relating to the state of agriculture and the condition of the population within the district of my consulate ; and I beg leave to observe that the answers are as accurate and comprehensive as it is in my power to furnish.

I am, &c.
(signed) *W. Hamilton.*

Enclosure in No. 3.

(Enclosure.)

Answers to Queries

ANSWERS to Queries.

Answer 1. THE names of the parishes or districts within the consulate of Boulogne, respecting which I am able to supply any information as to the state of agriculture and the condition of the population, are the following :

Canton of Marquise :—Wissant, Tardinghen, Audinghen, Audresselles, Ambleteuse.
Canton of Boulogne :—Wimille, Boulogne.
Canton of Samer :—Outreau, St. Etienne, Coudette, Neufchâtel, Dannes.
Canton of Etaples :—Camiers, Etaples.

FRANCE. No. 3.

(Enclosure.) Answers to Queries.

2. The following Table (A) will show the Number of Inhabitants in such Parishes or Districts, distinguishing the Rural Population from the Town:

NAMES of PARISHES.	POPULATION. Town.	Rural.	TOTAL.	CANTONS.	
Wissant	- -	847	847		
Tardinghen	- -	234	234		
Audinghen	- -	895	895	Marquise	
Audresselles	- -	746	746		
Ambleteuse	- -	595	595		
Wimille	490	1,289	1,779	Boulogne	Consulate of Boulogne.
Boulogne	20,856	- -	20,856		
Outreau	800	2,800	3,600		
St. Etienne	- -	514	514		
Coudette	- -	556	556	Samer	
Neufchâtel	- -	728	728		
Dannes	- -	309	309		
Camiers	- -	494	494	Etaples	
Etaples	560	1,115	1,675		
TOTAL	22,706	11,122	33,828		

3, 4, 5. *Vide* the following Table (B).

TABLE (B).

6. The

6. The quality of the land near the coast varies considerably, according to its relative situation; it is very hilly, and composed of gravelly, clayey, ferruginous and marshy soils. The manner it is cultivated shows nearly the proportion of each description of land; the stony and ferruginous soils are very indifferent, and grow principally March grain. The clayey soil is well adapted for wheat. The sandy soil is in the least proportion; it produces rye, barley and potatoes.

7. In this part of the country it seldom occurs that the proprietor of the land cultivates any portion of it on his own account, it is generally let in farms.

8. The larger farms, which are scarce, rarely exceed 100 hectares (247 acres); in general they do not exceed from 35 to 60 hectares (86 to 148 acres). The rent is always paid in money, and the farmer is also charged with the payment of the land taxes, which average a tenth part of the rent.

9. The average rent of the several qualities of land are: pasture land from 60 to 100 francs (48 *s.* to 80 *s.*); the measure of 42 acres (1 A. 6 P.) For cultivation of grain from 30 to 50 francs (24 *s.* to 40 *s.*); and the ordinary from 12 to 25 francs (9 *s.* 7 *d.* to 20 *s.*); the very inferior 10 francs (8 *s.*); and the uncultivated, serving as pasture for sheep, 6 francs (4 *s.* 10 *d.*) the measure.

10. In most farms there are orchards, meadows and uncultivated lands, serving as pasturage for the cattle; the orchards serve as pasturage for cows and horses in all seasons; the meadows for hay are generally inclosed, and sometimes the cattle are turned into them to take advantage of the after-grass; but they are only made use of for the cattle when the grass fails in the orchards, &c. and hay becomes scarce. The uncultivated commonlands are reserved exclusively for sheep, except when the grass is very abundant, then the cows and horses are turned in; each description of cattle has its particular place. A farmer generally keeps one horse for every 10 measures of land (10 A. 1 R. 20 P.); in the vicinity of the towns he has 2 cows for the same extent. The farmers rear until the age of six months to a year, six colts for every 10 horses, and two calves for a similar number of cows. He has also generally two pigs for every 10 measures of land, but never fattens more than one-fourth; the remainder are sold to the cottagers. There are no sheep except in the principal farms: namely, two or three flocks of from 100 to 250 head in each parish; all the cattle are fed within the limits of the farm, but after harvest the sheep are permitted to range over the district without being subject to any charge.

11 & 12. *Vide* Table (B).

13. The arable lands lie fallow one year before sowing with wheat; the year following the wheat crop, barley is sown; the next year oats or beans; afterwards clover, so as to allow the land to lie fallow the fifth year.

14. The rents are paid in money, and the proprietor does not require of the farmer any labour, as he is charged with the reparation of the country cross-roads; the portion is generally two days work in the year, with waggons, horses and men.

15. The reply to the 8th query resolves this: the proprietor has no taxes to pay for his land when let.

16. Idem.

17. Neither the proprietor nor farmer are compelled to pay anything for the support of church or poor; but it is the interest of the farmer to employ the poor, in order that he may not be obliged, from motives of humanity, to provide them with bread when they are unemployed.

18. All articles of consumption are subject to a considerable duty on entering towns, according to the annexed Table (C).

TABLE (C.)—TARIF de l'OCTROI MUNICIPAL de *Boulogne-sur-Mer.*

Chapitres de Perception.	OBJETS ASSUJETTIS AUX DROITS.	Mesures et Poids.	Droits à Percevoir.	OBSERVATIONS.
Boissons et Liquides.	Vins en cercles et en bouteilles - - -	l'hectolitre	5*f.* 40*c.*	- - Les quantités au-dessous de l'hectolit paieront le droit proportionnel. Pour la pe ception, la bouteille commune sera considér comme litre; les vendanges paieront le dr dans la proportion de 3 hectol. de vendang pour 2 hectol. de vin.
	Cidre, poiré, hydromel - - - - -	- id. -	1 50	- - Les fruits à cidre et à poiré paieront da la proportion de 5 hect. de pommes ou poir pour 2 hect. de cidre ou poiré.
	Alcool pur contenu dans les eaux-de-vie et esprits en cercles, eaux-de-vie et esprits en bouteilles, liqueurs en cercles et en bouteilles, fruits à l'eau-de-vie et eaux de senteur dont la base est l'alcool.	- id. -	18 -

THE OCTROI is the Municipal tax upon certain articles of consumption, as meat, wine, oil, wood, &c. and which enter the barrier of any town, there to be consumed. The Government takes a proportion of this tax, the remainder being applicable to the police expenses of the town, such as paving, lighting, cleansing, draining, &c.

COMPARATIVE STATEMENT of Weights and Measures.

DESCRIPTION OF WEIGHTS AND MEASURES.	In English bushels.	In English lbs. oz.	In English feet. inches.	REMARKS.
French :				
Hectolitre is equal to - - - - - - - - -	2 ¾	—	—	—
Quintal — - - - - - - - - -	- -	110 -	—	—
Kilogramme — - - - - - - - - -	- -	2 3	—	—
Mètre — - - - - - - - - -	- -	- -	3 3	Long measure.
Mètre carré — - - - - - - - - -	- -	- -	3 3	Square ditto.
Mètre cube or stère - - - - - - - - -	- -	- -	3 3	Cubic ditto.

19. Butchers' meat varies considerably in price, according to the quality: viz. from 40 cents. to 55 cents. (4 *d.* to 5½ *d.*) per lb. in the markets; but the shopkeepers usually charge 1 *d.* per lb. extra. The present price of bread is as follows:

	Kilogrammes.		Cents.		*d.*	English weight.
The best wheaten bread, weight -	2	- -	65	or	6½	- - 4 lb. 6 oz.
Second quality - ditto -	- 2	5 hecto^s	70	or	7	- - 5 lb. 8 oz.
Brown bread - ditto -	- 3	- -	75	or	7½	- - 6 lb. 8 oz.

20. There is generally one plough to every 40 measures of land (41 A. 2 R.), one labourer and one boy, engaged by the year; and six reapers per plough, without including the women and children, which are in the same proportions.

21. The labourers and servants are boarded in the farm, and also the reapers, &c. during harvest. The labourer or ploughman is generally paid at the rate of 12 to 18 francs (9*s.* 7*d.* to 14*s.* 5*d.*); the boy from eight to 12 francs (6*s.* 5*d.* to 9*s.* 7*d.*); the female servants from four to six francs (3*s.* 3*d.* to 4*s.* 10*d.*). The reapers, men and women, are employed during the other seasons, in weeding and cleaning the land; but they are not boarded, and receive from six to 15 sous (3*d.* to 7 *d.*) per day.

22. Replied to as above; but the yearly servants receive no extra pay during harvest.

23. *Vide* No. 21.

24. The ordinary food of the labourers in agriculture consists, in the morning, from four to six o'clock, of milk thickened with flour, which they eat with bread composed of an equal proportion of wheat and rye. At half-past eight o'clock the same sort of bread and butter, with water or thick milk. At noon, a soup made with lard and cabbage, and on particular occasions, soup made with pickled pork and vegetables, haricots, (a species of French bean), peas, &c. with bread; beverage, small cider or water; but never any butchers' meat.

25. The women are never employed in working the land; they are occupied with the duties of the farm house, the care of the cows, pigs, poultry, &c.; the men only have the care of the horses. During harvest the women work in the fields the same as the men, with the exception of mowing. The farmer's wife orders every thing in the interior of the farm house, and pays the workmen. In the houses of the labourers the women spin flax, during the winter, for sale.

26. For every hundred young men, born in the same year, throughout the district, which is equal to one-hundredth part of the population, the Government requires about 25 for the military service.

27. The price of a substitute for the army varies in time of peace from 1,400 to 1,800 francs (56 *l.* to 72 *l.*), according to the emergency or circumstances of the party requiring such substitute, but in general the average price is about 1,600 francs (64 *l.*)

28. In the towns, fuel consists of elm, beech, ash, birch, &c. The hard wood is sold for six francs (4*s.* 10 *d.*), the somme of 2½ somme to a stère, or (3 ft. 3 in. cubic feet); the soft wood about two francs (1*s.* 8*d.*), less in the country; but in the towns the price is advanced about two francs (1*s.* 8*d.*) on the above prices. All the wood is drawn from the neighbourhood. The peasants generally use the dead wood gathered in the forests, &c. The gentry in the towns consume, in addition to wood, coals which are brought from Belgium, and are sold for five francs (4*s.*) per hectolitre (2¾ bushels) about 1*s.* 6*d.* per bushel.

29. The labouring population wear a strong coarse linen dress during the summer, and in winter of coarse woollen. The summer dress complete costs about 7 francs (5*s.* 7*d.*), and the winter dress 15 francs (12*s.*)

30. There are no manufactories within the consulate of Boulogne, except a few bobbinet machines. At Boulogne there is a manufactory of fishing-nets, wherein poor children only are employed.

31. There are very few poor who require permanent relief; say about a sixtieth part of the population. The poor who have need of temporary aid may be estimated at a tenth part of the population. The relief afforded in the towns consists of bread, meat, fuel and a very little money; in the country, in a distribution of bread once a week.

32. The condition of the farmers is far from prosperous; but they are contented with little, and pride themselves upon their independence. They are generally happy.

W. Hamilton, Consul.

FRANCE.
No. 4.

Mr. Consul Gordon to Viscount Palmerston.

—No. 4.—

Mr. Consul *Gordon* to Viscount *Palmerston.*

My Lord, British Consulate, 22 Feb. 1834.

AGREEABLY to Mr. Bidwell's despatch of 26th November, I now have the honour to return the Queries relating to the state of agriculture and the condition of the population within the district of my consulate, with my Answers thereto.

I have, &c.
(signed) *Arch. Gordon.*

Enclosure in No. 4.

ANSWERS to Queries.

(Enclosure.) Answer to Queries.

Answer 1. THE district respecting which I have been able to obtain the most correct information as to the state of agriculture, and which I think may be applicable to the department of the Seine Inférieure and Calvados, are the cantons of Ingouville, Montivilliers, Criquetôt, Goderville, Fecamp, Bolbec, Lillebonne, and St. Romain, which form the arrondissement of Havre, and are estimated to contain 78,327 hectares of land, or 195,817 British acres.

2. The population of the above cantons, taken from the last census, is 102,163, of which 76,993 rural, and 25,170 urban.

This does not include the population of the town of Havre de Grace, taken at 25,450.

The division is as follows:

Ingouville	4,721	urban	4,207	rural.
Montivilliers	3,603	—	9,511	—
Criquetôt	—	—	13,083	
Goderville	—	—	13,162	—
Fecamp	7,849	—	8,173	—
Bolbec	6,946	—	9,629	—
Lillebonne	2,051	—	6,911	—
St. Romain	—	—	12,317	—
	25,170		76,993	

The land is divided as follows:

	Hectares.		British acres.	
Ingouville contains	2,554	=	6,385	in cultivation.
	410	-	1,025	wood.
	24	-	60	uncultivated.
Montivilliers	8,585	-	21,462	cultivation.
	204	-	510	wood.
	252	-	630	uncultivated.
Criquetôt	11,467	-	28,667	cultivation.
	645	-	1,612	wood.
	655	-	1,637	uncultivated.
Goderville	13,761	-	34,402	cultivation.
	209	-	522	wood.
Fecamp	5,838	-	15,595	cultivation.
	875	-	2,187	wood.
	280	-	700	uncultivated.

	Hectares.		British acres.	
Bolbec	9,050	=	22,622	in cultivation.
	790	-	1,975	wood.
Lillebonne	8,285	-	20,712	cultivation.
	2,157	-	5,392	wood.
St. Romain	11,170	-	27,925	cultivation.
	1,140	-	2,850	wood.
	136	-	340	uncultivated.

4. The waste land in these districts is very trifling, and in general is capable of improvement.

5. The above cantons may be divided as near as possible as follows:

39/50	in arable land.
6/50	pasture.
4/50	wood.
1/50	uncultivated and waste.
50/50	

6. The soil varies, but in general it is a fine light clay, capable of bearing wheat.

7. Proprietors of land in the department of the Seine Inférieure seldom or never cultivate their land; in Calvados it is sometimes done, but not generally.

8. The larger farms are from 200 to 300 acres, but in general they are much smaller. They are almost always let for a term of nine years.

9. Farms of 150 to 300 acres let at 40 to 50 francs (32 *s.* to 40 *s.* sterling); the smaller ones at 50 to 60 francs (40 *s.* to 48 *s.* sterling) per acre, equal to two British acres.

10. Every description of stock, (except goats) is bred: viz. horses, mules, asses, sheep, oxen, hogs, &c.; but I am not able to state in what proportions.

11. The proportions of the grains raised will be seen by the following tables, obtained from several of the most respectable farmers in different parts, and shows that the mode of culture is the same throughout:

On a farm of Goderville of 60 hectares, equal to 150 British acres:

Wheat	20 hectares.
Barley and Rye	2 —
Oats	15 —
Clover	10 —
Peas and Vetches	6 —
Flax	3 —
Fallow	4 —
	60 hectares.

Farm at Fecamp of 60 hectares, equal to 150 British acres:

Wheat	20 hectares.
Barley and Rye	2 —
Oats	13½ —
Clover	10 —
Peas and Vetches	4½ —
Flax	3 —
Rape	3 —
Fallow	4 —
	60 hectares.

Farm at Bolbec, of 60 hectares, equal to 150 British acres:

Wheat	20 hectares.
Barley and Rye	2 —
Oats	16 —
Rape	2 —
Peas and Vetches	5½ —
Clover	10 —
Flax	-½ —
Fallow	4 —
	60 hectares.

Farm at Lillebonne, of 36 hectares, equal to 90 British acres:

Wheat	12 hectares.
Rye	-¾ —
Flax	-¼ —
Oats	11 —
Peas and Vetches	3 —
Clover	6 —
Rape	1 —
Fallow	2 —
	36 hectares.

FRANCE. No. 4.

(Enclosure.) Answers to Queries.

Farm at St. Romain, of 72 hectares, equal to 180 British acres:

Wheat	24 hectares.
Barley and Rye	3½ —
Oats	21½ —
Clover	12 —
Peas and Rape	5 —
Flax	2 —
Potatoes	1 —
Fallow	3 —
	72 hectares.

Farm at Montivilliers, of 37 hectares, equal to 92 British Acres:

Wheat	16½ hectares.
Rye	¾ —
Oats	5½ —
Clover	6½ —
Peas	2¼ —
Flax	4¾ —
Turnips	¾ —
	37 hectares.

In the neighbourhood of Havre the culture of potatoes upon the small farms is annually increasing, and the use of this vegetable is becoming more prevalent.

12. Upon an average of five farms the quantity of different kinds of grain and produce raised per hectare, equal to two and a half British acres, is as follows:

Wheat	450 to 500	sheafs of	15 k° each	= 33 lbs. British.
Barley	425 - 460	- -	13 k°	- - 28½ lbs.
Rye	420 - 460	- -	10 k°	- - 22 lbs.
Oats	540 - 560	- -	10 k°	- - 22 lbs.
Clover	700 - 900	bundles	7 k°	- - 15½ lbs.
Flax	300 - —	- -	12 k°	- - 26 lbs.
Peas and Vetches	700 - 850	- -	6 k°	- - 13 lbs.

13. The culture of the land is triennial, and in nearly the following proportions throughout the department:—One-third in wheat; one-third in oats, barley and rye; one-sixth in clover; one-twelfth in flax; one-twelfth in peas and vetches. On the large farms a few acres are in fallow.

14. Rents are always paid in money; never in produce or labour.

15. Proprietors pay no tax on the land; it is always paid by the tenant.

16. The farmer pays the land, house and window, and personal tax. These vary, and are seldom two years the same. In 1833 they amounted to about 11 per cent. on the rent.

17. There is no tax for the support of the poor; they are relieved by voluntary contributions, collected in the churches and by the clergyman at the houses of his parishioners.

There is also no direct tax for the support of the church; the French government allows a small annual sum to the clergyman (not sufficient to maintain him), and each parish votes annually a certain sum in addition, the amount of which entirely depends upon the municipal council of each parish, who can increase or diminish it at will, and the parish is assessed accordingly.

18. The tolls on articles of consumption vary in every town according to its population, but in what proportion I have not been able to learn.

The following are the rates levied at Havre on a population of 21,000.

Alcohol	12*f.*	per hectolitre =	9/7¼ sterl. per 26½ gallon.
Wine	3*f.* 60*c.*	—	2/8½ —
Cider	1*f.* 50*c.*	—	1/1 —
Beer	2*f.* 30*c.*	—	1/9 —
Olive oil	6*f.*	—	4/9 —
Rape oil	4*f.*	—	3/2 —
Vinegar, from wine	3*f.* 50*c.*	—	2/8 —
Ditto, from cider	1*f.* 25*c.*	—	/10¼ —
An ox, entire	12*f.* 50*c.*	each	9/11 each.
Calf	1*f.* 15*c.*	—	/9¾ —
Sheep	1*f.* 65*c.*	—	1/2¼ —
Hog	5*f.*	—	4/ —
Ditto, under 32 lbs.	Free.		
Butchers' meat	06*c.*	per half kil.	/0½ per 1 $\frac{11}{100}$ lb.
Salt fish	06*c.*	—	/0½ —
Fire wood	90*c.*	per stère	/7 per 35·31 feet, cube.
Charcoal	20*c.*	per hectolitre	/1½ per 26½ gallons.
Coals	30*c.*	—	/2 —
Tallow	06*c.*	per kilogramme	/0½ per 2 $\frac{22}{100}$ lb.
Candles	07*c.*	—	/0½ —
Long straw	8*f.* 50*c.*	per 100 bundles	6/8 per 100 bundles.
Short ditto	2*f.* 50*c.*	—	1/11 —
Clover	3*f.* 50*c.*	—	2/8 —

Deals

Deals - - -	3*f.* 50*c.* per stère	= 2/8	per 35·31 feet, cube.
Bricks - - -	1*f.* 75*c.* per mil.	1/2	per mil.
Burnt lime - -	15*c.* per hectolitre	/1	per 26½ gallons.
Lime stone - -	80*c.* per metre, cube	/6	per 35·31 feet cube
Free stone - -	3*f.* —	2/4	—
Plaster - - -	08*c.* per 100 kils.	/0½	per 222 lb.
Ditto, in powder -	12*c.* per hectolitre	3/4	per 26½ gallons.
Soap - - -	06*c.* per kilogramme	/0½	per 2$\frac{22}{100}$ lb.
Lathes - - -	15*c.* per bundle of 50	/1	per 50.

19. Butchers' meat in the large towns is from 10 to 14 sous, or 4½*d.* to 6*d.* per pound of 17¾ English ounces; and in the country, 8 to 11 sous, 3½*d.* to 5*d.* sterling.

Poultry in this part of France is very high, on account of the great demand for the shipping.

Fowls -	- from 3*f.* to 6*f.*	each =	2/4½ to 4/9
Turkeys	- - 4*f.* - 5*f.* 50*c.*	—	3/2 - 4/1
Geese -	- - 4*f.* - 5*f.*	—	3/2 - 4/
Ducks -	- - 2*f.* - 2*f.* 50*c.*	—	1/7 - 1/11

Bread, at present, 80*s.* for 6 lb. = 6*d.*

This latter article is cheaper at present than it has been for many years.

20. On a farm of 100 acres there are generally employed from three to four men and 1 to 2 women, besides the farmer and his wife.

21. Ploughmen receive from 250*f.* to 300*f.* per annum = 10*l.* to 12*l.* sterling; others, 200*f.* to 250*f.* = 8*l.* to 10*l.*; women, 75*f.* to 150*f.* = 3*l.* to 6*l.* This is almost always paid in money.

22. No additional wages are given to servants engaged by the year during harvest; but day labourers may be calculated to gain one-fourth more.

Farmers generally contract for a certain sum to have all their grain cut and housed, and seldom do it by day labourers.

23. Servants on a farm always live with their masters.

24. The food in general consists of bread, vegetables of all kinds and soup and eggs, cheese, &c.; butchers' meat once or twice a week; drink, cider.

25. Women are employed on the farms in weeding, taking care of the cattle and poultry, and spinning.

26. I am not able to state the proportion of men taken for the military service. At the age of 20 years complete every man is liable to be taken; should he escape, he can never be called upon again.

The number annually drawn varies, and depends on the exigencies of the state. Men are taken for seven years.

27. From 1,500*f.* to 2,500*f.* = 60*l.* to 100*l.* in time of peace; in war it is much higher. In many parts of France a substitute may be had for one-half of the above sum.

28. Wood is principally used, and in some parts turf. In Havre, the use of coals is becoming very prevalent.

Wood according to quality, 40*f.* to 60*f.* per corde = 1*l.* 12*s.* to 2*l.* 8*s.* per 169 feet, cube.

English coals, 4*f.* 30*c.* to 4*f.* 50*c.* per hectolitre of 2 cwt. British = 3*s.* 4*d.* to 3*s.* 6*d.* sterling.

French coals, 4*f.* to 4*f.* 25*c.* per hectolitre of 2 cwt. = 3*s.* 2*d.* to 3*s.* 3½*d.* sterling.

29. Cloth usually worn by labourers costs from 8*f.* to 10*f.* = 6*s.* 4*d.* to 8*s.* per ell = 3 feet 11¼ inches. In summer, the men are clothed in cotton or linen (blue) at 80*s.* to 1*f.* per ell = 6*d.* to 9*d.*, and the women the same. Labourers, except on Sundays, always wear wooden shoes, which cost 1*f.* to 1*f.* 50*c.* a pair = 10*d.* to 1*s.* 3*d.* sterling, a pair.

30. I have not been able to ascertain the number of manufactories in this department; but they are very numerous and various, more so than in any other in France.

31. Paupers are numerous; there is no legal provision made for them, and they are quite dependent upon voluntary contributions and subscriptions.

32. Occupiers of farms are considered prosperous, but not rich.

Havre, 20th Feb. 1834. *Arch. Gordon*, Consul.

FRANCE.
No. 5.

Mr. Consul Perrier to Viscount Palmerston.

— No. 5. —

Mr. Consul *Perrier* to Viscount *Palmerston*.

My Lord, British Consulate, Brest, June 2, 1834.

I HAVE the honour to enclose a statement of replies to the Queries contained in the circular despatch from the Foreign Office, dated the 26th November last, relating to the state of agriculture and the condition of the labouring population.

The difficulty to obtain information that could be relied on has prevented my replying sooner.

The name and size of each farm, and the number of its inhabitants, the tax-gatherer's receipts, the examination of the registers deposited in the "Mairies," and information obtained from the notary, the priest, and some of the principal proprietors and farmers, have furnished the groundwork of my statement, which only relates to three communes at a short distance from Brest, my official duties (much greater than usual during the last six months),and the absence of my vice-consul, having prevented my giving it more extension.

The consulate of Brest includes five departments (La Manche, Ille and Velaine Côtes du Nord, Finisterre and Morbihan), in each of which there are great differences in agriculture, state of population, local administration and customs. To give accurate information on these subjects would require my presence for a few days in different parts of the country; indeed even the interior of this department (Finisterre), differs materially from the coast.

Should your Lordship deem it advisable that I should extend my labours on this subject, I shall do every thing in my power to obtain the most ample and satisfactory results.

I have, &c.

(signed) *Anthony Perrier.*

Enclosure

Enclosure in No. 5.

QUERIES relating to the State of AGRICULTURE, &c.	CONQUET. ANSWERS.	CONQUET. REMARKS.	PLOUSANÉ. ANSWERS.	PLOUSANÉ. REMARKS.	LAMBEZELLEC. ANSWERS.	LAMBEZELLEC. REMARKS.
1. State the names of the parishes or districts within your consulate, respecting which you are able to supply any information as to the state of agriculture and the condition of the population.	Conquet	-- This commune, 18 miles west of Brest, extends along the coast from Kermorvan Point, by St. Mathews, to Treganna in Brest Bay. Sea manure being plentiful, the soil is very productive.	Plousané	-- Seven miles west of Brest. Very little of this commune (about half a mile) borders Brest Bay. This part is productive. The remainder is inland, and, manure being scarce, is much less productive than Conquet.	Lambezellec	-- Joins the city of Brest at the north. The soil is very poor, and would produce but little were it not for the abundance of town manure from Brest, which is supplied mostly with butter, milk and vegetables by Lambezellec.
2. What is the number of inhabitants in such parishes or districts; distinguishing the rural population from that of the towns?	1,294 Inhabitants. In the country - - 479 Conquet town - - 815	- - - - - - -	2,452 Inhabitants. In the country - - 2,161 In La Trinité village - 96 In Plousané do. - 92 In Kiriminen do. - 103	- - - - - - -	8,460 Inhabitants. In the country - - 7,738 In Lambezellec town 722	-- 693 of the inhabitants are workmen in Brest dockyard, at an average pay of 15*d.* sterling per day.
3. What is the quantity of land in each; distinguishing waste land, wood land, and land in cultivation?	Journaux. Eng. Acres. 623 - - - - 747 All cultivated.	See Note (A.) - - -	Journaux. Acres. 2,108 - - - - - 2,529 60 Waste land - - 72 28 Wood land - - 33 2,020 In cultivation 2,424	- - - - - - -	Journaux. Acres. 18,442 - - - - 22,130 1,450 Waste land - 1,740 950 Wood land - 1,140 16,042 In cultivation 19,250	—
4. Is there any, and what portion of the uncultivated land which might be rendered productive?	None - - - -	- - - - - - -	-- Very little, it being mostly bog, difficult to drain.	- - - - - - -	-- About 1,200 acres might, by dint of labour, be rendered productive.	-- In the waste land are many quarries, which supply Brest with stone.
5. What proportion of the cultivated land is arable, and what pasture?	Journaux. Eng. Acres. 618 Arable - - - - 741 5 Pasture - - - - 6 623 747	- - - - - - -	Journaux. Acres. 1,656 Arable - - - 1,987 364 Pasture - - 437 2,020 2,424	- - - - - - -	Journaux. Acres. 13,790 Arable - 16,764 2,072 Pasture - 2,486 16,042 19,250	—
6. What are the general qualities of the soil; and if various, what is the extent of each variety?	Light sandy soil. 5-6ths rich soil (terre chaude). 1-6th poor soil (terre froide).	Note (B.) - - - -	Light sandy soil. 2-5ths rich soil. 3-5ths poor soil.	- - - - - - -	Light sandy soil. 2-3ds Rich soil. 1-3d Poor soil.	—
7. What proportion is cultivated by the proprietors; and what in general is the extent of such properties?	About one-third by proprietors. From 6 to 22 acres.	Note (C.) - - - -	About 1-15th by proprietors. From 15 to 35 acres.	- - - - - - -	About 1-8th by proprietors. From 8 to 23 acres.	—
8. What is the general size of the larger farms which are rented, and under what conditions is he land usually let?	Journaux. Acres. 18 22 Leases of nine years, renewable on payment of a fine, generally 600 *fs.* (24 *l.*) for a farm of this size.	- - - - - - -	Journaux. Acres. 35 42 Leases of nine years, renewable on payment of a fine of 550 *fs.* (22 *l.*) for a farm of this size.	- - - - - - -	Journaux. Acres. 20 24 Leases of nine years, renewable on payment of a fine of 700 *fs.* (28 *l.*) for a farm of this size.	—

(continued)

QUERIES relating to the State of AGRICULTURE, &c.	CONQUET. ANSWERS.	CONQUET. REMARKS.	PLOUSANÉ. ANSWERS.	PLOUSANÉ. REMARKS.	LAMBEZELLEC. ANSWERS.	LAMBEZELLEC. REMARKS.
9. What is the average rate of rent of each of the several qualities of land?	Per Journaux. Per Acre. *f.* £. *s.* *d.* 36 Rich soil - - 1 8 9 12 Poor soil - - – 9 7	Note (D.) - - - -	Per Journaux. Per Acre. *f.* £. *s.* *d.* 21 Rich soil - - – 16 10 6 Poor soil - - – 4 10	- - - - - -	Per Journaux. Per Acre *f.* £. *s.* *d.* 37 Rich soil - - 1 9 7 14 Poor soil - - – 11 2	—
10. What are the description of stock fed on the pastures, and in what proportions?	Oxen, cows, sheep and horses. The average quantities annually sold are, 61 oxen, 39 cows, 39 heifers, 150 sheep, 47 horses, 25 colts.	- - Many pigs are reared in this commune, but not for sale, being consumed by the farmers.	Oxen, cows, sheep and horses. The average quantities annually sold are 26 oxen, 20 cows, 16 heifers, 200 sheep, 60 horses and colts.	Same as Conquet - -	Oxen, cows, sheep and horses. Stock now in this commune: 30 bulls, 140 oxen, 580 cows, 60 sheep, 15 goats, 180 pigs, 440 horses.	—
11. In what proportions are the different kinds of grain cultivated?	Proportions of 100 bushels. 23 Bushels wheat. 10 Do. meslin (wheat and rye mixed). 48 Do. barley. 19 Do. Oats.	Note (E.) - - - -	Proportion of 100 bushels. 20 Wheat - Oats - - 26 18 Meslin - Rye - - 14 6 Barley - Buckwheat 16	- - - - - -	Proportions of 100 bushels. 12 Wheat. 35 Meslin 10 Barley. 25 Oats. 18 Buckwheat.	—
12. What is the average quantity of wheat and of other grain produced on a given extent of each quality of land?	Average produce of a Journaux. Acre. Bushels. Eng. lbs. 20 Wheat - - - - 2,943 18 Meslin - - - - 2,482 30 Barley - - - - 3,310 22 Oats - - - - 1,619	- - On rich soil; no grain is sown in poor soil.	Average produce of a Journal. Acre. Bushels. Eng. lbs. 8 Wheat - - - - 1,178 7 Meslin - - - - 966 19 Barley - - - - 2,096 27 Oats - - - - 1,986 10 Buckwheat - - 1,195	- - - - - -	Average produce of a Journaux. EAcre. Bushel. Eng. lbs. 7 Wheat - - - - 1,030 7 Meslin - - - - 966 11 Barley - - - - 1,213 13 Oats - - - - 957 12 Buckwheat - - 1,434	—
13. In what rotation are the different kinds of seed usually sown?	Six years cultivation: 1st. Manure, potatoes or parsnips; 2d. Wheat; 3d. Meslin; 4th. Barley, or oats and clover; 5th. Under clover for pasture; 6th. Broken, manured, potatoes, &c.	- - - - - -	Eight years cultivation: 1st. Manure, potatoes or parsnips; 2d. Wheat; 3d. Ditto or meslin; 4th. Barley or oats; 5th, 6th and 7th. Repose under natural grass for pasture; 8th. Broken, manured, potatoes, &c.	- - A small proportion of ground is sown with buckwheat; seldom more than three-fourths of an acre on each farm. A little clover is sown with the barley, one half acre per farm.	Eight years cultivation: 1st. Manure, potatoes or parsnips; 2d. Wheat or buckwheat; 3d. Meslin; 4th. Barley or oats, with clover; 5th, 6th and 7th. Under clover for pasture; 8th. Broken, manured, potatoes, &c.	- - Buckwheat is sown when night soil can be procured. It is plentiful at Brest, where the reservoirs of each house are emptied twice a year, and the contents taken in casks by the farmers.
14. In what value is the rent paid? What proportion of it is usually paid in labour or in kind?	In cash, at Michaelmas - - None.	- - - - -	Same as Conquet - -	- - - - - -	Same as Conquet.	—
15. To what tax is the proprietor of the soil subject; and how is it levied?	- - By law, to a land tax equal to one-fifth of the revenue of the estate.	Note (F.) - - - -	Same as Conquet - -	- - - - - -	Same as Conquet.	—
16. To what taxes or rates is the farmer subject?	- - A farmer paying 600 *f.* (24 *l.*) rent, is taxed annually *f.* £. *s.* *d.* 28 Poll & furniture 1 2 5 3 Doors&windows – 2 5 31 *f.* Total - £. 1 4 10	Rates paid in 1833 - -	- - A farmer paying 750 *fs.* (30 *l.*) rent, is taxed annually *f.* *c.* £. *s.* *d.* 185 – Poll and Furniture - - 7 8 – 12 50 Doors and Windows - – 10 – 197 50 - Total - £. 7 18 –	Rates paid in 1833 - -	A farmer paying 600 *f.* (24 *l.*) rent, is taxed annually *f.* £. *s.* *d.* 72 Poll & furniture - 2 17 7 3 Doors & windows – 2 5 75 Total £. 3 – –	Rates paid in 1833.

17. What proportion of the taxes levied on the proprietor or the occupier is for the relief of the poor, and what for religious purposes?	None The clergy are paid by government. Note (G.)	The rector is paid by government, per annum 800 *f.* (32 *l.*); one vicar is paid by government per annum 350 *f.* (14 *l.*)	Same as Conquet	The rector is paid by government, per annum, 800 *f.* (32 *l.*); two vicars, each paid the same as at Conquet.	Same as Conquet	The rector is paid by government, per annum, 1,500 *f.* (60 *l.*); three vicars, each paid the same as at Conquet.
18. To what tolls are articles of consumption subjected on entering towns?	None on necessaries of life	Tolls on Wine and Spirits: per cask of 228 litres. *f.* c. 3 50 Wine per velte. 0 40 Spirits or Eng. gal. 60. *s.* *d.* 2 10 2	Same as Conquet	Toll on Wine and Spirits: per cask of 228 litres. *f.* c. 7 – Wine per velte. 0 50 Spirits or Eng. gal. 60. *s.* *d.* 5 8 2½	Same as Conquet	Toll on Wine and Spirits: per cask of 228 litres. *f.* c. 7 – Wine per velte. 2 17 Spirits or Eng. gal. 60. *s.* *d.* 5 8 10½
19. What is the average price of butchers' meat, and of other principal articles of food?	per kil. *f.* c. – 60 Meat – 28 Bread per 100 kil. 1 65 Potatoes per lb. Eng. *s.* *d.* 2¾ 1½ per cwt. Eng. 1 4½	–	Same as Conquet	–	per kil. *f.* c. – 75 Meat Bread and potatoes same as at Conquet per lb. Eng. *s.* *d.* 3¼	—
20. In what proportion to the extent of the land are servants and labourers employed on each farm?	Two men and one woman for every 15 journaux, or 18 English acres.	During harvest two or three extra labourers are hired, and paid for five weeks, 18 to 20 *f.*; they are boarded and lodged.	Same as Conquet	Same as Conquet	Four men and three women for every 20 journaux, or 24 English acres.	Owing to the quantity of vegetables cultivated for the Brest market.
21. What wages do they receive, and in what value are they paid?	Per annum. *f.* 60 to 120 Men 45 to 75 Women £. *s.* £. *s.* 2 8 to 4 10 1 16 to 3 –	According to their capacities	Same as at Conquet	–	Per annum. *f.* 75 to 150 Men 45 to 75 Women £. *s.* £. *s.* 3 – to 6 – 1 16 to 3 –	—
22. Do they receive higher wages in time of harvest?	No	–	No	–	No.	—
23. Are they usually boarded and lodged by the farmers?	Always	–	Always	–	Always.	—
24. What is their usual food, and in what proportion does it consist of butchers' meat?	Breakfast at 8; Bread and butter, or the remains of the previous supper; cold pork and pudding.—Dinner at 12; Soup, made of cabbages, hog's lard, and salt poured on bread.—Supper at 7; Oatmeal porridge, or boiled pork and pudding, potatoes.	On fast days (Friday and Saturday), no meat; the soup is then made of cabbage and butter. A family of 12, servants and children included, consumes annually about 700 lbs. of pork, and 100 lbs. of cow beef; the latter only on festivals.	Same as at Conquet, but the porridge and pudding are frequently made of buckwheat.	–	Breakfast at 8; Cabbage, soup, bread and butter.—Dinner at 12; Buckwheat or wheaten porridge, with milk, bread and butter.—Supper at 7; Cabbage, soup, boiled pork or beef, and pudding or potatoes.	A family of 12, servants and children included, consumes annually 500 lbs. of beef or veal, and 800 lbs. of pork.
25. Do the women work on the land, or have they other and what profitable employment, independently of the care of their families?	Yes They spin.	–	Yes They spin.	–	Yes. They go to Brest market. They spin.	—

26. What proportion of the men are annually called upon for military service?	Two to three	According to the number of men required by government.	Three to four		10 to 12.	—
27. What is the price of a substitute for the army?	1,000*f.* to 1,200*f.* (40*l.* to 48*l.*)		1,300*f.* to 1,400*f.* (52*l.* to 56*l.*)		1,400*f.* to 1,500*f.* (56*l.* to 60*l.*)	—
28. What fuel is principally used; whence is it derived, and at what cost?	Wood grown in the commune. *f.* Prices: *s. d.* 10 Oak, per cord - 8 – 5 Oak faggots, per 100 4 – 4 Furze or broom faggots, per 100 - 3 4	Grows on the ditches (banks). A cord is 4ft. 3in. English high, 8ft. 6in. long, and 2ft. 4in. deep; faggots are 4ft. 3in. long.	Wood grown in the commune. *f.* Prices: *s. d.* 12 Oak, per cord - 9 7 5 Oak faggots, per 100 4 – 4 Furze or broom faggots, per 100 - 3 4		Wood grown in the commune. *f. c.* Prices: *s. d.* 12 – Oak, per cord - 9 7 7 50 Oak faggots, per 100 - 6 – 5 – Furze or broom faggots, per 100 4 –	—
29. What is the price of articles of clothing, such as are usually worn by the labouring population? Do you consider them to be in general dearer or cheaper than in England?	Note (H.) Cheaper.		Cheaper.		Cheaper.	—
30. Are there any, and what manufactories in each parish or district?	A refinery of kelp, producing potass, iode and hydriodate of sodium.	The kelp is made on the islands between Ushant and the main land.	None		Two tallow chandleries; two tan-yards; one wrought iron manufactory for shipping; three ditto of glazed hats and cloaks.	—
31. Are paupers numerous; and what provisions exist for their support?	40 in the commune None.	14 unable to work; 26 work three or four months and beg eight or nine months.	51 in the commune None.	34 unable to work; 17 work part of the year.	411 in the commune None.	326 unable to work; 85 work part of the year.
32. Is the general condition of occupiers of farms prosperous, or otherwise?	Prosperous		Prosperous		Prosperous.	—

NOTES.

(A.)—The legal French Agrarian measure is the "Are," equal to 119.68 English square yards. The inhabitants of Britanny still retain the old measure, the "Journal," equal to 43.60 ares, or 5,816.44 English square yards. I have therefore calculated the journal at 1⅕ English acres. This, being within half a yard of the real measure, is near enough for any calculation.

(B.)—

(B.)—In Brittany the soil is classed under two heads :—Terre chaude (hot earth). Terre froide (cold earth).

Terre chaude is very productive, the mould being deep; I have called it, in the foregoing tables, rich soil.

Terre froide produces but little, the rock being near the superficies. I call it poor soil; it is generally left under broom or furze; the latter, pounded, is eaten by horses, and is considered strengthening.

When two successive crops of wheat are raised, in Plousané and Lambezellec, furze or broom is sown in the terre chaude, and left six or seven years that the ground may recover.

Terre froide is sometimes, by industrious farmers, rendered more productive, and in time becomes terre chaude. This is done in situations where, between the thin superficies and the hard rock, there happens to be a stratum of yellow earth or decomposed rock. Being a troublesome and expensive operation, it is seldom resorted to.

50 kilogrammes being equal to 110 1/3 pounds English.

(F.)—Taxes (with the exception of door and window-tax), are very unequally levied throughout France.

France is divided into 86 departments, each of which contributes, according to its population and revenue, a proportion of the taxes annually voted by the Chambers. Were this principle strictly adhered to, nothing could be more equitable; but the basis on which the allotment of taxes is grounded, is that of 1791, since which no regular estimation of property has taken place.

The departments are divided into arrondissements, which are subdivided into cantons; these are again subdivided into communes.

There is a conseil-general for every department, and a conseil for each arrondissement. The members of both councils are chosen by the electors of the department.

When the taxes are voted, the amount to be paid by the department is signified to the conseil-general, by whom it is divided between the arrondissemens. The conseil d'arrondissement subdivides it amongst the communes.

In each commune are a mayor and municipal council; the mayor appointed by government and the council elected by householders paying certain taxes.

Assessors of taxes are proposed by the mayor and approved by the sous-prefet, (there are a prefet for every department, and a sous-prefet to each arrondissement). These assessors attend to changes in doors and windows, and to mutations of property. They regulate the poll and furniture taxes, always according to the estimation of 1791.

At that period (1791), each commune was favoured or injured by the valuators, according to the political sentiments of its inhabitants, or the caprice of the ruling party. Hence the difference in the property tax paid in the several communes.

The commune of Conquet pays about one-seventh of its real revenue, whilst Plousané pays one-ninth, and Lambezellec only about one-fifteenth. In some communes the proprietor does not pay more than one-twentieth

Under Napoleon a general survey (le cadastre) was commenced, to correct the valuation of property. It is still going on, although very slowly. Little more than two-thirds of France are surveyed. Before this survey is finished another will be required, the changes since its commencement being so great.

There have been, at different periods, attempts to allot a more equitable share to each department. During the Villèle ministry, the proportions of several departments, being erroneous, were altered.

It is only within the last three years that the conseil-generaux have been made elective, the members being formerly chosen by government. The result has not proved satisfactory. When the members were appointed by government, they considered themselves bound to attend the council. At present some go, others do not. In 1832, the members for the arrondissement of Brest being absent, the taxes were nearly doubled, to the detriment of Brest, and to the relief of other arrondissements whose members attended. This year Brest being represented, its taxes are reduced, but another arrondissement suffers.

(G.)—Government Pay is not the sole Revenue of the Clergy, as is shown by the following Table:

REVENUE OF THE CLERGY.	CONQUET.		PLOUSANÉ.		LAMBEZELLEC.

The quête is a collection made annually by the clergy personally. It is forbidden by government, but continues to be practised in communes distant from large towns. Where the clergy do not quête, the parishioners bring their contributions in kind to the parsonage. It is then less productive. The rector and vicar of Conquet quête. The rector of Plousané does not; the vicars do. The rector and vicars of Lambezellec do not. The more distant the commune from large towns, the more abundant the quête.

† There are two vicars at Plousané and three at Lambezellec.

FRANCE, No. 6.

Mr. Consul Newman to John Bidwell, Esq.

— No. 6. —

Mr. Consul *Newman* to *John Bidwell*, Esq.

Sir, Nantes, January 31, 1834.

ENCLOSED I have the honour to transmit my Replies to the questions you sent to me, on the state of agriculture within my consulate.

I have, &c.

(signed) *Henry Newman.*

Enclosure in No. 6.

REPLIES to the QUERIES relating to the State of Agriculture, &c., Departments of *La Loire Inférieure* and *La Vendée.*

(Exchange calculated at 25 *f.* to 1 *l.* sterling.)

(Enclosure.) Replies to Queries.

Answer 1. THE following replies, marked with an *, relate to the north-west part only of the Loire Inférieure, Guerande, Piriac, Mesquior, Pouliguen, Batz and Croisic; those marked with a †, relate generally to the department, and those marked with a ‡, to La Vendée.

2. The parish of St. Aubin, contains Guerande, Piriac and Mesquior, having together 8,000 inhabitants, about 1,000 of whom are husbandmen, and a rural population of 10,000 more.

Batz, Poliguen and Croisic contain about 5,915, and a rural population of about 5,600.

I have not been able to obtain any positive return of another parish, respecting which I have collected information of its agriculture, &c.

3. I have not any return of the different sorts of land in a parish; those designated above are supposed to have about two-thirds broom heath, land and saltpits, and nearly one-third in vineyards, arable and pasture land.

† The Loire Inférieure contains a superfice of

706,285 hectares - - - or British acres 1,589,141

of which	38,736 hectares	are forests - - -	British acres	87,156
	45,000 –	vineyards	–	101,250
	430,732 –	arable and pasture land	–	969,147
	91,817 –	waste lands	–	206,588
and about	100,000 –	covered with water		225,000
	706,285 hectares.		Acres	1,589,141

Population, 470,093.

‡ La Vendée measures 675,458 hectares, 1,519,780 acres: of which

49,350	acres are forests.	
40,500	– vineyards.	
450,000	– arable - -	land.
500,000	– pasture - -	land.
100,000	– marsh - -	land.
120,000	– uncultivated	land.

The remainder covered with water. Population, 330,350.

4. A large proportion of the waste lands could be rendered productive in both departments; but the low prices of produce on them, from the total want of roads in most places and the bad state of them in others, would not remunerate the proprietor for the expense of clearing them.

† On the right bank of the Loire, nearly a fourth part of the country may be considered but little better than waste, as it produces only a dwarf heath, on which sheep are miserably fed throughout the year. On the left bank the soil is better, and nearly the whole of it is under cultivation.

FRANCE. No. 6. (Enclosure.) Replies to Queries.

‡ About a tenth part of the Bocage is waste; the greater part of it useless; it has remained uncultivated for ages. Some parts adjacent to villages, or to a farm that has a road to it, have occasionally been fenced in, and cultivated for a few years, then abandoned for a long time, and afterwards cultivated again; the waste lands of the plains is better, and serves for sheep occasionally.

5. * The north-west, and generally the right bank of the Loire (particularly Lower Brittany), have not more than a fourth of the ground under tillage; the remainder, as before observed, is very poor pasture or waste land.

† Arable bears a proportion of three-fifths to pasture land.

‡ Pasture bears a proportion of three-fifths (500 to 450) to arable land. The most correct calculation of the ground under tillage in this department, gives 363,375 acres, as will be explained at No. 11, for all sorts of grain, exclusive of what is used of the drained marshes for oats, peas, flax, hemp, &c. In the parish of St. Hilaire de Loulay, canton of Montagn, 15 miles from Nantes, nearly all the ground is under cultivation: one-tenth is meadow; one-third of the remainder is sown with grain; and the two-thirds used as pasture, and sown with clovers, luzerne and other grasses, or planted with cabbages peculiar to this part of the country, called mille-têtes, which serve as food for both men and cattle at least five months of the year.

6. † The soils vary very much; in general they are light, shingly or slatey; a considerable proportion is gravelly, and some parts are rich and loamy. On the left of the Loire, particularly in the vicinity of Machecoul, there is a great show of vegetable mould; a considerable breadth of ground, which has granite for its base, is very productive; there are besides several places that contain limestone, of which the farmers begin to comprehend the value. On the right bank the soil is chiefly of a cold clayey nature, and such will not produce grasses.

‡ *Parish of St. Hilaire.*—Soil light; until within a few years it was used for rye only; now it grows fine wheat, but not equal to that of Machecoul.

The soil of the department generally varies more than that of the Loire Inférieure, on account of the numerous hills, and the plains, which were formerly covered by the sea. The vallies are rich, and so are those grounds that have for a considerable depth a great quantity of marine shells; they are found at the distance of 20 and 30 miles from the sea coast. The soil on some of the hills is also good, and favourable for the vine.

7. † A very small proportion of the land is cultivated by the proprietors of the larger farms; and that only since 1815; but a desire to do so appears by several of the landlords increasing the quantity of ground under their own direction, in the immediate vicinity of their country residences. There are a great number of little proprietors holding from one to 10 acres, which are farmed by the family; the greater part of those persons are workmen or farmer's labourers. Very few of the properties produce 60,000 francs (1,500 *l.*) per annum; they run generally from 5,000 francs (200 *l.*) upwards.

‡ La Vendée is cultivated in a similar manner.

8. †The largest farms seldom extend beyond 300 acres; the greater part are from 60 to 200; if the soil be good, and the whole fit for cultivation, they run from 60 to 100, and so on, in proportion to the quantity of waste land on them. Near to Nantes there are grounds let as high as 87 francs (3 *l.* 10 *s.*) per acre, whilst in the vicinity of Chateaubriant, the average price is not 12 ½ francs (10 *s.*), and in other parts of the department it is even less, from the want of roads. This depreciation of property at a distance from the roads throughout this department and La Vendée, will soon be remedied, as the government has commenced cutting communications in every direction, and the money to defray the expense has been voted by the Chamber; they are expected to be completed in two years; but if the usual inactivity be applied to them, that has been given to other public works, they will not be completed in 10 years. The present value, therefore, of a great part of the farms, is not above one-third of what it may be when all those roads be finished.

Very few of the farms are let for money; the leases run from three to five and seven years; seldom beyond the latter term; and from this cause arises in some measure the miserable state of the grounds at the expiration of the leases. The usual mode of letting is for the proprietor to receive half the produce; but some farmers pay a stipulated quantity of grain for the arable, and money for the pasture land; the greater number are let for one-half of all produce clear to the proprietor, which is another cause of the impoverished state of the land; for what farmer can be expected to lay out his money in manure, when he knows he will only reap one-half of the advantage that may arise from it. In general the farmers are very poor; they are as rich as they have ever been; but they are a class without capital, have seldom a sufficient stock of cattle, and from the effects of the causes I have already alluded to, they feel no desire, no ambition to exert themselves, or rise above what they are, remaining content with the produce of a farm that will just serve to maintain their family. Yet several of those persons who resided in England during the war, or have visited it since the peace, or have sense enough to comprehend the value of the mode of agriculture pursued by some Englishman in their neighbourhood, are by degrees improving their lands, by lengthening the terms of their leases to the farmers, by giving the latter a more

decided interest in the better cultivation of the ground, by paying for one-half of the manure, and frequently one-half of the seed-corn; by providing one-half of the number of oxen, cows and horses, necessary to cultivate the estate, and in some instances, making advances to enable the farmer to purchase modern and improved implements of husbandry, in lieu of the vile ploughs, &c. in general use.

‡ In La Vendée, the leases are nearly the same; but some stipulate for half of the seed corn to be provided by the proprietor. If a farmer in the plains pays for all the seed corn, he bears but one-half of the cost of harvesting the produce. Other leases require the tenant to supply the landlord with a certain quantity of oats, hay, straw, flax, linen, cloth, poultry, butter and eggs. On the other hand, the farmer has the privilege of cutting the tops of all trees for his own use, and the right of selling what he cannot consume; which, if the farm be near a town, produces a considerable sum. He also derives a benefit on most lands in the Bocage, from the sale of hoops, walnuts and chesnuts.

9. † It is impossible to state what the average of rent may be; but the most correct statement of the average revenue of the lands throughout the department makes it appear to be, for

	Corn land - - -	22*f.* - -	17/9 per acre.
	Vineyards - - -	44 - -	35/6 —
	Meadows - - -	50 - -	40/ —
	Forests - - -	17 - -	14/ —
‡ La Vendée, for	Corn land - -	26 - -	20/9½ —
—	Vineyards - -	24 - -	19/3 —
—	Meadows - -	40 - -	32/ —
	Forests - -	11 - -	9/3 —

† There is a farm on the right of the Loire containing about 68 acres of tolerably good land, of which 13 to 14 are meadow; of the remainder the farmer keeps one-third fallow, as has been the custom of ages; the other part is sown with wheat, rye, &c. There are on it the farmer, his wife, four children, a labourer (sometimes two), and two women; four oxen, five or six cows, three to four calves, two horses, and about 50 sheep, when there are any. The farmer pays a rent of 600*f.* (24 *l.*); the average expense has been 1,500*f.* to 1,600*f.* (60 *l.* to 64 *l.*); the gross produce 2,400*f.* to 2,500*f.* (96 *l.* to 100 *l.*), leaving a balance of 300*f.* to 400*f.* (12 *l.* to 16 *l.*) for him and his family, besides the use of the dwelling house.

10. † Sheep generally. Oxen are fattened under sheds; cows are fed on the highways, in lanes, or on waste patches, or by the sides of ditches, always staked, and attended by women or girls, who occupy themselves with spinning or knitting until they return home with the cattle.

‡ A farm of 60 to 70 acres has usually six oxen, six cows, four to six calves, and from 30 to 40 sheep, but no horses. (Parish of St. Hilaire, Montagn, mentioned before.)

In the Bocage the estates are nearly all divided into farms of from 45 to 90 acres; the greater part about 70. On the whole, in this part of Vendée, beasts are fattened; from six to 12 oxen, with half the number of cows, are kept on each farm, and from two to four fat oxen are sold annually, which are replaced by the calves that are reared, or by young oxen purchased from the plains; and every two or three years a cow is sold, and replaced by a calf reared.

‡ In the plains (south and west), the quantity of cattle kept on the land varies according to the qualities of the ground. On some farms of the sizes before mentioned the number of oxen varies from six to 12; cows, from three to eight. Of the former, three to six are sold annually as store cattle to the farmers of the Bocage for fattening. Horses and mares, four to six, of a most miserable breed. On other farms, mules are used in lieu of oxen for ploughing; they are obtained from the department Les Deux Sèvres, where great attention is paid to their production from the strongest asses to be found in Europe. They are purchased when about a year old at 300*f.* to 800*f.* (12 *l.* to 32 *l.*) each; are worked lightly at first; are kept four or five years, and then sold to merchants for the Spanish market at prices varying from 500*f.* to 1,250*f.* (20 *l.* to 50 *l.*) There are more sheep fed in the plains than in the Bocage, and they are more valuable, few farms having less than 60 to 80. Many of the peasants, and most of the little proprietors of horses near the roads and villages, have their five or six sheep, which they confide to their children during the winter, and place on the fallow lands or heaths from the month of May to November.

11.* The most part rye and wheat, a little barley and some buckwheat.

† In the Loire Inférieure generally, there is a much greater extent of ground sown with rye than with wheat. Those two sorts are the principal grain raised for sale. There is an immense quantity of buckwheat produced for the consumption of the inhabitants, as it is the principal, if not in most instances in the country the only food of the farmers and labourers. The cultivators prefer rye to wheat, for two reasons; first, that it is a hardier plant, and not so liable to be injured by this damp atmosphere; and secondly, because it requires less trouble and less care in every stage.

FRANCE. No. 6. — (Enclosure.) Replies to Queries.

‡ In the Bocage -	81,000	acres of	wheat	averaged	800 lbs.	per acre British.
—	81,000	do.	rye	—	800	—
—	6,750	do.	barley	—	462	—
—	9,000	do.	millet	—	a quarter	—
—	3,375	do.	oats	—	670	—
In the plains - -	155,250	do.	wheat and barley produced about the same as above.			
In the drained marshes	18,000	do.	wheat	averaged	1,030 lbs.	per acre British.
—	4,500	do.	winter barley		924	—
—	4,500	do.	beans	—	1,264	—
			(Peas and oats too little to notice.)			
	363,375	acres, as stated at No. 5.				

12. * Produce of wheat and rye nearly equal, not above 500 lbs. per acre.

† On the heavy loamy soils near Machecoul, and similar lands, the produce has been a ton of wheat per acre, whilst the poorer soils, always badly manured, have not yielded more than 500 lbs. Of rye, the produce has been about the same for good and indifferent grounds. The soil being unfavourable for barley, very little is sown in the department.

‡ Answered at No. 11.

13. † On the best lands, adapted for wheat, that grain only is sown, and they are left fallow for the next year. On others buckwheat follows wheat, and on some rye; and those lands, after two harvests, are left fallow for five or seven years. This is the general and wretched husbandry of this department.

‡ In La Vendée, lands that have been recently cleared of broom give two harvests; if the soil be very good, four, successively; if bad soil, it lies idle one year after the two harvests, and is tilled again the fourth year, after which it is abandoned to return to broom or furze. In the plains the ground is left idle the second year, as in the Loire Inférieure; but near to Luçon and all the farms bordering on the Deux Sèvres and the department of Charente, they are divided into three or four parts, one of which only remains fallow. Wheat is sown first, when the ground is brought into tillage after being idle, and a crop of spring or March barley follows; and so on alternately. The whole of this department, as well as that of the Loire Inférieure, is, with very few exceptions, most miserably farmed. The farmers are without capital, are badly provided with implements, have not half the number of labourers required for the land, do not lay on a sufficient quantity of manure, and will use but very little lime, although they find their wheats suffer by the smut for want of it; the fields are always full of weeds, for the roots are left entire by the miserable ploughs in use, and from the want of hands to pluck them out.

14. † and ‡ Rents are paid, as stated 8 and 9, in money or in grain; generally in corn for arable lands, and in money for the meadows and pasture lands. Many landlords who have grounds in hand near to a farm which is leased out, stipulate for a certain number of days' work with men and oxen; others require a certain quantity of every article raised on the farm; fowls, geese, hay, straw, oats, flax, linen, and even of eggs; but it is impossible to furnish any given rule for those kinds of leases. The landowners in most instances exact to the utmost of their power from their tenants. Rents are due at Michaelmas, but are seldom forthcoming until Christmas; and more are paid after than before that period.

15. The land tax is about one-sixth part of the produce, and falls on the proprietor, unless a special agreement throws it on the tenant. It is usually collected by the quarter, but is payable monthly. The occupier of the land pays it, and it is deducted from his rent at Michaelmas. The government are now occupied in measuring and valuing every piece of land throughout the kingdom, according to its size and quality, with a view to levy the tax equitably.

16. The farmer pays only a poll tax and a tax on his furniture, the value of which is fixed according to the value of the habitation; both are trifling.

17. There are no taxes levied for the support of the church or for the poor; the clergy are paid by the government; the poor subsist by begging, or by private subscriptions raised for their relief. A proprietor of an estate of 300 *l.* per annum considers he has given handsomely if his charities amount to 12 *l.* or 15 *l.* in the year.

18. The taxes and the articles taxed depend on the size of the town or city. With the exception of poultry, eggs, butter, vegetables and green fruits, every article of consumption pays an octroi duty on entering Nantes. Wine of every quality, whatever be its value, pays 22*f.* 30*c.* for 30 velts., equal to 18*s.* for 60 gallons; brandy, 25*f.* per hectolitre, 20*s.* per 100 quarts. Oxen of all sizes, 25*f.* (20*s.*); calves, 3*f.* (2*s.* 4½*d.*); sheep, 1½*f.* (14*d.*); and pigs, large and small, 8*f.* (6*s.* 4*d.*) for each. Beer, cider, vinegar, cheese, oranges, and all dried fruits; all salted fish, hay, straw, oats, oils, tallow, candles, all sorts of fire wood, turf, coals, lime, slates, tiles, &c. &c., are taxed in the same proportion.

In smaller cities the rates are less, and the number of articles that are taxed less also; Guerande, for instance, pays only 2*f.* (1*s.* 7*d.*) per hogshead for wine, and nothing on articles of food. Country villages pay nothing.

19. At

19. At Nantes the prices of meat and bread are fixed by the mayor at the close of each month; at present, beef, mutton and veal are 10 sous per lb., equal to 4¼ *d.* per lb. British; pork, on market days, 3½ *d.* or 4 *d.* per lb. British; dried fish, 8 sous per lb. (3½ *d.*); bread, 1st quality, 1½ *d.*, 2d quality, 1 *d.*, and 3d quality, ⅝ *d.* per lb.; butter, from 7 *d.* to 1 *s.*; bacon, 5 *d.* to 6 *d.*; and cheese, 6 *d.* to 7 *d.* per lb. In the smaller towns and country, butchers' meat is now at 2½ *d.* or 3 *d.* per lb., pork not more than 2 *d.* or 2¼ *d.*, and bread about 25% under the price at Nantes.

20. Refer to No. 9.

† and ‡. A farm of 67 to 70 acres of good land, if well cultivated, has generally three men and three women servants, besides additional help during the hay and corn harvests; but on most farms of 200 to 220 acres, there are not more than that number, including the farmer and his wife.

21, 22 and 23.† Men's wages vary from 120*f.* (4*l.* 16*s.*) to 200*f.* (8*l.*) per annum; with a small allowance for sabots, 3*f.* or 4*f.*, and perhaps a blouse or canvas frock; altogether, with allowances at harvest times, subsistence occasionally and other trifles, a man-servant is supposed to cost the farmer, whether boarded and lodged or otherwise, from 250*f.* (10*l.*) to 300*f.* (12*l.*); women from 150*f.* (6*l.*) to 200*f.* (8*l.*) Those paid by the year always live with the farmer. Daily labourers are usually employed all the year: some are fed by the farmer, but not generally. If fed, a deduction is made from the following rates:

	sous.	*d.*		*sous.*	*d.*	
A man receives from	15	7½	to	20	9½	per day.
During harvest or vintage	25	11⅞	–	30	14¼	—
A woman receives from	8	3¾	–	16	7½	
And during harvest	20	9½	per day.			

In some parts of La Vendée:

	sous.		*d.*	
Men's wages are	15	or	7½	per day, besides being fed.
Ditto at harvest	20	–	9½	—
Women	6	–	2⅞	—
Ditto at harvest	10	–	4¾	—

The harvest in the plains, where resident labourers are scarce, is frequently got in by a set of reapers for the ninth part of the produce; for which they reap, thresh, clean and carry it to the granary. A small present in money, according to the high or low rate of wages at the time, is generally given in addition, as a recompense for clearing and making the ground to thresh on.

24. Very little butchers' meat is consumed by the farmers or their labourers. Their staple food is bread, of which a man consumes about three pounds per day. In the summer they generally eat four or five times a day of soup made with bread and cabbages, with fat or butter; sometimes a small bit of bacon. On some farms in Brittany, butchers' meat is given on Sundays; other days, cabbage soup and bread and butter, and, lately, potatoes. On other farms, pancakes made of buckwheat are served to the labourers; but the farmers within these three or four years have turned their attention to the planting of potatoes, in which they find a great advantage over the buckwheat cakes. The quantity of land planted with potatoes since 1830 has been doubled each year. In some parts of La Vendée the mechanics and peasants use millet in lieu of buckwheat; but there also the farmers begin to understand the value of potatoes.

25. The women work on some farms. In Brittany they sometimes sow the corn; but in general they are occupied in the house, excepting those who have to attend the cattle, particularly the cows; they take with them their distaff or their knitting, and thus prepare a considerable quantity of the clothing used by the family from the flax raised upon the premises.

26. One out of eighty is drawn to serve eight years, but they are not always called out when drawn.

27. The prices vary according to circumstances. Some are provided at 800*f.* (32*l.*); others have cost as high as 1,800*f.* (72*l.*) There are several establishments at Nantes for providing substitutes for those who can pay for them; they are regular traders in men for the army; they make advances to poor, needy men, who are distressed, and bargain for a certain sum to be paid to them when they can be placed; and thus the establishments run the risk of being able to dispose of those poor fellows or not. If a number of gentlemen should be drawn, substitutes would be at a high price. There are also a number of insurance companies, that, for a trifling premium, take the risk of the subscriber being drawn; those also provide substitutes in case of need. The person drawn is answerable for his substitute for one year and a day; if he deserts within that time, another must be provided.

28. Fuel is very cheap in the country, although it is dear in the towns. Turf is the most general in use near the bogs, but the greater part consists of the tops of trees, cuttings of hedges, roots and trunks of old trees. The better parts are sent to towns for sale. A cord of good wood, 8 feet long, 4 feet high, and 32 inches deep, is worth on a farm from 10*f.* to 12*f.* (8*s.* 3*d.* to 9*s.* 6*d.*); a hundred of faggots nearly the same value.

FRANCE. No. 6.

(Enclosure.) Replies to Queries.

29. A man's hat costs, in the country, 2½ *f.* to 4 *f.* (2 *s.* to 3 *s.* 2 *d.*); shoes, 4 *f.* (3 *s.* 2 *d.*); sabots, 5¾ *d.*; coarse woollens, 4 *f.* to 6 *f.* per aune; one aune makes a peasant's coat, which therefore costs 3 *s.* 2 *d.* to 4 *s.* 9 *d.* sterling; a pair of trowsers the same. Linen for shirts costs 25 sous to 35 sous per aune, (9 *d.* to 13 *d.* per yard.) During the summer months the men wear dresses of very coarse linen, which is generally made at home; and their winter garments, as well as the women's, are made of the wool spun at home or in the fields when attending the cows; the expense, therefore, is trifling indeed. The prices quoted above are shop prices.

30. There are not any manufactories that have the smallest influence on the price of labour, produce or lands.

31. Paupers are very numerous in the winter; there are no provisions for their support in the country. In some towns there are poor-houses, which are kept up by private donations as may be required, by the proceeds of concerts, balls, and representations at the theatres, and collections made at each house by persons authorised by the mayor, to be paid to a board appointed by him and the council to distribute the money to those in need of relief. In the country they maintain themselves by begging if work be not provided for them; but in general, as labourers are scarce, work is found for a considerable number of them on the roads, paring hedges, or other labour required on the farms.

32. The farmers in general are poor; they occupy such farms as are just sufficient to support their families by the produce they can raise. They are in this part of France an ignorant set; are badly clothed, badly fed, and miserably lodged in most instances, frequently sleeping in the same apartment with their cattle. They are not in debt, nor have they any money to spare, and appear contented to move on, as their fathers have done, without any desire, or at all events without any exertion, to improve their circumstances.

Henry Newman,
His Majesty's Consul for La Loire Inférieure and La Vendée.

Nantes, 31 January 1834.

— No. 7. —

Mr. Consul *Close* to Viscount *Palmerston.*

British Consulate, Charente,
January 10, 1834.

No. 7. Mr. Consul Close to Viscount Palmerston.

My Lord,

I HAVE the honour to acknowledge the receipt of a circular despatch, dated Foreign-office, November 26th 1833, inclosing a list of Queries relating to the state of agriculture and the condition of the population within the district of this consulate.

I herewith transmit you a set of the most accurate and comprehensive Answers thereto, that it is in my power to furnish.

I am, &c.

(signed) *J. Close.*

Enclosure in No. 7.

ANSWERS to QUERIES relating to the State of Agriculture, &c.

(Enclosure.) Answers to Queries.

Answer 1. THERE are within this consulate six principal districts (arrondissements), La Rochelle, Rochefort, Saintes, St. Jean d'Angély, Marennes, and Jonzac, which form 484 parishes, (communes).

2. The population of these districts and parishes amounts to 446,500 souls, of which about 80,000 inhabit the towns, and 366,500 form the rural population.

3. The parishes vary much in extent, but average 24,557 square acres each, forming altogether 11,885,500 square acres, of which about 8,914,126 are cultivated, 1,485,687 in waste land, and 1,485,687 in wood land.

4. There is no portion of the uncultivated land which might not be rendered productive.

5. About half the cultivated land is arable, one quarter pasture, and one quarter in vineyards.

6. The quality of the soil is of two distinct sorts, the arable and vineyard land being composed of rich, light earth, mixed with gravel, and the pasture land of black, heavy earth, mixed with clay.

7. About

7. About half the land is cultivated by the proprietors; the extent of each of such properties is small, in general from 50 to 120, or 150 acres.

8. The general size of the larger farms, which are rented, varies from 300 to 700 acres.

9. The average rate of rent of the inferior arable land, is from 12*f.* to 15*f.*, (10*s.* 6*d.* to 13*s.*) per acre; of the best arable land from 25*f.* to 30*f.* (20*s.* to 26*s.*); for the pasture land of inferior quality, from 10*f.* to 20*f.*, or 8*s.* to 16*s.*; and for the best quality, from from 40*f.* to 45*f.*, or 32*s.* to 36*s.* per acre.

10. Principally oxen; of which three quarters to one quarter, horses and sheep.

11. One half wheat, one quarter oats, and one quarter, Indian corn, rye and barley.

12. One acre (juurnal) of the best land, produces from 27 to 30 bushels of wheat, from 30 to 36 of oats, and from 20 to 25 of barley or rye.

The same quantity of the inferior or worst land, produces from 9 to 12 bushels of wheat, from 12 to 15 of oats, and from 7 to 10 of rye or barley.

13. The first year wheat; the second oats, barley, rye, Indian corn, &c.; and the third year the ground remains empty and untilled, and serves as pasture for sheep; the fourth year the same routine begins over again.

14. Always in cash, and never in labour or kind.

15. The proprietor of the soil is subject to the land-tax (impôt foncier), which is equal to one-fifth of the rent the land would produce if let. He is likewise subject to the door and window tax of 7½*d.*, or 75*c.* per door or window, and 2*f.* or 1*s.* 8*d.* per gate (porte cochère); also to the "côte personelle," or 2*f.* 50*c.* (2*s.* 1*d.*) per individual of his family, whether male or female, aged 21 years (servants excepted); and 7*f.* (5*s.* 10*d.*) per male, of same age, per annum (servants included), for repairing the bye roads of the parish. Besides these, he is subject to a tax which may be laid on by the "Conseil du Département," equal to the impôt foncier, but which cannot exceed it, for the extraordinary wants of the department, such as repairing high roads or making new ones, providing for foundlings, &c.; and if he exercises a trade or profession, he is obliged to pay a "droit de patente," of which there are four classes, proportioned to the various professions, and to the population of the town or village in which they are practised, varying in cost from 20*f.* (16*s.*) to 600*f.* or 25*l.*

16. The farmer is subject to all the above mentioned taxes, but the impôt foncier, for which he is personally answerable, when paid by him, is deducted from the rent.

17. No proportion whatever, of the taxes levied on the proprietor or occupier, is for the relief of the poor, or for religious purposes.

18. The tolls on articles of consumption, on entering towns, vary according to the population of those towns, for which however there is no fixed scale; when the population is under 1,500 there is no toll; from 1,500 to 5,000 there is a toll called "octroi"; above 5,000, there is, in addition to the octroi, a toll called "droit de consommation;" the rates of the first as well as of the second of these, are always settled by the mayor and corporation of each town, and are levied in each, according and in proportion to the population and consumption of the town, to the wants of which their produce is destined. In a town of the lowest class, the rates of octroi are in general as follow:—

Per cask or hogshead of wine, of any quality	- -	1*f.* 50*c* or 1/3
Per bottle of wine - - - - - - -		05*c.* – /½
Per cask of brandy, according to its strength, from		5*f.* to 10*f.* – 4/2 to 8/4
Per ox or cow - - - - - - - - -		5*f.* – 4/2
Per calf - - - - - - - - -		1*f.* – /10
Per sheep or lamb - - - - - - - -		50*c.* – /5
Per pig - - - - - - - - -		2*f.* – 1/8

And for every pound of meat, cut up, 05*c.* or ½*d.*; hay or straw, 60*c.* or 6*d.*, for every 600 lb. weight; and for fire wood, from 50*c.* or 5*d.* to 1*f.* 50*c.* or 1*s.* 3*d.*, per cart load, according to the sort of wood.

19. The average price of butcher's meat is 45*c.* or 4½*d.* per lb.; bread, 20*c.* or 2*d.* per lb.; potatoes, about 2*f.* or 1*s.* 8*d.* per bushel; and wine, the growth of the department, about 50*c.* or 5*d.* per gallon.

20. A farmer who cultivates 300 acres of land, employs six servants all the year round, and takes seven or eight in addition, during July, August and September.

21. The men from 120*f.* to 200*f.*, or 5*l.* to 8*l.* per annum; and one head-man in each farm about 300*f.*, or 12*l.*; the women from 60*f.* to 110*f.*, or 2*l.* 18*s.* to 4*l.* 8*s.* per annum.

22. Not those hired for the year; but those hired for the hay harvest, and vintage months, receive about 40*f.*, or 32*s.* per month.

23. They are always boarded and lodged by the farmer.

24. Their

FRANCE. No. 7.

(Enclosure.) Answers to Queries.

24. Their food consists of bread, beans, garlic, potatoes, and every sort of vegetable, with butcher's meat (generally pork) once a week, or at most, twice.

25. The women in this department never work on the land, though they assist in thrashing out the corn. Their principal employment, independently of the care of their families, is to tend the sheep and poultry.

26. The average proportion during the last five years, has been 25 out of 100.

27. The price of a substitute for the army is from 1,800*f.* to 2,000*f.*, or 72 *l.* to 80 *l.*

28. Nothing but wood; it grows in this and the neighbouring departments, and costs from 30*f.* to 40*f.*, or 25 *s.* to 30 *s.* per cart load.

29. The yearly clothing of a labouring man, costs from 70*f.* to 100*f.*, or 3 *l.* to 4 *l.* sterling; that of a woman, from 60*f.* to 80*f.*, or 2 *l.* 8 *s.* to 3 *l.* 6 *s.*

30. There are none whatever in this department.

31. There are from 800 to 1,000 paupers in the department, but there does not exist any provision whatever for their support, other than that afforded by voluntary contributions and donations, which are paid into the hands of the tax collectors in each commune, and distributed to the poor by a commission composed of the mayor and four members of the municipal council. In the largest communes, about 600*f.* or 25 *l.*, is distributed annually in this way.

32. The general condition of the occupiers of farms is very prosperous, many of them in this department are even wealthy.

— No. 8. —

Mr. Consul *Scott* to Viscount *Palmerston.*

No. 8. Mr. Consul Scott to Viscount Palmerston.

His Majesty's Consulate, Bordeaux,
June 6, 1834.

My Lord,

I HAVE the honour herewith to transmit to your Lordship, the answers to the queries relating to the state of agriculture and the condition of the population within the district of my consulate, contained in Mr. Bidwell's Circular Despatch of 26 November 1833.

I beg leave to assure your Lordship, that I have used all the diligence in my power to transmit these answers earlier, and have only been prevented from so doing by the long delays I have met with in obtaining accurate information.

I have, &c.
(signed) *T. B. G. Scott.*

Enclosure in No. 8.

ANSWERS to QUERIES relating to the State of Agriculture, &c. in the department of the *Gironde.*

(Enclosure.) Answers to Queries.

1st. The six "arrondissements" or districts of the department of the Gironde.

The first arrondissement is that of Blaye; it is composed of 59 parishes, of which the principal ones are Blaye, Bourg, St. Ciers-Lalande, and St. Savin; its limits are, to the north and east, the department of the Charente Inférieure; to the south, the districts of Libourne and Bordeaux; to the west, the Dordogne and the Gironde.

Its principal productions are wines, grain of different kinds, fruits, provender and wood. It contains a great extent of uncultivated heath. Though the number of acres cultivated in grain exceeds that in vine, there is not one half-year's provision of grain for the "arrondissement."

The wines of this district are employed in the Dutch and Baltic trade; and a considerable quantity of cattle is reared in it.

The second arrondissement is that of Libourne; it is composed of nine cantons, or 140 parishes, of which the principal are St. Emilion, St. Foi, Coutras and Castillon.

Its boundaries are to the north, a part of the department of the Charente Inférieure, and a part of that of the Dordogne; to the east, the department of the Dordogne; to the south, the district of La Réole; to the west, that of Bordeaux.

The culture of this district is very varied; its principal produce, however, consists in wine and grain: it is one of the richest and best cultivated districts of the department, both from the nature of the soil, and the number of streams by which it is watered, of which many are navigable.

The third "arrondissement" is that of La Réole, it is divided into six cantons, and contains 107 parishes, of which the principal are La Réole, Monségur, Castelmoron and Sauveterre;

Sauveterre; it is bordered on the north by the district of Libourne; on the south by the department of Lot and Garonne; on the south-west by the district of Bordeaux; the west by the Garonne. This district contains the least quantity of uncultivated land; the soil is generally very fertile and will produce tobacco.

It abounds in pasture land; its production consists in wheat, barley, oats, hay, clover, peas, beans, lentils, hemp and flax, fruit and wine: oxen, horses, sheep and pigs are bred in considerable numbers. Its inhabitants, especially the labourers, are on the whole those who are in the most easy circumstances. The River Drot, which traverses it, has many mills on it.

The fourth "arrondissement" is that of Bazas; it is divided into seven cantons, and contains 68 parishes, of which the principal are Bazas, Captieux, Noaillan, and St. Symphorien; its confines are, to the south and west, the department of the Landes; to the north and north-west, the district of Bordeaux; to the east, the Garonne.

It produces wine, chiefly white, rye, a great quantity of chesnut trees, used for barrel hoops, wood of various kinds, and cattle; it contains much wood land, and "landes," or waste heath.

The fifth "arrondissement" is that in which Bordeaux is situated, which is placed almost in the centre of the department; it is divided into 15 cantons, and contains 154 parishes, of which the principal are, besides Bordeaux, Cadillac, Rions, La Teste, Blanquefort.

Its soil is much varied; a great portion of it consists in landes, especially towards the west; its produce consists in wine, grain, vegetables, fruit, osier wood and cattle. It comprises the "Bassin," or estuary of La Teste, and a part of Médoc.

The sixth "arrondissement" is that of Lesparre, and forms the isthmus, at the extremity of which is situated the "Tour de Cordouan;" it comprises four cantons, and contains 34 parishes, of which the principal are Lesparre, Pauillac, St. Laurent, Castelnau, and is that portion of the department known under the name of Médoc. It produces principally wine, of which the fine wines of St. Julien, Lafitte, Latour, &c. form a part; it also produces corn to the amount of 110,000 hectolitres (39,286 Winchester quarters) annually. A great part of it consists in "landes," waste heath. It also possesses lakes of considerable extent, such as Hourtens, La Canau, Carcaus. It is bordered on the sea side by a vast tract of sand hills, portions of which, have, within the last 30 years, been reclaimed. These sand hills have been and are continued to be sown with fir seed, in order to prevent the sand from being blown inland; the part sown is covered with branches to prevent the seed from being buried too deep, and in the course of a few years the young fir trees suffice to retain the sands. These sand hills belong to the Government, and if properly administered would prove a source of considerable profit.

The condition of the labouring population, with the exception of those in the district of La Réole, and a portion of Bordeaux immediately round the town, where it is somewhat better, is not as flourishing as it might be, chiefly owing to the want of order and morality of the people themselves. With proper care and frugality, the peasantry of this department might be well off, but as it is they are generally in a distressed state. The men are much addicted to gambling and drinking, so that the earnings of the week are immediately expended. The billiard table is the great attraction; for instance, in the parish of St. Julien, in the district of Médoc, containing 1,200 souls, there are no less than 12 billiard tables. The women likewise are very improvident; whatever little money they may earn is generally expended in some useless article of dress: the consequence is, that the majority are in debt for the common necessaries of life.

2. The number of inhabitants in such districts is as follows;

					POPULATION.	
					Rural.	Towns.
1st District—	Blaye: containing	59	parishes	- - - -	45,463	10,493
2d —	Libourne —	140	—	- - - -	82,426	25,088
3d —	La Réole —	107	—	- - -	43,931	10,306
4th —	Bazas —	68	—	- - -	39,836	13,966

In all 562 parishes, the rural population of which is - - - - -						366,221
Population of the towns - - - - - - - - - - -						187,554
TOTAL population of the department of the Gironde - - - -						553,775

FRANCE. No. 8.

(Enclosure.) Answers to Queries.

3. The quantity of land in the first district, that of Blaye, amounts to 43,649 hectares, 107,970 acres, 3 rods and 96 yards: viz.

	Hectares.	Acres.	Rods.	Yards.
Corn land, gardens, orchards, nursery gardens, &c.	18,404	45,524	1	977
Pasture land	5,592	13,832	1	519
Vineyards	11,270	27,877	2	480
Woodland	3,245	8,026	3	428
Landes (heath), commons, marshes	1,521	3,762	1	581
Ground occupied by country houses and agricultural buildings.	492	1,217	–	48
Roads, burial grounds, churches, &c.	1,035	2,560	–	919
Rivers, lakes, streams, &c.	2,090	5,169	3	584
TOTAL	43,649	107,970	3	96

In the second district, that of Libourne, the quantity of land amounts to 49,268 hectares, or 121,870 acres, and 48 yards, divided thus:

	Hectares.	Acres.	Rods.	Yards.
Corn land, gardens, orchards, nursery grounds, &c.	22,952	56,774	1	689
Pasture land	5,305	13,122	2	97
Vineyards	13,352	33,027	2	959
Woodland	3,432	8,489	1	919
Landes (heath), commons, marshes, &c.	1,306	3,230	2	192
Ground occupied by country houses and agricultural buildings.	646	1,597	3	968
Roads, burial grounds, churches, &c.	1,417	3,505	–	532
Rivers, lakes and streams, &c.	858	2,122	1	532
TOTAL	49,268	121,870	–	48

The third district, La Réole, contains 43,151 hectares, or 106,738 acres, 3 roods, and 774 yards, divided thus:

	Hectares.	Acres.	Rods.	Yards.
Corn land, gardens, orchards, nursery gardens, &c.	19,044	47,107	2	–
Pasture land	4,298	10,631	2	484
Vineyards	10,443	25,831	3	1,008
Woodland	6,186	15,301	3	144
Landes (heath), commons, marshes, &c.	934	2,310	1	490
Ground occupied by country houses and agricultural buildings.	403	996	3	540
Roads, burial grounds, churches, &c.	1,236	3,057	1	528
Rivers, lakes, streams, &c.	607	1,501	2	–
TOTAL	43,151	106,738	3	774

The fourth district, Bazas, contains 47,497 hectares, or 117,489 acres, 1 rod, divided thus:

	Hectares.	Acres.	Rods.	Yards.
Corn land, garden, orchards, nursery grounds, &c.	10,476	25,913	2	380
Pasture land	5,640	13,951	–	480
Vineyards	10,060	24,884	1	240
Woodland	16,612	41,091	1	565
Landes (heath), commons, marshes, &c.	2,621	6,483	1	474
Ground occupied by country houses and agricultural buildings, &c.	380	939	3	111
Roads, burial grounds, churches, &c.	1,313	3,247	3	381
Rivers, lakes, streams, &c.	395	977	3	–
TOTAL	47,497	117,489	1	–

The

The fifth district, Bordeaux (the town not included), contains 356,994 hectares, or 883,065 acres, 1 rod, and 484 yards, divided thus:

	Hectares.	Acres.	Rods.	Yards.
Corn land, garden, orchards, nursery gardens, &c.	35,455	87,701	3	1,010
Pasture land	14,601	36,117	–	1,114
Vineyards	58,031	143,546	1	192
Woodland	34,156	84,488	3	410
Navigable canals and lakes	4,701	11,628	2	500
Landes (heath), commons and marshes, &c.	181,759	449,601	2	484
Ground occupied by country houses and agricultural buildings.	1,641	4,059	–	920
Roads, burial grounds, churches, &c.	15,983	39,535	2	550
Rivers, lakes and streams	6,385	15,794	–	96
Royal forests, waste land, &c.	4,282	10,592	–	48
TOTAL	356,994	883,065	1	484

The sixth district, Lesparre, or Médoc, contains 56,228 hectares, or 139,086 acres, 1 rod, and 484 yards, divided thus:

	Hectares.	Acres.	Rods.	Yards.
Corn land, gardens, orchards, &c.	16,077	39,768	1	242
Pasture land	5,536	13,693	3	871
Vineyards	9,322	23,058	3	242
Woodland	6,566	16,241	3	534
Landes (heath), commons, &c.	13,006	32,171	3	338
Ground occupied by country houses and agricultural buildings.	364	900	1	676
Roads, burial grounds, churches, &c.	2,050	5,070	3	727
Rivers, lakes, streams, &c.	3,307	8,180	1	484
TOTAL	56,228	139,086	1	484

Total of the above: 596,787 hectares, or 1,476,220 acres, 2 rods, and 816 yards, forming the part of the department which has already been surveyed. There yet remains to be surveyed throughout the department 329,721 hectares, or 815,602 acres, 1 rod, and 1,114 yards, divided thus:

	Hectares.	Acres.	Rods.	Yards.
Arable land, &c. &c.	67,630	167,290	2	48
Meadow land	22,637	55,995	–	1,016
Vineyards	62,143	153,717	3	192
Woodland	38,783	95,934	–	930
Navigable canals, &c.	2,600	6,431	1	720
Landes (heath), &c.	111,131	274,895	–	920
Building ground, &c.	2,169	5,365	1	48
Roads, &c.	12,726	31,479	–	1,016
Rivers, &c.	7,496	18,542	–	1,016
Royal forests, &c.	2,406	5,951	2	48
TOTAL	329,721	815,602	1	1,114

Grand total: 926,508 hectares, or 2,291,823 acres, and 720 yards.

It is to be observed, that the maps contain 1,080,000 hectares; but this includes the sand hills and sea shore, which do not form part of the above enumerations.

4. At least two-thirds of the uncultivated land in the department might be rendered productive, and the great part of that might be rendered very productive.

5. In the 926,508 hectares, or 2,291,823 acres, 720 yards contained in the department, 190,038 hectares, or 470,080 acres, 2 rods and 726 yards, are employed in arable and garden land, and 63,609 hectares, or 157,344 acres, 2 rods and 552 yards in pasture land.

6. The soil of this department may be divided into four qualities, as follows:—

Land of 1st quality yields 16 for one in wheat.
of 2d - ditto 12 - ditto.
of 3d - ditto 12 for one in rye.
of 4th - ditto - 9 - ditto.

There are five principal kinds of soil:—1st, Meadow land, rich loam; 2d, Gravel of white quartz; 3d, White sand; 4th, Chalk and black sand; 5th, Black and white sand, similar to Bagshot-heath. The divisions are so small and intermixed as to render an accurate statement of the quantity of each impossible. On the whole there may be an equal quantity of each.

7. In the districts of Médoc and Blaye the land is generally cultivated by the proprietors alone. The extent of properties are either very large or very small, owing to the division of estates which takes place at the death of the owners.

8 and 9. Throughout this department the system of farming, as practised in England, is very rare. In place of this the following system, when the land is not cultivated by the proprietor alone, is almost universally adopted:

A certain quantity of land, which is called a "Métarie," is given by the proprietor for a term of years to a competent person, called a "Métayer," under these conditions: The proprietor finds a habitation with all the necessary appurtenances. He finds the cattle necessary for the labour of the land, as well as the implements. Generally he finds manure, and the first years all the necessary seeds. All other expenses are at the charge of the "Métayer." A sufficient quantity of the produce is first set apart for the following year's seed, and the remainder is divided between the proprietor and the métayer. The above applies to arable land. Wherever cattle, sheep, &c. are bred, their produce is divided between the two parties.

The extent of these "Métairies" varies according to the number of the family of the métayer, and the nature of the soil, from 65 journaux (52 statute acres) to 30 journaux (24 acres), for the métayer generally endeavours to cultivate the land he holds, without the help of hired servants or labourers.

Average land producing rye ought to be worth to the métayer 7 francs (5 *s.* 7 *d.*) per journaux (four-fifths of an acre); that producing wheat 25 francs (1 *l.*) per acre.

The only land farmed is meadow land, situated in the lower part of Médoc, called "Bas Médoc," and a part of the district of Blaye, which is let, at an average, 80 francs (3 *l.* 4 *s.*) the journaux (four-fifths of an acre).

10. Oxen, horses and sheep. Oxen in general are more numerous than horses, except in the district of Lesparre, where the number of each is nearly equal. Oxen throughout this part of France are principally used for agricultural purposes. The system of stall feeding is little used, except in the district of La Réole. Large flocks of sheep, and herds of young oxen, are fed on the landes, or waste heath.

11. Wheat chiefly, then rye, millet-seed, Indian corn, oats, beans and peas.

12. The best wheat land gives 10 hectolitres per journaux, that is, three quarters and four-sevenths per four-fifths of an acre.

The worst three hectolitres (1 ¼ quarter per four-fifths of an acre,) or one journal.

Rye gives six hectolitres per journaux (2½ quarters per four-fifths of an acre).

Oats sometimes 25 hectolitres per journaux (8 quarters and 13-14ths, per four-fifths of an acre).

13. On old pasture lands the soil is turned up, and after being twice ploughed wheat is sown. The following year potatoes or oats; the third, fallow. In the landes, two crops are produced yearly, one of millet and one of rye or Indian corn; the land is manured, but never suffered to remain fallow. At La Réole, wheat is succeeded by Indian corn or maize, carrots or potatoes. It is necessary to remark here, that the science of agriculture is little known or practised in this part of France. All the attention has been directed to the cultivation of the vine, which excels that of any other part of France.

14. The rent is paid in the value of one-half or a third, according to the quality of the land. It is never paid in money, except the meadow-land.

15. The land tax, "foncier," the "centimes additionels," rates for roads, churches, &c. They are levied in money, except for the road rates, which may be paid either in money or by labour on the roads.

16. The farmer, or métayer, unless by some particular agreement with the landlord, is only subject to the "impôts personnel et mobilier," which are taxes levied in proportion to his situation and means, on his own person as head of the family, and on his household furniture and utensils.

17. It varies, but the new laws tend to regulate it. On this subject there is a great confusion in the French legislature, an absolute anarchy resulting from the vast number of laws, and the number and insufficiency of the jurisdictions.

18. With

18. With the exception of grain, all articles are subject to tolls, or "droits d'octroi," too multiplied and too exorbitant. The towns being poor in consequence of the spoliations incurred during the Revolution, spoliations that have been all to the profit of the State, and which has retained for its own profit those duties of which the towns had been deprived, continue through a false policy to maintain and favour those duties which create revenues for themselves, but which greatly injure both the agricultural and commercial interests.

All towns containing above 1,200 souls may establish an "octroi," or petty custom-house.

19. In Bordeaux the average price of meat is:

Beef	12 *sous* per pound	6*d.*	17 oz.
Mutton	12 —	6	–
Veal	14 —	7	–

In the rural districts:

Beef	7 —	3½	–
Mutton	10 —	5	–
Veal	9 —	4½	–

Pig meat varies everywhere from 8 *sous* to 12 *sous* a pound, 4*d.* to 6*d.*

Bread - - 3 *sous* per pound 1½

20. This depends upon the quality of the land. The "métayer," as has been before mentioned, seldom undertakes more land than he with his children can cultivate. A small average "métairie," say 30 acres, requires two men, a woman and child, with a pair of oxen.

In the district of Médoc, where the culture consists almost wholly of vines, and where the proprietor holds all his land, he divides his property into "prix faits," portions of land consisting of 8 journaux, about 6½ acres, the labour of which is done by a man, his wife and a child. This man is called a "prix faiteur" (Anglice, "fixed price man"). His employment is the dressing, pruning, &c. &c., of the vine. In addition to this man, an ox-driver, called a "valet," is required, who with a pair of oxen suffices for the ploughing of two "prix faits," 16 journaux, about 13 statute acres. In the district of Bordeaux, where the vines are cultivated solely by the spade, and where no ploughing is required, two men, with their wives and children, undertake the cultivation of 20 journaux of vine, about 16 acres. Sometimes, however, extra aid is given them by the proprietor.

21. The wages of a "prix faiteur" in Médoc are as follows:

	Francs.	£.	*s.*	*d.*
He earns annually in money	425	17	–	–
In addition he receives four hogsheads of piquette, valued at 25*f.*, and wood for fuel, valued at 30*f.*	55	2	4	–
	480	19	4	–
The wife and child earn annually	198	7	18	5
TOTAL	*F.* 678	£. 27	2	5

He is lodged and has a garden, which may be valued at 60*f.*, 2*l.* 8*s.*, per annum.

During the vintage, which lasts about three weeks, the whole family is fed by the proprietors on the very best food, butchers' meat, vegetables, salt fish, wheaten bread and piquette.

The wages of an ox driver (married) are:

	Francs.	£.	*s.*	*d.*
He receives in money annually	135	5	8	–
Fourteen hectolitres of rye, at 13*f.* (38½ bushels)	182	7	5	7
Four hogsheads piquette 25				
Wood for fuel 30				
	55	2	4	–
	372	14	17	7
His wife and child earn annually, as those of the "prix faiteur," say	198	7	18	5
TOTAL	*F.* 570	£. 22	16	–

He is lodged, and has a garden of the same value as the "prix faiteur," say 60*f.*, or 2*l.* 8*s.*

The whole family is fed during the vintage.

Wages of an unmarried "valet:"

	Francs.	£.	s.	d.
He receives in money, per annum	135	5	8	–
For board at the "maitre valet," head ox-driver*	45	1	16	–
Seven hectolitres rye, at 13*f.* (19¼ bushels)	91	3	12	9
Four hogsheads piquette – 25				
Wood for fuel – 30				
	55	2	4	–
TOTAL	*F.* 326	£. 13	–	9

He also receives 1 lb. soap, 1 lb. eating oil, and 100 sardines (salted and dried fish) annually.

He is lodged, and during the vintage is fed.

The wages of a day labourer in the corn districts are – 1*f.* 25*c.* 1*s.*
In the vine districts – 1*f.* 60*c.* 1*s.* 3½*d.*
Those of a woman or child – 50*c.* to 75*c.* 5*d.* to 7½*d.*

22. Yes; about one-fourth.

23. When by the year they are always lodged, but not boarded; when by the day they are neither boarded or lodged.

24. Throughout the department, except in that portion called the Landes, the labourer generally eats wheaten bread and wholesome food, such as vegetables and pulse, but seldom butchers' meat. Their drink consists in wholesome water, except in the vine districts, where they drink wine and piquette, a beverage made from the residue of the grapes and the lees of the wine after it has been drawn off, over which water is poured.

In the Landes the labourer's fare is by no means as good: it consists in rye bread, a species of soup made of Indian corn, flour and millet; rarely if ever butchers' meat. Sometimes he adds to his bread a bad sardine, a small fish of the herring species, salted and dried. His only beverage is water, which is very bad, being almost always stagnant.

The lives of these people are short, seldom exceeding 55 years.

In the neighbourhood of the "Basin d'Arcachon," and near the lakes, the peasant's food is somewhat better, as he is able to procure fish and shell-fish. It may, however, be safely said, that the principal food of the labourers in this department consists in bread, either of wheat or rye.

25. The women work on the land nearly in the same proportion to the men, though of late there has been a great amelioration in this respect. They have few profitable employments. Spinning is their principal in-door occupation; the spinning-wheel, however, is hardly known among them; the distaff is the only method they know. Coarse knitting is also one of their employments.

26. One in 410.

27. 1,400 to 1,500*f.*, 56 *l.* to 60 *l.*

28. Wood is the only fuel used in this department, derived chiefly from the woods, which are gradually diminishing in extent. In the vine districts, the fuel of the peasantry consists principally in the cuttings of the vines and in the old wood used for the purpose of training them, together with faggots of fir branches. A great part of the country produces excellent peat, but it is never employed.

The yearly value of fuel for a labourer with wife and child averages about 30*f.* to 35*f.*, 1 *l.* 4*s.* to 1 *l.* 8*s.*

29. The price of the usual clothing used by the labouring population, is as follows:—

Linen – 2*f.* 25*c.* per ell or 1/10
Cloth – 4*f.* — – 3/2½
Flannel, drugget – 4*f.* to 6*f.* — – 3/2½ to 4/10

These articles are generally obtained by the exchange of carded wool or flax, of which latter a provision is made by nearly all the peasantry, who either cultivate it or buy it.

30. Manufactures in the department of the Gironde:—

Woollen.—One manufactory by machinery for making woollen blankets, employs from 80 to 100 hands, and uses about 40,000 lbs. of wool annually.

A manufactory of flannel, employing about 30 hands, and using about 40,000 lbs. of wool annually.

About 150 hand-looms for making coarse common woollen and mixed stuffs, employing about 700 hands.

Cotton

* All the unmarried ox drivers live at the head ox driver's, called "Maitre Valet," who prepares their food and for which he receives 45*f.* (1 *l.* 16*s.*) a-head annually. This man's wages amount to 300*f.* (12 *l.*) annually, besides the advantages enjoyed by the valet. All medical attendance and medicine is found by the proprietor.

Cotton.—A manufactory for spinning and weaving by steam machinery, containing 120 looms and employing about 200 hands.
Four manufactories for spinning worked by machinery by water, employing about 400 hands.
One spinning and weaving manufactory for blankets.
Two manufactories for making wadding lining.
Five cotton printing manufactories.

Flax and Hemp.—One manufactory for spinning thread by machinery.
Fifteen rope houses, employing 700 hands.

Various.—Fourteen ship-building yards, employing 800 to 900.
Six manufactories of amadou.
One manufactory of ivory black.
Six breweries of beer.
Two manufactories of sulphuric acid.
Ten ditto of potash.
Fifty-five tanners' yards.
Six parchment manufactories.
Two gut string manufactories.
Ten glove skin manufactories.
Four pasteboard manufactories.
Six glass-houses, employing about 300 hands.
One floor-cloth manufactory.
Twenty-one sugar refiners.
Sixteen manufactories of turpentine.
Sixteen hat manufactures.
One hundred and sixty tile-kilns, employing about 500 hands.
Sixty potteries, employing about 300 hands.
Ten white earthenware manufactories.
Several paper-mills of little importance.

Iron and Metals.—Four founderies, employing about 240 hands.
One large foundery in the Landes, capable of working any size.
One foundery and steel manufactory, employing 40 to 50 hands.
One foundery for the manufactory of steam-engines and chain cables.
Three small founderies, employing about 20 hands.
Four - ditto - copper, employing about 30 hands.
Two shot manufactories.
One copper rolling machine.
One lead ditto - ditto.
One manufacture of zinc.
Two letter-press founderies.
There are sundry other manufactories in the department, but of little importance.
At Bordeaux, a manufacture of tobacco, belonging to government.

31. Paupers, generally speaking, are not very numerous in this part of the country, for the population being so small, every person who is able and willing to work can always find employment. No legal provision is made for the paupers. In the town of Bordeaux there exist local institutions for the relief of the paupers, such as the "Bureaux de Charité" (offices for charity); these, however, are insufficient, owing to the want of means, for the purpose to which they are destined. The "Depôt de Mendicité" (a kind of work-house), supported by private contributions, is worthy of notice as having been the means of suppressing to a very great extent street begging. Since its institution in 1827, the number of professional beggars has decreased from 700 or 800, to 150 or 200; the average population of the establishment amounts to 350, of which number not above 50 are professed beggars.

Begging is forbidden, and beggars are taken up and confined in the Depôt de Mendicité, where they are obliged to work.

In the rural parishes, paupers are entirely dependent on private charity; the consequence is, that though many will beg when an opportunity occurs, there are few who make it their profession.

32. The condition of the farmer is not generally prosperous; capital is wanting. That of the proprietor is likewise far from prosperous from the same cause. The day labourer alone appears to be well off, especially in the neighbourhood of Bordeaux, and the district of La Réole.

T. B. G. Scott.

FRANCE
No. 9.

Mr. Consul Harvey to Viscount Palmerston.

— No. 9. —

Mr. Consul *Harvey* to Viscount *Palmerston.*

My Lord, Bayonne, June 4, 1834.

I BEG leave to enclose herewith, the Report relative to the State of Agriculture, and the Condition of the Population within the districts of this Consulate.

I have, &c.

(signed) *J. V. Harvey.*

Enclosure in No. 9.

No. 1 to 5.—DEPARTMENT of the Lower Pyrenees, comprising the five Districts of Pau, Oloron, Mauléon, Bayonne, Orthéz, situated between 42° 45′ and 43° 32′ North Lat., and 3° 15′ and 5° 7′ West Long., Meridian of Paris.

Table in Answer to Queries 2, 3, 4 and 5.

* The hectare is calculated at two and a half English acres, of 4,840 square yards each.

† Nearly the whole of the uncultivated land might be rendered productive, even to the summits of the mountains; but besides the mountain lands there is an ancient and mistaken custom of reserving a certain proportion of land on each farm in an uncultivated state, for litter and other farming purposes. The chief obstacle to the cultivation of the waste lands is the expence of the buildings that would be required for each 20 or 30 acres, the average size of each farm which ancient custom has established.

Number of houses in the department, 71,554; mills in ditto, 1,760. The revenue of the department from the land subject to taxation is, 9,756,355*f.*; ditto in buildings, 2,208,316*f.* Total revenue of the department, 11,964,671*f.*

6. The general quality of the soil is of a good earthy substance.

7. The land is in general cultivated by the proprietors, each property or farm consisting of from 20 to 40 acres; there are, however, properties consisting of several farms, but which are invariably let separately, and in farms of from 20 to 40 acres, as before stated; and although a person during life-time may become the proprietor by purchase or otherwise of several farms, on the demise of such person, by the laws of France, the property must be equally divided amongst the children (or in default, amongst the nearest of kin), with a trifling advantage to the first born, whether male or female, and thus the division of landed property is perpetuated.

8. The size of the largest farms which are rented seldom exceed 40 acres, and the rent is paid in kind, that is, by the equal division of the produce, besides a tithe or tenth part of the whole for the proprietor.

9. Taking into account (from the territorial situation of this department), the frequent destruction of the crops by hail storms, the average annual produce in revenue per hectare (measuring, within a trifle, two acres and a half English), is as follows, viz.: Wheat, Indian corn and other grain, 30*f.*; vineyards ditto, 30*f.*; garden land, 49*f.* 50*c.*; meadow land, 31*f.*; pasture, 5*f.* 50*c.*; waste land, 2*f.* 32*c.*; chesnut wood, 15*f.* 57*c.*; coppice wood, 5*f.* 50*c.*; forest grown wood, 10*f.* 56*c.*; verge wood (rods), 20*f.*

10. The stock fed on pastures, sheep 200,000, besides horned and other cattle in considerable numbers, but of which no exact report has yet been received.

11. The proportions of the different kinds of grain cultivated in the department are, viz.: wheat, 620,000 hectolitres, or Winchester quarters of eight bushels, 221,427; Indian corn, 700,000 hectolitres, or Winchester quarters, 250,000; rye, 16,000 hectolitres, or Winchester quarters, 5,714; barley, 36,000 hectolitres, or Winchester quarters, 12,857; oats, 16,000 hectolitres, or Winchester quarters, 5,714. Beans, haricoes, &c., in small proportions. Wheat, rye, barley and oats, are imported from other departments.

N. B.—Two hectolitres and four-fifths, measure a Winchester quarter of eight bushels.

12. The average quantity of grain produced on a hectare, or on two and a half English acres is, on land of the first quality, viz.: wheat, 10 to 12 hectolitres; Indian corn, 25 to 30 hectolitres; rye, 12 to 15 hectolitres; oats, 15 to 18 hectolitres. On land of an average quality, viz: wheat, 4 to 5 hectolitres; Indian corn, 8 to 10 hectolitres.

13. The different kinds of seeds are usually sown in the following rotations, viz.: two crops of Indian corn, one of wheat, and three years fallow (friche), during which time it is used as pasture and natural meadows.

14. The rent is generally paid in kind.

15. The cultivated land is subject to a fisc, or an average tax of 3*f.* 65*c.* per hectare (or 1*s.* 2*d.* per acre), and is paid either by the proprietor or farmer, according to agreement, to the tax-gatherer.

16. The proprietor and farmer are also subject to personal tax, the window and door tax, and furniture tax.

17. There is no proportion of the taxes which are levied on the proprietor or farmer specified for the relief of the poor, or for religious purposes.

18. The articles subject to tolls (octroi) on entering towns, are wines, spirits and butchers' meat, also every other article of consumption, excepting grains, and although the toll is trifling, it is attended with much vexation and inconvenience; wine is taxed about six sols per gallon, butchers' meat four sols per lb. of 16 oz.

19. The price of butcher's meat and other articles of food, per lb. of 16 oz., French, viz.: beef and veal, 7 ½ sols; mutton, 8 sols; pork, 12 sols; ham, 12 sols; lard, 16 sols; bread in ordinary use, 2 sols; Indian corn bread, 1 ½ sols; salt fish, 8 sols.

20. The families on each farm consist on an average of five or six persons, which in general suffice for the cultivation, and the neighbours assist each other.

21. When labourers are called in, they receive from one franc to one franc five sols per diem without food, and when boarded and lodged they are paid about half that sum, say 12 sols per diem.

22. It does not appear that the harvest causes any difference in the amount of wages or price of labour.

23. The labourers are not usually lodged and boarded with the farmers.

24. The usual food of the farmers and labourers is vegetable soups, pork, bacon, salt fish, and invariably Indian corn bread, home baked, and seldom or ever butchers' meat.

25. The women work on the land; they spin when not at work, or are otherwise occupied in the care of their families.

26. The proportion of men annually called upon for military service, is about one in a thousand.

27. The price of a substitute is from 1,300*f.* to 1,400*f.*, for a service of seven years.

 28. Wood

FRANCE. No. 9.

(Enclosure.) Answers to Queries.

28. Wood fuel is always used, and is derived from the department, each farm furnishing a sufficiency; in the towns the price is from 7*f.* to 8*f.* the stare or mètre cube.

29. The articles of clothing worn by the labourers and country people, are much cheaper than those worn by persons of the same class in England: for instance, the round cloth cap (berret), price from 2*f.* 50 *c.* to 3*f.*, and which will last for two or three years; a pair of wooden clogs, 10 sols, which will last a season, besides the advantage of preserving the people from colds and other diseases; the women also wear clogs, and their head dress, a plain coloured handkerchief, price 1*f.*; they also make use of large flat straw hats, to guarantee them from the sun and wet weather, the price about 15 sols; Sundays and fêtes, and on entering the towns, they always wear leather shoes, but the berret and handkerchief are always worn.

30. There are not any manufactories in the department of any note.

31. Paupers are not numerous, to which may be attributed the present equal division of the land; there is no provision for paupers, excepting private charity and relief; there are public hospitals for the sick only.

32. The general condition of the occupiers (particularly those who are owners) of the land; although not prosperous, they are enabled to earn a respectable livelihood for themselves and families.

— No. 10. —

No. 10. Mr. Consul Turnbull to Viscount Palmerston.

Mr. Consul *Turnbull* to Viscount *Palmerston*.

British Consulate, Marseilles,
March 6, 1834.

My Lord,

I HAVE the honour of enclosing herewith my Replies to the Queries relating to the State of Agriculture, &c. transmitted to me by your Lordship's directions in the Circular Despatch dated November 26, 1833.

I have, &c.
(signed) *Alex. Turnbull.*

Enclosure in No. 10.

(Enclosure.) Replies to Queries.

REPLIES of *Alex. Turnbull*, esq. His Majesty's Consul at Marseilles, to the annexed Queries, relating to the state of Agriculture, &c.

R. 1. The information I give, as follows, is relative to the whole department of the mouths of the Rhône.

2. The total population of this department is 359,473 inhabitants, whereof 140,000 is the rural population, including therein that of the smaller villages dependent upon agriculture, and 219,000 the population of the towns.

3. The quantity of land in this department is 510,000 hectares=1,275,000 acres, which may be divided as follows:

Land in cultivation - - - - -	209,000 hectares	=	522,500 acres.
Incapable of culture - - -	193,000 hectares		482,500 acres.
Marshes and swamps - - -	47,000 hectares		117,500 acres.
Woodland - - - - - - -	61,000 hectares		152,500 acres.
	510,000 hectares		1,275,000 acres.

4. I presume very little, but I cannot answer this question with certainty.

5. The cultivated land may be divided as follows:

Arable - - - - - - - - -	105,000 hectares	=	262,500 acres.
Meadow - - - - - - - -	16,000 hectares		40,000 acres.
Vines - - - - - - - - -	60,000 hectares		150,000 acres.
Olive Trees - - - - - -	24,000 hectares		60,000 acres.
Garden and pleasure grounds -	4,000 hectares		10,000 acres.
	209,000 hectares.		522,500 acres.

6. The replies to Nos. 3 and 5, answer in great measure this question; to which I will add, that the nature of the soil in the commune of Marseilles is a mixture of chalk and clay, and at least half the district is covered by very compact calcareous mountains.

7. The

7. The extent of the properties differs much in the three arrondissements of this department; in that of Marseilles the properties are the most divided; they are about 8,000 in number, on an average of 3 hectares=7½ acres each; in the arrondissement of Arles, the average extent is at least 50 hectares=125 acres; and in that of Aix, they may be considered as a medium between the two; in the whole department there are estimated to be 3,595 proprietors of the larger class, who do not themselves cultivate their property, and 13,521 proprietors who do.

8. The size of the *larger* farms may be gathered from the preceding reply: the conditions on which they are let are generally for a fixed rent, payable in money, and sometimes in a certain fixed quantity of corn or other produce; the latter usage was adopted at the time of the great depreciation of money, during the French revolution. The duration is generally 3, 4, 6 to 9 years. The majority of the farms in this department, consequently those of the *smaller* extent, are let upon the system of dividing with the tenant the produce of the soil in the following proportions: half of the corn, oil and vegetables, and one-third of the wine, being the portion of the farmer; the landlord provides what manure may be necessary, and the tenant the whole expense and labour of the culture.

9. I cannot answer this question with any precision; the general result, however, may be collected from the facts, that in the neighbourhood of Marseilles land is very dear, and seldom gives above three per cent., in the other arrondissements four to five per cent.

10. Generally speaking there is no stock fed on the pastures, the whole produce of the meadows being reserved for forage.

11. Of the arable land, wheat is cultivated to the extent

Of	- - - 44,000 hectares	=	110,000 acres.
Oats about	- 4,600 hectares	-	11,500 acres.
Rye	- - - 3,000 hectares	-	7,500 acres.
Barley, very little.			

12. In best lands and in large farms wheat gives 10 for 1; in small farms 12 for 1; poor lands do not give more than 4 for 1; the average may be 7 to 8 for 1; much, however, depends on the quantity of manure, of which all the lands require a good deal.

13. The system of cultivation varies so much, according to the nature of the soil, and the knowledge and experience of the cultivator, that it is impossible to give any general idea upon the subject.

14. This question is replied to in my answer to No. 8.

15. The sole tax to which the proprietor of the soil is subject, *as such*, is the land-tax, which is levied on the estimated income of each property, and paid in money; the sum to be raised in the mass is previously fixed, and then divided among the landholders, and the average result may be from 10 to 12 per cent. on the income of each property; but from the difficulty of ascertaining the net annual value of the soil, and of following up the improvements and deteriorations that the land may undergo, it is levied very unequally; it is levied by the government officers; the other taxes are the same as those paid by the inhabitants of towns.

16. The farmer, *as such*, is subject to no rate or taxes whatever; if the furniture of his house is his own, he pays about 7 per cent. on the presumed rent of the house he lives in, as the inhabitants of a town would do.

17. No proportion of the taxes levied on the proprietor or occupier is for the direct relief of the poor, or for religious purposes; those expenses are provided for by the general departmental and communal budgets.

18. The tolls on articles of consumption (called in French Droits d'Octroi) on entering the town of Marseilles are very numerous; but the principal are the following:

	f.	*c.*		*s.*	*d.*	
Oil	from 1	50	per hectolitre =	–	5⅛	per gallon.
Wine	2	40	—	1	8	—
Flour	–	75	per 100 kilogrammes	–	3½	per cwt.
Oxen	25	–	per head	19	10	per head.
Calves	10	–	—	7	11	—
Sheep	1	75	—	1	4½	—
Hogs	15	–	—	11	10¾	—

These tolls vary in each town; they are established by the municipal council for the sole expenses of the town.

19. Butcher's meat generally costs 20 sous per kilogram. (4 ½ *d.* per lb.); wheat bread, first quality, 8 sous per kilogram. (1 ¾ *d.* per lb.), second quality, 6 sous per kilogram. (1 ¼ *d.* per lb.) Common wine in the country, 3 to 4 sous the litre, (1 ¼ *d.* to 1 ¾ *d.* per quartern;) towns, 5 to 6 sous the litre, (2 ¼ *d.* to 2 ¾ *d.* per quart.)

20. To this question I have no means of giving any direct reply; the proportion must be extremely uncertain, arising from the varieties of the soil, and the kind of agricultural implements that may be used.

FRANCE. No. 10. (Enclosure.) Replies to Queries.

21. The wages of the farming servants depend necessarily on their respective services; of those engaged by the year, with board and lodging, a good labourer would obtain 6 *l.*, 8 *l.* and 9 *l.* a year; a good shepherd, 10 *l.* to 12 *l.* a year. Women servants employed in agriculture, 3 *l.* to 6 *l.* Of those engaged by the day without food or lodging, a common labourer, 1 *s.* 3 *d.* to 1 *s.* 6 *d.* per day; a gardener, 2 *s.* to 2 *s.* 6 *d.* per day; a labourer with a horse or mule, 4 *s.* to 5 *s.* per day; a mower, 2 *s.* 6 *d.* to 3 *s.* per day. The wages are always paid in cash.

22. Generally speaking, the difference in time of harvest is, that the day labourers get their food in addition to their wages.

23. Sometimes one mode, sometimes the other, as may be seen in the answer to No. 21.

24. Their food is usually composed of vegetables, bread, and farinaceous substances, made into soup, or otherwise prepared; sometimes salt fish, and meat only on Sundays; their drink is piquette, a kind of inferior wine. They are very sober, and abstain from spirituous liquors. The bread is in most cases very good.

25. The women in the country are generally employed in the lighter labours of agriculture, the care of animals, and domestic services.

26. During the 10 years, from the restoration of the Bourbons until 1824, the average number was about 400; and I believe that it continued nearly at that point until the revolution of 1830; since that time the wants of the state have been very great, and the average annual number may be near 1,160; but if peace continues, it will probably fall down to what it was before 1830.

27. The usual price paid at the insurance offices against being drawn is, 700 *f.* to 800 *f.*, or 28 to 32 *l.*; when the individual is drawn, the price at which a substitute may be procured varies from 1,200 *f.* to 1,800 *f.*, or 50 *l.* to 60 *l.*; this of course applies to a time of peace.

28. Wood is the principal fuel, brought from the country and from Corsica; the average price is 45 sous per 100 kilograms. 10¾ *d.* per quintal.

29. A labouring man would pay for a jacket, waistcoat and pantaloons, of cloth, 60 *f.*, (48 *s.*); a strong pair of shoes with nails, 9 *f.* (7 *s.* 6 *d.*); a white or blue shirt of linen, 5 *f.* (4 *s.* 2 *d.*) Being ignorant of the prices in England, I cannot reply to the second part of this question.

30. The principal manufactures in this district are situated at Marseilles and its neighbourhood, and are far too numerous to be specified in this reply. I will therefore mention the following as being those of the greatest importance: soap, sugar refining, salt, tanning, all chemical productions, preparations of wine, and other liquors, for exportation, hat-making, refinery of sulphur, rope making, coopering, cotton twist, salaisens, &c.

31. Paupers are numerous at Marseilles, as is generally the case in large and populous towns; it is calculated that the number of beggars who live permanently in this department are about 1,000, which makes one in 300 of the whole population; there are no special provisions for the support of the poor in general, or for the relief or suppression of mendicity.

32. As far as I can ascertain, it is prosperous rather than otherwise.

British Consulate, Marseilles, 28 February 1834. } *Alex. Turnbull,* Consul.

— No. 11. —

No. 11. Mr. Consul Turnbull to Viscount

Mr. Consul *Turnbull* to Viscount *Palmerston.*

My Lord, British Consulate, Marseilles, 9 April 1834.

I HAVE the honour of transmitting herein to your Lordship the information required by the despatch of the Under Secretary of State, of the 25th March, being a supplement to that already furnished by me, in reply to the Queries on the state of Agriculture, &c.

I have, &c.

(signed) *Alex. Turnbull.*

Enclosure in No. 11.

SUPPLEMENT to the REPLIES to the Questions on Agriculture, &c., forwarded by *Alex. Turnbull*, Esq., His Majesty's Consul at *Marseilles*.

Query 1.

STATE the number and names of the districts and parishes (communes) within your consulate?

Answer.

The department of the Mouths of the Rhone is divided into three arrondissements; viz. Marseilles, Aix, Arles.

The arrondissement of Marseilles is divided into nine cantons, and those subdivided into 16 communes, as follows:

CANTONS.	COMMUNES.	CANTONS.	COMMUNES.
Marseilles - (six cantons)	Marseilles. Allanch.	La Ciotat - (*continued*)	Ceyreste. Roquefort.
Aubagne -	Aubagne. Cujes. Gemenos. De la Penne.	Roquevaire -	Roquevaire. Auriol. Belcoderre. Greasque. Perpin. Saint Savournin.
La Ciotat -	La Ciotat. Cassis.		

The arrondissement of Aix is divided into 10 cantons, and those subdivided into 58 communes, as follows:

CANTONS.	COMMUNES.	CANTONS.	COMMUNES.
Aix - - (two cantons)	Aix. Equilles. Meyreuil. St. Marc de Jaumegarde. Tholonet. Vauvenargues. Venelles.	Martignes -	Martignes. Carri le Rouet. Châteauneuf. Gignac. Marignane. Saint Victoret.
Berre - -	Berre. La Fare. Rognac. Velaux. Ventabren. Vitroles.	Peyrolles -	Peyrolles. Jonques. Puy Ste Reparade. Meyrargnes. St. Paul lez Durance.
Gardanne -	Gardanne. Albertas. Cabrics. Mimet. Pennes. Septemes. Simiane.	Salon -	Salon. Aurons. Cornillon. Grans. Labarden. Lançon. Miramas. Pelissarre.
Istres - -	Istres. Fos. Saint Chamas. Saint Mitre.	Trets - -	Trets. Beaurecueil. Châteauneuf le Rouge. Fuveau. Peynier. Puyloubier. Roques Hantes. Rousset. Saint Antonin.
Lambesc -	Lambesc. Charleval. La Roque d'Antheron. Rognes. Saint Cannat. Saint Esteve Janson.		

FRANCE.
No. 11.

(Enclosure.)
Supplement to Replies to Questions.

The arrondissement of Arles is divided into eight cantons, and those subdivided into 32 communes, as follows:

CANTONS.	COMMUNES.	CANTONS.	COMMUNES.
Arles - - (two cantons)	Arles.	Organ - -	Organ.
	Fontvicille.		Cabannes.
	Mas Blanc.		Eygalieres.
			Eyragues.
Château Renard	Château Renard.		Molleges.
	Barbentane.		Saint Audiol.
	Graveson.		Senas.
	Noves.		Verquieres.
	Roquonas.	Saintes Maries	Saintes Maries.
		Saint Remi -	Saint Remi.
Eyguieres -	Eyguieres.		Des Baux.
	Allcius.		Maillane.
	Aureille.		Maussane.
	Lamanon.		Mouries.
	Mallemort.		Paradon.
	Vernegues.	Tarascon -	Tarascon.
			Boulbon.
			Mezoargues.

2. Furnish some data by which Lord Palmerston can judge what proportion the number of men drawn for military service (40,041,160) bear to the male population?—The information here required will be found fully detailed in the following table, that I have compiled from the most accurate sources in my power:—

YEARS.	Number of Years.	Average Number of Men raised each Year by the Conscription.	Average Amount of the Population of the Department	Proportion of Male to Female Population.	Average Amount of Male Population.	Proportion of the Levies to the Male Population.
1816 to 1829	14	397	320,000	17 to 16	164,850	$\frac{1}{415}$
1830 1831	2	1,166	326,302		168,095	$\frac{1}{144}$
1832 1833	2	632	359,473	- -	185,183	$\frac{1}{293}$

I beg further to remark, that as this department is on the coast, it is subject to the operations of the "inscription maritime," or registry of seamen; and such of the above conscripts as have, previously to the ballot, engaged in a seafaring life, and are inscribed in the registry, do not, when drawn, join the military, being already destined by their inscription for the naval service of the state. Of the number of these conscripts I have not been able to obtain any return; but I have been informed on good authority, that the annual average number has been about 90.

The difference in the amount of the population between the years 1831 and 1832 arises from the circumstance of a new census having been taken and put in force on the 1st of January 1832.

British Consulate, Marseilles,
9th April 1834.

Alex. Turnbull, Consul.

— No. 12. —

Mr. Consul *Palmedo* to *John Bidwell*, Esq.

Mr. Consul Palmedo to John Bidwell, Esq.

Sir, Bastia, January 5th, 1834.

I HAVE the honour to enclose my Answers to the Queries transmitted to me in your circular of the 26th of last November, relating to the state of Agriculture and the condition of the Population within the district of this consulate.

M. Robiquet's "Statisque de la Corse," a manuscript of which has been rewarded with a prize by the French Academy, and which I am told has been recommended by the Minister of the Interior as a model to other departments, remains hitherto unpublished. But I have cause to believe that even with such an assistance my answers would still have remained defective in accuracy and comprehensiveness.

I have, &c.

(signed) *A. Petri Palmedo.*

Enclosure in No. 12.

ANSWERS to Queries.

(Enclosure.) Answers to Queries.

Answer 1. CORSICA, which forms one of the departments of France, contains five "arrondissemens," or districts, viz. those of Bastia, of Calvi, of Corte, of Ajaccio and of Sartene. The three first contain the north-eastern and greater part of the island, and were formerly called "département de Golo;" the districts of Ajaccio and Sartene, formerly called "département de Liamone," contain the south-western, lesser, and less cultivated part of Corsica.

Correct statistical information regarding the whole or the parts is hitherto difficult to gather; deficiencies and irregularities are here still too often inseparable, from the nature of the subject; and where the concise method of presenting a clear answer in numerical tables is aimed at, either assistance is nowhere to be met with, or in estimates founded on some imaginary base, or on returns badly executed by the incapacity and indolence of the inferior agents. Whilst I, therefore, may aver the general truth of the following answers, I avow my doubts on many of the numeral quantities or proportions therein expressed.

The occurring measures and currency of the island are reduced as follows, mostly according to the calculation of the Board of Longitude of Paris.

Mètre - -	= 3.281 English feet.	Kilogramme -	= 2.205 Eng. lbs. avoirdupois.
Hectare - -	2.4736 acres.		
Average mezzinata	0.5987 acres.	Metrical quintal -	220½ —
Hectolitre -	22.000 gallons.	Pounds, 2,043 -	2,205
	2.751 bushels.	25*f.* 20.80 *c.* -	£. 1 sterling

2. POPULATION, (as fixed by "Ordonnances Royales"):—

Arrondissement or District.	No. of Parishes, "Communes."	In 1827.	In 1832.	Of which in the Towns of	In 1827.	In 1832.
Bastia - -	95	56,375	- -	Bastia -		9,531
				St. Florent	-	391
Calvi - -	34	19,895	- -	Calvi - -		1,382
				Ile Kousse -	- -	1,046
Corte - -	111	43,704	- -	Corte - -	-	3,282
Ajaccio - -	71	43,882	- -	Ajaccio - -	- -	8,920
Sartene - -	43	21,223	- -	Sartene - -	- -	2,715
				Bonifacio - -	-	2,944
				Porte Vecchio -	-	1,738
TOTAL - -	354	185,079	195,407	- - -	- -	31,949

From municipal motives the population of the town of Bastia was given too low; it exceeds now 12,500. More than the moiety of the population in towns consist in families wholly or partially depending on and employed in agricultural pursuits.

The population of 1st January 1834 can be but very little short of 209,000 souls, of which in towns about 35,300.

FRANCE. No. 12.

Enclosure.) Answers to Queries.

The tendency to increase of population may be established by the following table, which I collect from official papers:

YEARS.	Population.	YEARS.	Population.	YEARS.	Population.
1740 - -	120,380	1808 - -	165,196	1819 - -	171,539
1786 - -	138,833	1810 - -	166,813	1821 - -	180,348
1790 - -	150,638	1813 - -	170,541	1827 - -	185,079
1792 - -	160,658	1818 - -	171,187	1832 - -	195,407

The irregular progress of these quantities is not solely to be imputed to physical and political vicissitudes, but also to the more or less activity of the too often varying prefects regarding this inquiry, to the incapacity of the "maires," and sometimes to the private and local interest of persons and "communes," especially concerning military conscription. The laudable French regulations on the rolls of birth, marriage and death, ("régistres de l'état civil,") encounter, however, from year to year a more improving application. In the conflict of the very many checks and incitements to population, the latter happily prevail; they chiefly consist in the still working consequences of the secularisation of church and main-morte lands in 1792; in the importation of agricultural experience by returning absentees, and by the press; in an improving security of property since 1816, (with the exception of the years since 1830, to be regarded as years of transition); in the increase, however slow, of capital, principally by the savings of pensioners and absentees; in the establishment of steam-boats from and to Toulon, and, next April, from and to Leghorn. This tendency to increase may be fairly stated at 2,100 a year, or almost at the double of the contingent, of which Corsica should contribute to the average increase of 186,012 for whole France. It is greatest in the district of Bastia, lowest in that of Sartene; it is greater in the principal towns and populous boroughs than in the villages.

Average number of marriages 1,650, of births 7,200, of deaths 5,000. Average proportion of births of legitimate to natural children 68 to 3.

Within 13 years Corsica has three times presented the anomaly of the births of females exceeding that of males, if faith can be given to the returns.

3. The land-roll, (terrier, catasto) of Corsica, commenced 1773 and completed 1793, is not here, but said to be since 1796 in England; an either full or succinct copy is lodged at the War-office at Paris; an extract there taken states in *arpens* the quantity of

Lands not fit for agriculture (forests included) - - -	- 874,612 arp. 35 verges.
— fit, but never cultivated - - - - -	- 576,426 — 50 —
— productive, either yearly or within a series of years -	- 621,402 — 25 —
Surface of Corsica, or Total - - -	2,072,441 arp. 10 verges.

In this statement I have reason to believe that the quantity of uncultivated land is fixed too high; nor am I, on the other hand, inclined to estimate this class to only five twenty-sevenths of the surface, according to the intelligent M. Gueymard. I have hitherto had no means to ascertain the distribution of these quantities among the five districts; the calculation according to their respective population, or number of communes, would be an unfaithful guide. Again, the reduction of the above total into hectares is differently calculated; some give it 874,741 hectares. The reduction of the French War-office in 1804, is

Department de Golo, or districts of Bastia, Calvi and Corte	- 519,301 hectares.
Department de Liamone, or districts of Ajaccio and Sartene	- 461,209 —
Total - - - -	- 980,510 hectares.

By applying this reduction to the above quantities, and adopting the usual estimation of 80,000 hectares of never-measured wood lands, we have, in 1793,

Lands uncultivable, exclusive of forests -	- 333,795	hectares =	825,675 acres.
Land uncultivated, but fit - - - - -	- 272,718	-	- 674,595
Waste land - - - - - - -	- 606,513	-	- 1,500,270
Wood land in about 200 forests, of which 69 royal	80,000	-	- 197,890
Land in cultivation - - - - - -	- 293,997	-	- 727,230
Total Surface - - -	- 980,510	-	- 2,425,390

The

The proportions, if just in 1793 cannot have been essentially altered, as the progresses in agriculture, though undeniable within the last 20 years, have much more tended to augment the number of harvests on the land in cultivation within a given series of years, than to draw waste land into the sufficiently large circle of cultivation.

4. The quantity of waste land which could be rendered productive has (in the third answer) been stated at 674,000 acres, without counting those many thousands contained in the exaggerated estimate of 825,000 of unfit, or rather less fit land. But the prospects of each of these 674,000 acres to be drawn into cultivation vary extremely, according to their soil, declivity, and still more to their situation near roads or more or less advantageous neighbourhood; in general these prospects are distant, not merely from want of population (one person to 12 or 13 acres), but because there is nowhere a tendency to leave the villages and to settle in farms on the lands, and because almost all the lands in what is called cultivation, deserve still a prior application of the little agricultural capital and diligence, in order to be rendered more and oftener productive than they now are, so that they, rather than the waste land, ought to invite home and foreign capital, and industry and a true system of agriculture, instead of the antiquated course with primeval ploughs, without manure, &c.

There exist, however, two sorts of land near the sea, which ought to call upon them the united attention of foreign monied men or companies, and of the French government, viz.: 1. The drainable marshes, incapable to be redeemed by the sole exertions of the Corsicans, and universally agreed to be able to remunerate a prudent management. 2. Extensive and fertile, but unwholesome tracts in the plain, which also demand to be drained, and when so, would not only reward the capital laid out, but also spread salubrity over the adjacent country. The difficulties with respect to both sorts lie not so much in the process of draining, as in the beating the way, how to acquire and purchase those more or less contested soils, and then to secure not merely a legal, but also an undisturbed and neighbourly possession. The success of similar undertakings being of the highest moment for the salubrity and welfare of the entire island, I doubt not that the enlightened French government would powerfully abet any rational trial.

5. The third answer gives 727,230 acres of land in cultivation, which comprehend arable, vine, olive, chesnut, garden and pasture lands. That part of this quantity which about the year 1820 was usually sown in one year, according to the return of the Agricultural Central Society, and the report of the prefet, did not amount to 35,000 hectares, or 87,576 acres. The unquestionable progresses since 1820 are (loosely) estimated to have added 10,000 hectares to the annual seed, so that the land now annually sown

may be	-	112,312 acres.
The arable land not sown, but reposing, after a very loose estimation	-	336,936
In consequence, total of Arable Land	-	449,248

This entire total offers, after the harvest and during the years of repose, more or less good pasture to the live stock, which, besides into these lands, is driven in the Makis (*cf.* 6th answer; tracts covered with shrubs), and on the summits of mountains.

My inquiries give the estimation of land exclusively destined for artificial forage, mostly 'lucerne,' at 2,000 acres.

The most discrepant and unmanageable returns and estimates of the distribution of the remaining 175,982 acres, among the very extensive chesnut woods, large and increasing olive groves and vines, and comparatively too little garden land and orchards (lemons) have not allowed me to fix on any numeric proportion. The insignificant quantity of 2,000 acres of meadows or artificial grass land demands explanation; no kind of live stock, except some gentlemen's horses and mules are fed in stables; nowhere stocks of hay or straw (except at Venaco); there exist indeed an abundance of places irrigable and convertible into meadows, but the old course of husbandry, the extreme distance of the villages, situated on eminent spots from the valleys, the badness or often absence of roads, and the insecurity of (distant) possession, oppose and threaten to oppose for some time, the introduction of a better system; regarding the animals, the driving of the herds and cattle over the lands, besides the thence arising total want of manure, occasions every year numberless trespasses, and these again lawsuits or worse brawls. An Agrarian code, adapted to the island, and of practical enforcement, is a grand desideratum.

6. Corsica is formed of a mountainous chain, running from north to south, with predominant talc in the north and granite in the south; the centre of this chain, Monte Rotondo, is 2,672 mètres, or 8,754 feet high, whilst various other summits almost equal this height. The western coast, exposed to the dominant S. W. winds, is generally rugged; the eastern (and insensibly growing) coast has very often the advantage of plains of an alluvial character; the grand chain is furrowed by numerous small valleys perpendicular to the line of separation of waters, and in consequence mostly running towards east and west.

The plains on the coast, about $\frac{1}{24}$th of the surface, so richly peopled in the time of the Romans, are now mostly abandoned, as historical causes have driven, and physical kept, the population in the interior. This plain land is divided into two classes: 1. *Prati*, or lands very

very wet in the rainy season; they contain the most fertile soil of the island. 2. *Pianure* or *ville*, more or less dry lands, and throughout very productive when cultivated. The proportion of prati to pianure is about one to six in quantity, five to three in fertility. The soil in the mountains and their valleys, about $\frac{23}{24}$ths of the island, is obviously of the extremest variety. The poorest and most naked part is Cape Corso, in the district of Bastia, a narrow rocky neck stretching towards the north, yet inhabited by the most or rather only industrious portion of the Corsican population (some of the wealthiest merchants of Leghorn are Capo Corsines). In the interior the hills are also often of a steep declivity, never corrected by terraces, and where the vegetable triturations are washed or blown away by rains or frequent and domineering winds; there are, on the other hand, tracts in the mountains, scarcely yielding to the best land in the plains. The Makis, or tracts thickly covering with their shrubs $\frac{21}{24}$ths of the island according to the highest computation of M. Gueymard, or two-thirds according to a moderate estimate, testify by the height of their bushes of 4 to 12 feet the prevailing capability of the soil. Their predominant shrubs are, erica arborea, arbutus unedo, cistus Mompeliensis, pistacia lentiscus, the common myrtle, and the wild olive-bush.

7 & 8. With the exception of a few gardens and arable acres near Bastia and Ajaccio, the land is cultivated by the proprietors; farmers (métayer ou fermiers) are unknown; this absence is explained by the abundance of soil and want of circulating capital. Payments of rent in cash would be impossible; in kind, unprofitable to the owner. Farming or leases are, however, in a certain manner supplied by the mode called "terratico," which finds its application on about $\frac{1}{15}$th or $\frac{1}{20}$th of the land yearly sown; only the wealthier proprietors, or where produce is easily saleable, avail themselves of this method.

The conditions of the terratico vary according to provincial customs and the quality of the soil; the two modes most in use are:

1st. The proprietor gives the land for one season to a cultivator, and receives for best quality of land, but rarely, one-third; for land of ordinary quality, one-fourth of the net produce, that is, of the gross, less the seed which had been sown.

2d. The proprietor furnishes the land, one-half of the seed, and the oxen for labouring; he receives one-half of the produce.

The "terratico method" has no prospect to be superseded by leases. The land, which is not cultivated by terratico, is tilled by the owner, either in person or by means of day labourers.

Extent of Property.—The mountainous character of this island favours little the contiguity of landed property. An ordinary landowner in Corsica, where division of labour is at its infancy and capital is scarce, will at once possess lands producing corn and other grains, wine, oil, chesnuts, vegetables, fruits, &c., and soils of such fitness cannot well be contiguous. This natural separation is still more, and to a highly detrimental degree, enhanced by the following causes: since centuries the laws have protected an equal succession amongst children; the Genoese, when rulers, abetted this system, and the French law on heirdom, which found Corsica in an extravagantly parcelled state, has confirmed and aggravated it. These ancient and modern agrarianisms, unaccompanied by the remedies of capital and of various roads of industry, have made a proprietor of almost every Corsican, and have, it is true, averted bare mendicity, but also generally created a narrow situation, without resources, pregnant of family intrigues and not unbloody dissensions, litigious propensities, and various checks on population, and, combining with other incidents, they have fostered maxims which again serve to the same end of disconnecting all landed property. It is a distinctive trait, that the Corsican rather starves than sells land; that inheritances, which lose in value by division, still must submit to it; that advantageous offers are the more readily refused, the more such land should aggrandize and connect the purchaser's estate. These causes serve to explain how it comes that almost every one is a landowner, that an ordinary proprietor of the second class, worth 20,000*f.*, has his little estates at 10 or more unconnected places within a range whose radius exceeds many miles, and that the few great landowners (more near Ajaccio than in the northern part) possess indeed circuits of 6 to 20 miles, yet with separated spots of cultivation on such extent.

9. Rent, considered as price for the use of land, does not exist in Corsica, where at utmost the "terratico contract" (*cf.* 8th answer) partakes of the nature of a lease of land; but this method, as it depends on the seasons, and does not take in account the fallow time when land, though untilled, yet produces an income from pasture, cannot lead to an answer on rent. I have also vainly, though diligently, tried to arrive at a solution on this query, by inquiring for the produce of a given extent of different soils for the respective cost of produce, and for the ordinary profits of stock adapted to such extent, but my questions were too seldom understood or too discrepantly answered. I beg to offer as supplementary information the following Table, where the last column may in a certain manner be interpreted, as what rent would likely turn out if it were in practice. It is calculated as $4\frac{1}{2}$ and $3\frac{1}{2}$ per cent. of the land in certain situations, and $2\frac{1}{2}$ in other parts, such being the low per-centage with which a purchaser and owner contents himself as interest for money placed in soil.

One Mezzinata Arable Land.	Eng. Acre.	Price.	Lit.	renders per cent.		s.	d.
		f.					
Best *prato*, wet land near Bastia	0.447	300	12	4½	=	10	9½
Id. id. not near but well situated	0.447	225	9	4½	-	8	1
Id. id. id. badly situated	0.447	150	6	4	-	4	9½
Ordinary *prato*, wet land near Bastia	0.447	225	9	4½	-	8	1
Id. id. not near, but well situated	0.447	175	7	4	-	5	7
Id. id. disadvantage ously situated	0.447	125	5	4	-	4	–
Villa or dry land in the plain near Bastia	0.584	200	8	4½	-	7	2½
Id. not near Bastia, but well situate	0.447	150	6	4	-	4	9½
Id. id. badly situate	0.584	100	4	4	-	3	2½
1st quality in the mountainous part	0.584	200	8	4	-	6	5
2d	0.584	125	5	3½	-	3	6
3d	0.735	75	3	2½	-	1	6
4th	0.735	25	1	2½	-	–	6

This low expectation of revenue from land is striking, when compared with the average interest of money. Money cannot be found here, on good sureties, at the legal interest of 5 per cent. and seldom at that of 6 per cent. allowed by law in trade; if we suppose an absence of laws on usury, the ordinary interest would most likely settle between 5½ and 6 per cent.

Land covered with chesnut trees gives usually 4 per cent. of the estimate price.
Ditto - - vines - - - - 3 - - —
Ditto - - olive trees, depends on seasons, from 20 to 10 per cent.

10. A Synoptical Table for the district of Bastia, gives the following quantities:

Horses	1,240	Rams	998	He Goats	2,590	Bulls	271
Mares	1,431	Ewes	40,931	She Goats	26,049	Oxen	3,480
Mules	2,014	Wethers	2,864	Goat Lambs	9,345	Cows	4,194
Asses	1,653	Lambs	14,174	Pigs	38,276	Calves	1,367

I do not know that similar tables are made up for the other four districts; but have been given to understand that a multiplication by three of the above quantities, would give a tolerable estimate of the live stock, except the sheep and goat race, and the pigs, which are to be taken four times.

All these species, except the goats, are of an inferior, diminutive, and mostly degenerate race. The horse, indeed, if well kept, is brisk and ardent, sure-footed and an excellent climber; something has been doing within the last ten years by French stallions; but the common horse is a very degenerate animal. All are destined for the saddle and for carrying loads, except 20 or 25 carriage horses drawing the diligence between Bastia and Ajaccio, or one or two private carriages at the latter place. Horned cattle: Four Corsican oxen or cows draw one plough; the few oxen imported from Sardinia are stronger; the cattle destined for the butcher are not fattened. Sheep, very small, very lean, with little milk, and a very coarse black or dark brown wool. Pigs, small, but good, by far too numerous; every family in the village, even the lowest, possesses at least one; hence a frequent cutaneous and uncleanly disease. Fowls, few, because they eat the grapes. Turkeys, about 80 in the island, though they might be fed in troops on the plains.

11. The above-mentioned 'tableau synoptique' gives for the district of Bastia the following average quantities for a year:

	Hectolitres.		Bush.		Hectolitres.		Bush.
Wheat	38,276	=	105,297	Beans, French and other	3,902	=	11,734
Barley	18,658	-	51,328	Flax	5,724	-	—
Rye	1,531	-	4,211	Hemp	11	-	—
Maize	3,224	-	9,144	Dry chesnuts	51,060	-	140,466
Millet	21	-	58				Gallons.
Potatoes	9,043	-	24,877	Oil	8,507	-	187,162
Lupines	5,215	-	14,346	Wine	104,498	-	2,298,060

I have no sort of confidence in this table; the proportions of rye, barley and lupines to wheat, are too high in favour of the former; the quantity of potatoes, still little in use, is too large, and that of oil very much below the yearly average.

The district of Bastia furnishes more than one-third of the entire agricultural produce, except in oil and chesnuts; but to estimate the proportions for the five districts, would be, at least for me, a work of fancy. I beg, however, to add, that

Wheat is proportionally and absolutely most grown in district of Bastia.
Barley - - id. - - id. - - - - Calvi.
Rye - - - id. - - id. - - - - Corte.
Millet and hemp id. - - id. - - - - Corte.
Maize and lupines id. - - id. - - - - Bastia.
Oil - - - id. - - id. - - - Calvi.
Wine throughout.
Chesnut id. id. - - - - - - Corte.

I also give the following table for an ordinary year:

FRANCE. No. 12. (Enclosure.) Answers to Queries.

Wheat, import 25,000 sacks, and smuggled.
Barley, no import nor export.
Rye - - id. - - id.
Maize, small export.
Millet, no import nor export.
French beans (haricots), export 3,000 sacks.
Small beans (fèves), small export.
Lupines, export $\frac{4}{5}$ of the harvest.
Vetches, import 150 sacks.
Peas, no export nor import.
Potatoes id. - - id.
Flax - id. - - id.
Hemp - id. - - id.
Dry chesnuts, export, 12,000 sacks.
Lemons, an increasing exportation.
Wine, very small export and greater import.
Oil, very great and increasing export, 1,500,000 litres, value 60,000 *l.* sterling.

Note.—The sack at 140 pounds, if wheat.

12. Soils which have enjoyed a repose of several years (*cf.* answer 13) from three to seven or more, give the first year the 12th to 20th corn or grain, according to their respective quality, and the second year somewhat less; the following table does not include these lands, but those which are tilled every, or every second or third year.

QUALITY.	EXTENT.		—	Average Quantity produced on such Extent.		
		Acres.			*Bushels.*	*Bacini.*
Prato, or wet land, best -	One Mezzinata.	0.447	Seed of wheat sown on this extent is 6 bacini or 1½ bushel.	The 12th corn, about	17	or 72
Id. - ordinary - -		0.447		10th —	14	— 60
Dry land, or ville, best -		0.584		9th —	12	— 54
Id. - ordinary - -		0.584		8th —	11	— 48
Land in the mountainous part, 1st quality - -		0.584		10th —	14	— 60
Id. - 2d quality - -		0.584		8th —	11	— 48
Id. - 3d quality - -		0.735		5th —	7	— 30
Id. - 4th quality - -		0.735		4th —	5½	— 24

Barley and rye in the same proportions; maize depends very much on seasons.

Vines are divided into three classes: 1st of the mountains; 2d of the hills or middle region; 3d of the plains near the sea. One hectare or about 2½ acres, gives, according to the synoptical table, from 30 to 7 hectolitres, or from 660 to 154 gallons. The younger a vineyard is, and the more it is situate in a mean region of altitude, the greater is the quantity; whilst a good age and a hot situation contribute to increase the alcohol and the sugar-matter contained in the vine.

13. As manure, the basis of agricultural rotation, is nowhere applied to arable land, a systematical succession of seeds is unknown. With respect to cultivation and repose, the different soils are thus treated:

1st. Land in the plain near the sea. This land is cultivated by a peasantry residing on the hills at a distance of three to seven miles, and going or returning daily during the times of labour.

A small portion of the prati or wet land of these plains, near Bastia, is cultivated every year; viz. 1st year wheat, and after this harvest; the same year maize or French beans, according to the wetness or dryness of the season; 2d year no corn, but French beans or lupines.

The greater part of these prati near Bastia, give wheat, and after the wheat, maize or French beans in the first twelvemonth, but repose entirely the next twelvemonth.

The same prati, situate at a distance from Bastia; first year wheat, second year repose.

The ville, or dry plain land near Bastia; first year wheat, second year French or small beans, or lupines, third year repose.

The same dry plain land, at a distance from Bastia; first year wheat, second and third year repose.

2d. Land in the mountainous part of the island. The arable portion, which is not too distant from the mountain villages near Bastia, or from those of a large population, produces every third year wheat or barley, and reposes two years.

In the other villages, only the very nearest land is thus treated; the remainder of the arable soil is, after having enjoyed a long repose, prepared, ploughed, and sown two or three years consecutively, to produce mostly the same sort of grain; rarely an alternation of wheat and barley. When the soil is become poor by this successive tillage, its shrubs (makis), are again allowed to grow up during four, seven, or more years, in order to be burnt, and to manure with their ashes such spots for a new turn of tillage. This portion of soil explains the large quantity of what is called arable land in the island, although in fact only a small portion of it receives seed in the course of a year.

14. Rent, taken as price for the use of land, is not known.

15. The proprietor of the soil is subject, first, to the land tax (contribution foncière), distributed as follows, for the year 1834:

DISTRICTS.	LAND TAX IN 1834.			
	Francs.		£. s. d.	
Bastia - - - -	54,536	=	2,163 5 3	
Calvi - - -	25,695	-	1,019 4 6	
Corte - - -	32,140	-	1,277 17 9	
Ajaccio - - -	34,424	-	1,365 9 9	
Sartene - - -	23,252	-	922 6 6	
TOTAL - - - -	170,047		6,745 3 9	sterling.

Of

Of the five constituent parts of the French direct taxes, which in an average year, and the additional centimes included, give to the government and the department the sum of 455,000*f.*, or about 18,000 *l.* sterling, and which since 1818 are discharged with ease and regularity, the comparatively mildest portion is the land tax, paid by the proprietor by twelfths to the "receveur." When compared with that on continental French soils, it is extremely light. This arises from the low valuation at which, on the incorporation of Corsica with France, the productive powers of Corsican soils were, from kindness and policy, rated in money, and $\frac{1}{20}$th of such low revenue of land was imposed. The general burthen being so light, its extremely unequal distribution is not much complained of; this inequality is besides much greater when comparing the tax laid on one parish with that laid on another, than when comparing the taxes on the proprietors of the same village. This is explained by the method of distribution. The prefecture divides, according to a standing register, the Corsican contingent amongst the communes, and only on the complaints of a commune, before the departmental council, alterations are granted. In each commune three arbiters (répartiteurs) subdivide its respective contingent by estimating the revenue of properties; and inequalities find here an easier correction.

2. Besides this ordinary land tax, the proprietor has to pay 20 p' % of it for the customary expenses of the department (vingt centimes additionels), and yearly-occurring extra centimes, or per-centages, according to the wants of the department or the commune; these "centimes additionnels et facultives" amount now commonly to 80 or 100 p' %; so that the tax exacted in the shape of land tax is almost doubled, and amounts to about 325,000*f.*, or 18,000 *l.* sterling.

3. Lastly, two working days every year are imposed on the proprietor for every horse, mule or ox; this tax, combined with that of one days' labour of every male from 18 to 60 years; and female above 15 years, is appropriated, though most ineffectually, to the reparation of the roads of the parish (route communale).

16. There are no farmers, nor could they, as such, be subject to any tax.

17. No taxes are levied on the proprietor or occupier of land for the relief of the poor, who do not even, or extremely rarely, exist in the villages, nor are there taxes for religious purposes. The French parish education law (instruction élémentaire) has hitherto found no application in Corsica, nor can its financial and personal provisions find it without great exceptions and prudent alterations in this poor country of two languages. The curate is paid by the French government (average 700 francs), but customs, sanctioned by time, though unsupported by law, procure him certain fees and presents.

18. The table of tolls (Octroi) varies, however little, in those towns which possess this institution. Corte has not yet been, nor chooses to be, subject to this tax.

TABLE of TOLLS or OCTROI at *Bastia*, let at annually 52,000*f.* or 2,080 *l.* sterling.

FRANCE. No. 12.

(Enclosure.) Answers to Queries.

19. Average price of butcher's meat and other articles of food:

ARTICLES.	——	Currency	——	ARTICLES.	——	Currency	——
		f. c.	*s. d.*			*f. c.*	*s. d.*
Beef - -	pound	– 40	– 3.81	Country cheese.	pound	– 75	– 7.14
Veal - -	- id. -	– 50	– 4.76	Oil - -	litre -	1 10	– 10.47
Pork - -	- id. -	– 50	– 4.76	Bread, wheat	pound	– 17½	– 1.67
Mutton -	- id. -	– 35	– 3.36	Id. barley	- id. -	not for sale.	—
Lamb - -	- id. -	– 40	– 3.81				
Goat lamb -	- id. -	– 30	– 2.88	Flour of wheat.	- id. -	– 30	– 2.88
Fowls - -	each -	1 50	1 4.28				
Eggs - -	a dozen	– 75	– 7.14	– of maize	- id. -	– 12½	– 1.19
Bacon, lard -	pound	– 80	– 7.62	– of chesnut	- id. -	– 10	– 0.95
Fish of the lake.	- id. -	– 25	– 2.38	French beans	- id. -	– 25	– 0.48
Sea fish -	- id. -	– 50	– 4.76	Maccaroni	- id. -	– 30	– 2.88
Milk - -	litre -	– 30	– 2.88				
Cheese, foreign.	pound	1 10	– 10.47	Potatoes -	100 lbs.	3 75	2 11.70
				Wine -	litre -	– 20	– 1.90

Only in the larger villages and boroughs some of these articles are for sale, and then at prices a little inferior.

20. As farms do not exist, this query cannot be answered.

21. The average wages, which are contracted and mostly paid in money, are:

	f. c.		*s. d.*
A male Corsican labourer, per day - - -	1 25	=	– 11.90
A female - - - - - - - -	– 60	-	– 5.77
A Lucchese labourer, for ordinary work per day	2 –	-	1 7.04
Idem - - - - for harder work per day -	2 50	-	2 0.80

The Corsican labourer, almost generally a small proprietor, and relying on his chesnut trees, is seldom a good and able labourer; thence, and from want of population, continues the custom to employ Italian labourers, from Lucca, Parma, Tuscany, Genoese coast, and even Modena, but generally comprised under the name of Lucchese. Their number depends greatly on the chesnut harvest, on which they live; the average number is 4,000 a year; they undertake the harder work of agricultural concerns, by digging ditches, draining, building stone walls for inclosures, preparing the makis, cutting trees and sawing boards; after a stay of five or six months, they return to Italy with considerable savings. The yearly number is likely to increase by the expected establishment (next April) of a steam-boat between Bastia and Leghorn. There is scarcely an example of a marriage between a Lucchese and a female of Corsica, it would be held a "mésalliance."

22. No higher wages are received in time of harvest.

23. Labourers are nowhere boarded and lodged by their employers. The hard race of Lucchese is bivouacking.

24. The usual food of the Corsican labourer is good and nourishing; I can scarcely except those villages which lie on an extreme height; it consists of very good bread, mostly of wheat, else of barley, and of polenta of chesnut flour during the winter months; in the villages near to the plains also of polenta of maize; this basis of food is agreeably mixed or varied with country cheese, ham and lard, French and other beans, dry figs, and the fruits of the season. Potatoes are not yet liked. Wine is a cheap and common beverage; no cider. The too common use of pork is objectionable; fresh meat occurs rarely, except in the time of goats and lambs. The Lucchese labourer, only intent to save, and with no property in the island, lives exclusively on polenta of chesnut and maize, except on holidays, when he tastes bread and wine, but no meat.

25. Independently of the (trifling) care for their families, the women are employed in the lighter occupations of the land, and a good deal in carrying wood, water and other loads, and in gathering chesnuts and olives. They rarely understand to spin, to knit, or needlework. Reading is out of the question.

26. For every French levy of 40,000 men, Corsica furnishes the average contingent of 241 men; besides this contingent, the average number of volunteers is 200, a quantity which increases greatly and does more than double, when rumours, founded or not, spread the hopes of an approaching war.

27. The average price of a substitute for the army is 700 *f.*, or 28 *l.* sterling. This dear price in a poor country, and where 200 volunteers engage without levy-money, must appear extraordinary; it is, however, explained, by the popular discredit which a substitute undergoes as a mercenary person, "che vende la sua carne," by the little chance of a substitute's advancement

advancement, and none to enter in the privileged corps (voltigeurs, gensd'armes), as also by the still more advantageous market in France, where 1,000 or 1,200 francs are offered.

28. The fuel principally used, consists in oak, beech, ash, chesnut and olive; it is dear in town (150 lbs. cost 4*f.*) because of the bad state or rather want of roads. For this same reason it is scarcely ever bought in the country, where every commune abounds in decayed chesnut or olive trees, and in forests. The greatest consumption is occasioned by the drying of chesnuts. Charcoals are only used in towns. I do not see in M. Gueymard's Notes, that this intelligent mineralogist has discovered fossil coals, nor are they imported. The steam-boat uses mostly wood from Bastia to Toulon, and coals on its return.

29. Articles of clothing, such as are usually worn by the labouring class:

ARTICLES.	Lasting.	Currency.		£.	s.	d.
		f.	*c.*			
Jacket - - -	24 months -	8	–	–	6	6
Cap - - - -	24 — -	1	50	–	1	2
Waistcoat - - -	36 — -	4	–	–	3	3
Pair of pantaloons -	18 — -	5	–	–	4	5
Shirt - - -	12 — -	3	50	–	2	9
Pair of shoes - -	6 — -	6	–	–	4	11
Stockings - -	None.	—		—		
			£.	1	3	–

I am not prepared to compare these proportions with those of the clothing in England.

30. A very coarse woollen cloth (panno Corso) of dark brown natural colour, is woven throughout the island, and furnishes the national garb of the second and lower order of the country population.

Home-spun and woven linen (coarse) does not supply the demand.

A soap manufactory, producing about 2,000 hundred weight, exists at Bastia.

No mill work, except for grinding corn and olives, are in existence; the trial of a sawing mill at Sartene, for boards, has not succeeded.

Of about 12 iron forges in the arrondissement of Bastia, one or two are continually at work, some for months, some silent, none of importance, nor do they supply the demand. The iron ore on which they work, is not indigenous, but comes from Elba.

Tanning business is conducted in 10 establishments of small extent.

No article soever of manufacture or of ordinary profession is exported or exportable, except oil, rather to be considered as a natural product.

31. There are no, or very rarely, paupers, except at Bastia and Ajaccio; at Bastia about 500, almost all of foreign extraction, and supported by private charities. For cases of disease the towns have hospitals, but too small and two little endowed. The Lucchese labourers continue, in their old and provident custom, to pay to their respective consuls 1*f.* 50*c.* on their arrival, which sort of insurance entitles them to medical treatment and care in hospitals in case of their catching the fever. The institution for foundlings (enfans trouvés ou abandonnés) so ambiguous in its consequences, counts ordinarily 300 children, and 150 new yearly cases, at the annual expense of 35,000*f.*; the average of births is 7,200; of illegitimate 318, of foundlings 130; and this latter quantity is rather striking in a country without paupers, and with prevalent morality.

32. I have already and on various occasions mentioned that the occupiers of land are at the same time proprietors; their general condition is unquestionably in a state of progress. Those of Capo Corso prosper by industry and economy; some in the other parts do so from the same honourable causes, but rather oftener from the enjoyment of small pensions and places. One of the chief sources of increasing welfare, is the law which, since about 10 years, assimilates Corsican to French oil, and allows its duty-free entry into France, certainly the greatest and almost only boon granted by the French governments of this century to Corsica, which owes this equitable decision to the exertions of Count Sebastiani. The landed interest, as far as it regards the producing of corn, appears not to be sufficiently protected: 1. Because France does not contribute to the confection of roads, and corn remains thus often untransportable. 2. Because Corsica is classed together with the Provence in the protecting corn laws, whilst it ought to form a sole and higher category. 3. Because the French government does not protect the producer of corn against the excessive smuggling of this commodity.

No. 13. ABSTRACT OF ANSWERS.

REPORT from the CONSUL at	1. Number of Parishes or Districts referred to in his Return.	2. NUMBER of INHABITANTS, viz.:		3. QUANTITY OF LAND, (Acres)				4. UNCULTIVATED, which might be rendered PRODUCTIVE.
		Rural.	Towns.	Waste.	Wood.	Cultivated.	Total.	
Calais: (Cantons of Calais and Guines).	28 Communes	17,779	20,298	8,000	4,500	56,447	68,947	- - About 2,000 acres, but would not be profitable.

PRUSSIA.

— No. 14. —

Mr. Consul *Gibsone* to *John Bidwell*, Esq. British Consulate.

Mr. Consul Gibsone to John Bidwell, Esq.

Sir, Dantzig, 13 May 1834.

I HAVE now the honour to convey the Answers to the Queries respecting the state of Agriculture, &c., which I have confined to what relates to the department of the Dantzig Regency. I am sorry it has not been in my power to send the answers earlier; but I wished to make them accurate and comprehensive, and thence required time, having to collect the information mostly from private sources.

Should a copy of the Statistical Tables for the whole of the Prussian dominions by Hoffman, be desired, I could send one; but I suppose the work will be known in England, and new tables up to the end of this year will probably be published towards the close of next year.

I have, &c.

(signed) *Alex. Gibsone.*

First Enclosure in No. 14.

ANSWERS (for the *Danzig Regency* Department) to QUERIES relating to the state of Agriculture, &c.

(Enclosure 1.)
Answers to Queries.

Answers 1 *&* 2. *See* the accompanying Statistical Table for this department, at the end of 1831.

3. *See* ditto for the quantity of land in each circle, say in square miles, it being only so stated in the official tables. On the whole there is not much waste land; of wood land there is little in the circles of Danzig and Elbing, in the other five a good deal, but the quantity cannot be ascertained; the rest is mostly in cultivation.

4. The little waste land in this department could not well bear the expense of cultivation, partly from the poorness of the soil, and partly from the too sloping situation of the ground, being unfavourable for ploughing. This too sloping situation is also against the cultivation of part of the pasture land, which might else be rendered arable by manure, as part might be by draining.

5. The proportion of the cultivated land that is arable, and that is pasture, cannot be ascertained. It may be said generally, that almost the whole land is cultivated, or can be fallowed, and that only a small portion is used constantly for pasture. The pasture proceeds, for the most part, from the system of cultivation, by which the fields are, by rotation, laid in fallow; but chiefly by their being sown with clover or other herbs for fodder. A considerable portion of the arable land yields little or proportionally little profit, from want of sufficient manure. Upon the whole, about one-third of the land may be considered as usually lying in pasture.

6. The general qualities of the soil are extremely different. It varies, often with surprisingly sudden transitions, from flying sand to the heaviest clay; very strong clay, rich loam, sandy loam, loamy sand, gravel, fruitful and sterile sand, are soils that often alternate. It may in general be accepted, that the land is rather of a cold nature, and has a more or less impervious (undurchlassenden) sub-soil, nearly throughout wanting draining, which is almost solely effected by open canals and ditches; under-drains and the like means of carrying off the superabundant water being scarcely known even by name. By far the smaller portion of the arable land has a mild, warm soil, with an open sub-soil.

The extent of each variety of soil cannot be ascertained. The circles of Behrend, Carthaus, and Neustadt have, upon the whole, the worst and the least cultivated land, the latter partly owing to their unfavourable situation for the sale of the produce; the circles of Danzig, Elbing and Marienburg have the best and most cultivated land; the land and situation of the Stargard circle are partly good, partly bad.

7. The greater part of the land is cultivated by the proprietors, and only little is rented; part, however, consists in royal domains, which are rented, and in fee-farms, held almost solely of the crown, at a fixed rent (canon).

The private properties consist in noble estates or in farms, partly also in small possessions. The owners of the first class have certain privileges, for instance those of jurisdiction and police on their estates, and others.

PRUSSIA. No. 14.

(Enclosure 1.) Answers to Queries.

The size of the private properties may, in general, be rated as follows: of the noble estates at from about 1,000 to 2,700 morgens (about 630 to 1,700 acres), and of the farms from about 70 to 400 morgens (about 44 to 250 acres). Of both there are some greater as well as smaller, and several frequently belong to one owner. The morgens are Magdeburg or Prussian, whereas the culm morgen, frequently still reckoned by in this quarter, is above double the size.

The extent of the royal domains is various. A domain-bailiwick (amt) often contains several estates or farms (vorwercke), each from about 300 to 3,000 morgens (about 190 to 1,900 acres) extent, the medium size being about 1,000 morgens, or about 630 acres. The size of the royal fee-farms (erbpachts-güter) is from about 150 to 600 or 700 morgens (about 95 to 380 or 440 acres), or more.

8. The answer to this query is mostly comprised in that to the preceding one. By far the smaller portion of the private properties is rented. The leases of such are mostly for three, more seldom for six to nine years; but they are beginning to be made for longer periods. The leases of the domains are not under six, and seldom above 18 years.

9. This query is very difficult to answer, from the soil, the situation, and extent being so very different. The usual rent in the circles of Neustadt Carthaus, and Behrend, may be called from 5 to 15 silver groshes per morgen, (about 9.27 ($9\frac{27}{100}$) to 27.81 pence per acre), in the Stargard circle somewhat more. In the circles of Danzig, Elbing and Marienburg, partly also of Sturgard, the average rent of good land may be rated at 1 rix (dollar), or 30 silver groshes per morgen (about 55.62 pence per acre), the tenant bearing all taxes, public burthens and expenses.

10. All the cattle of the peasants, whether kept for farming or for other purposes, horses, horned cattle, sheep, pigs and geese, are almost exclusively fed on the pastures, from spring till late in autumn. On the domains and most of the larger private properties the working horses are fed in the stable, but the horned cattle and sheep are kept on the pastures, and the horned cattle only seldom get at night, in addition, some green clover or vetches in the stable.

11. The proportions cannot be stated generally, from the great difference in the particular lands. In the low grounds more summer corn (chiefly oats), in the higher grounds more winter corn is grown. Upon the whole rye is more grown, in quantity, than oats, next barley, less peas, and least of all wheat; of this not one-fifth, perhaps not above one-eighth so much as of rye, throughout the department. These are about the proportions *usually* grown, but a particular demand for the one or the other grain creates exceptions. Very few beans are grown, and vetches solely for green fodder. Spring wheat, hitherto very little grown, begins to be more cultivated.

12. This query is difficult to answer. In general it may be said that, on an average, the produce of wheat, rye, barley, oats and peas, is four to five fold; on good land, however, the average produce may be stated, of wheat at about tenfold, of rye and oats at about eight, of barley and peas at about twelvefold; but with sufficient capital and manure (both which are, on the whole, wanting), the result would be greater.

The average quantity sown may be called,									$2\frac{355}{1000}$			
Of Wheat and rye about 1 scheffel per morgen, or about									2.355	imperial bush.	per	acre.
Barley	-	-	$1\frac{1}{2}$	-	-	—	-	-	3.533	-	-	—
Oats	-	-	2	-	-	—	-	-	4.711	-	-	—
Peas	-	-	$0\frac{3}{4}$	-	-	—	-	-	1.766	-	-	—

13. The peasants, and the major part of the great farmers and proprietors, cultivate their lands on the following plan: Of the arable land one-third is laid fallow, one-third is sown with winter corn, rye and wheat, and one-third with summer or spring corn, as oats, barley, peas, beans and vetches, with some spring wheat. The smaller portion of the greater cultivators has introduced other systems of farming. According to these, rye or wheat follows usually upon manured fallow; then peas and barley; on the poorer soils oats. Among the barley, sown after a manured crop of winter corn, clover and grasses for fodder are usually sown, which are cut one year for fodder and then left several years for pasture. Potatoes, which are now much cultivated (for distilleries, &c.) are planted on fresh manured land, and afterwards wheat or barley.

14. Rent is paid throughout in Prussian currency, of which 14 rix (dollars) are coined out of the mark fine silver. Only in single instances are there some few exceptions, of payments in labour chiefly, which are usually estimated in money in the contracts.

15. The proprietor is subject to a land-tax, levied for the benefit of the state, which was established as permanent, at the occupation of the province in 1772, but only finally fixed for the different possessions in 1787, by a commission appointed for the purpose. As basis for this tax 25 per cent. of the net revenues of the properties was prescribed; but these were estimated so very variously at the time, and have since so much altered, that no general rule can be given for rating the proportion of the tax to them. That the burthen is moderate can perhaps be best judged of, by considering the whole amount of the tax

tax in the different circles, which I have obtained from an authentic source, and is, in the circle

	R.ds.	*s.gr.*	*pf.*		£.	*s.*	*d.*
Of Elbing - -	32,984	21	2	per cent. or	4,827	–	7 sterling.
Marienburg -	46,364	16	6	—	6,785	1	1
Danzig - -	54,003	3	3	—	7,902	17	10
Stargard - -	11,289	16	10	—	1,652	2	8
Behrend - -	6,551	4	3	—	958	14	–
Carthaus - -	4,770	10	2	—	698	1	11
Neustadt - -	7,326	4	11	—	1,072	2	5
Total -	*R.ds.* 163,289	17	1		£. 23,896	–	6

The proprietor is also subject to the following classification tax:

16. The tenant, or farmer, pays to the state only a personal, called classification-tax, introduced in lieu of the excise before levied on butchers' meat, and on the produce of grain ground at the mill (the schlacht and muhl-steuer). For levying this tax there are four classes, each with three gradations, and the yearly rates are, for the

	First Class.	Second Class.	Third Class.	Fourth Class.
1st Gradation -	*R.ds.* 144	24	8	3 per cent.
2d - - - -	96	18	6	2 —
3d - - - -	48	12	4	0½ —
Or 1st - - -	£. 21 1 6	3 10 3	1 3 5	8 9⅜ sterl.
2d - - -	14 1 –	2 12 8½	– 17 6¾	5 10¼
3d - - -	7 – 6	1 15 1½	– 11 8¼	1 5

The third gradation of the fourth class is the rate paid by servants and labourers. The other rates are those levied on farmers and proprietors, and they are regulated, not merely according to the size of the farms or estates, but in a certain degree (as regards the proprietors) according to their value, deducting what debt is on them. It is frequently complained of, that there are too few gradations, by which the tax is less equally imposed than it ought to be. In this department only two individuals pay the highest rate of *R.ds.* 144, and only nine the second rate of *R.ds.* 96.

17. No part of the taxes levied by the state on the proprietor or occupier is for the relief of the poor, or for religious purposes. Any grants of the king for these objects, under peculiar circumstances, when deemed useful or necessary, are matters of grace, and are paid out of the general revenue of the state, or out of the privy purse. The sums wanted for the poor, or for religious purposes, as well as for schools, must be supplied by the proprietors of estates, or by the communities of the towns and in the country.

Each proprietor of an estate, and each community, is bound to support his or its own poor. The expense is very small, there being few persons, able to work, that cannot find employment. Those poor who do not properly belong to an estate or community in the department, or who will not work, are sent to the provincial poor and workhouse, and supported at the general expense, but which makes only about *R.ds.* 24¼ (about 3 *l.* 11 *s.* sterling) yearly, for 1,000 of the population.

The contributions for religious purposes are made by each parish. Those for the support of the clergyman are fixed, and very small, but also very various, compared with the value of the property, and therefore cannot be generally stated with any degree of accuracy.

The tax for schools is also small, but indeterminate, depending in a great measure on the number of the children on the estate, or in the community. The school money is paid on the number of the children.

18. In the department of the Danzig Regency only the towns of Danzig, Elbin Marienburg are subject to an excise on butchers' meat, and on the produce of grain ground at the mill (called the schlacht and mahlsteuer); the rest of the department pays the classification tax in lieu of this. In these three towns the rates of this excise are

	Per centner of 110 lbs.			Per cwt. about
On articles of baking or pastry, from flour, &c. of wheat - - - - - - - - -	20	silver groshes	-	24 *d.* sterling.
Ditto - ditto - Rye - - - - -	5	- —	-	8 —
Starch, powder, groats, &c. &c. of wheat -	40	- —	-	48 —
Ditto - ditto - of other grain -	10	- —	-	12 —
Flour of wheat and spelt - - - - -	26	- —	-	32 —
Ditto other grain - - - - - - -	6	- —	-	8 —
Wheat brought to town to the mill - - -	20	- —	-	24 —
Rye - - - - - - - - - -	5	- —	-	6 —
Butchers' meat and fat articles - - -	40	- —	-	48 —
Live cattle - - - - - - - - -	30	- —	-	36 —

It may be observed, that this different system of taxation in the three towns necessarily requires the adoption of measures to prevent the articles taxed being smuggled into the towns, which not only occasions considerable expense, but is injurious to free intercourse in the country, and to morality. The towns could indeed, upon application, get the classification tax substituted for the excise; but they do not wish it, as it might fall too heavy on the more wealthy inhabitants, because it would be required that the full amount of the excise were raised, and as direct taxes cannot be so easily collected from the poorer classes as indirect ones. This difference of taxation in the country is at variance with the principle established for promoting free intercourse between Prussia and other German states.

19. The average prices of meat, bread, and butter are

	In Danzig.	In the Country.
Of Butchers' meat per lb. from	$2\frac{1}{2}$ to 3	$1\frac{1}{2}$ to 2 silver groshes.
Rye bread about	$0\frac{2}{3}$	$0\frac{1}{2}$ —
Butter from	4 to 5	3 to 4 —

Making, in English money and weight, about

$3\,d.$ to $3\frac{6}{10}\,d.$ in Danzig, and $1\frac{8}{10}\,d.$ to $2\frac{4}{10}\,d.$ per lb. in the country.
$0\frac{8}{10}\,d.$ - - - - $0\frac{6}{10}\,d.$ —
$4\frac{8}{10}\,d.$ to $6\,d.$ - - - $3\frac{6}{10}\,d.$ to $4\frac{8}{10}\,d.$ —

The bread is, however, somewhat better in town than in the country, and perhaps also the meat.

20. Farming servants and labourers may be said to be employed at the rate of about two male and two female for 25 morgens (about $15\frac{4}{5}$ acres.) The larger the property, the more male and the fewer female servants are required.

Cattle for farming purposes are used in the proportion of about two horses and two oxen to 120 morgens (about $75\frac{7}{10}$ acres) of good land; and three oxen are reckoned about equal to two horses.

21. The wages of these men vary according to the different districts, but may be, on an average

Of a male farming servant - *R.ds.* 18 to 22, or about £. 2. 12. 8. to £. 3. 4. $4\frac{1}{2}$.
Female ditto - - - 10 to 12 - 1. 9. 3 to 1. 15. 1.
annually, with board and lodging;

Day-labourer, in the long days, 4 to 6 *s.gr.* - $4\frac{2}{3}\,d.$ to $7\,d.$
Ditto - - - short - 3 to 4 - - $3\frac{1}{2}\,d.$ to $4\frac{2}{3}\,d.$
daily, without subsistence, but with a dwelling free, or at a low rent;

Day female-labourer in the long days, 3 to 4 *s.gr.* - about $3\frac{1}{2}\,d.$ to $4\frac{2}{3}\,d.$
Ditto - - - - short - 2 to $2\frac{1}{2}$ - - $2\frac{1}{3}\,d.$ to $2\frac{10}{11}\,d.$
Children, 2 to $2\frac{1}{2}$ silver groshes - - - - - $2\frac{1}{3}\,d.$ to $2\frac{10}{11}\,d.$
daily, without subsistence.

A cottager (day-labourer), with his family, may cost the proprietor, every thing included, about *R.ds.* 100 (about 14 *l.* 12 *s.* 8 *d.* sterling), yearly. The cottager receives, for threshing corn, from the 11th to the 16th bushel, it varying in the different districts.

22. In time of harvest the wages of the day-labourers are higher, perhaps half more than, sometimes even up to double, the rate paid in the short days, according to the demand. The servants hired by the year generally get some very small beer, or some spirits, in addition to their victuals.

23. Domestic servants, even day-labourers during harvest, from distant parts, are boarded and lodged with the farmers; the latter at least usually. Cottagers and their families must subsist themselves, but they get from the landlord a dwelling with garden, free of, or at a small rent, also pasture for a cow in summer, and a small load of hay for fodder in winter, with free fuel.

24. The usual food of the domestics consists in rye-bread, milk, potatoes and other vegetables, groats, peas, beans, fruit, flour food, and butchers' meat, (chiefly pork, seldom mutton, and most rarely beef) once or twice in the week on an average, sometimes even thrice. Potatoes form the chief nutriment of the other farming labourers, with the above-mentioned additions, but less, often much less, frequently. The usual drink is water; in time of harvest very small beer, or common spirits are given when the work is hard. The domestics live tolerably well; comparatively the labourers very poorly in general.

25. The women are employed in the field during harvest, and in the gardens; with the cattle; with turning the grain in the storehouses; at the washing and shearing of the sheep; also at various other work. They have, besides, useful occupation in their gardens, and in winter they spin, though not so generally as in other parts.

26. The number of the men subject to military service is to be found in the accompanying Statistical Table; but, as all cannot be employed, at least not in time of peace, the number wanted is drawn by lot, and the remainder are placed in the army reserve. Of the number subject to service in the standing army, only the tenth part, upon an average of the last three years, has been annually required in this department.

27. Substitution

27. Substitution is not allowed of, on the principle that all ought to serve who are qualified, and not legally exempted, and in time of war all might indeed be called out; but, as a great number are not wanted to serve in the line, and only those who are required for it belong afterwards to the landwehr (except possibly in war time), it follows that many do not serve at all, by which a door is opened to exemptions through favour, and hence a principle, ostensibly good in theory, is actually bad in practice, the frailty of human nature not having been taken into the account.

28. Wood and turf are the principal kinds of fuel used, and either or both are to be found on the most properties. In the low country straw is also used. When wood and turf are bought, the prices may be called,

From 3 *r.ds.* to 5 rix dollars, for 108 cubic feet of hard wood, or about 8/9 ½ to 14/7 ½
From 2 - to 2 ½ - - - - - — - - - fir — - - 5/10 ¼ to 7/3 ¾
And about 2 rix dollars for 1,000 pieces (called bricks) of turf, about
equal to 108 cubic feet (a klufter) of fir wood, about - - - 5/10 ¼
The prices vary according to the distance from the greater markets for the articles.

29. The prices of clothing articles usually worn by the labouring population in the country are as follows:

A Male attire of linen (jacket and trousers) about	-	-	-	-	-	35	silver groshes, or about	-	-	41	pence
A woollen jacket	-	-	-	-	30	-	—	-	—	-	- 35 1/10 -
A shirt	-	-	-	-	15	-	—	-	—	-	- 17 11/20 -
A pair of wooden shoes			-	5 to	6	-	—	-	—	5 85/100	to 7 -
A pair of leather ditto	-		-	20 to	40	-	—	-	—	23 4/10	to 46 8/10 -
A pair of worsted stockings			-	10 to	12	-	—	-	—	11 7/10	to 14 -
A pair of boots (seldom worn)				50 to	70	-	—	-	—	58 ½	to 81 9/10 -
A hat or cap	-	-	-	15 to	20	-	—	-	—	17 7/20	to 23 4/10 -
A Female, jacket with gown, or half woollen stuff or linen			-	35 to	40	-	—	-	—	41	to 46 8/10 -

Woollen stuff two, three or four times as much.

The yearly cost of the most economical clothing of the labouring class in the country is
For a male labourer, about 8 rix dollars to 10 rix dollars, or about 23/4 ¾ to 29/3
For a female ditto - - 6 - — - 8 - — - — - - 17/6 ½ to 23/4 ¾
Domestic servants (used in farming) are much better clothed.

No comparison can be drawn between these expenses here and in England, from want of sufficient knowledge of the latter.

30. There are no manufactories of importance in this department, but only some of small extent: viz., a couple of weed-ashes; a couple of cichory; one of potato syrup; a couple of oil mills; a couple of flour mills, and a couple of biscuit bakers' for exportation; several iron works, several paper mills, several distilleries and breweries, lime and brick kilns and the like.

31. Paupers are only in small numbers. Regarding their support and the expense attending it, *see* answer to the 17th query.

32. The general condition of the occupiers of farms and of the proprietors, is indeed more thriving now than it was some years ago, from the price of produce, particularly of wool, being better; it is, however, still far from being enviable.

N. B.—The sums in Prussian money are reduced to sterling at the rate of 205 *s.gr.* (silver groshes,) or 6⅔ *r.* (dollars), 70 *l.* sterling, which is the course of exchange as it is at present, and much as it has been for some time back. The Prussian pound is about 3 ½ per cent. heavier than the English.

I have had difficulty in collecting accurate information on many of these points, there being few public notices on the subjects of them; but I have drawn all from the best sources, and have used every endeavour to give correct and comprehensive answers. The groundwork of the statistical information is taken from the General Statistical Tables of the Prussian dominions, published every three years by Mr. Hoffmann, Director of the Statistical Board at Berlin, and the details are from other authentic channels not in print.

Not being versed in agricultural matters, I have perhaps erred in some of the technical expressions, but I hope to have made myself understood, and I have at times added the German word, when more in doubt about the sense of it.

British Consulate,
Dantzig, 13 May 1834.

Alex. Gibsone.

GERMANY.

— No. 15. —

Mr. Consul-General *Canning* to Viscount *Palmerston.*

My Lord, Hamburgh, 28 May 1834.

In Mr. John Bidwell's circular letter, dated the 26th November last, I received a list of Queries relating to the state of Agriculture, and the condition of the Population within the district of my consulate, with your Lordship's directions to return the most accurate and comprehensive answers to them which it may be in my power to furnish, accompanied by any further statistical information likely to be interesting to His Majesty's Government.

To obtain the information which these questions call for, and to arrange and translate a great part of it, has occupied much of my time and attention; but the difficulty of collecting it has occasioned an unavoidable delay in transmitting the answers, for which I have to solicit your Lordship's indulgence.

The accompanying Report contains my answers to the questions referred to me, with appendixes necessary to elucidate them; but for further information of this description I beg leave to refer to two publications, one of them being a Statistical Account of Schleswig and Holstein, published by A. C. Güdme, and the other the State Calendar of Mecklenburgh Schwerin.

I have, &c.

(signed) *Henry Canning.*

First Enclosure in No. 15.

ANSWERS to Queries.

Answer 1.—The district of the Consul-general at Hamburgh comprehends the Duchies of Mecklenburgh Holstein, Lauenburgh, Oldenburgh, and the Hanseatic towns; but residing always at Hamburgh, he has little opportunity, personally, of acquiring local knowledge of the whole of his extensive district, as regards the state of agriculture and the condition of the people. He must depend on the information he is enabled to obtain from others. As regards Oldenburgh, the means of obtaining information, with any accuracy, on the different matters contained in the queries are so imperfect, that I am not able to include that portion of my district in my Report.

The Hanse towns have very little agricultural territory; their land, especially that about Hamburgh, consists chiefly of marsh, orchard and garden ground, but their rural population is altogether in a very good condition; decent, comfortable, and not very poor.

The information which enables me to offer, I fear, very imperfect answers to the questions submitted to me, is drawn chiefly from Mecklenburgh Schwerin, Holstein and Lauenburgh; and I am indebted for it, for the most part, to the friendly trouble of the persons whose obliging reports will be found in Appendixes (A to N) hereto annexed. And the parishes or districts and estates respectively, of which I am able to supply any information, are:

In *Mecklenburgh.*—Gnoyen district, Gustrow district, neighbourhood of Rostock; Friedrichstorf, Dreweskirchen, estate in neighbourhood of Wismar; Prietzier, estate.

In *Holstein.*—Breitenburg district, centre of Holstein; Haselau, Haseldorf, Uetersen, Seefter, Collmar, Neuendorf, parishes in the marshes on the east coast of the Elbe; Kiel, district in its neighbourhood, extending through a large part of the east of Holstein; Osterade, Auvensiek, Steinwehr, Georgenthal, Grosswerder, Cronsburgh, estates, forming together a parish in the north of Holstein, adjoining Schleswig; Jersbeck, Stegen, estates in the middle of Holstein; Lubeck, the principality, in the neighbourhood of Eutin, belonging to the Grand Duke of Oldenburgh; Lauenburgh duchy.

2. The population of Mecklenburgh Schwerin is about 460,500 souls; that of Holstein about 419,000. The returns do not enable me to distinguish, generally, the rural population from that in the towns. In Mecklenburgh there may be about 95 souls to an English mile; in Holstein, about 126 souls to an English mile, including the towns. The number of inhabitants in the places I have mentioned in my answer to question 1, as far as the returns enable me to ascertain it, is about 20,500 in Mecklenburgh, of which about 2,500 belong to towns; and in Holstein and Lauenburgh about 74,000, of which 19,650 belong to towns.

3. The extent of Mecklenburgh is about 2,948,000 acres; the extent of Holstein, 212,600 acres; a considerable part thereof is moorland, which affords turf for fuel, heath and uncultivated land, but the precise proportion of each cannot be given. The cultivated land is divided chiefly into marsh land and geest land, or light sandy soil.

	Contains: Acres.	Waste.	Wood.	In cultivation.
MECKLENBURGH:				
The district of Gnoyen - - -	100,183	638	4,954	94,691
Ditto - - Gustrow - - -	153,680	- - -	43,908	109,772
Estate: Friederichstorff, &c. - -	2,063	- - -	172	1,891
Ditto - Prietzier - - - -	Unknown.			
HOLSTEIN:				
District: Breitenburgh - - -	25,000	5,000	1,500	18,500
Parishes: Haselau and five others -	13,070	- - -	- - -	13,070
District: Kiel - - - - -	300,000			
Estate: Osterade - - - - -	2,200	120	500	1,580
Ditto: Jersbeck, &c. - - -	10,500	2,200	800	7,500
Principality: Lubeck - - -	104,960	8,960	13,760	82,240
Duchy: Lauenburgh - - -	298,880	74,720	74,720	149,440

4. Some of the uncultivated land might be made productive; but as yet no scientific means are used to drain the turf moors and extract the fuel, and the proportion therefore that might be rendered productive it is very difficult to ascertain.

5. This differs in different districts and on different estates, according to the nature of the land. In Holstein, where there are so many dairy farms, and oxen are fed and fattened, the proportion of pasture may be greater than arable land: in Mecklenburgh it is different; but on the whole it may probably be fairly taken at five-ninths arable and four-ninths pasture.

6. The quality of the soil is divided generally into marsh land and geest land or light sandy soil; and these vary in their quality according as they are mixed with marl, loam, clay and alluvial soils; but the extent of each variety cannot be accurately stated. According to a table which I have seen, Schleswig contains about 200 parts marsh land, 925 parts of geest land, 290 parts of heath and quicksand, 78 parts of moor, 77 parts of meadow, 73 parts of wood; but in Holstein the proportion of marsh land may be more, and the quality of the geest land better. The specific quantities of each have not been ascertained, but the country is now undergoing a survey. In Mecklenburgh the quality of the land is divided into six classes.

1. Wheat land, containing 240 acres per hufe.
2. Peas land, - — - 240 to 287 acres per hufe.
3. Barley land, - — - 287 to 350 acres per hufe.
4. White oats, - — - 350 to 470 acres per hufe.
5. Mixed oats, - — - 470 to 638 acres per hufe.
6. Such land as can only be sown once in six or seven years with rye and coarse oats, 638 to 950 acres per hufe.

According to this proportion the direct taxes are regulated, and hence in some districts 638 to 950 acres of poor land pay the same tax per hufe as 240 acres pay in districts where the land is the best. The exact quantity of each of these qualities of land cannot be given.

7. In Mecklenburgh about one-fourth part of the land throughout the whole country is cultivated by the proprietors, two-fourths by farmers, and one-fourth by the peasants. *See* Appendix (A.) and (C.) The extent of such estates cultivated by the proprietors may be from 800 to 1,300 acres, but they vary; some are much larger, and several by far smaller. It is not more easy to answer this question accurately as regards Holstein, but it will be seen by the Appendixes that in some cases about one-sixth is cultivated by the proprietors, and that the extent of such properties is 1,200 to 1,300 acres, 2,200 acres, 3,616 acres, 500 to 4,000 acres, according to circumstances, but in general seldom exceeds 2,000 to 2,500 acres.

8. From 300 to 1,000 or 1,200 acres, in some cases even larger. The conditions on which the land is let are very various, but the usual term is at least seven years, or sometimes according to the rotation of sowing in practice, which must be strictly adhered to, and frequently for 14 or 21 years. The rent is paid at different periods, and one year's rent is sometimes paid in advance. The tenant must keep the buildings in good order, and in some cases plant fruit and other trees. The stock on the larger farms usually belongs to the tenant, but the stock on the smaller farms, tenanted by peasants, belongs usually to the landlord. Some farms of 250 to 300 acres have been sold, subject to a quit-rent of 3*s*. to 6*s*. sterling per acre. These are held in perpetuity so long as the quit-rent

is

is paid, but if re-sold, must be offered to the state or to the original proprietor, who has the refusal at the price any other person would give, or that it would bring at auction. Farms are also let on lease for eight to ten years, at from 9*s.* to 14*s.* per acre.

The tenant of smaller farms has sometimes various services to perform. *See* answers to this question in Appendixes (H), (I) and (M). *See* also the translation of an old lease, Appendix (O), and Appendix (P) showing the various sorts of land tenures, translated from Güdmes' Statistical Account of Holstein, page 171, which accompanies this report.

9. From the variety and intermixture of soils on a farm, the exact proportion of each of which has not been ascertained, it is impracticable to state the average rate of rent of each of the several qualities of land. It will be seen in the Appendixes how differently this question is answered.

In Mecklenburgh, 4*s.* 6*d.* to 16*s.* 8*d.* sterling is mentioned; two-thirds rix dollar to one and two-thirds per scheffel.

In Holstein, 14*s.* to 16*s.* 6*d.* and 17*s.* 6*d.* per 1¼ acre for the best land; 7*s.* 6*d.* to 8*s.* 6*d.* per acre for smaller farms; 3*s.* to 3*s.* 6*d.* and 7*s.* per acre; 7*s.* per acre for sandy soil; 8*s.* 9*d.* per acre for loamy sandy soil; 10*s.* 6*d.* per acre for sandy loam soil; 13*s.* per acre for loamy soil, fit for wheat; 21*s.* to 24*s.* per acre for marsh land; 13*s.* to 16*s.* for good moor land; 11*s.* to 16*s.* for good still soil; 8*s.* 6*s.* for light sandy soil.

In Lauenburgh, 14*s.* per acre as an average rent; landlord paying taxes.

Mr. Jacob, in his Report, page 40, computes the rent probably with more accuracy.

In Mecklenburgh, at 12*s.* per acre for the best farms, and at 6*s.* 4*d.* to 8*s.* 4*d.* and as high as 10*s.* 6*d.* per acre for medium soils.

In Holstein, on an average 13*s.* to 14*s.* per acre for good land.

10. In Mecklenburgh, cows, sheep and horses; in Holstein, oxen for fattening, and dairy cows. In Mecklenburgh, on an estate of 2,060 acres, having about 200 acres of meadow, there are 250 cows, 1,000 sheep, 16 oxen, 32 horses for work, and 25 colts and mares.

On an estate of 1,000 acres, 200 cows, 1,200 sheep, 20 horses, and 30 oxen for tillage.

On an estate of 1,000 acres, having something less than 300 acres of meadow, 100 cows, 1,000 sheep, 28 horses and colts, and 24 oxen.

In Holstein, on the marsh lands oxen are fattened, and on the inferior moor lands smaller cattle are fed.

One milch cow to two acres, on inferior land.

Three milch cows to four acres, on the best land.

In Lauenburgh, one dairy cow to two acres, on good land.

Four sheep to an acre on inferior land.

11. In Mecklenburgh, one-seventh wheat and rye; one-seventh barley and oats; one-seventh peas and oats; one-seventh fallow; three-sevenths laid down with clover for pasture. Also, one-sixth wheat with some peas, one-sixth rye with ditto; two-sixths barley; two-sixths oats.

In Lauenburgh, one-eighth wheat; two-eighths rye; five-eighths oats with peas and buckwheat.

In Holstein, two-fifths wheat and rye; three-fifths barley, oats and potatoes.

In the marsh districts, rapeseed is the principal and most advantageous crop; then wheat in considerable quantities, barley, oats and beans. On the geest and light land rye is principally grown, buckwheat and oats.

12. In Mecklenburgh, wheat and rye, 10 to 11, 6 to 8, 6 to 7 fold; Barley, 9, 7 to 9, 7 fold; oats, 12, 5 to 7, 6 fold.

In Holstein, wheat and rye, 9 to 10 fold; barley, 10 fold; oats, 8 to 10 fold; wheat 10 fold in the marsh land; rye, 7 to 8 fold in the geest.

In Lauenburgh, wheat and rye, 20 bushels per acre; barley and oats, 24 bushels per acre.

In Appendix 10, page 200, in Mr. Jacob's Report, the produce of the chief kinds of grain on a particular estate in Mecklenburgh is stated to be, wheat, 30 bushels per acre, rye 26 ditto, barley 28 ditto, oats 33 ditto; but he adds, with truth, "that from the production of a single estate no conclusion can be drawn as to the produce of the soil of the whole country, but there is no doubt that the general average would be much less than the average produce of the particular estate."

And another calculation to be found in Mr. Jacob's Report, Appendix 21, page 233, shows the produce of an estate in Holstein to be, wheat, 28½ bushels per acre; rye, 24 ditto; barley, 24 ditto; oats, 37 ditto.

13. The usual rotation seems to be, first year fallow; second year rapeseed or wheat; third year wheat after rapeseed; fourth year barley after wheat; fifth year rye or oats, with clover; three years pasture.

When the soil is very luxuriant, the practice is to sow rapeseed first after fallow, otherwise wheat.

On some lands wheat or rye follow the fallow. On light lands buckwheat is sometimes sown in the fourth year. Refer to the Appendixes for the practice on different lands.

14. Rent is invariably paid in money. Some of the peasant tenantry may in some cases be liable to some services, and to deliver some quantity of grain, &c., but, generally speaking, no proportion of rent is paid in labour or in kind. According to Appendix (D.) the rent in some cases is payable in a certain quantity of rye, which is, however, com-

GERMANY. No. 15.

(Enclosure 1.) Answers to Queries.

muted into money according to the prices of the current year; and according to Appendixes (G), (K) and (L), small farmers attached to large estates, sometimes, though not uniformly, pay in labour and part in kind; but the system is on the decline, and the practice getting quite into disuse.

15. In Mecklenburgh the proprietor of the soil is subject to a tax which is rated per hufe, but of which it is exceedingly difficult to ascertain the exact value in English measure and money. The hufe, as has been stated in answer No. 6, is of different measurement, varying, according to the quality of the land, from 240 to 950 acres, but the average measurement of a hufe has been taken at 458 acres. The tax is stated in Appendix (A.) to be 80 dollars per hufe, about $7\frac{1}{2}d.$ sterling per acre; in Appendix (C) to be 70 dollars per hufe, about $6d.$ per acre. But supposing a hufe to contain only 240 acres, which is the quantity of good land usually appropriated to it, then the tax on good arable land may be considered as $14d.$ sterling per acre, which is paid periodically into the public treasury.

The proprietor is also subject to various local taxes, namely, church-rates, clergymen, &c.; insurance from fire of buildings and stock; repairs of roads, bridges, &c.; support of poor; school-tax; which are shown by Mr. Jacob (page 40 and page 188) to be about $9\frac{1}{2}d.$ sterling per acre, which added to the above would make the whole taxes payable by the proprietor of an estate in Mecklenburgh to be $1s.\ 5d.$ or $1s.\ 4\frac{1}{8}d.$ sterling per acre. Mr. Jacob has computed them at $1s.\ 10d.$ sterling per acre.

In Holstein, the principal taxes are ordinary contributions, being 36 dollars or about $6l.$ sterling per plough. This is a measure which, like many other modes of measuring the land in Holstein, as shown in Appendix (Q), is arbitrary, and no accurate proportion can be given of it; the number of ploughs for which each estate is liable to pay the contribution being fixed after survey by agreement with the government.

Land-tax rated according to the value of the cultivated land on an estate.

Bank interest being 6 per cent. on an agreed value of the land.

These taxes being thus rated, not by any general measurement of the land, but by agreement between the government commissioners and the proprietors of estates, fixed according to the value and nature of the land upon survey, and varying on different estates, renders it impossible to give the rate generally per acre in British money with any degree of accuracy. According to the aggregate sum paid on the estate of Jersbeck, (*see* Appendix (L), these taxes together do not amount to more than $1s.\ 2\frac{1}{2}d.$ sterling per acre. On Osterade estate, (*see* Appendix (H), they amount to $2s.$ per acre; and they are computed at the same rate in the neighbourhood of Kiel, (*see* Appendix (G); but Mr. Jacob (p. 74) rates the taxes at about $4s.$ per acre. Of these taxes, the ordinary contribution is paid solely by the proprietor, the other taxes sometimes by the proprietor and sometimes by the tenant, as may be agreed upon between them; but the proprietor is responsible to the government for the whole, and pays the amount of his own accord periodically into the public treasury. In Appendix 22 to Mr. Jacob's Report, p. 238, it is stated that the government taxes, church, school, and poor-rates, &c. &c., all fall upon the tenant, though the landlord is held accountable to government in the first instance.

There are many other ordinary taxes, including poor and church-rates, and some extraordinary taxes, not of any great importance, which fall on the proprietor or tenant according to circumstances, and which will be found detailed in Appendix (N.)

16. In Mecklenburgh, the farmer pays no land-tax, unless the conditions of his lease require it. He is subject to head money ten dollars, or something about $30s.$ per annum, and to $\frac{1}{2}$ or $\frac{3}{4}$ per cent. on his rent. In Holstein, the farmer pays no direct taxes, except what his contract with the landowner requires. This sometimes includes land-tax and bank interest. He is subject to rates for poor and parish purposes, but they are not important.

17. It does not appear that any proportion of the taxes levied on the proprietor or occupier is for the relief of the poor or for religious purposes, one dollar per hufe, in Mecklenburgh, excepted. The proprietor of the soil, it is true, must provide for the poor upon his property, and the occupier assists, but it is done by providing a dwelling, garden, potatoe plot, clothes and fuel, medical aid, by voluntary contributions, and not by money levied as a tax, except in the cases of a rate mentioned in the Appendixes (E), (F,) (G), and (M.) The clergy are supported out of the property of the church, from whence they are provided with house and land; in some places they take a tithe in kind; labour, to till their land and cultivate their gardens, is provided by the peasantry for them without payment, as well as assistance to keep their houses in repair.

Their income in money arises chiefly from fees, Easter offerings, &c. (*See* Appendix (H), where this question is answered at length.

18. In Mecklenburgh, namely, at Rostock and Wismar, articles of consumption pay an *ad valorem* duty of two to three per cent., with the exception of corn. The noble estates are free from duties on articles of consumption. In Holstein, it does not appear that articles of consumption are subject to any tolls on entering the towns. In Hamburgh and the Hanse towns an excise duty is payable on all articles of consumption, according to tariff.

19. Beef, $2\frac{1}{2}d.$ to $3\frac{1}{2}d.$ per lb.; veal, $3d.$ to $4d.$ do,; pork, $3\frac{1}{2}d.$ do.; butter, $4\frac{1}{2}d.$ to $5d.$; mutton, $2\frac{1}{2}d.$ to $3d.$ do.; wheaten bread, $1d.$ to $2d.$ do.; rye bread, $\frac{1}{2}d.$ to $\frac{3}{4}d.$ per lb.; potatoes, $2d.$ per peck; cheese, $1d.$ per lb., inferior sort used by the peasants

These

These are to be considered as the prices in the country of such articles as are consumed in common; but in towns, and particularly in Hamburgh, they are fifty per cent. higher. Other articles of food being obtained from the consumers' gardens or from the proprietor's farm, are not to be valued in money.

20. In Mecklenburgh, on a farm of four hufe, about 1,800 acres, there are employed, one clerk, one overseer, one chief shepherd, one wheelwright, one cartwright, six carters, one servant for the oxen, two assistant shepherds, fifteen day labourers, one housekeeper, one overseer of the dairy, one housemaid, five servant girls, fifteen labouring women.

This may be taken rather as a minimum. Another return reckons 20 men servants and labourers, and also 20 women and servant girls to a farm of three hufe or 1,350 acres; and another statement gives thirteen day-labourers and five stablemen to a farm of 1,100 acres. *See* Mr. Jacob's Report, p. 196.

In Holstein, small farms from 50 to 100 acres have one servant, man or woman, two day labourers, a boy, the farmer himself, and his wife. A farm of 750 acres requires six carters or ploughmen, two boys, ten to twelve labourers and ten women; and during harvest, the labourers' wives and ten or twelve extra hands are engaged. Larger farms or estates have one bailiff, one clerk, one foreman in the field, one foreman in the farmyards, one man to every four horses, sometimes six, and sometimes twelve, according to the size of the farm, one cowherd to each 100 cows, ten to twenty day labourers, ten or twelve women, and if it be a dairy farm, more.

21. In Mecklenburgh, clerk, 100 dollars, or 18 *l.* per annum.

Overseer - - } 30 dollars, about 5 *l.* each per annum, besides 24 bushels of rye, 18
Master shepherd } bushels of barley, 6 bushels of oats, 6 bushels of peas, a dwelling, a
Wheelwright - } garden of ¼th of an acre, land in cultivation, ⅛th of an acre for potatoes,
Cartwright - - } ⅛th for linseed, and fodder for a cow.

Carters, 16 dollars, about 2 *l.* 12 *s.* 6 *d.* per annum in money, besides board; two lbs. of wool, 30 ells of linen, and one coat in two years.

Servant for the oxen } same as above, but no coat.
Assistant shepherds }

Labourers, eight schillings, or 7 *d.* a day, a dwelling, a piece of land like that of the overseer, and fodder for a cow.

Housekeeper, 40 dollars, about 7 *l.* per annum, board, and 32 lbs. of flax, 30 ells of linen, and 2 lbs. of wool.

Overseer of the dairy, 24 dollars, about 4 *l.* per annum, board, 16 lbs. of flax, 30 ells of linen, two lbs. of wool.

Housemaid, 12 dollars, about 2 *l.* per annum, board; one pair of shoes, 30 ells of linen, 1 lb. of wool.

Servant girls, nine dollars, about 1 *l.* 10 *s.* per annum; board and allowance as the former.

Labouring women, 5 *d.* per diem from Easter to Michaelmas; 4 *d.* per diem from Michaelmas to Easter.

In Holstein, the wages are: bailiff, 100 dollars, about 18 *l.* per annum; clerk, 40 dollars, about 7 *l.* 7 *s.* per annum; foreman, 50 dollars, about 9 *l.* per annum; second foreman, 30 dollars, about 5 *l.* per annum; carter, 28 dollars, about 4 *l.* 14 *s.* per annum; cowherds, 20 dollars, about 3 *l.* 13 *s.* 6 *d.* per annum; day labourers, 10 schillings, about 9 *d.* sterling, per day in summer; 8 do., about 7 *d.* sterling per day in winter; women, 6 do., about 5 ½ *d.* sterling per day.

The day-labourers, stablemen, and cowherds, if not lodged and boarded by the proprietor or his farmers, get a free dwelling in a cottage, a cabbage garden, a piece of ground equal to one-eighth of an acre, for potatoes, fodder for a cow, 16 bushels of rye, eight bushels of buckwheat, and turf for fuel.

22. Yes; in Mecklenburgh, the day-labourer 8 *d.* sterling per day, being 1 *d.* more; women, 5 ½ *d.* do., being ½ *d.* more.

In Holstein, the day-labourer 10 ½ *d.* sterling per day, being 1 ½ *d.* more, but he works from six in the morning until night; women, 7 *d.* sterling per day, being 1 ½ *d.* more.

N.B.—By referring to the Appendixes, it will be seen that the answers to the three last questions vary very much according to circumstances, and therefore it is difficult to give any fixed rule.

23. In Mecklenburgh, the servants seem to be always boarded and lodged, the labourers never. In Holstein, the servants belonging to the proprietor's farm are sometimes boarded and sometimes not; the labourers never.

24. Their usual food is farinaceous. Buckwheat grits, boiled in water and eaten with butter and salt; flour made into dumplings; rye bread, potatoes, bacon, smoked and salted meat. But the proportion of fresh butchers' meat is very small; the peasants, particularly those who board themselves, get butchers' meat very seldom. The servants who are boarded by the farmers get fresh meat occasionally, and particularly in time of harvest. In Lauenburgh they seem to get butchers' meat oftener. Their beverage is beer and spirits.

25. The women work on the land in harvest, and assist in spreading manure, and they work in their gardens. They also spin wool and flax, as well for their own use as for sale, as often as their usual domestic duties will allow.

GERMANY. No. 15.

(Enclosure 1.) Answers to Queries.

26. In Mecklenburgh, the actual number embodied is 3,580 men, taken at about one per cent. on the whole population of 1815; but about one-third are called out annually, and a proportional number retires and belongs to the reserve. In Holstein, the actual number embodied is 3,600, taken on the population of 1815. The service is for two years at first, and then six years in the reserve for one month annually.

27. The price for a substitute varies much, being from 15 *l.* to 50 *l.* and even to 60 *l.*

28. Turf is the fuel principally used, with some wood. The turf is derived from the moors and turf bogs which are distributed throughout the duchies, and of which every estate has a portion. It is often procured for the expense of digging and carrying; but the price in the country is about 2 *s.* 6 *d.* sterling for 1,000 sods, each about the size of a brick.

29. A superior peasant may clothe himself for from about 2 *l.* to 3 *l.* per annum; a labourer, for 1 *l.* 10 *s.* to 2 *l.* per annum; the women something more. The clothes are chiefly made from home-made materials. They are on the whole cheaper than in England.

30. There are no manufactories of any importance in any of these parishes or districts; but at Neumunster, in Holstein, are two manufactories of woollen cloths for the use of the peasants.

31. On the estates real paupers are few; the necessity that the landlord is under of providing for his poor prevents excessive poverty. In towns and parishes the contribution for the poor is computed at two to three per cent. on income. The number of paupers about two per cent. on the population; in some places said to be increasing.

32. The general condition of the occupiers of farms is by some deemed prosperous, according to the ideas of the inhabitants of the country; though in other places they are not admitted to be flourishing, as a reference to the answers to this question in the Appendixes will show.

Henry Canning.

Appendix (A).

ANSWERS by *George Meyenn*, Esq., Vice-Consul at *Rostock*, as regards *Mecklenburgh*.

Appendix (A.)

Answer 1. DISTRICT Gnoyen.

2. 10,223 inhabitants; of which, 2,463 in a town (Gnoyen), 7,760 in the country.

3. 18,853,549 square rods of 256 square feet each (244 ½ hufen or hides), of which 931,411 square rods wood land, 120,000 square rods waste land, 17,802,138 square rods land in cultivation.

4. With the exception of some commons, which serve as pasture for the herds kept in the town, little or no waste land could be rendered productive; at least, it would not pay the charges.

5. One-half of the cultivated land is arable, and the other half serves as pasture.

6. The greater proportion of the land consists of a mixture of clay, sand and black so The land is divided into six different classes; viz.:

1st class	70 and 75 square rods to a scheffel	
2d do.	80 and 90 - — - — -	
3d do.	90 and 110 - — - — -	600 scheffel are equal to a hufe or hide.
4th do.	110 and 150 - — - — -	
5th do.	150 and 200 - — - — -	
6th do.	200 and 300 - — - — -	

The soil of this district may therefore be computed to belong originally to the 4th clas but has been rendered by far more superior by cultivation.

7. About one-fourth part of the land throughout the whole country is cultivated by the proprietors, two-fourths by farmers, and one-fourth by peasants (boors). In this district, however, the number of proprietors cultivating their estates is as two to one to the farmers and boors. The reason is, that only few estates belong to the Grand Duke, and by far the greater proportion to privates. The extent of such estates cultivated by proprietors is generally from 150,000 to 180,000 square rods, independent of wood land and meadows, which may render the surface from 20,000 to 60,000 square rods larger.

8. The size of the farms is the same as above; generally, the estate is delivered to the farmer at Midsummer, and in most instances he pays the grain sown, as well as the labour to have it sown. On his leaving the farm his successor must of course pay the same to him. Besides, one year's rent is paid in advance to secure the proprietor. The stock belongs to the farmer, with few exceptions, or is paid by him; but the stock of the boors in most instances belongs to the proprietors of the estates.

9. The rent is from ⅔ rix dollar to 1 ⅔ rix dollars, or per scheffel, or ; but is not only dependent on the quality of the arable land, but also on the quality and quantity of the meadows attached to the estate.

10. Much

10. Much depends on the quality of the land and meadows; but on an average, one may calculate that on a well-cultivated estate of 180,000 square rods or with 50,000 square rods or meadows, &c., the following number are fed: 28 horses and fillets, 24 oxen, 1,000 sheep, 100 cows, 16 pigs, and a number of fowls, turkies, pigeons, &c.

11. One-sixth wheat, one-sixth rye, of which some peas; two-sixths barley, two-sixths oats.

12. Ten grains of wheat of one grain sown; 11 do. rye; 9 do. barley; 12 do. oats; is considered an excellent crop.

Many estates produce more wheat and less rye and oats, which very often they are obliged to buy from their neighbours.

13. If the estates are in very good condition, then rapeseed is first sown; next wheat and some rye; then follows barley; and lastly, oats and some peas; in which manner the soils yield four crops in four successive years; then the land is left for pasture three years (potatoes are grown during this time, as well as some linseed and clover seed sown). Generally the estates are divided into seven parts: one-seventh is sown with wheat and rye, or rye alone, and some peas, one-seventh with barley, and one-seventh with oats. Sometimes rapeseed and peas are sown before the wheat. Potatoes are always planted when the land is left for pasture.

14. The rent is always paid in ready money, only the boors have sometimes to perform work (socage services), and some copyhold farms have to deliver certain quantities of grain, &c.

15. Mecklenburgh is divided into hufen or hides, at 600 scheffel, or each.
A scheffel is equal to 70 and 300 square rods cultivated land.
50 and 150 - — - meadows.
100 and 500 - — - wood land or pasture.

This division was made during the years 1758 to 1772, and the wood was not taken into consideration, but only the land. Hence it arises that those estates which had extended woods not only gained by the sale of the wood, but now pay less taxes than those who had little or no wood land. The whole extent of the country is 6,415 hufen or hides, of which 2,924 belong to the Grand Duke, 3,153 to privates, 338 to convents, towns, &c. All the taxes, inclusive of land tax, interest of the public debt, &c., are as near as possible 80 dollars, or per hufe, or vary a couple of dollars from one year to another. These taxes are paid at Rostock to certain officers appointed by the representatives of the people.

16. Head-money 10 dollars, or and $\frac{3}{4}$ per cent. of the amount of the rent.

17. Only a very small proportion of the above taxes is for the relief of the poor, about one dollar per hufe; for religious purposes, none. Every owner of an estate is obliged to keep his own poor, as will be shown hereafter. In towns, the taxes for the poor are about one per cent. of the income. Most of the churches have property of their own, and the clergymen receive certain emoluments, rituals, &c., from the parishioners. In many instances, the Grand Duke and the proprietors of the estates are co-patrons, and have a right to present a clergyman, who is elected by the parish. In few instances, the patrons have a right to elect a clergyman. The lands of the churches are generally let on long leases to the proprietor of the estate where the church is situated.

18. The duties of articles of consumption entering the towns are from two to three per cent., *ad valorem*. Corn and grain are free of any import duty, and only pay an export duty by sea at from 5 *d.* to 6 *d.* per quarter. The importation of flour and spirits, however, is only permitted under certain restrictions.

19. The price of butchers' meat varies very much, as it depends chiefly on the inquiry from abroad for live stock. Beef is now paid at the rate of 2 *d.*, pork 2 $\frac{1}{4}$ *d.*, veal 2 $\frac{1}{4}$ *d.*, butter 5 *d.* and 6 *d.*, potatoes 8 *d.* and 9 *d.* per scheffel, seven of which are nearly equal to a quarter, Winchester measure.

20, 21, 22 & 23. The following servants are kept on an estate of the extent of four hufen or hides, equal to 1,800 acres:

One clerk, who receives a salary of 100 dollars per annum, or 18 *l.*, and is boarded.

One overseer - -
One master shepherd
One wheeler - -
One cartwright -

With a salary of 30 dollars, or 5 *l.*, each, besides 24 scheffels, or bushels, of rye; 18 scheffels, or bushels, of barley; 6 scheffels, or bushels, of oats; 6 scheffels, or bushels, of peas; 2 scheffels, or bushels, of wheat; a dwelling; a garden of 50 square rods, or about one quarter of an acre; a piece of land in cultivation of 24 square rods, or about one-eighth of an acre, to grow potatoes, and another piece of land of 24 square rods, or one-eighth of an acre, to sow linseed; besides a cow is kept for them. They are not boarded.

GERMANY. No. 15.

Appendix (A.) Answers to Queries.

Six grooms, who are boarded; they receive 16 dollars*, or 2*l.* 12*s.* 6*d.*, per annum each; 2 lbs. of wool, 30 ells of linen, and one coat in two years, value five and seven dollars, or

One servant for the oxen, as above, but no coat.

Two assistant-shepherds, like the servant for the oxen.

About 15 day-labourers, who receive 8 schgs. a day (about 7 *d.* sterling), and in time of harvest 9 schgs. (about 8 *d.*) They are not boarded, but have a dwelling; and a piece of land, like that for the overseer, &c., is allotted to them, and a cow kept for each of them.

One housekeeper, with a salary of 40 dollars, or , 32 lbs. of flax, 30 ells of linen, and 2 lbs. of wool. Is boarded.

One overseer of the dairy, 24 dollars salary, or , 16 lbs. of flax, 30 ells of linen, and 2 lbs. of wool. Is boarded.

One housemaid, 12 dollars salary, or , 1 pair of shoes, 30 ells of linen, 1 lb. wool.

Five servant girls, 9 dollars salary, or , - ditto - - ditto - - ditto.

Fifteen labouring women, 5 schgs. a day (4 *d.*) from Easter to Michaelmas; 4 schgs. (3 *d.*) from Michaelmas to Easter; 6 schgs. (5 *d.*) in time of harvest. Eighty days' work are deducted for their dwelling; 24 schgs., or , they must pay for the keeping of their cow, and 36 schgs., or , for 3 lbs. of wool. In sheep-shearing time they receive for the shearing of every fleece, ½ schg., or , and for every lamb ¼ schg., or

24. Their usual food consists of milk, grits, potatoes, bacon and brown bread. Twice or three times a week salt meat, but seldom butchers' meat, perhaps once a month. In harvest time they receive as much meat and beer as they can consume, besides some brandy; but then they are obliged to work from four o'clock in the morning till sunset.

25. The women work on the land, not only during the harvest but also at other times, on an average three days a week. Independently of the care of their families, they spin and knit, and assist in cultivating their gardens, &c.

26. The whole population of Mecklenburgh Schwerin is 460,529 individuals. About 1,000 men of 20 and 21 years old are annually called out for the active service; about 250 men for the reserve.

27. 100 and 200 dollars, or

28. Turf (peat) forms a great part of the fuel, besides wood. The prices vary very much. On those estates situated in the vicinity of the greater towns, 1,000 pieces of turf are paid at the rate of half a dollar to one dollar, or . A fathom of dry beech wood (about 200 cubic feet) is paid at from two to six dollars; 5,000 pieces of turf of the best quality will give as much heat as a fathom of wood, and as half a chaldron of coals, Newcastle measure.

29. The clothing of the labouring classes consists chiefly of a linsey-woolsey stuff, home-spun and woven. The stockings are knitted by the women and shepherds. Their great coats are of a coarse cloth, worth from two to three schillings, or a yard. During the summer they wear linen jackets or coats. Upon the whole, I consider their clothing cheaper than in England.

30. There are no manufactories in this district; in fact, there are none in the whole country, with the exception of one cloth manufactory at Schwerin; only three paper mills, and no cotton or silk manufactories. The Mecklenburgh industry has entirely the better cultivation of the soil for its aim.

31. Paupers are not very numerous in the country. If a man (an individual) serves upon an estate, and becomes 50 years old, then the proprietor or farmer of the estate is obliged to keep him, if he cannot find another place. If he becomes a pauper, the occupier of the farm must provide him with a dwelling and certain provisions. If he should leave his place and become a pauper or a vagrant, he is, according to circumstances, transported to his native place, where the proprietor or occupier is obliged to keep him, as above mentioned, or the vagrant is sent to the workhouse. In the towns, certain taxes (about one per cent.) are levied for the support of the poor.

32. The general condition of the occupiers of farms cannot be called flourishing; at any rate, if they have no fortunes of their own, say from 8,000 dollars to 12,000 dollars, or to begin with, they can hardly keep themselves and their families decently.

* A dollar equals 3*s.* 6*d.* sterling.

Appendix (B).

ANSWERS by Baron *Von Moëller*, as regards *Mecklenburgh.*

Appendix (B.)

Answer 1. GUSTROW district, grand duchy of Mecklenburgh Schwerin, namely, that part of it which contains estates with noble privileges. Size, 153,680 acres.

2. About 10,000 in the country.

3. Of the surface, sec. 1. No waste land, except the roads. In grain, three-sevenths; in pasture, two-sevenths; in wood, two-sevenths.

4. *See* sec. 3.

5. *See*

5. *See* sec. 3.

6. About two-sevenths loam, loamy sand (clay) three-sevenths, sand two-sevenths.

7. Three-sevenths cultivated by the proprietors, four-sevenths on lease.

8. The average extent of an estate, 1,000 acres; 20 *l.* for a surface of arable land, in which 14 quarters, Winchester measure, may be sown.

9. Mere land 10 *l.*; clay, 15 *l.*; loam, 20 *l.*

10. An estate of 1,000 acres: 200 cows, 1,200 sheep, 20 horses, 30 oxen, the latter for tillage.

11. One-seventh is sown with wheat and rye, one-seventh barley and oats, one-seventh peas and oats, one-seventh fallow, three-sevenths laid down with clover for pasture.

12. Wheat and rye, from 6 to 8 bushels; barley, from 7 to 9 do.; oats, from 5 to 7 do.; peas, from 5 to 12 do., for every bushel sown.

13. First year, after fallow, wheat and rye; second year, barley and oats; third year, oats and peas.

14. In money, with hardly any exception.

15. 100 *l.* for a farm of the above description, *i. e.* size.

16. This depends entirely on the conditions of the lease.

17. Every estate is obliged to provide for its own poor. The clergyman has generally some land, or is paid by the parishioners.

18. The estates are nineteen-twentieths noble, and thus exempt from any duty or toll, accise, &c., whatever.

19. Beef, 3½ *d.*; mutton and veal, 4 *d.* per lb.; pork, 3 *d.* per lb.

20, 21, 22 & 23. The labourers dwell constantly on the farm. One of 1,000 acres will have 25 families; six waggoners, fed at the farmer's table, for six teams of farm horses; one for eight teams of oxen, to feed them, besides a boy. Such a labourer has a dwelling, and a garden of about 120 square roods; his cow pastures on part of the farm; he keeps swine, geese and poultry; receives the necessary fuel, has a bushel of barley or rye and a quarter of a bushel of linseed sown on the fallow. For this his wife or daughter works 100 days. For his labour he is paid about 8 *d.* a day.

24. Pork, poultry, potatoes, cabbage, &c.; beverage, beer, rye-bread and barley-soup.

25. (No answer.)

26 & 27. The whole population of the country, 450,000 souls, of which about 1,000 men, when at the age of 22, are levied annually by ballot; term of service, four years, then two years in the reserve. Except the first year of service, generally on leave of absence. Substitute, 20 *l.*

28. Turf and wood. 168 cubic feet of beech wood, 16 *s.* sterling.

29. Coarse linen of their own growing. Coarse cloth at 4 *s.* a yard. The women calicoes and coating at from 5 *d.* to 20 *d.* a yard.

30. The manufactories are very few, hardly worth noticing.

31. *See* paragraph 17.

32. In general prosperous.

Appendix (C.)

ANSWERS by *P. Jusserot*, Esq., Vice-consul at Wismar, as regards Estates in *Mecklenburgh.*

Answer 1. ESTATES of Friederichstorff and Dreweskirchen.

2. 304 inhabitants.

3. 385,887 square roods, or 2,063 acres; of which 32,223 square roods, or 172 acres, woodland, 353,664 square roods, or 1,891 acres, land in cultivation.

4. There is no uncultivated land on these estates.

5. About nine-tenths are arable, and one-tenth consists in meadows for making hay. There is no land which serves continually for pasture.

6. About one-sixteenth part is sand, one-third clay, and the remainder black soil.

7. Of the whole extent of Mecklenburgh Schwerin about 2,700 hufen or hides belong to the Grand Duke, which are almost all, or perhaps all, let; about 3,600 hufen belong to private proprietors, and thereof about one-fourth part is cultivated by the proprietors themselves, two-fourths by farmers, and one-fourth by peasants. Some towns are also possessed

of some lands, but of no consequence. The size of the single estates cultivated by the proprietors themselves is in most cases, on an average, about 180,000 to 250,000 square roods, or 900 to 1,300 acres, though there are many estates which are much larger, and several which are by far smaller.

8. The general size of the farms is as before stated; the conditions under which the land is let are very various, but usually they are let for at least seven years; frequently for 14 or 21 years. The rent is paid in two, three or four terms, and one year's rent is usually paid in advance. The farmer is, generally speaking, not allowed to change the prescribed rotation of seed; he must partly keep the buildings in good order, and plant annually a certain number of fruit and other trees.

9. Calculating 520 to be equal to about 100,000 square roods, the rent is from about 4*s.* 6*d.* to 16*s.* 8 *d.* sterling per acre, which great difference arises from the variety of the soil, and from the local situation of the estates in this country.

10. This differs very much according to the quality of the soil; on the aforementioned two estates there are fed 253 cows, 16 oxen, 32 horses for work, and about 25 fillies and mares, 1,000 sheep; and some pigs, fowls, pigeons, &c., are also fed for sale, and for the use of the household.

11. Referring to No. 13 respecting the courses in which the land is cultivated in this country, one course is sown with wheat or rye, or partly with one or the other, according to the quality of the soil; of another course, three-fourths are usually sown with barley or oats, and one-fourth with peas, and the third with oats, and together therewith in this third course clover and other seeds to serve for pasture for the three following years.

12. Taking the whole of Mecklenburgh Schwerin, it is considered to be a good average produce, if of wheat, rye and pease, one grain brings up six to seven grains, of barley one grain seven grains, and of oats one grain six grains; however, this differs very much on the different estates.

13. The arable land in this country is usually cultivated in seven courses, of which each is first sown with wheat or rye, or partly with one or the other; secondly, with barley and pease, then with oats and clover, &c., and then it serves for pasture for three years, and one year it is fallow, which in some cases is partly used for growing flax, and for planting potatoes and other food for animals. Estates which have a particularly rich soil also grow rapeseed, which, however, speaking of the whole of Mecklenburgh, does not come into consideration. There is also much land where little or no barley is sown, and, instead thereof, oats.

14. The customary value in Mecklenburgh Schwerin are new two-third pieces, whereof three are two dollars, and in this value the farmer has to pay the rent in almost all cases. The peasants, however, have sometimes to perform work for a certain number of days every year.

The proprietors have to pay annually about 70 dollars, or about 12 *l.* sterling taxes, per hufe or hide. The extent of a hufe differs very much, it depending upon the quality of the soil, so that it may vary from about 45,000 to 180,000 square roods, or 240 to 900 acres. These taxes must, for the greatest part, be delivered by the proprietors at certain offices.

16. The farmer has to pay for himself and family, a head-money of 10 dollars (about 1 *l.* 14*s.* sterling, and besides this, an extraordinary contribution of one-half to three-fourths per cent. on the amount of the rent.

17. A very small proportion of the above-named taxes levied by the Grand Duke are for the relief of the poor. Every proprietor of estates, however, must provide for the support of his poor, besides the above-stated taxes. Every estate is subject to certain taxes to the church where it belongs to, which consist sometimes in victuals, sometimes in money. Some churches have property of their own, whereby they are enabled to provide for the support of the clergyman, &c.; but if this is not the case, the parishioners have to take care thereof.

18. The articles of consumption on entering towns pay a toll of about two to three per cent. of the value, with the exception of corn, which does not pay any import duty, but only an export duty. In some towns there exist restrictions respecting the import of flour and spirits.

19. The average price of good veal may be considered to be about 4*d.*, of beef and pork about 3½*d.* per lb.; of butter about 5*d.* to 6*d.* per lb.

20. On an estate of about three hufen (about 1,350 acres,) I believe that one may reckon about 20 men servants and labourers, and also about 20 women and servant girls.

21. The labourers who are not boarded, but who have a dwelling on the estate, receive in this neighbourhood in summer 8 schgs. (about 7*d.* sterling), and in winter 7 schgs. (about 6*d.* sterling) per day, and their wives 5 schgs. (about 4*d.* sterling) per day.

22. In harvest time the labourers on some estates of this neighbourhood receive at least 4 schgs. (about 3½*d.*), the women 1 schg. (about 1*d.*), more than at other times; however this differs very much in the country.

23. The

23. The labourers who are married are lodged by the farmers in separate houses, but not boarded; they have, however, a garden of about 80 square rods, and a cow is kept them. Besides this, they have 16 square roods to sow linseed, and 16 square roods for planting potatoes, and get the necessary fuel, for all which the women must usually work 80 days gratis. The unmarried servants and maids are lodged and boarded; the men servants receive 19 dollars (about 3*l.* 5*s.* sterling) wages, 24 ells (about 15 yards) linen, and in some cases cloth for a coat; the maid servants get 12 dollars (about 2*l.* 1*s.* sterling) wages, and 24 ells (about 15 yards) linen. Of course there is also some deviation in these wages; some proprietors or farmers give more and others less, according to circumstances.

24. Their food consists chiefly in potatoes, grit, bread and butter; commonly three times a week the servants who are boarded get meat either smoked or salt, and only very seldom butchers' meat, except in harvest time, when they get butchers' meat oftener. Where there are fish, they also get these.

25. The women must do such work on the land and at home which is adapted to their sex, for which they are paid.

26. According to the government almanack of this year the whole population in Mecklenburgh Schwerin consisted, towards the end of last year, of 460,529 individuals; and in this year there are to be levied for military service 1,443 men, whereof, however, only 787 men for active service, and 356 men for the reserve, which latter is but seldom called upon.

27. Commonly about 150 dollars (about 25*l.* 14*s.* sterling).

28. Wood and turf, which latter is gained from the moors at an expense of about 12⅔ n., (about 10*d.* sterling), for 1,000 sods, whereat it is then commonly given to the labourers who are not boarded. In the towns the price of turf is of course much higher. The price of wood in the different estates differs very much.

29. A whole set of clothes for a labourer may be had for about seven dollars (about 1*l.* 4*s.* sterling), and for his wife for about as much, which I consider to be cheaper than in England.

30. There exist no manufactories of any consequence in Mecklenburgh Schwerin, except one cloth manufactory in the town of Schwerin.

31. Generally speaking, the number of paupers cannot be called very great, and every proprietor must, as above stated, provide for the subsistence of those of his estate.

32. A great part of the farmers in this country are very well off, especially those who have occupied farms on long leases, as they have had opportunity of gaining money during those years when the prices of corn were high. Most of those, however, who have only in the latter years become farmers, I can certainly not consider to be well situated; many of them are undoubtedly very poor, they not having calculated on such low prices of corn as we have at present.

Appendix (D.)

ANSWERS by *Kammerherr von Könemann*, as regards Estates in *Mecklenburgh*.

Answer 1. THE following answers are to be considered as general observations, having a reference to the greater part of Mecklenburgh Schwerin.

2 & 3. (No answers.)

4. From the progress of agriculture in the last 10 years, that portion now remaining uncultivated, and which is really tillable, may be considered trifling.

5. The proportion of the arable land to the pasture depends upon the very different rotation in particular regard to the peculiar quality of the soil, &c. In proportion as a field is cultivated is five, six, seven, eight or nine divisions for pasture, there come respectively two-fifths, two-sixths or three-sixths, three-sevenths, three-eighths or four-eighths, and four-ninths. The remainder, with the exception of that part for fallow, is used for growing corn.

6 & 7. (No answers.)

8. The size of the farms differs too much to find out a general average. Such is the case also with the conditions as regards leases, which take the rotations as a basis in regard to the term. The rent, therefore, is paid in cash accordingly.

9. A surface of from 60 to 300 square rods yields an annual rent of from one dollar downwards to half a dollar, which depends upon the goodness of the soil, and inasmuch as it belongs to any one of the six classes of soil, unless favourable or unfavourable circumstances, as, for instance, additional meadows and pasture land render an increase of rent admissible, or a decrease necessary.

 10. Oxen

10. Oxen, milch cows and sheep, are the chief kinds of beasts of pasture; and, if no extraordinary management in the breeding of horses alters the proportion, generally about ten sheep, in proportion to one principal ox, are kept for the farm, as far as the space or room does not exclude the one or the other kind of beasts of pasture.

11. According as the goodness of the soil allows of the rotation one-fifth, one-sixth, one-seventh to three-fourteenths; one-eighth to two-eighths or two-ninths are sown with wheat and rye, but the remainder of the arable land coming into turn for bearing is sown with summer corn. However, without being able to vouch for the accuracy of the proportion, I think I may state that the sowing of wheat and barley to that of rye and oats in Mecklenburgh is upon an average as four to one.

12. This is determined by the natural quality of the soil in a large space. A natural wheat soil, namely, of a loamy substance, and under-soil, yields a larger crop of corn than an artificial one, which has acquired a mould soil by means of manure. As a rule of proportion for a middling crop, we may assume that a space of 70 square rods will yield a crop of nine, eight and seven scheffel of wheat, rye and barley, and of eight and six scheffel oats. In pease the crop very precarious.

13. After a previous fallow come first wheat and rye, then barley, pease and oats; and lastly, again oats and rye, but seldom wheat, unless the quality of the soil is superior.

14. The tenants under lease of larger farms always pay their rent in money. The farmers or tenants in fee, and other farmers, indeed, pay the canon and the rent also in this manner; for both, however, it is frequently stipulated by contract that this payment be made in a certain quantity of rye, and which is commuted again into money according to the prices of the current year.

15. All the estates which are comprised under the name of registered noblemen's estates contribute by virtue of a fixed land tax to the expenses of the government, and, by other yearly imposts, to the incidental expenses of parliament. All these taxes are raised according to the number of hufen or hides of land, and paid into the treasury at fixed terms, and the land itself, and not the proprietor, serves as a mortgage or security for the same. Besides this there are other land taxes paid into that department of the treasury appointed to pay off the government debts, which the parliament has taken upon itself to discharge, and also other extraordinary expenses, according to the number of hides of land, for a fixed number of years.

16. The tenants of estates (as such) pay no land tax, as the same is already rendered by the hufen or hide tax.

17. Every parish is bound by law to provide for its own poor; consequently there is no occasion for a general poor tax, although some individual parish societies exist for this object. On the registered noblemen's estates where the proprietor chiefly provides for the poor, there are few of them, as there are many opportunities of employing the older and feebler inhabitants.

18. In general, to none.

19, 20, 21, 22, 23 & 24. (No answers.)

25. The women in the country certainly share the work with the men; but only the lighter part, and they commonly gain thereby a surplus, besides the rent of their dwellings.

26. About one-fourth per cent. of the male population yearly is required by ballot to complete the number of troops, to which every person is liable, except in case of bodily infirmities.

27. From 120 to 180 rix dollars ( ) are paid to a substitute; that is to say, for a four years' active service, and one year in the reserve.

28. Wood of all kinds, and turf of different preparation are used for fuel. Both are, with few exceptions, to be obtained in the district. In the country every farm-house commonly receives from the proprietor a certain quantity gratis, or at a moderate price.

29. The working classes in the country are mostly clothed with linen cloth made of flax, herds and coarse wool. The price of these manufactures may be taken at from 6 schgs. to 20 schgs., or 5*d.* to 1*s.* 5½*d.* sterling an ell; but on a Sunday their dress is of better materials.

30. With the exception of the woollen manufactories, breweries and distilleries, the manufactories are not very extended in Mecklenburgh.

31. Answered in No. 17.

32. In general, prosperous.

Appendix (E.)

ANSWERS obtained through the assistance of *W. A. Warre*, Esq., as regards the District of *Breitenburgh*, and Neighbourhood of *Itzehoe*, in *Holstein*.

Answer 1. THE Herrschafft Breitenburgh; a district in Holstein, containing about 14 German square miles, or 250 English miles.

2. The population is about 11,000, of which about 8,000 are rural.

3. About 20,000 tons or 25,000 acres, of which 14,640 or 18,500 acres in cultivation; 1,200 or 1,500 acres in wood; 4,160 or 2,500 acres in heath, on which sheep are fed; 2,500 acres moor, from whence turf for fuel is obtained.

4. The greatest part of the uncultivated land might easily be brought under cultivation, particularly for clover, as marl is found almost everywhere in abundance.

5. About half one and half the other.

6. Three; marsh or rich alluvial soil; moor or turf, formed of decomposed moss and other vegetable substances; geest, or light sandy soil.

The extent of each it is difficult to give, as they are much interspersed.

N.B.—It is to be remarked with regard to this district, as well as Holstein generally, that it is composed of two descriptions of land, geest and marsh, in which there is a marked difference of quality, product of the soil, method of cultivation, &c. The geest land is that which is naturally above the level of the tide, and is generally a light sandy soil. The marsh is recovered from the water by means of dykes, and is generally a rich alluvial soil.

7. The greatest part is cultivated by the proprietors, principally substantial farmers. The extent of such properties in the marsh is generally about 80 or 90 tons, or 100 to 115 acres, and in the geest land about 125.

8. Few farms are rented, the ground being principally cultivated by the proprietor. In the lordship of Breitenburgh the three principal farms are about 400, 900, or 1,000 acres, let for 20 and 22 years. The conditions generally are, that the land shall be properly farmed; that the farmer insures the buildings, and takes the responsibility of fire. The buildings, farming utensils, &c. (which belong to the landlord) are surveyed and valued at the beginning and at the end of the lease, and any deficiency must be made good.

9. The average rent of a ton, 1¼th acre, of marsh land, is 8 to 9 dollars, or 28*s.* to 32*s.* sterling; good moor land, 5 to 6 dollars, or 17*s.* to 21*s.*; good stiff soil, 4 to 6 dollars, or 14*s.* to 21*s.*; inferior geest, light soil, 3 dollars, or 10*s.* 6*d.* Situation, however, makes a great difference; and in the neighbourhood of towns and villages the rent is often much more.

10. The best marsh grazing land is generally used for fattening oxen, six cwt. and upwards; the inferior and moor lands for smaller oxen. One young horse to every two or three oxen, and also a proportion of young cattle. On geest farms of 25 to 30 acres, from 12 to 15 milch cows and three or four young cattle are generally grazed. Sheep are fed on the farms that have large tracts of heath.

11. The exact proportions cannot be given. In the best marsh districts rapeseed is the principal and most advantageous crop; then wheat in considerable quantity, barley, oats and beans. On the geest soil rye is the principal; then buckwheat, of which the consumption among the peasantry is large; also oats, spring wheat, pease, and large quantities of potatoes; also the chickory root, as a substitute for coffee.

12. The produce of wheat in the marsh land is about tenfold, and of rye on the geest land seven to eight fold.

13. In the marsh land the rotation is generally rapeseed, wheat, barley, and twice oats. In the geest land rye twice, then buckwheat, then oats, and oats and clover. Sometimes buckwheat first, then twice rye, and then oats.

14. The rent is generally paid in money.

15. A land tax of 12 ½ schillings for every 62 ½ dollars value, reduced since 1817 one-half.

Six per cent. bank interest, calculated on a value somewhat arbitrarily fixed.

Thirty-six dollars yearly for each full plough of land, rated by agreement.

Herrngeld to the landlord, not considerable and very unequal.

Poor-money, school-money, &c., all uncertain.

Certain officers of the landlord collect these dues, and the landlord sends them to the receiver-general.

16. The farmer pays rarely the principal taxes; they are deducted from the rent, and so are paid by the proprietor.

17. This is so extremely uncertain as not to admit of a positive answer. Poor money is collected according to the necessity of the case, and each pays so much per cent. according

GERMANY. No. 15.

Appendix (E.) Answers to Queries.

to his property. A proprietor of a farm of considerable extent will have to pay 20 or 30 dollars yearly, and one schg. a week for each servant. Church money is about five dollars a plough, and contributions are occasionally called for, for the repair of the church and parsonage-house. There are no tithes, and the moderate revenue of the clergyman is derived principally from his glebe lands, and the incidental douceurs at marriages, births and deaths.

18. In this district there are none.

19. Beef, 2 ½ *d.* per lb.; veal and mutton, 3 *d.* per lb.; pork, 3 ½ *d.* per lb.; bacon, 5 *d.* per lb.; wheaten bread, 2 *d.* per lb.; black rye bread, 6 *d.* for 8 lbs., or three farthings per lb.; potatoes, 2 *d.* per peck.

20. In the marsh, where grazing oxen is more looked to than the produce of he dairy, the number of hired servants is very small in general. The ploughing and sowing, gathering in the harvest and threshing, being done by day-labourers. The geest farmer of 100 tons of land has generally as hired servants two men, two maids and a boy.

21. The one man, called grossknecht, gets about 30 or 32 dollars, the other called kleinknecht, about 24 or 26 dollars; one maid, called houptmagd, about 20 dollars, and the other, called nebenmagd, about 18 dollars in money. The maids also, generally, get a few ells of self-spun linen and woollen stuff; the boy gets six or eight dollars, with a shirt and a pair of shoes.

22. The wages of the day-labourers are often double in time of harvest.

23. The hired servants are boarded and lodged by the farmers; the day-labourers not.

24. Their principal food is farinaceous, particularly buckwheat grits boiled in water, and eaten with butter and salt; buckwheat flour, made into a kind of dumpling, and eaten with treacle; also bacon in considerable quantities. An ox is always killed in every farmer's house, and salted and smoked for consumption. Fresh meat is seldom or never eaten in the farmer's household.

25. The women work a great deal on the land in spreading manure, binding the sheaves, loading and unloading them, and the hay, planting and getting up potatoes; in short, they help in everything except in ploughing, sowing, mowing and threshing. In this district they have no other profitable employment except spinning, which brings in very little.

26. About one per cent. of the adult male population.

27. One thousand marcs (60 *l.*)

28. Turf, faggots, and large wood. The great farmer generally possesses a turf pit, and procures his fuel at little cost.
The marsh farmers generally are obliged to buy their fuel; a hundred pieces of turf, about the size of a brick, cost 3 *d.* or 4 *d.*; a faden of best beech wood, six feet long, six feet high, and two feet four inches broad, costs 12 or 15 marcs; oak, 7, 8 or 9 marcs.

29. The ordinary clothing of the labouring classes is generally composed of home-made materials; their Sunday dress of coarse cloth; their clothes are generally made at home, and come to them, upon the whole, much cheaper than in England.

30. There are no manufactories, properly so called, in this district.

31. The paupers are about two per cent. of the population; the natural children to be provided for fall heavy upon the poor rates. In each village there is an overseer of the poor, who is obliged to help them in necessity, and each person is rated according to his means; and a farmer who is considered to make about 200 *l.* a year will have to pay 20 or 30 dollars; at times the rates are doubled.

32. Of late years, the condition of the farmers, owing to the low price of corn, has not been prosperous.

Appendix (F.)

ANSWERS obtained through particular Interest, as regards sundry Estates in *Holstein*, bordering on the Marshes.

Appendix (F.)

Answer 1.—THE marshes upon the east coast of the Elbe, in South Holstein, as the parishes of Haselau, Haseldorff, Uetersen, Seefter, Collmar and Neuendorf, situated in the same.

2. The above-mentioned parishes only, with their communities, form the country. The amount of the population in the single districts cannot be accurately given, as the last calculation ordered in Denmark is old, and will be renewed shortly. In 1833 there was an official calculation of the inhabitants in the districts of Collmar and Seeftermühe (a part of the parish of Seefter), which amounted to, for Collmar, 2,200; for Seeftermühe, 900; in Uetersen, a market town, lived in 1831, according to an official calculation, 3,400.

3. Haselau

3. Haselau contains 28 ½ ploughs; Haseldorf, 24 ½; Uetersen, 9; Seeftermühe, 10 ½; Collmar, 74 ½; Neuendorf, 45. A plough is a rate of taxation, and comprises 24 morgen; one morgen is 450 square roods of land, or about two acres and one-fourth. The above-named districts have no waste land, neither woodland, nor heath, nor moor, but only cultivated fields.

4. Answered in No. 3.

5. A farm comprising a surface of 40 acres, contains generally about 12 acres of pasture land.

6. In Holstein the cultivated land is distinguished by marsh lands and sandy lands. The latter have, in proportion to their produce, again their subdivisions, and are in their quality as one to six, in proportion to the marsh land. Undiked marsh lands are not tax-worthy.

7. In the marsh, the different estates are called hofe, and divided into full, half and quarter höfe. The surface of a full hofe is not everywhere the same; some full hofes have 16 morgen, and some 30 morgen. The average quantity is 24 morgen.

8. In the marsh, generally speaking, there are no particular farms which are let to be cultivated by third persons; whereas, if the lands belonging to the Noble Marsh Estates, Haselau, Haseldorf, and Seeftermühe, most of the pieces are let singly to third persons The term of letting is commonly 10 years; the tenant bears no land tax, can manage the farm as he likes, but in the two last years of the term must let it lie in pasture.

9. The lands within the dike are at present let for about from 18 dollars to 20 dollars per morgen, and lands without the dike for about 10 to 12 dollars per morgen. Sandy land is not let by morgen, but by ton; one ton of land comprises 260 square roods, about 1 ⅓ of an acre, and is let for from 2 dollars to 3 dollars, according to the quality.

10. A marsh hof, of 24 morgen, keeps commonly four horses, two colts, two cows, two young bullocks, and two oxen.

11. Upon a hof, or farm of 24 morgen, commonly from two to three morgen are sown with rapeseed, and the same quantity with wheat, two morgen with barley, three morgen with beans or vetches, three to four morgen with oats, two to three laid down in fallow, and the rest used for pasture. Rye, buckwheat and potatoes are especially grown upon the sandy land.

12. One morgen of marsh land produces, upon an average, 17 tons of wheat, 20 tons of rapeseed, 30 tons of barley, 18 tons of beans, and 30 tons of oats. The best sandy land commonly bears tenfold.

13. After fallow, rapeseed, then wheat, then beans, oats, barley, and lastly, pasture.

14. The rent is paid in cash, in Danish currency; never in work.

15 & 16. The taxes are as follows:—

Land-tax according to a certain rate of valuation of the land.
Ordinary contribution according to the number of ploughs.
A rate of six per cent. to the National Bank, upon an estimated value of property.
House tax being, in fact, insurance against fire.
The proprietor is answerable for these taxes; but he charges them to the tenant or not, according to agreement.
There are many other ordinary taxes, including poor and church rates; some personal, some not, but of no very great extent; and there are extraordinary taxes for dowries to princesses, for war, for billeting and conveying troops, &c., which fall on proprietor or tenant, according to circumstances.

17. The amount of the yearly poor money is very different, and depends upon the number wanting assistance. A sworn commission of persons from every parish values, according to the best of its judgment, the property of every inhabitant, and fixes accordingly the monthly contribution to be paid, which is eventually collected by distress by the civil authorities. These appointments are repeated every one or two years. There are no particular taxes for religious purposes; the ecclesiastical matters are, in their economical and administrative parts, purely parochial affairs, which are managed among the parishioners, under the inspection of the state; the necessary pecuniary contributions for each church are considered as a real tax upon the parishioners, according to the size of their possessions.

18. The import duties depend upon the different town regulations, and the yearly alterations in the duties; in general they cannot be ascertained.

19. The average price of fresh beef is 2 *d.* per lb.; veal, 3 *d.*; pork, 2 ½ *d.* to 4 *d.*; a fowl, 8 *d.*; a duck, 14 *d.*; a goose, 2 *s.* 6 *d.*; butter 7 *d.* per lb.; wheat flour, three farthings per lb.; rye flour, one halfpenny per lb.; 20 eggs, 6 *d.*

20. Upon a full hof of 20 morgen, in general, one man servant and two day-labourers are kept, who, besides the master himself, do the work.

N. B.—Twenty morgen may be equal to 50 acres, but the measurement varies, and is not always the same in all districts.

GERMANY. No. 15.

21. A man servant receives commonly 30 rix dollars a year; each day-labourer, besides his board, 28 schgs. weekly, otherwise daily from 8 to 12 schgs.; they are paid in cash. In the harvest time, day-labourers receive double wages, but not men servants.

Appendix (F.) Answers to Queries.

22. Answered in No. 21.

23. The man servant receives board and lodging, but not the day-labourers, otherwise they would belong to the class of domestics.

24. Smoked meat, bacon, dumplings, bread and spirits. Upon a full hof they generally kill and consume two oxen of 600 lbs. weight, two pigs from 300 to 400 lbs., 20 ducks and six geese. A workman in the Marsh consumes daily about 2 lbs. of bacon, 2 lbs. of meat, 1 lb. of wheat flour, in the shape of boiled dumplings, ½ lb. bread, ¼ lb. of peeled barley or groats, or other milk food, and a quarter of a bottle of spirits; fresh meat is very seldom eaten.

25. We seldom find in Holstein, and still more seldom in the Marsh, women who are employed in field work. In the harvest, indeed, they bind the sheaves, but commonly this work is done by the maid servants or the wives of the day-labourers; but, properly speaking, the field labour falls upon the male part of the servants and day-labourers.

26. The military service falls upon the peasantry and day-labourers. In the towns, and small places, this duty is imposed upon the possessor of five acres of land; it is hereditary. The active service begins in peace with the 22d year; consists, in the troops of the line, in a two years' garrison service, and the usual exercises for six years. In the reserve battalions, the six years' service, in peace, consists only in yearly exercises. In the 36th year the soldier enters into the reserve, and only serves in war; after his 45th year he is discharged. The yearly contingent of the recruits called upon to serve is different, and varies according to the number capable of service in the single districts.

27. A substitute commonly receives 1,000 marcs (60 *l.*), for which he performs the whole of the service.

28. Turf; this is dug upon the moor; a faden (or cord) of turf contains 400 pieces, or sods; costs upon the moor, according to the quality and the season, from 12 schgs. (10 ½ *d.*) to 1 marc 4 schgs., (1 *s.* 6 *d.*); four faden or cords make a waggon load.

29. The working classes are generally clothed in unbleached linen, from 6 to 8 schgs. (5 ¼ *d.* to 7 *d.*) an ell; in coarse cloth, from 2 marcs 8 schgs. to 3 marcs (3 *s.* to 3 *s.* 6*d.*) an ell. In proportion to the quality this price may be higher than in England.

30. Trade and handicraft are confined to the corporate and free towns and places, and can only be carried on in the country by permission of the sovereign. The nobility of the country are privileged thereto upon their private estates. In Seeftermühe the proprietor has an oil mill and a distillery, and there are several of the latter in the country.

31. With the increase of luxury universal poverty has also increased. The population pays yearly for poor money, upon an average, 1 marc 8 schgs. a head, (or 21 *d.*); in some towns double. The overseers of the poor fund, at the head of whom stands the clergyman of each parish, grant a monthly sum for support, without any control.

32. Generally speaking, prosperous.

Appendix (G.)

ANSWERS obtained through the assistance of Mr. *Edward Birch*, as regards Estates in the Neighbourhood of *Kiel.*

Appendix (G.)

Answers 1, 2 & 3. THE information possessed by me being more of a general than [a] local nature, and extending over a large district, their knowledge of the quantity of land in each of their parishes is not sufficiently accurate to enable them to state it with confidence. The district to which their remarks apply is situated on the east coast of Holstein and Schleswig, and embraces the most fertile portion of these provinces, with the exception of the marsh or alluvial lands on the banks of the Elbe. The limits of the district are Flensburg on the north-west, and Lubeck on the south-east, and its breadth inwards, various, from 15 to 20 English miles.

4. There is little uncultivated land in the district, and of that little a very small portion is capable of cultivation.

5. Of the cultivated land about two-thirds are under the plough, and one-third in pasture, exclusive of the meadow lands which are never broken up.

6. The general quality of the soil is a gravelly or sandy loam, in some parts rather light, in others (particularly in the Angeln or Oldenburgh districts, approaching to clay, but in all fertile, and with few exceptions, well adapted for raising wheat and other grain.

7. The district comprises about 300 large estates, varying in size from 500 to 4,000 acres each, and estimated in the aggregate at 300,000acres. The rest of the land, consisting of about 250,000 acres, is subdivided into numerous small farms of from 40 to 100 acres, which are generally the property of the occupiers. The large estates are partly farmed by the proprietors themselves, and partly let on 10 years' leases, the tenants being restricted

restricted to a certain rotation of cropping (*see* answer to question 13). The number of large farms in the occupation of the proprietors is about one half, or 150.

8. *See* answer to No. 7.

9. The rent of the lighter lands is between 10*s.* and 13*s.*, and of the stronger lands from 13*s.* to 17*s.* per acre; the average rent being about 14*s.* or 15*s.* per acre.

10. The produce of the dairy being the main source of profit to the Holstein farmer, his stock is almost exclusively confined to cows, the number of which on some of the largest farms is 350. These are sometimes let to a professional dairyman, who pays an annual rent for them, equal in many instances to the whole rent of the farm, and never less than three-fourths of it.

11. *See* answer to No. 13.

12. The following is considered a fair average produce of land in this country: Wheat, 26 bushels; barley, 30 bushels; oats, 36 bushels; rye, 28 bushels; rapeseed, 20 bushels.

13. The most common rotation of cropping is as follows; viz., first year, fallow; second year, rapeseed; third year, wheat or rye; fourth year, barley; fifth year, oats; sixth year, oats with grass seeds; seventh year, hay; eighth, ninth and tenth years, pasture. Sometimes the course extends to 11 years, the last being pasture; or it is shortened to nine by taking only one crop of oats. It is also not unusual to take a crop of buckwheat, or a part of the first year's fallow; and some farmers sow peas after the first crop of oats, which are followed by rye. Where no rapeseed is cultivated, the other parts of the rotation remain the same.

14. The rent is almost universally paid in money, the only exception being in the case of the small farmers attached to the large estates, who sometimes, though not uniformly, pay a part in labour and a part in kind. The system of labour rent is, however, on the decline in this country.

15. The king's taxes amount to about 2*s.* per acre, and are paid by the proprietor.

16. The farmers are only subject to a tax of 4*d.* per acre.

17. On the large estates the proprietors administer to the wants of their own poor and according to their own discretion. The rest of the poor are supported by a rate collected by the parish overseers. The clergy are supported by the whole of the proprietors and householders; their pay consists part in money and part in kind, and amounts, on the average, to about 3*d.* per acre, exclusive of fees.

18. There are no consumption duties levied in any of the towns of Holstein and Schleswig; in all the other Danish provinces they exist to a vexatious extent.

19. The retail price of butchers' meat of the best quality, is from 3*d.* to 3½*d.* per lb.; the wholesale price is from 2*d.* to 3*d.*

20. An estate of 750 acres requires six ploughmen, two boys, 10 or 12 labourers, and 10 women in constant employment. During harvest the labourers' wives and 10 or 12 extra hands are engaged. The small farms of about 75 acres are cultivated by the farmer, his wife, two men and one servant woman.

21. The wages of farm servants are from 4*l.* 10*s.* to 5*l.* per annum, paid in the currency of the country, and of women from 2*l.* 10*s.* to 3*l.* 10*s.* per annum, exclusive of board and lodging. Day labourers receive in summer 1*s.* per diem, and in winter 8*d.* to 10*d.*; women, from 6*d.* to 10*d.* per diem.

22. Labourers being scarce in harvest, are paid extra wages according to emergency; the extra men as high as 1*s.* 3*d.*, and the women 1*s.* per day. Those hired by the half-year receive no addition.

23. The farm servants are always boarded and lodged by the farmer, but the day labourers only sometimes; these find their own food, which they bring with them to the field; it consists generally of rye bread with butter, cheese or pork.

24. The staple articles of food are rye, barley, buckwheat, and peas also form a part. Wheat is hardly ever used by the peasantry. Four times a week they dine on butchers' meat, and an allowance of milk, butter and cheese, is given at every meal. The butchers' meat consists in summer of bacon, and in winter of the beef of such cows as become, from age or otherwise, unfit for the dairy, and which are killed and salted in the autumn.

25. The prevalence of the dairy system affords employment for a large portion of the female population. Many of them also perform the usual field and farm works during summer, and are occupied in winter in dressing and spinning flax, from which is manufactured a coarse kind of stuff for their own use or that of their employers. For spinning flax they are paid from 8*d.* to 20*d.* per ell, according to the degree of fineness.

26. In a district containing 7,000 souls, the number called upon annually for military service varies from 20 to 30; each serves two years permanently, and is for four years after compelled to attend three or four weeks annually to exercise.

27. The price of a substitute is not less than 48*l.*, and not more than 60*l.*

GERMANY. No. 15.

Appendix (G.) Answers to Queries.

28. The only kinds of fuel in use are wood and peat; the former is always on the estate, and the tenant is furnished with a quantity sufficient for his consumption. The peat is generally held in common by a number of estates or farms, each of which has a right to dig a certain superficial space proportioned to its size. A fathom of beech fire-wood, two feet long and six feet by six, costs at the place where felled from 10 *s.* to 12 *s.*

29. The clothing worn by the peasantry of both sexes is of a very coarse description, and its cost considerably less than that worn by the same class in England, probably not more than one-half of the price. The clothing of the latter classes consists for the most part of English or French manufactures, and is dearer than in England.

30. The manufactories in the district are very unimportant. At Neumunster (a small town of 2,000 inhabitants,) there is a manufactory of coarse woollens supported by government, which employs from 200 to 300 persons. In Preetz, about a like number are employed in making boots and shoes, and there are a few weavers in most of the towns and villages, but their numbers, compared with the whole population, are few.

31. There are few paupers, except such as have suffered from sickness or old age; these are supported by the proprietors of the estates where such cases exist.

32. Some of the large proprietors are men of property, but, taken as a body, they are much less wealthy than they were 20 years ago, and there are now few estates that are not mortgaged. The increased productiveness of the soil since the introduction of marl as a manure, has counterbalanced in some degree the great fall in the prices of produce since the peace, and the increasing intelligence of the farmers enables them, by an improved and improving system of agriculture, to support themselves in their proper scale of society; but it can hardly be said that they are generally in a prosperous state, and there is scarcely an instance of an individual realizing anything like a fortune by farming within the last 20 years.

Appendix (H.)

ANSWERS regarding the estate of *Osterade* and neighbourhood in *Holstein*.

Appendix (H.)

Answer 1. The estate of Osterade, situate in the duchy of Holstein in the district of Kiel, forms with five other estates of Auvensick, Steinwehr, Georgenthal, Grossnordsee and Cronsburg, to which six villages belong, a parish.

2. These estates contain together a surface of about 10 English miles, with about 1,200 inhabitants. In the duchy of Holstein, upon an average, there are about 2,600 to (a square mile) 16 to 18 English miles.

3. Of the above-mentioned estates, Osterade is the largest, and contains about 2,200 acres of land in the hands of the proprietor; 1,260 acres are cultivated land, 320 acres meadow land, 120 acres turf moor, land covered with water and waste land, 500 acres of wood land; it possesses besides about 500 acres of cultivated hide land (*see* Nos. 7 & 8). But in general the size of these estates in Holstein is very different; some of them are from 3,500 to 5,000 acres, and some from 500 to 600 acres.

4. Upon Osterade there are about 90 acres of uncultivated land, the greatest part of which was formerly wood land, a part of which is every year, by rooting up, made bearable. Pretty nearly the same proportion is found upon the other above-mentioned estates, where they are also occupied in cultivating and enriching not only this wood land, but also moor and boggy soils, and every less yielding soil, by marling, which since some years is becoming more general in Holstein.

5. Of 1,600 acres on the Osterade estate, 1,300 acres are arable, and 300 acres meadow, which latter is used as well for hay as for pasture land. But what peculiarly distinguishes the method of farming in Holstein is, chiefly, that all the cultivated soil is used alternately for corn and pasture land, and thereby rendered capable of yielding a greater produce in corn; therefore the oldest grass land is again used for growing corn: on the other hand, a part of the land which has borne corn the longest is again laid down in pasture. The cultivated land on the estate is divided into certain equal parts called inclosures, and the proportion of those parts which bear corn to those which lie in pasture is very different, and depends, among other things, upon the greater or smaller extent of the meadow land. The most common division on the estates is into 10 inclosures, of which one is every year fallow, one is sown with rapeseed, two with winter corn, one with barley, one with oats, and one with clover, and three lie in pasture.

6. The soil varies very frequently in all Schleswig and Holstein, and all the varieties of the same are often found united upon one estate. In the east part is a clay soil mixed with sand, the prevailing one upon a considerable part of the Osterade estate, which consists of a rich (fat, that is to say) strong clay soil; however, a good middle soil is also found upon the same, that is to say, where the proportion of the sand to the clay does not preponderate; as also a light marl soil, that is to say, a soil which is mixed with loamy and chalky parts; a very small part of it only, consists of a light middle soil, or buckwheat soil, containing more sand than clay.

7 & 8. Almost

7 & 8. Almost all the estates are divided into the so called hofland, that is, such land which is generally cultivated by the proprietor himself; into farm or hide land, that is, such which is let to farmers (small or hofen farmers) in small parcels of about 50 acres; and lastly, into day labourers' land, of which every day labourer has about five acres to his dwelling. Thus the Osterade estate, besides the 2,200 acres of land cultivated by the proprietor, has still about 440 acres of farm land let to nine smaller farmers, and about 60 acres of day labourers' land. However, the proprietor does not always cultivate the beforementioned lands himself, but lets them, as is the case with Osterade, to a farmer, and generally for a term of ten years; therewith the farmer at the same time takes the live and dead stock belonging to the estate at a valuation, which he, at the expiration of the lease, delivers up in the same good condition as he received it, and after a re-valuation, and he also takes upon himself every risk in respect to the live stock, the harvest crop and the dead stock, except in case of a distemper in cattle, recognised by the government, upon the breaking out of which, the proprietor bears two-thirds and the tenant one-third of the loss, as also in case of damage by fire, where the loss of the buildings falls upon the proprietor, but the loss of the corn and the like upon the tenant. The tenant must also, by a mortgage of all his property, give security to the proprietor against any impoverishment of the land, and for the ready payment of the rent; and lastly, he is obliged, if required, to deliver to the proprietor, in case the latter lives upon the estate, all and everything which is produced thereupon, at certain previously settled prices. On the other hand, he receives from the proprietor, gratis, the necessary fuel, mostly in turf, as also a quantity of coopers' and wheelwrights' wood.

The smaller farms are, on the contrary, let for five, or at longest for eight years, but pretty nearly upon the same terms as the hofland, and they receive from the proprietor upon entering, a live and dead stock, which, upon quitting, they must leave in the same condition as they receive them, and are bound to incur every risk. However, the lettings of five acres of land to the day labourers are renewed yearly.

9. On the larger farms, the average price for a tun or 1 ¼ acres of cultivated land is 12 marcs, or 14*s.*; the best land is, however, let for 14 or 15 marcs, or 16*s.* 6*d.* to 17*s.* 6*d.*; but the hoff land belonging to an estate which is let to the smaller farmers, is always lower, and seldom more than from 8 to 9 marcs a tun, or 7*s.* 6*d.* to 8*s.* 6*d.* per acre. The day labourers pay their rent in work, and they have, for instance, at Osterade, to work in the field 72 days in summer, for their dwelling and four tuns or five acres of land. Should the hoflands be let so that the proprietor cannot avail himself of this work, the farmer employs them himself, and bonifies the proprietor for the same.

10. The soil in Holstein,—which is in itself very much adapted for grazing, (at present by the application of marling, as they put sand marl upon the heavy and clay marl upon the light soil, which in dry summers has a very good effect,) has now reached an extraordinary state of fertility, so that at present the proportion of arable land to that of meadow is not so considerable as formerly, as the clover and grass produced upon the arable land by marling, fully makes up for the deficiency in meadow land; therefore, at present there are without comparison many more cattle kept in Holstein, and with increased profit, and the milk farms, especially, upon the estates are now become a chief branch of farming; formerly one cow was kept upon four or five tuns (five to six acres) of land; at present three tuns (three and three quarter acres) are sufficient, and upon a good soil two and a half tuns (three acres). Osterade keeps upon the milk farms 350 cows; each of the small farmers nine or ten; each day labourer one. The breeding of sheep in Holstein is very trifling, as it is thought that the more profitable milk farming would be thereby too much confined.

11. The proportion of seed sown yearly to the size or extent of the estate or farm, depends upon the number of fields into which the same is divided; these fields, as they are variously divided on the farms into six, seven, eight, nine, ten or eleven fields, are always of as equal a size as possible, are again determined by the total extent of the cultivated land; thus, for instance, the fields at Osterade contain upon an average from 100 to 110 tons, or 125 to 137 acres. Of the 10 Osterade fields, five are yearly used for growing corn; one is sown with clover, &c., one lies in fallow, and three lie in pasture, so that of the whole 1,050 tuns, or 1,300 acres, which the estate contains, one half is yearly used for growing corn. Of the five corn-bearing fields, one bears rapeseed, one wheat, one rye, one barley and one oats; but sometimes one and a half fields is sown with oats, and then only half a field with wheat or barley.

12. One ton (1 ¼ acre) produces of

Wheat	-	12 to 15 tons,	the ton equal to 3 ¾ bushels.
Rye	-	12 to 14	—
Barley	-	12 to 14	—
Buckwheat		3 to 14	very uncertain
Oats	-	15 to 16	on good soil
Rapeseed	-	8 to 10	medium; sometimes much more.

13. First year, clean fallow; second, rapeseed; third, wheat or rye; fourth, barley; fifth, oats; sixth, oats, with clover and rye grass; seventh, mown or eaten off the land; eighth, ninth, tenth, and sometimes eleventh, pasture, and then again fallow.

14. The rent is almost generally paid at two periods in the year, as well by the tenant of the hoflands as by the smaller tenants, and always in cash, and the latter have also to perform

GERMANY. No. 15.

perform some labour and service with waggons and horses, which, in case the whole estate is let, are for the benefit of the tenant.

Appendix (H.) Answers to Queries.

15 & 16. The following are the taxes upon an estate, and payable to the treasury: viz., contribution, land-tax, house-tax and bank interest.

A. The contribution originally destined for the maintenance of the raised militia, is still paid by ploughs by the country districts, according to an ancient division of the land possessions, the scale of which cannot be determined, and which, since the 13th century, when the plough-tax first began, is become very disproportionate. However, the contribution is still accordingly raised, and the Osterade estate pays 1,080 marcs yearly for 10 ploughs, or about 6 *l.* per plough.

B. The land-tax is divided into ground-rent, and tax, and in case of a letting, the former is borne by the proprietor, and the latter by the tenant. The land-tax is determined according to the number of tuns of cultivated land, so that wood land, moor, heath, and land covered with water, &c., are not liable to the same: and it is fixed at 10 schgs. for every ton, of which 7 schgs. are charged upon the proprietor, and 3 schgs. upon the tenant. Osterade pays, therefore, for the whole of the cultivated land in the hands of the proprietor and that in the hands of the tenant, 890 marcs yearly for land-tax, about 52 *l.*

C. The house-tax is paid according to the scale of the valuation of the different buildings, and is very trifling; as, for instance, the Osterade estate has to pay only 18 marcs yearly for house-tax.

D. The bank interest is imposed according to the value of the possessions in land, and for the Osterade estate amounts to the sum of 130 marcs, 6 *l.* 6 *s.*, so that the whole of the payments to the king charged upon the estate, amount to 2,118 marcs yearly, 130 *l.*

The whole of these revenues are paid from the two duchies of Schleswig, Holstein, into the royal treasury of Rensburg; the proprietor of the estate is alone answerable for all the dues to be levied from the whole of the estate, and the tax on buildings in use on the farm, paid by him, are repaid him by his tenants; the payment of the dues or taxes must for each year be paid on the last day of February in the following year. In Holstein, upon non-payment, they are levied by execution, and if payment be not made within 28 days, a distress and further judicial proceedings take place.

17. The provisions for the poor devolve indeed upon the individual parishes; however, in the country it is the business of the proprietor of the estate to provide for those belonging to it (that is, those born upon it, as also for those who by an uninterrupted service of 15 years have gained a settlement upon it,) and to whom he is then bound to give, besides free dwelling, a piece of garden ground and fuel, and also to support the most necessitous, and that duty does not fall either upon the rest of the persons under him or upon his tenants. It has been found that in Holstein, among about 200 country inhabitants, there are five poor, but among 200 town inhabitants, eight, and that the yearly expense of a country pauper is commonly about 50 marcs. If the dependent on one estate becomes a pauper upon another, the estate upon which he was born is immediately bound to receive him and to provide for his subsistence, if he has not uninterruptedly resided in another place 15 years, in which case he has there obtained a settlement and must be received and provided for by this place. To the widows and also those poor who work indeed, but cannot earn so much as they require for their subsistence, the proprietor of the estate is bound to give, at least, free dwelling and firing.

17. The church payments are divided into those for the clergyman and those for the church. The clergymen have generally free dwelling, which the proprietors of estates, as patrons, maintain; they have also generally lands, the produce of which composes the greatest part of their incomes. To these are added the payment in natura (tithes), to which the parishioners are altogether liable, as corn, poultry, eggs, &c. Their firing they receive from the proprietors of the estates.

Their pecuniary revenues consist, in the next place, in the fees for christenings, confirmations, marriages, &c., which they levy according to a general rate or valuation. Lastly, they receive from the patrons commonly a yearly fixed sum, which is paid according to the number of ploughs, but in general is inconsiderable; for instance, in the parish to which Osterade belongs, it amounts to 8 marcs a plough yearly.

In respect to the schoolmasters, the same regulation takes place, and these are also maintained by the proprietors of the estates alone as patrons.

The revenues of the church consist in the interest of the church property in money; all payments for the same, reparations, insurances from fire, are paid out of this interest, and, where this is not sufficient, by church payments from the proprietors of the estates yearly, also imposed according to the number of ploughs.

18. The products in Holstein which are brought to the towns from the country are subjected to no toll. The noblemen's estates have, besides, the right of exporting all the produce from the lands belonging to the estate toll free, and are also toll free in respect to the importation of all articles used in housekeeping upon the estate.

19. The average meat prices are,

Beef, per lb.	- -	3 to 4 schgs.	or
Veal -	- - -	2 to 3 —	or
Mutton	- - -	3 to 3½ —	or
Pork	- - -	3 to 3½ —	or

Bread

Bread in the country is not bought, as not only each estate, but each family upon the same, bakes its own bread, which, however, is rated at ½ schil. per lb. Butter costs in summer 6 schgs. per lb., or 5*d.* sterling; in winter 7 schgs., or 6*d.* sterling. A ton of potatoes costs from 1 marc, or 14*d.*, to 1 marc 8 schgs., or 1*s.* 9*d.*

20, 21, 22 and 23. Upon the Osterade estate the tenant keeps one smith, one wheelwright, one bailiff, one steward, and 12 servants, who have to tend 48 horses; further, besides the usual female house servants, about 20 milk-maids and four men-servants on the milk farm. All these live partly on the estate, partly on the milk farm, and receive from the tenant board; among other things the men-servants receive meat twice a week, and sometimes bacon. The yearly wages of a man-servant are from 80 to 90 marcs, or 5*l.* to 5*l.* 13*s.*: those of the female servants from 45 to 50 marcs, or 2*l.* 16*s.* 6*d.* to 5*l.* 2*s.* 6*d.* Besides these servants there are about 20 day labourers in the village belonging to the estate, who live in houses belonging to the proprietor: these, as well men as women, have almost constant employment from the tenant, and in summer the men receive daily from 10 to 12 schgs., or 10½*d.*, the women 7 schgs., or 6*d.*; in winter, the men 7 schgs., or 6*d.*, the women 5 schgs.; for which they must work in summer from six o'clock in the morning till half past seven; in winter, half past seven till five in the evening, with an interval of an hour and a half for rest. In corn threshing the day labourers are here and there paid with a part of the threshed corn: but upon an extensive estate like Osterade, this number in the harvest time is not sufficient, especially where rapeseed is grown, and the tenant must then often get some 20 workmen more from other places, to whom he also commonly gives dwellings as long as the work lasts; therefore in the harvest time, besides the servants, some 60 labourers are employed. At this time the men receive 20 schgs., or 1*s.* 3*d.*, the women 12 schgs., or 11*d.*, as day wages; but the men must work from five o'clock in the morning till nine in the evening, the women from six o'clock till half past eight, with an interval of one hour for rest.

24. Among the country people the most general food is potatoes, buckwheat groats, barley groats, often boiled in buttermilk, which in summer is their chief beverage. Meat they eat very seldom, and only the better sort have sometimes bacon. The same food is also found among the small farmers, with the difference that they eat more meat.

25. The women do the same work as the men, with the exception of ploughing; they perform almost every kind of field labour, but they are especially used for threshing and cleaning the corn; besides this work they have no other source of earning; however, in winter, they are accustomed to spin. *See* No. 29.

26. By the hitherto existing laws only the countryman is liable to military service; this duty is connected with the bondage or vassalage laws abolished in the duchies in the beginning of the 19th century, where every countryman was obliged to furnish soldiers in proportion to his lands. The strength of the military in Schleswig Holstein is 9,000 men, for which in the yearly levy the second man is taken. The levied forces remain two years constantly in garrison service, when they are dismissed, but still remain liable to serve for six years, and must duly appear for four weeks at the yearly exercising.

27. The price of a substitute for the military service is from 800 to 1,000 marcs, or 48*l.* to 60*l.*

28. The firing most generally used in the country is turf; little wood. The farmers, small farmers and day labourers always receive gratis from the proprietors what they necessarily want, which is assigned to them from the turf moors belonging to the estate, which are found everywhere in Holstein. The small farmer commonly receives 30,000 sods, the day labourer from 8,000 to 10,000; also the bushwood yearly cut out of the enclosures belonging to the estate is partly distributed gratis amongst the poorer sort, whilst the day labourers have the liberty of digging up the roots of the trees felled, and to use them for firing.

29. In the duchy of Holstein the countryman is clothed with the linen produced from the flax sown by him, and which he gets spun and woven; the winter woollen clothing is procured mostly from the town of Neumunster in Holstein, which has two manufactories and 33 clothmakers. An ell of coarse cloth costs the countryman from 1 marc 8 schgs. to 2 marcs (21*d.* to 28*d.*), therefore a complete linen dress from flax, and the preparing the same, may be reckoned at about 5 or six marcs (6*s.* to 7*s.*), whereas a woollen dress costs him from 11 to 12 marcs (13*s.* to 14*s.*).

30. Holstein is very poor in manufactories and manufactures. A copper and brass work, which at present produces yearly from 80,000 to 100,000 lbs. of copper, and 50,000 lbs. of brass; an iron forge, which produces yearly in cast iron wares about 8,000 or 10,000 cwt.; and the cloth manufactories in the town of Neumunster, mentioned in No. 29, which use about 100,000 lbs. of wool, are almost the only ones in the country.

31. *See* No. 17.

32. The general condition of the proprietor, as well as that of the farmer, in the duchies of Schleswig and Holstein is very good. Those in the easterly part of Schleswig, where an extremely good soil is found and excellently managed, are particularly distinguished for their prosperous condition.

Appendix (I.)

GERMANY. No. 15.

Appendix (I.) Answers to Queries.

ANSWERS given by *Louis Thierry*, Esq. as regards a part of *Holstein*.

Answer 1. JERSBECK and Stegen in Holstein, about 15 English miles from Hamburgh, containing about 10,500 acres.

2. About 2,000 souls, all rural.

3. Two thousand two hundred acres waste land, 800 acres wood land, 7,500 acres cultivated land.

4. One thousand four hundred acres are moor, heath, waste, roads and water; 800 acres of waste land consist of a turf moor which is in use for fuel sold or used at home.

All the real moors, which form a very extensive part of Holstein Schleswig, are neglected, no scientific means having been adopted for getting the fuel free from the land and draining the moors, otherwise these might be rendered productive, or at least used as common or wood land.

5. Five-ninths arable; four-ninths pasture, exclusive of the natural meadows. This is the natural proportion through Holstein, of those farms in the hands of the proprietors. These are to be distinguished from those farms in the hands of the peasants, who follow no fixed plan for the management of their farms.

6. The general quality of the ground is good middling, some clay, some sand and clay, some loam, but the precise quantity of each difficult to apportion.

7. About one-sixth of the arable and meadow land is cultivated by the proprietors; the quantity 1,200 to 1,300 acres. The extent of the farms cultivated by proprietors is from 400 to 2,000 acres. The largest in Holstein may be 2,500 acres.

8. The size of the larger farms rented by the peasantry is about 80 acres; middling ditto, 40 to 50 acres; small ditto, 25 to 40 acres. These farms are let for a term of years, at a small rent to the landlord, but the tenants have generally an interest in them by inheritance. *See* Report. The tenant must keep dwelling-house, hedges and ditches in repair, and pay fire insurance; certain articles mentioned in an inventory must be forthcoming. The tenant has certain services with carriages and horses to perform for the king and clergy, also to the landlord; he must aid in repairing the roads. He is allowed firing for his own use and that of a cottager, for which he pays one rix-dollar yearly. He must assist in carrying the proprietor's corn and hay in harvest, also provide horses and carriage for him on certain occasions, but he pays no taxes except land-tax and bank interest due to government.

9. The inherited farms pay only a small ground-rent to the proprietor of 3*s.* to 3*s.* 6*d.*, and so on to 7*s.* per acre; but farms which are entirely in the hands of the proprietors pay a rent of about 7*s.* per acre for sandy soil; 8*s.* 9*d.* for loamy sandy soil; 10*s.* 6*d.* for sandy loam soil; 13*s.* for loamy soil fit for wheat.

10. Chiefly cows; horses for the use of the farm; hogs for sale; bees for home use; few sheep. On the best land, three cows to four acres; on inferior, two cows on four acres. In Jersbeck, 1,300 acres feed only 220 to 240 cows, 30 horses, 20 to 25 hogs.

11. Two-fifths wheat and rye, usually called winter corn; three-fifths barley, oats and potatoes.

12. First quality of land produces, of wheat, 10 times the quantity sown; rye, without manure, in second year, nine ditto; barley, 10 ditto; oats, 10 to 11 ditto.

Sandy soil: rye, six to seven times the quantity sown; oats, five to eight ditto.

Good middling land: wheat is not sown; rye, nine to ten times quantity sown; barley, 10 ditto: oats, eight ditto.

Buckwheat, usually sown on sandy soil, produce uncertain; sometimes yields nothing; sometimes 25 times quantity sown.

13. First year, fallow, fully manured; second year, rapeseed or wheat; third year, wheat after rapeseed, barley after wheat; fourth year, oats; fifth year, rye or oats, with clover, and half manure; sixth to ninth, clover.

14. The rent is invariably paid in money. For services to which tenants are subject, see answer to Question 8.

15. Ordinary contribution to which adelige güter (noble estates) are subject, is 36 dollars, or about 6 *l.* per plough per annum; it is paid according to the number of ploughs used on the estate, fixed by agreement with government in the year 1652. Thus on this estate 25 ploughs are paid for at 36 dollars per annum, equal to 900 dollars, or about 150 *l.* This tax falls on the proprietor exclusively, and he pays it of his own accord periodically at the office appointed to receive it.

Land-tax paid upon the value of the land on this estate is 658 dollars, or about 115 *l.* sterling yearly. Bank interest paid upon the valuation of land and buildings is 1764 dollars, about 200 *l.* sterling yearly. House-tax unimportant. The valuation of landed property by government, and the tax thereon, first took place in the year 1802.

16. To

16. To none directly; but in all cases the tenants (erbpächter) have to pay their share of the land-tax and bank interest in proportion to the size of their farms. At Jersbeck, out of the abovementioned 658 dollars land-tax, 510 dollars are paid by the tenants, besides 850 dollars bank interest out of 1,164 dollars.

17. The proprietor of Jersbeck takes upon himself the whole expense of the poor; support, provisions, rent, medical aid, clothing, &c. The cost is about 620 dollars, or 110 *l.*, yearly, or about 3 *d.* per acre upon the whole property; none for religious purposes. There are houses and lands in each parish belonging to the clergy. The peasants must assist in tilling the clergyman's ground and carrying his harvest. Must occasionally provide conveyance for him, and must pay him some small tithes in kind, such as corn, firing, eggs, &c. He receives fees for his services and offerings; he is free from taxes.

18. To none.

19. The average price of beef may be about 2 ½ *d.* to 3 *d.* per lb.; the other articles of food being drawn from their own gardens or from the proprietor's farm, are not to be valued in money in the country.

20. The farm at Jersbeck, in the hands of the proprietor, about 750 to 800 acres; 1 bailiff, 1 clerk, 1 foreman in the fields, 1 foreman or inspector in the farm-yards, 6 carters, each has 4 horses, 2 cowherds to 140 or 160 cows, 20 day labourers, 12 women.

21. Bailiff, 100 dollars (18 *l.*) per annum; clerk, 40 dollars (7 *l.* 7 *s.*) per annum; foreman, 50 dollars (9 *l.*) per annum; 2nd foreman, 30 dollars (5 *l.*) per annum; stablemen or carters, 28 dollars (4 *l.* 14 *s.*) per annum; cowherds, 20 dollars (3 *l.* 10 *s.*) per annum; day-labourers (summer), 10 schillings (9 *d.*); day-labourers (winter), 8 schillings (7 *d.*); women, 6 schillings, or 5 ¼ *d.* Are paid in money.

22. The day-labourer receives 12 schillings, or 10 ½ *d.* per diem, from 6 in the morning until night; women, in harvest, 8 schillings, or 7 *d.* per diem.

The day-labourer, stableman, or cowherd, if not lodged and boarded by the proprietor or his farmer, gets a free dwelling in a cottage, a cabbage-garden, a piece of ground for potatoes, equal to one-eighth of an acre, fodder for 1 cow, 4 tonne or 16 bushels of rye, 2 tonne or 8 bushels of buckwheat, and 15,000 sods of turf for firing.

23. The servants about the proprietor's farm-house are sometimes boarded and lodged, sometimes not, but the day-labourers never.

24. Potatoes, rye, buckwheat, pork, milk, beer, and spirits. Butchers' meat is seldom used by the peasantry. A family of from four to five persons can support themselves on 70 to 80 dollars, or from 12 *l.* to 14 *l.* per annum. Supposing a day-labourer and his wife could work 300 days in the year, at 10 *d.* and 8 *d.* per diem, the utmost of their joint income would not exceed 112 and 113 dollars, or about 20 *l.*

25. The women work on the land, and have no other profitable employment independently of the care of their families, which in many places includes spinning yarn for family use.

26. Forty to fifty men belonging to Jersbeck property are liable to serve. Of them, four or five are regularly absent for two years at a time. After two years' actual service, they are obliged for six years to join their regiment for four weeks annually. Government allows them 2 ½ schillings, or 2 ¼ *d.* per diem, to feed and clean themselves; but they require 10 to 15 dollars (2 *l.* to 3 *l.*) more, which they must draw from home. After this service, they form part of the reserve corps.

27. From 400 to 500 marcs currency, equal to 24 *l.* to 30 *l.*

28. Turf chiefly, and some wood; both found on the estate. The farmer pays 1 dollar (3 *s.* 6 *d.*) for as much turf as he requires for his own use. The labourer is allowed 15,000 sods annually.

29. The clothing for the superior peasant will cost 40 to 50 marcs, equal to 2 *l.* 7 *s.* to 3 *l.* per annum; for the labourer, 1 *l.* 15 *s.* to 2 *l.* 2 *s.* per annum; for a woman, 3 *l.* 10 *s.* per annum.

30. There are no manufactories excepting a distillery and brewery.

31. Actual paupers are not numerous in the country. (See Question 17, which shows what provisions exist for their support, and that in a population of 2,000 persons, the whole annual expense is only 110 *l.*, not much more than at the rate of 1 *s.* sterling for each soul.

32. Generally prosperous, according to their usual condition and notions.

Appendix (K).

ANSWERS obtained through the assistance of *George Weltden*, Esq., as regards the Duke of *Oldenburgh's* possessions in *Holstein*.

Answer 1. The Principality of Lubeck, the Duke of Oldenburgh's dominion in Holstein, comprises four bailiwicks, viz. the bailiwick of Eutin, including the town of Eutin and the estate of Benz. The bailiwick of Kaltenhoff, the bailiwick of Grossvogtey, and the

GERMANY. No. 15.

Appendix (K.) Answers to Queries.

bailiwick of Collegiatstift, which contain six distinct parishes, viz. 1st, the town and parish of Eutin, of Boseauw, of Neukirchen, of Mallent, of Ransefeld, and of Hamberge, all agricultural.

	Population.	Rural.	Towns.
2 The bailiwick of Eutin and Benz estates contain about -	8,000	7,000	1,000
Town of Eutin - - - - - - - -	3,000	——	3,000
Bailiwick of Kaltenhoff - - - - -	2,500	81,00	700
Grossvogtey - - - - - - - -	6,000	4,600	1,400
	20,300	14,050	6,250

In each of the above parishes are villages, the principal part of the population of which is rural, still having a proportion of tradesmen and handicraft people; and on an average they may be said to contain from 600 to 1,000 each, and in each parish there are from 8 to 12 farmers.

3. The land in the whole principality of Lubeck may be estimated at about 7 ½ to 8 German, or 164 English square miles, and consists of about

5 German, viz. -	107 English square miles	-	arable and pasture in cultivation
1 ditto -	21½	ditto -	meadow
1 ditto -	21½	ditto -	woods and forests
½ to ¾ do -	14	ditto -	lakes and public roads
7 ½ to 8	164 square miles English.		

4. It cannot be said that there is any waste or uncultivated land in the principality. The lakes and waters are farmed to fishermen.

5. Almost every farm in the principality has a portion of it arable and a portion of it for pasture.

6. The soil of this principality is generally considered to be good, and equal to that of any part of Holstein; it is often light and sandy, and frequently mixed with rich loam; it is generally from four to six inches deep; it is in the aggregate very productive, and when the crops are good, the corn produced is of a very good quality.

7. The farms are for the most part the property of the occupants, as the people prefer purchasing to renting, particularly as they can be bought, by the usage of this country (under particular conditions), rather upon easy terms. They are generally from 60 to 100 tonnen, *i. e.* from 85 to 140 English acres, and when rented, the rent is estimated according to the quality of the land, from 4 to 6 dollars current per tonne per annum, that is, about from 10 *s.* to 14 *s.* per English acre.

8. Very few farms exceed 200 tonnen, or about 280 acres, and are held under various conditions. Some were purchased (when the large estates in Holstein were divided into smaller properties) for a certain sum, to pay afterwards an annual quit-rent of from 1 ½ to 2 ½ dollars per tonne (3 *s.* to 6 *s.* sterling per acre); these are held in perpetuity so long as the quit-rent is paid, but if resold, must be offered for the price any other person will give or it will fetch at auction to the state or to the original proprietor, who has the refusal. These purchases are called erbpacht. Farms are also let on leases of 8 to 18 years, at from 4 to 6 dollars per tonne, or at 9 *s.* to 14 *s.* sterling per acre. When such are taken, *the inventory*, that is, the horses, cows, cattle, stock, and agricultural implements are purchased by the tenant at a valuation, and repurchased by the proprietor or successor in the same way at the expiration of the term. Small farms of 20 or 50 tonnen are hired for 6 to 10 years on various conditions, at from 3 to 5 dollars per tonne, or 6 *s.* to 7 *s.* sterling per acre, according to the value of the soil: Farms are very seldom, hardly ever, let for a year.

9. Farms here generally comprise some arable and some pasture land; the qualities are always taken in the aggregate; it is unknown here to attach rent to each particular quality of land.

10. Principally cows; some sheep, the latter being of a very inferior quality both as to flesh and wool. Horses are mostly fed in stalls; seldom sent out to graze.

11. The system varies. A farm is sometimes divided into 7, 9, and 12 equal parts, but more generally into 9.

12. This depends much upon the quality of the soil, and varies. On a tonne of land, that is 1 ⅔ of an English acre, it is usual to sow about 1 tonne (224 lbs. of 16 oz.) of seed, and if the soil is good, the produce is generally, of wheat and rye, 8 to 10 tons, or 4 to 5 quarters; of barley, 8 to 9 tons, or 4 to 4 ½ quarters; of oats, about 8 tons, about 4 quarters.

13. After land has been laid in fallow, it is sown one year with wheat or rye, one year with barley, two years with oats (sometimes the first year clover is mixed in), then one year with clover, and then left three years for pasturage.

14. Rent

14. Rent in this principality is mostly paid in money, with the exception of some few farms, where it is paid partly in kind, viz. one-third in money, one-third in corn, one-third in butter, the price of each article being annually determined upon by the parties at fixed seasons of the year. The custom of paying rent in kind is subsiding, as it too frequently causes disputes and ill-will between landlord and tenant.

15. Taxes are not known in this principality. The proprietors pay certain contributions for support of the poor or find them work; they also pay what are called communal or parochial rates, for support in part of the clergy and repairs of the church and of schools. The taxes, or rates rather, are generally paid by the occupant; but when the proprietor pays them, he collects them again from the tenants, and often with advantage to himself.

16. The farmer is not subject to taxes, but is called upon for parochial rates, for support of the clergy (in part), which is sometimes paid in money, sometimes in kind, as the parties agree, for the support of the poor, the schools and schoolmaster; these were formerly levied in the shape of contributions, according to the means of the parties, but now very frequently by assessment, and may be estimated at about 2*d.* to 3*d.* and 4*d.* sterling per acre.

17. It is difficult to determine, the collections being made variously, what portion of the rate is applied to either purpose. The clergyman being paid by the state in a great degree, receives but a portion of his emoluments from the land. He is also provided with a dwelling and some land. The repair of churches is also provided for by various means; it might be estimated that one-third of contributions are applied to the poor, one-third for the support of schools and masters, and one-third for religious purposes.

18. None.

19. The average price of butchers' meat of all descriptions, including pork, of the best qualities, may be averaged at 2½ to 3½ current schillings, or about 3*d.* sterling per lb.; but cow beef and inferior qualities of meat may be had at 2*d.* and lower per lb. of 16 ounces. Wheaten bread at 1*d.*, and rye bread at three farthings or 1*d.* sterling per lb. Cheese at 1*d.* and bacon smoked, at 4½ to 5½ current schillings, or at 4*d.* to 5*d.* sterling per lb. Butter, fresh, at 4½*d.* to 6*d.* per lb.; these being retail prices. Beer about 1*d.* for a large quart.

20. No such calculation is made here. The usual mode is (much depends on the size of the farm), to have on large farms, 1st. an overseer of the land, whose business it is to superintend the village and cultivation of the land, the harvest, the ditches, drains and hedges; 2d., an overseer of the farm yard, buildings, barns, stables, cows and stock and implements, who attends to the housing and threshing of the grain, to the stowage of the hay, &c. &c. One man to every four horses and one cart on the farm; one man to every 100 cows, to attend them in the fields and stables; almost all other work is done by day-labourers as required. The expense may be estimated at 1½ dollar per tonne, or about 2*s.* 6*d.* per acre per annum. The number of women and boys depends on a variety of circumstances. Fields are often ploughed by contract and mowed in the same way.

21. The overseers alluded to above, if married men, are allowed a cottage or dwelling with a small garden, 1½ fathoms of fire-wood of 90 cubic feet per fathom; 1½ ton (224 lbs.) wheat; 4 tons of rye; 3 tons of barley; 1½ ton of oats; and from 30 to 35 dollars current per annum as wages, *i. e.* 6*l.* to 7*l.* sterling. The servants that attend the horses and cows 20 to 24 dollars, or 3*l.* to 4*l.* per annum in money, and some linen; but if unmarried, which is not often the case, they are lodged and fed in the master's house, and receive from 20 to 30 dollars wages and some linen. Female servants, when boarded and lodged, receive from 12 to 20 dollars (2*l.* to 3*l.* 6*s.*) per annum. Boys about 10 dollars, or 30*s.* per annum, with some linen and stockings. Day labourers receive, in summer, from 12 to 18 schillings current, or 10*d.* to 1*s.* 4*d.* sterling per day, and in winter from 8 to 10 schillings current, or from 7*d.* to 9*d.* per day, and feed themselves.

22. Yes, sometimes almost double wages, and occasionally some beer and spirits.

23. Labourers mostly feed and lodge themselves, but when working in harvest and fed by the farmer, an adequate deduction is made from his daily pay for his food.

24. The largest portion consists of potatoes, bread, and what is called meal food, or various soups and messes made of meal and vegetables; the quantum of meat or bacon varies. Some give it three, some four times a week, and some give it every day, but then in less proportions; also a certain quantity of butter weekly, about 1 lb.; and in winter the fat of geese (that are cured for winter) as a substitute for butter, and some beer, but not always.

25. Those that are able to work, work on the land in the harvest time, and in spreading the dressing on the land when it is laid on, and often in their own little gardens. In winter they are occupied in spinning wool and flax for their own use, and also for sale, as much as their domestic duties will allow them.

26. Drafts for the military service (to which all from the age of to are subject) take place twice a year, in a ratio of one per cent. on the whole population, and half per cent. for the reserve; each man in peace serves one month for drill and to learn his duty, then six months in actual service, and is dismissed, but afterwards called out for three or four weeks once a year to drill. In war time they are called upon to serve six or seven years; the drafts take place one year in anticipation.

GERMANY. No. 15.

Appendix (K.) Answers to Queries.

27. From 60 to 100 dollars current, that is from 10 *l.* to 17 *l.* sterling; as much as 120 dollars or 20 *l.* have been paid but very lately.

28. Wood and turf. The first is derived from the woods and forests belonging to the principality, and is bought usually from 4 to 4½ dollars current, or 12 *s.* to 14 *s.* sterling per fathom of 90 cubic feet. The latter is generally obtained from Sasel (in Holstein), bordering upon this principality, and is sold at 36 schillings current, or 2 *s.* 5 *d.* per 1,000 pieces of about the size of a small brick, retail. The poor are allowed to collect loppings and broken branches in the forests (under the superintendence of a sub-forester), for which they pay a mere trifle, and sometimes without paying anything.

29. The labouring classes use almost exclusively a cloth made from wool and flax mixed; the material is spun by the women in winter and wove in the villages, and may be purchased from 9 to 10 schillings current, or 8 *d.* to 9 *d.* sterling the ell of 24 inches, or 1 *s.* 4 *d.* to 1 *s.* 5 *d.* sterling per yard. A labourer can certainly clothe himself here in every respect much cheaper than in England; even were he under the necessity of using British manufactures, he could obtain them as cheap and even cheaper than the labourer can purchase them retail in England.

30. None in this principality.

31. They are increasing. Heretofore they were generally supported by contributions levied upon those who were able to contribute, which they did according to their means; but now it is become necessary to make assessments in the towns and parishes, which may be estimated at nearly two to three per cent. on income.

32. The occupiers of small farms are, for the most part, prosperous; those occupying the larger less so. This is caused much by the extravagancies the latter fell into during the time of high prices, and leases taken at high rents, which have brought them into difficulties, and which would have been ruinous to many had not large reductions been made by the proprietors, who experienced the same inconvenience from the same causes.

Appendix (L).

ANSWERS by Captain *Carr*, of *Tüschenbeck*, as regards *Lauenburg*.

Appendix (L.)

Answer 1. Duchy of Lauenburg, one of the confederated German provinces, subject to Denmark since 1815, previously to Hanover.

2. About 33,000; of which the town of Lauenburg contains 3,300, Ratzeburg 2,000, and Möllen 1680 inhabitants.

3. An accurate acreable survey is not known; but the extent of the duchy may be called 22 (German) square miles, and a German mile as equal to five miles English; one quarter sandy and unimprovable wastes, one quarter woods and forests, one quarter useful sandy and gravelly soils, and about one quarter good clay land.

4. Very little, because the summers are too warm and dry to admit of turnip culture on the present wastes, nor could they be "eaten off" upon the land, as in England, because the ground is generally hard frozen from the beginning of December to the end of March.

5. About one-third is in pasture, alternating with corn.

6. About one-third of the cultivated lands is capable of producing wheat crops, and the remainder rye and oats.

7. Two-thirds of the lands in the duchy are occupied by peasantry inhabiting 111 villages, which are divided into four amts or districts; managed by the amtman, or stipendiary magistrate of the Crown, who collects all dues payable to the Crown, as well as taxes to the government. The remaining one-third comprises seven royal domains and 23 manors, the property of the aristocracy of the country, who generally live upon their estates, and cultivate about one-half of them. The rest is in forest, and in the hands of tenants whose tenures have descended from feudal times.

8. Large farms are rarely let, except the royal domains, or in event of the death or absence of a proprietor. There are, however, nine such farms at present let, varying from 1,000 to 2,000 English acres, and for periods varying from 9 to 21 years. The stock and farming utensils generally belong to the proprietor. An accurate valuation takes place when the tenant enters upon the farm, to the full amount of which he usually pays the landlord, as well as a year's rent in advance. At the termination of the lease a second valuation takes place; if the stock is improved, the tenant is remunerated; if deteriorated, a deduction is made from the deposit. The tenant is bound to a fixed rotation.

9. The rent is usually paid for the whole farm as a round sum, and not often as an acreable rent: 14 *s.* sterling per English acre may be taken as an average rent, the landlord paying all taxes.

10. Dairy cows, about one cow to two acres on the good lands; and sheep, a large proportion of which are "fine woolled," about four to the acre on inferior pastures.

11. About

11. About one-eighth of the crops of the duchy are wheat, one-fourth rye, the food of the population; a small quantity of peas and buckwheat, and the remainder oats.

12. Twenty bushels of wheat per acre of late years. Since the effect of a universal marling, which took place about 25 years ago, has ceased, 20 bushels of rye, and probably 24 of barley or oats.

13. In good lands: a fallow from grass, dunged (perhaps a few potatoes); second year, wheat; third year, barley or rye; fourth year, oats; fifth year, oats, sown down with five or six pounds of red clover seed to the acre; sixth year, clover hay, if a tolerable crop; seventh year, pasture; eighth year, pasture; ninth year, pasture. Light lands: first year, fallow from grass, dunged (perhaps a little buckwheat); second year, rye; third year, oats; fourth year, oats, if possible; fifth year, sheep pasture; sixth year, sheep pasture; seventh year, sheep pasture.

14. Rents of large farms paid in cash. The peasants pay of late years also in money, as a commutation for the labour of their men and horses, which they formerly furnished to cultivate the manorial demesnes. There are still small obligations remaining, such as driving building materials for the repair of the manorial house or offices, &c. &c., but which are not burdensome.

15. A land-tax, assessed by the constitutional assembly, the 23 proprietors of manors, and a deputy of each town. There are no tax-gatherers, as the money is sent quarterly by the proprietors to the tax-office, and may be computed at 1 *s.* sterling an acre on the cultivated lands, and the expenses of the manor court to one-half as much more.

16. The farmer has no taxes to pay. The peasant, whose tenure descends from father to son, pays his proportion to his chief, who is alone responsible to the government.

17. The towns, the proprietors of the manors, and the villages having each to support their own poor, there is no tax for that purpose; neither is there any tax for religious purposes; the clergyman has land sufficient, or nearly so, to his support, which is cultivated by the peasants, who, as well as the proprietors, pay him a small fixed sum of money; besides which, he receives money at baptisms, marriages, and funerals, as well as presents in kind, called Easter offerings.

18. None.

19. Beef and mutton, 2½ *d.* per lb.; veal, 3½ *d.* per lb.; butter, 6 *d.* per lb. A loaf of rye bread, of unsifted flour, weighing 8 lbs., 4 *d.*; skimmed milk cheese, 1 *d.* per lb.; bacon, 4½ *d.* Wheaten bread only used by the higher orders.

20. For a farm of 1,000 acres there is generally one upper and one under steward; five four-horse waggon teams, with a waggoner to each, who also ploughs; from 10 to 12 day labourers, who are employed the year round in various farm work.

21. The waggoners are yearly servants, and live in the house; their wages about 5 *l.* a year. The labourers have cottages and gardens, with the keep of a cow free, and receive as daily wages, from Easter to Michaelmas, 9 *d.* per day, women 7 *d.*; during the winter, 7 *d.*, women, 5 *d.* The men are then, however, generally employed in threshing, for which they are paid the eighteenth part of the clean corn which they deliver.

22. Yes; 2 *d.* a day from the commencement till the end of harvest.

23. The waggoners are always boarded and lodged; the daily labourer only by the peasants in harvest.

24. Black bread, butter and cheese; potatoes, vegetables and fruit in abundance. Every day for breakfast, dinner and supper, a hot soup of either milk or meat. Butchers' meat three to four times a week; and, every day, table beer as much as they choose to drink.

25. The women assist at all kinds of farm work, spinning and knitting for family use.

26. The number of recruits required depends on the casualties in the regiment the duchy maintains. They are annually ballotted for. The recruit must serve in the first instance two years, and for the four following years for a period of four weeks in each year. During six subsequent years he belongs to the army of reserve, which is only expected to serve in case of emergency.

26. From 9 *l.* to 18 *l.*, depending on the ability of the person balloted to pay.

28. Turf; 1,000 sods of 12 inches long, six broad, and three thick, costs about 16 *d.* to make and dry. The other fuel is principally beech wood, which costs about 4 *d.* per cubic foot, round measure; and copse wood, about 7 *s.* for a four-horse waggon load.

29. Coarse woollen cloths of home manufacture; serge for women's gowns and petticoats of home manufacture; home made linen and Saxon or English cottons. They are dearer than in England.

30. No manufactories.

31. Paupers are rare, but their provision is secured according to the answer of No. 17.

32. Under the present depressed value of their produce, they cannot be called prosperous.

No. 15.

Appendix (M.)
Answers to Queries.

Appendix (M.)

ANSWERS as regards the District of *Breitenburg* in *Holstein.*

Answer 1. It must, in the first place, be remarked, that on so small a surface as that which comprises the duchy of Holstein, I have never seen so manifold a difference in the soil as shows itself here, for besides the marsh and moor lands, which are adapted as well to the growth of corn and grazing as to hay, and are of a superior and inferior quality, the difference upon the so called sandy land is the more striking, as it may be easily divided into 12 or 14 classes. It will therefore be impossible to answer and elucidate all the questions relating to the province of Breitenburg so decidedly as may be expected.

2. By the census of 1803, the amount of the population was 9,763, which may be now taken at one-tenth more; of this number about 3,000 to 4,000 may be reckoned to belong to the town of Itzehoe.

3. The area of the province of Breitenburg has not been generally measured, although a very good map thereof was prepared by the late Captain von Justy. Its greatest length is about from three and a half to four German miles (15 to 18 English miles); its greatest breadth from two to two and a half German miles (9 to 11 English miles). It is called a province, because it is composed of several noblemen's estates and districts.

These estates and districts are still partly recorded in the register of the county, and are the Wellne estate, the Stellau Estate, and the Rostorff estate.

The lands on which the chief seat of Breitenburg, with the lands immediately belonging to it, now lies, as also the parish of Breitenburg, were formerly a separate district, belonging to the monastery of Bordesholm, and were purchased by General John Rantzau in the 16th century, as also afterwards the villages of Mühlen and Lobarbeik by Count Christian Rantzau, and united to the other districts of Breitenburg.

All these estates, districts and lands together form the present province of Breitenburg, to which also a part of the town of Itzehoe belongs.

The whole possession consisted of the lands belonging to the former estate and the present mansion, the marsh farms, woods, moor lands, and 48 partly larger, partly smaller villages and places, which are divided into three parishes, having churches, and into three other bailiwicks, which are aggregated to other churches. The whole quantity of land amounts, according to the rolls of the province, to 180 ploughs (*see* Appendix), and with the exception of the wood lands, moors and outer dikes, by the land measurement is calculated at 14,638 taxable tonnen (about 18,500 acres), and these are valued for taxation at 1,514,300 rix dollars silver, equal to 260,000 *l.* sterling.

Of this number of taxed tonnen, which composes the quantity of the cultivated land, as far as the same is measured or estimated by the tenants of the estate, there belong to the proprietor himself,

	Acres.		Tonnen.
In marsh land and meadows - - -	1,190	=	953
In sandy land - - - - - -	2,420		1,936
Together - - -	3,610		2,889

The remaining 11,749 tonnen (14,890 acres) belong to the tenants of the estate.

The waste or uncultivated land, which is chiefly used for grazing sheep, and belongs partly to the proprietor and partly to the tenants, contains more than 2,000, tonnen (2,500 acres.)

The whole of the woods together, belonging to the proprietor, contain about 1,200 tonnen (1,500 acres), consisting of oak, beech and fir woods, in which, however, several young plantations are not reckoned, and the magnitude of which cannot be given.

The turf moors belonging to the proprietor contain about 2,000 tonnen (2,500 acres), and lie partly near the Stoer.

I cannot give the size of the turf moors belonging to some of the tenants of the estate, as turf moors, wood lands and outer dikes are not taxable.

4. Upon the sandy parts of this district there are also at least 3,000 to 4,000 tonnen (3,750 to 5,000 acres) of heath and moor land, which, by a proper cultivation of clover and other kinds of fodder, might now be easier brought into cultivation, as the marl, which is to be found everywhere, affords a greater facility.

5. To some of the villages of the sandy lands almost the half may be used as pasture and fallow land, and in others less; however, it is from village to village so different, that one can speak with as little certainty there as in the marsh or moor lands in this district of Holstein, as the marsh and moor farmers are guided by the prices and the circumstances of the times either in growing corn or grazing.

6. This district has three principal divisions:

(*a*) Marsh land,
(*b*) Moor land, and
(*c*) Sandy soil, with meadow land.

But the two first are often so mixed together that no fixed rule as to their precise use can be laid down.

The proprietor has as before mentioned,

	Tonnen.
In marsh and meadow land - - -	953
In sandy land - - - - - -	1,936
Together - - -	2,889

In the remaining cultivated quantity of land of 11,749 tonnen, which properly belong to the tenants of the estate, and for which they pay the before-mentioned royal taxes, there are also 436 tonnen of marsh land included, which belong to the Breitenburg inhabitants at Rethwisch and a farmer at Hohdorff.

But what is (after deducting this marsh land from the 11,313 tonnen remaining for the tenants of the estate) properly sandy land and meadow land, I cannot in this moment state, as the land-tax register affords no information about it; however, the sandy land composes by far the greatest part.

7. In answer to this question, I refer to what is stated in No. 3.

8. Besides the lands and corn mills not used by the proprietor, and let respectively for 10 and 20 years, there are, in the province of Breitenburg, only the following farms let, viz.

The Carlshoff farm, consisting of 280 to 300 tonnen, from the 1st March 1829, for 22 years.

The Büthen farm, of 700 to 800 tonnen, consisting of half cultivated and half uncultivated land, from the 1st May 1824, for 22 years.

The Nordac farm, of 757 tonnen, the greatest part of which is still uncultivated and used for grazing sheep, from the 1st March 1829, for 20 years.

A small farm formerly annexed to Nordac, and called Klein Schulenberg, of 33½ tonnen (42 acres), let from Martinmas 1826, for 10 years.

The tenant to pay the rent yearly, to keep the land in a proper state of cultivation, to sell no straw or manure, to keep the buildings, taken at a valuation upon entering the farm, and any stock, in good repair, in as far as the landlord has not taken the larger buildings upon himself; further, to pay the insurance money yearly for the buildings insured, and in case the buildings should be burnt by the negligence of the tenant or his people, to bear the loss himself. But if the landlord himself has to rebuild the building burnt down, the insured value to be received by him from the fire-office.

At the end of the term the stock and other things will be again valued by two impartial appraisers, upon which a remuneration will be made to the tenant for the improvements made by him, and a compensation by him to the landlord for any injury done to the land.

9. This depends much upon local circumstances, whether the lands lie near to or at a distance from the towns. The medium may be,

For a tonne (1¼ acre) of	marsh land, 8 to 9 rix dollars	=	28*s.* to 32 *s.*
—	moor land, good, 5 to 6		17 *s.* to 21 *s.*
—	better sort, loamy, 4, 5, to 6		14 *s.*, 17 *s.* to 21 *s.*
—	inferior sandy soil, 3		10 *s.* 6 *d.*

Whereas if the same be nearer cities and towns, the amount of the rent is more than double.

10. Upon the heavy marsh soil, the pasture land is used for grazing fat oxen of 600 lbs. and more, and the less rich marsh and moor soil for grazing oxen of 300, 400, and 500 lbs. weight. With two or three oxen, the farmers like to graze one or two year old colts. While, on the one hand there is a great difference between the rich pastures and those used for young heifers; and, on the other hand, upon the sandy lands, the untilled enclosures and corn fields, which are now often in the last sowing, are sown with clover and used for grazing the cows, it may be assumed that upon a grazing farm where 12 to 15 tons of rye, between 20 and 25 tons of oats, 4 to six tons of buckwheat, and some barley and wheat, mostly of the latter, are sown for the use of the farmer, from 12 to 15 milch cows, and three or four heifers are kept.

11. I am ignorant of the proportion. The kinds of corn in the marsh are wheat, rye, barley and oats; potatoes, horse-beans, and white cabbage, are also grown in pretty large quantities. For the growth of rapeseed, the Breitenburg marsh ground is partly too low, and partly not heavy enough.

In the sandy lands, the kinds of corn consist chiefly in rye, oats and buckwheat, which last, if the year is favourable, is very abundant. Some farmers grow, besides these, peas, summer wheat and barley; however, only in small quantities; potatoes, on the contrary, are planted in considerable quantities; some land also near Itzehoe, is used for growing chicory, and the chicory roots sold to the chicory manufactory without the town, at from 26 to 32 current marcs a ton.

12. The average quantity of wheat in the marshes may be taken at the 10th grain of corn, as the average quantity of rye upon these sandy lands may be taken at the seventh or eighth grain of corn.

GERMANY. No. 15.

Appendix (M.) Answers to Queries.

13. *See* No. 11.

14. The rent is generally paid in money. Only one of the corn millers in this district has, by contract, to deliver 582 tons of rye. The payments of the farmers consist chiefly in ready money, although services and delivery of corn besides, however of less consequence, must be done.

15. The proprietor pays yearly the following taxes:

1st. Land-tax upon every 100 R. C. D., or 62 ½ dollars current, at which the land is valued, 40 R. B. D., or 12 ½ dollars current; however, since 1817, upon a deduction of 50 per cent., only the half of the original tax.

2d. Six per cent. bank interest upon the estimated value of the property.

3d. Contribution for a full plough or morgenland, yearly, 36 dollars current, and so farther in proportion to the number of ploughs.

4th. Money paid to the proprietor, but the amount of which is uncertain, it being for a large farm, more, for a smaller, less.

These payments are levied yearly at fixed periods by the proprietor or his collectors, and the royal taxes, as land-tax, bank interest and contributions, for which the proprietor is responsible, are paid by him into the Royal Schleswig Holstein Exchequer at Rensburg.

The parish payments and taxes, which, besides the above, must be collected from the proprietor, are altogether not inconsiderable: however, they cannot here be stated.

16. The lessees of hof lands and farms seldom pay taxes; these are generally paid by the proprietors.

17. This is uncertain, as these payments have no fixed rule, but are levied and collected whenever they become necessary.

The church money amounts sometimes to five dollars current a plough yearly, sometimes less, according as the payments, which, including the fixed salary of the clergyman, for buildings and repairs of the church, and those of the clergyman, must therewith be paid, are more or less considerable yearly.

In respect to the monthly poor money for the support of the poor and needy, generally, every year. There is a sessions held by the magistrates, with the bailiffs and overseers, to regulate the amount according to the property and possessions of each contributor, which is collected monthly by the overseers in fixed sums, from all who are liable, and by them paid to the poor and needy as occasion requires.

These contributions are in some parishes considerable, and may amount yearly to 20 or 30 marcs current, for some of the rich or opulent contributors. Servants pay the poor money in proportion to the amount of their wages.

18. In this district, as in all Holstein, there are no duties paid on the importation of articles of consumption into the towns.

19. The average price of beef is 2 ½ schgs. ( ) veal, 3 schgs., ( ) and pork 3 ½ schgs. ( ) a lb.

N. B.—Fourteen schillings equal 12 *d.* sterling.

20. In the marshes where oxen are pastured, and where the milking business is little regarded, the number of fixed servants is often very small, as in the sowing as well as in the harvest time, day labourers are employed, and also in winter, and also on the larger farms; this work and the threshing of corn is seldom done by fixed servants, but by day labourers.

The Geest farmer keeps generally one upper servant and one under servant, according to the size of his hide of land, and in summer a boy to drive the plough and tend the cows, and two maid servants.

21. The wages of an upper servant are from 30 to 32 rix-dollars (5 *l.* 5 *s.* to 5 *l.* 12 *s.*); of the second servant from 24 to 26 rix-dollars (4 *l.* 4 *s.* to 4 *l.* 12 *s.*,) and the summer wages of the boy commonly from 6 to 8 rix-dollars (1 *l.* 1 *s.* to 1 *l.* 8 *s.*,) and of a head maid servant 20 rix-dollars (3 *l.* 10 *s.*), and of a second maid servant, 18 rix-dollars current (3 *l.* 3 *s.*), to which are sometimes added some ells of linen and woollen stuff.

N.B.—A rix-dollar is equal to 3 *s.* 6 *d.* sterling.

22. In the harvest time the day wages are often double, and often more, particularly in the marsh, as this often depends on the weather.

23. The fixed servants receive board and lodging, but the day labourers must find themselves.

24. A great deal of buckwheat groats, buckwheat flour, potatoes and peeled barley, with bacon, is the daily food of the servants; however, in almost every household, an ox is killed in autumn, and the pickled and smoked meat made therefrom eaten by them, but seldom fresh meat, whereas in the marsh more barley groats and also wheat flour are used.

25. The maid servants and the wives of the day labourers take their part in every field labour, as manuring, loading and unloading, binding sheaves and putting them up in shocks, as also in loading and bringing the hay and corn into the barn; but ploughing, sowing, mowing and threshing, are exclusively the work of the men.

26. From

26. From the protocol of the military commission, upon an average, only 20 men are levied yearly in the province of Breitenburg to fill up the vacant numbers in the ranks of the different regiments and corps.

27.—

28. Turf, bush and wood, which, except in the marsh, where they must be purchased, the farmer has himself.

29. The daily clothing consists chiefly of home-made stuffs, but the Sunday dress consists of cloth, and such kinds of stuffs as are worn in the small towns.

30. With the exception of small oil mills, a paper mill and some bark mills, there are no manufactories in this district.

31. The number of poor families, and particularly of illegitimate children, to be supported, has unfortunately so much increased, that there are parishes which 20 years ago had not to pay half of the contributions.

The former are provided for by paying for their dwellings, delivery of fuel and contributions in money; the latter are provided for by agreement or contract.

32. From the badness of the crops or the too low prices of produce, the situation of the farmer has not been very prosperous of late years.

N. B.—The tonne of land, here, is reckoned at 260 square roods, about 1 ¼ acre.

Appendix (N).

ANSWERS obtained through particular interest to the Questions relating to Agriculture, &c., as regards sundry Estates in *Holstein*, bordering on the Marshes.

Answer 1. The marshes upon the east coast of the Elbe in South Holstein; as the parishes of Haselau, Haseldorff, Ueterson, Seefter, Collmar and Neuendorff, situated in the same.

2. The above-mentioned parishes only, with their communities, form the country. The amount of the population in the single districts cannot be accurately given, as the last calculation ordered in Denmark is old, but will be renewed shortly. In 1833, there was an official calculation of the inhabitants in the districts of Collmar and Seeftermühe, a part of the parish of Seefter, which amounted to, for Collmar, 2,200; for Seeftermühe, 900. In Ueterson, a market town, lived, in 1831, according to an official calculation, 3,400.

3. Haselau contains 28 ½ ploughs; Haseldorff, 24 ½; Ueterson, 9; Seeftermühe, 10 ½; Collmar, 74 ½; Neuendorff, 45. A plough is a rate of taxation, and comprises 24 morgen; 1 morgen is 450 square roods of land, or about 2 ¼ acres. The above-named districts have no waste land, neither wood land, nor heath, nor moor, but only cultivated fields.

4. Answered in No. 3.

5. A farm comprising a surface of 40 acres contains generally about 12 acres of pasture land.

6. In Holstein, the cultivated land is distinguished by marsh lands and sandy lands. The latter have, in proportion to their produce, again their subdivisions, and are, in their quality, as one to six, in proportion to the marsh land. Undiked marsh lands are not tax-worthy.

7. In the Marsh, the different estates are called höfe, and divided into full, half and quarter höfe. The surface of a full hof is not everywhere the same: some full hofs have 16 morgen and some 30 morgen. The average quantity is 24 morgen.

8. In the Marsh there are, generally speaking, no particular farms which are let to be cultivated by third persons; whereas of the lands belonging to the Noble Marsh estates, Haselau, Haseldorff and Seeftermühe, most of the pieces are let singly to third persons. The term of letting is commonly 10 years; the tenant bears no land-tax, can manage the farm as he likes, but in the two last years of the term must let it lie in pasture.

9. The lands within the dike are at present let for about from 18 dollars to 20 dollars per morgen, and lands without the dike for about from 10 dollars to 12 dollars per morgen. Sandy land is not let by morgen, but by tonne. One tonne of land comprises 260 square roods, about 1 ⅓ acre, and is let for from two tot hree dollars, according to the quality.

10. A marsh hof of 24 morgen keeps commonly four horses, two colts, two cows, two young bullocks and two oxen.

11. Upon a hof or farm of 24 morgen, commonly from two to three morgen are sown with rapeseed, and the same quantity with wheat; two morgen with barley, three morgen with beans or vetches, three to four morgen with oats, two to three laid down in fallow,

and the rest used for pasture. Rye, buckwheat and potatoes are especially grown upon the sandy land.

12. One morgen of marsh land produces, upon an average, 17 tons of wheat, 20 tons of rapeseed, 30 tons of barley, 18 tons of beans, and 30 tons of oats. The best sandy land commonly bears ten-fold.

13. After fallow, rapeseed, then wheat, then beans, oats, barley, and, lastly, pasture.

14. The rent is paid in cash in Danish currency, never in work.

15. The proprietor is liable to the direct and indirect taxes; these fall again into real and personal taxes, ordinary and extraordinary taxes.

1. Ordinary real taxes consist of state taxes and taxes paid to the proprietor.

A. The taxes paid to the treasury are yearly.

1st. For the tenants of the estate.
a. The land-tax, according to a certain rate of taxation of the lands.
b. The ordinary contribution, according to the number of ploughs.
c. A payment of six per cent. upon the estimated value of the property.
d. House tax, according to the amount of the insurance from fire in the country, but only for manufactory buildings, mills and public houses.

2. For royal bailiwicks.
e. Protection money, rate uncertain.
f. A fowl; a very ancient custom of paying a fowl.
g. Moor payments, for the turf moors as soon as they are partitioned.
h. Magazine corn and delivery of forage, according to the number of ploughs.
i. Carriage service by the tenant for the proprietor.

1. The particular ordinary real taxes to the estate are, for tenants,

a. Protection money, a payment which, according to the difference of the peasant's rights, is sometimes in the shape of an imposed tax, and sometimes as reserved rent. In the Marsh, the protection money is unalterable.
b. Miller's fees for mills.
c. Services, which are for the greatest part compounded.

2. The extraordinary real taxes are especially stipulated in carrying on a war and other circumstances. The chief ones are,

a. Dowries to princesses upon their marriage.
b. War tax.
c. Billeting and conveying troops.
d. Particular cases occasion extraordinary services.

The personal taxes paid to the Royal Treasury.

a. Head-money or poll-tax in the royal bailiwicks of one rix dollar a head.
b. A tax on wages and perquisites from all public persons, from the salaries and perquisites.
c. Rank-tax, according to the difference of the classes.

The parish taxes of the proprietors are,

a. Poor money, monthly, according to the value of the property after deduction of debts.
b. Real school taxes, according to the number of acres.
c. Scot and lot to the church, according to the number of acres.
d. Payments for the House of Correction and expenses for criminals, according to the number of acres.
e. Salary of the clergyman, clerk and schoolmaster, according to the same.
f. Dike and sluice money in the Marsh.
g. Common parish taxes, comprising casual payments of the overseers.

The chief indirect taxes of the proprietor are,

a. A tax of one-half per cent. upon the value of newly-acquired property in land.
b. Import and export duties.
c. One-half per cent., and four per cent. from inheritances.
d. One-half per cent. from auctions above 500 rix-dollars in amount.
e. Last money from ships.
f. Ten rix-dollars for every commercial last of ships purchased abroad.
g. For stamped paper in the royal bailiwicks of about four-fifths per cent. upon the value of the object.
h. Stamps on cards of 4 schgs. for every pack.

The direct ordinary real and personal taxes are paid yearly to the collectors; the indirect to persons appointed, according as the case may be, to receive them; the parish taxes to the representatives of the parish.

16. The tenant has to pay taxes according to the contract, otherwise only personal, parish and indirect taxes.

17. The amount of the yearly poor money is very different, and depends upon the number wanting assistance. A sworn commission of persons from every parish values according to the best of his judgment the property of every inhabitant, and fixes accordingly the monthly contribution to be paid, which is eventually collected by distress by the civil authorities. These appointments are repeated every one or two years. There are no particular taxes for religious purposes. The ecclesiastical matters are, in their economical and administrative parts, purely parochial affairs, which are managed among the parishioners under the inspection of the state. The necessary pecuniary contributions for each church are considered as a real tax upon the parishioners, according to the size of their possessions.

18. The import duties depend upon the different town regulations and the yearly alterations in the duties; in general, they cannot be ascertained.

19. The average price of fresh beef is 2*d.* per lb.; veal, 3*d.*; pork, 2½*d.* to 4*d.*; a fowl, 8*d.*; a duck, 1*s.* 2*d.*; a goose, 2*s.* 6*d.*; butter, 7*d.* per lb.; wheat flour, ¾*d.* per lb.; rye flour, ½*d.* per lb.; 20 eggs, 6*d.*

20. Upon a full hof of 20 morgen, in general, one man servant and two day labourers are kept, who, besides the master himself, do the work.

21. A man servant receives commonly 30 rix dollars a year; each day labourer, besides his board, 28 schgs. weekly, otherwise daily, from 8 schgs. to 12 schgs. They are paid in cash. In the harvest time, day labourers receive double wages, but not the men servants.

22. Answered in No. 21.

23. The man servant receives board and lodging, but not the day labourer, otherwise they would belong to the class of domestics.

24. Smoked meat, bacon, dumplings, bread and spirits. Upon a full hof they generally kill and consume two oxen of 600 lb. weight, two pigs from 300 lb. to 400 lb., 20 ducks and six geese. A workman in the Marsh consumes daily about two pounds of bacon, two pounds of meat, one pound of wheat flour in the shape of boiled dumplings, half a pound of bread, quarter of a pound of peeled barley, or groats, or other milk food, and a quarter of a bottle of spirits. Fresh meat is very seldom eaten.

25. We seldom find in Holstein, and still more seldom in the Marsh, women who are employed in field work. In the harvest, indeed, they bind the sheaves; but commonly this work is done by the maid servants or the wives of the day labourers; but, properly speaking, the field labour falls upon the male part of the servants and day labourers.

26. The military service falls upon the peasantry and the day labourers. In the towns and small places this duty is imposed upon the possessor of five acres of land. It is hereditary. The active service begins, in peace, with the 22d year; consists, in the troops of the line, in a two years' garrison service, and the usual exercises for six years. In the reserve battalions, the six years' service in peace consists only in yearly exercises. In the 36th year the soldier enters into the reserve, and only serves in war; after his 45th year he is discharged. The yearly contingent of the recruits called upon to serve is different, and varies according to the number capable of service in the single districts.

27. A substitute commonly receives 1,000 marcs (60 *l.*), for which he performs the whole of the service.

28. Turf; this is dug upon the moor. A faden (or cord) of turf contains 400 pieces or sods; costs, upon the moor, according to the quality and the season, from 12 schgs. (10½*d.*) to 1 marc 4 schgs. (1*s.* 6*d.*) Four faden or cords make a waggon load.

29. The working classes are generally clothed in unbleached linen from 6 schgs. to 8 schgs. (5½*d.* to 7*d.*) an ell; in coarse cloth from 2 marcs 8 schgs. to 3 marcs (3*s.* to 3*s.* 6*d.*) an ell. In proportion to the quality, this price must be higher than in England.

30. Trade and handicraft are confined to the corporate towns and free places, and can only be carried on in the country by permission of the sovereign. The nobility of the country are privileged thereto upon their private estates. In Seeftermühe the proprietor has an oil mill and a distillery; and there are only several of the latter in the country.

31. With the increase of luxury, poverty has also increased. The population pays yearly for poor money, upon an average, 1 marc 8 schgs. a head (21*d.*); in some towns double. The overseers of the poor fund, at the head of whom stands the clergyman of each parish, grant a monthly sum for support without any control.

32. Generally speaking, prosperous.

Appendix (O.)
Conditions for letting a Farm.

Appendix (O.)

CONDITIONS for letting a farm on the *Jersbeck* property.

Answer 1. Farm let for 10 years at the yearly sum of 69 dol. 6 schgs., according to inventory annexed.

2. The tenant to keep the dwelling-house in good condition, and pay the fire insurance, and to put the hedges and ditches into good order and keep them so.

3. The inventory being fairly valued, is to be delivered on leaving the farm as good as when received, or the difference to be made good; but if he has made improvements, he is to be allowed for them.

4. The tenant must not dam up the water to the inconvenience or damage of his neighbour, but must leave a free course for it.

5. The tenant must provide conveyances for the king and the clergyman, &c., when required; must pay the tithes or dues to the rector and clerk, to which the farm is subject, and also to plough in his turn the clergyman's fields, and to forward in his turn, like the cottagers, letters and messages from the village to the proprietor's house; also to furnish a man for the treibjagd when required, or to assist in building or pulling down the landlord's houses; also in his turn to assist one day in the year with the garden plough and harrow in the landlord's garden, with two boys; and lastly, every year to deliver in the landlord's kitchen 30 fresh eggs.

6. In respect to repairing the public roads, he must bear his share as is customary, as well also as in the bye-roads.

7. He must also keep his cattle on his own ground and never let them go elsewhere, especially as the commons are discontinued, and he has no share therein.

8. For firing for his own use, he can dig from the place allotted to him as much as he requires for one rix-dollar yearly; but he is forbidden to carry any, or sell or deliver it to any one else.

9. Without permission from the proprietor he can have no stranger with him.

10. In case of prisoners coming, who must be arrested, transported or guarded, he must in his turn, from beginning to end, afford all necessary assistance.

11. If he is obliged to use the proprietor's mill, he must, like other customers, assist in repairing it when required. Should one or other of the mills be deficient either in water or wind, he must let his corn lie three days in the mill to which he has taken it, before he can carry it to the other, and on no account, under arbitrary penalties, can he go to a foreign mill.

12. He must forbear from all hunting, shooting, snaring, &c. of game, and also pilfering the proprietor's wood or bushes.

13. He is free from all feudal services formerly belonging to this farm; also from land-tax and other ordinary contributions. Likewise he is not subject to any tax on the rent of house or inventory.

14. He is, on the other hand, obliged to make for the proprietor, yearly, eight journeys of from three to five German miles, gratis; whereby it is fixed that he is obliged to carry eight tonne hartkorn, twelve tonne oats, one-half last lime, one faden weichholtz, three-fourths faden hardwood; only, except in necessity, this is not to be required in harvest time.

If the proprietor should go only one to two miles, then two such journeys make a whole one. The same regulation in regard to carrying turf or dung, or hay, or for ploughing, &c.

On these occasions he must assist with a good carriage, in summer from seven to seven, in winter from eight to four.

He is allowed one and a half to two hours in the day for dinner and feeding, but not when he is at work on corn or hay, and he must even work later if necessary.

Should the proprietor not make the stipulated long journeys, or instead of them, the shorter or day journeys, they shall not be put off, but every time at the end of the year, as from May-day to May-day, they shall be considered as performed, and all such journeys, as formerly, shall be made in the village by turns.

15. He is obliged to get his beer and brandy, particularly at marriages and christenings, from the proprietor's brewery and distillery.

Appendix (P.)

Land Tenures in Holstein.—The land in the duchy of Holstein, including also Schleswig, is held under various tenures, namely, estates of noblemen, crown lands, fee-farms, hides of land, cottages, leibeigenschaft (bondage farms).

The estates of noblemen are of two sorts.

Lehngut, of which there is but one. It is an estate in Schleswig, which was sold in 1673 by Christian the 5th to Count Reventlau, upon condition that the contribution on 51 ploughs for land-tax, to which this estate, on the footing of other noble estates, was subject, should be paid only to the special royal war fund in the duchies, the park and cottages being free from it. In 1681 this estate was made an earldom, and its contribution for the land-tax reduced from 51 to 30 ploughs. On failure of heirs, the estate to revert to the king and his heirs, the widow of the last possessor being allowed to hold it for her life. *See* Güdme, p. 171.

Adelige Güter.—In the beginning of this century there were 145 noble estates in Holstein, of which, including those of the Duke of Oldenburg, 64 were in possession of the members of the Schleswig Holstein Knights Corps. This corps, at the end of the last century, consisted of 39 families, who have alone the right of admission for their daughters to the three Holstein cloisters or nunneries, and from whose members the prelates for them and the St. John's nunnery in Schleswig are chosen. The number of noble estates in Holstein is computed at 145, having 1,460 ploughs, and valued for taxation at 10,228,500 rix-dollars, but the accounts differ as to the exact number. The size of these estates is very different, they are dispersed through the whole duchy. The origin of these estates is not known; only scattered information is to be obtained about them. In latter times the estates have been enlarged by the resigning of the peasants' lands and purchasing public districts, and the number increased by separating of farms which from time to time have been added to the class of estates. For more particular information respecting these estates, *see* Gudme, page 171.

Crown Lands.—These were formerly royal domains, but in 1763 the king determined on disposing of them. The woods were retained as royal forests and inclosed, but the land was divided into small parcels, which were sold singly to the highest bidders and called parcelen. The purchase money was allowed to remain in the estates as mortgage, the purchaser paying interest and a moderate canon or tax. The estates were free from all increase of taxes or tributes in time of peace; the proprietors and their families, but not their servants, were free from service in the militia, and from the usual official personal services and providing of carriage for public purposes within the province, and from the delivery of magazine corn. In this way 52 royal estates were disposed of between 1765 and 1787, containing between 40,000 and 50,000 acres, and about 6,000 or 7,000 acres of wood converted into royal forests; and instead of 260 families, which formerly were resident on these estates, there were 776 families on them in 1787. In consequence of this arrangement, the king no longer possesses a single estate in the duchies,

Fee Farms.—These tenures have arisen since the middle of the last century out of the division of the manors; they are of different sizes, and the possessors, on payment of a canon or tax, have full right to the property, which they can dispose of as inheritance, and sell wholly or in part, subject only to the usual rights of the lord of the manor.

Hides of Land (Hufen), which are either *Freihufen*, *Bauerhufen*, or *Festehufen*.

Freihufen are such tenures as through particular favour of the landlord are free from one or more burdens. Such favours were granted on the disposal of the royal domains.

Bauerhufen are of different sizes, and, according to their area and the number of ploughs, are divided into whole, half, third and quarter. They are subject to general, ordinary and extraordinary duties, carriage services, &c., and can, under certain circumstances, be sold. The sons of the hufner have the right by entail to take the hufe valued at a moderate price; if there are several sons, the eldest in Schleswig, and the youngest in Holstein, has the prior right.

Festehufen are only in three provinces in Holstein, namely, in Neumunster, Bordesholm and Munster; they originate out of domains formerly belonging to the clergy in the duchies, and were all then of the same character, but have altered their nature either by forming bailiwicks or making royal domains of them, by which these hufen became liable to services to them.

The difference between the festen and bonden generally consists in the more limited rights of the former over the hufe in the disposal of it; however, he cannot sell the hufe to any stranger, or resign it at pleasure to any of his children, but he must leave it to the most skilful of his relations, and deliver over to his successor the hufe with a certain number of horses (hofgespann), and the stock of iron implements. The women may likewise inherit a festestelle, and only in case of the death of the whole family does the king inherit.

Upon the taking possession of a festestelle, a fee of about 10 dollars is paid into the treasury.

GERMANY. No. 15.

Appendix (P.) Land Tenures, Holstein.

Cottages provided with a certain piece of land, over which the possessor, upon payment of purchase money, or a constant tribute, acquires complete property, and to the landlord belongs only the right to that tribute. The possessor does no transport service, but must forward on foot the landlord's orders through the district, must guard prisoners and assist with the hufners in mending the roads.

Bondage Farms (Leibeigenschaft.)—Originally the peasants in the duchies were free, but some by chance of war became bondmen, and the number increased by propagation; the peasants thus became so bound to the landlord that they could not even marry without consent, could apply themselves to no art or handicraft, and could engage in no service for another which interfered with their bond service. Fortunately, however, for mankind, this bondage, partly at the free will of certain landlords, following the example given on the royal domain, and partly by ordinances, has been entirely abolished in the duchies. The landlords have sold to their tenants as property, that part of their estates which they were formerly obliged to cultivate, or have given it up as hereditary or leasehold farms for the performance of stipulated transport and personal services. The cessation of bondage made it necessary, on account of the large extent of most of the estates, to establish new farms; many of these in 1806 were by patent, with consent of the landlord, separated from the estate and erected into particular properties, with all the rights possessed by the noble estates, but the possessor acquired no freedom from taxes. The number of such properties in Holstein is 24. For a copy of the lease of such bondage farms, *see* Appendix (O).

Appendix (Q.)

Measurement of the Land.

Appendix (Q.)

See Güdme, p. 181*

Pflugzahl.—The plough is a measurement by which the land-tax usually called "Ordinary contribution" is assessed. It is difficult to state on what principle this measurement was formerly made, but it appears to have been very disproportioned. In some places 22 ½ morgen, in others 29 to 30, in others 36 morgen, and in Tondern 74 ¼ demath went to a plough. Owing to these varieties one cannot decide on the precise size of the plough measure; in order, however, to regulate the tax, a commission was appointed to investigate the measurement locally, and fix the number of ploughs on which the duty was to be paid, and, in Holstein, it is thus divided:

The noblemens' districts contain - -	2,750	ploughs
The bailiwicks and provinces - -	3,166	ditto
The towns - - - - - -	1,016	ditto
The north and south marshes - -	1,425	ditto
	8,357	

By an order dated 31st December 1800, it was fixed that for taxation 24 morgen, or 48 demath, and where the partition could not so take place, 100 tonnen of land should go to a plough.

Demath seems to have been originally a measure for meadow land, and equal to the quantity that a man could mow in a day, but it is used also as a measure for arable land. The precise quantity of the measure seems to be very uncertain, and differs materially in different places. But generally a demath contains 180 square roods, and each rood 18 square ells. This measurement is used chiefly in Schleswig.

Morgen is a measurement of land used chiefly in the marsh districts in Holstein; its size seems to be various. In the district of Gluckstadt it contains 360, in the province of Steinburg 450, and in South Ditmarschen 600 square roods, equal to 649 Hamburgh square roods = 3 ⅜ acres. In North Ditmarschen there is a small and a large land measure. In the southern district, a morgen of marsh land contains 20 scheffel of seed, or 600 square roods at 16 feet, and in the northern district 16 scheffel seed or 480 square roods at 18 feet.

A morgen of meadow land contains 16 scheffel or 480 square roods at 18 feet; a morgen of arable (pflug) land four scheffel seed or 200 square roods at 18 feet; 105 feet in North Ditmarschen are equal to 106 in South Ditmarschen; 25 demath are equal to nine morgen in South and Little North Ditmarschen, land measurement; in Great North Ditmarschen, land measurement, 80 morgen are as great as 81 morgen in the southern district; 15 scheffel land in South Ditmarschen, and 20 scheffels of seed in North Ditmarschen, are each equal to a large morgen.

Tonne. In the provinces, and where no other particular land measure exists, a tonne contains, according to the difference of the estates, 200, 240, 250, 300, and 320 square roods of 16 feet, and according to a decree of the 15th December 1802, 260 square roods (1 ⅓ acre) were fixed as the reduced land measure for taxation of a tonne, and 220 square roods (1 ⅛ acre) as that of a demath.

GERMANY. No. 15.

Appendix (Q.) Answers to Queries.

SOME CALCULATIONS made for the purpose of reducing German to English measurement.

Mecklenburgh Schwerin measures 228 square geographical German miles.

Fifteen geographical German miles equal 69-12 English statute miles; one ditto equals 4-608 ditto; one square ditto, equals 21,233 square ditto; 228 ditto, equal 4841-124 ditto.

One English square mile contains 640 statute acres; 4841-124 ditto, contain 2938-319 English acres.

188 square roods in Mecklenburgh, equal one English acre.

One hufe in Mecklenburgh, contains on an average 458 English acres.

One hufe contains 600 scheffels.

One scheffel, as a measurement of land, contains about 1 ¼ English acre.

One scheffel, as a measurement of corn, contains about 1 ⅛ bushel English.

Mecklenburgh Schwerin contains a population of about 460,500 souls, being 2,020 per German mile, or 95 per English mile.

Holstein contains 156 ½ square geographical German miles, or 3322-964 English miles, or 2,126,080 English acres.

The population in 1830 was 418,920 souls, being 2,676 per German square mile, and 126 per English square mile.

The plough, as a measurement of land for taxation, is calculated to contain 24 morgen.

One morgen equals 2 ½ acres, consequently one plough contains 60 acres; but this valuation varies much, and often the plough contains more than 60 acres, according to the nature of the land.

One tonne as a measurement of land, is considered generally to be equal to 1 ¼ English acre, but it contains sometimes 1 ⅓ English acre, and sometimes 1 ⅔ English acre.

One tonne contains generally 240 square roods Hamburgh.

240 square roods equal 1 ¼ English acre.

One tonne, contains four scheffels.

A rix-dollar contains three marcs courant, and equals 3 *s.* 6 *d.* sterling.

One marc courant contains 16 schillings, and equals 14 *d.* sterling, consequently 12 do. equal 10 ½ *d.* sterling, and eight do. equal 7 *d.* ditto.

HOLLAND AND BELGIUM.

— No. 16. —

Mr. Consul *Ferrier* to the Duke of *Wellington.*

HOLLAND AND BELGIUM. No. 16.

Mr. Consul Perrier to the Duke of Wellington.

British Consulate,
Rotterdam, April 10, 1835.

My Lord Duke,

I HAVE the honour to transmit herewith, embodied in one general series, all the answers to the list of queries relating to the state of Agriculture in the Netherlands, but more especially respecting that part of it within the jurisdiction of this consulate.

I have, &c.

(signed) *Alex. Ferrier.*

Enclosure in No. 16.

(Enclosure.)

A SERIES of ANSWERS to QUESTIONS relating to the State of Agriculture, &c., in *South Holland.*

THE great difficulty there is in obtaining correct information on subjects which concern the Dutch Government will be shown by the following extract of a letter from an eminent professor on the science of agriculture to the undersigned. This gentleman, after expressing his regret that statistical reports are almost a complete desideratum in Holland, states as the reasons why such reports, especially on agricultural subjects, are not likely to appear from individual research, "1st. The trouble and difficulty in procuring the necessary data from the several branches of administration, who are particularly reserved in this respect. 2. The jealous caution of the proprietors themselves."

HOLLAND AND BELGIUM. No. 16.

(Enclosure.) Answers to Queries.

If even a native, therefore, has to contend with such obstacles, it were to be wondered at if any attempt on the part of a foreigner to give a satisfactory account of this subject should be attended with uncommon success.

Answer 1. This province is divided into the following departments (arrondissementen) and cantons (kantons).

DEPARTMENTS.	CANTONS.	DEPARTMENTS.	CANTONS.
1. Brielle - - -	Brielle.	5. Leyden - -	Leyden.
	Sommelsdijk.		Noordwijk.
	Goede Reede.		Schoonhoven.
2. Dordrecht - -	Beyerland.		Woerden.
	Dordrecht (*a*).		Woubrugge.
	Dordrecht (*b*).		
	Ridderkerk.	6. Rotterdam - -	Delft.
	Streijen.		Gouda.
3. Gorinchem - -	Gorinchem.		Haestrect.
	Sliedrecht.		Hillegersberg.
	Vianen.		Naaldwijk.
4. 'S Gravenhage -	Alphen.		Rotterdam.
(Hague).	'S Gravenhage.		Schiedam.
	Katwijk.		Vlaardingen.
	Voorburg.		

The parishes contained in the above-mentioned departments and cantons are the following in number:

DEPARTMENTS.	CANTONS.	Parishes.	DEPARTMENTS.	CANTONS.	Parishes.
1. Brielle -	Brielle - -	19	5. Leyden -	Leyden - -	3
	Sommelsdijk -	5		Noordwijk -	11

28. Vlaardingen - -	2,513	14,490	1,228	6,823

The amount of the population of South Holland, including both that of the towns and country, is 479,565 souls in 75,658 houses; and thus at the rate of six and a half souls per house. The warehouses, stables and barns annexed to the houses are to the number of 5,751.

3. The answer to this question is clearly stated in the following table:

N. B. The extent of the lands given is expressed in Netherlands' bunders, each equal to 2·471143 English acre.

CANTONS.	Arable Land.	Gardens.	Orchards.	Pasture and Hay Land.	Dikes, Waste and Low Land.	Woods.	Reed and Rush Land and Marshes.	Sandbanks, Heaths, Fens, Commons, &c.	Canals, Navigable and other Waters.	Heritable Property.	TOTAL in Bunders.

4. The quality of the uncultivated land in general may be said to be improving gradually; as, with the exception of the land lying along the downs, which is in many cases mere sand, the most of the extensive pasture grounds, &c., have been literally won from the bogs and fens. The slow but sure contrivance of the natives is constantly effecting the same changes beneath our eye: 1st. The turf is excavated, leaving an immense sheet of stagnant water; this is in time drawn off by means of water-mills; the lake then assumes the appearance of one large meadow, which in course of time is broken up for one or other agricultural purpose.

5. According to the statement given in answer to the 3d Query, of the 285,079 Netherlands' bunders in the province of South Holland, there are 71,839 bunders of arable, and 143,516 bunders of pasture land. Thus the arable land stands in proportion to the pasture as one to two.

In this a trifling difference arises, if there is reckoned for arable land the gardens, which are used partly for the cultivation of vegetables and medicinal plants, of which the superficial contents are 3,558 bunders; and on the other hand, if there is included under the pasture land the 1,672 bunders of dikes, waste land bordering on the rivers (interwaarden), and low lands, the two last of which may be considered as pasture and hay lands.

In general the breeding of cattle and the manufacture of butter and cheese, may be considered as forming the principal objects of husbandry in South Holland; a considerable part of the province, however, is appropriated to the cultivation of corn, and other parts to the rearing of cattle and the production of corn promiscuously.

It may be correctly enough divided in the following manner:

The cantons which, with trifling exceptions, contain only pasture land, are Rotterdam, Leyden, s'Gravenhage (Hague district,) Woerden, Schoonhoven, Gouda, Haestrecht, and Sliedrecht.

The cantons which are entirely appropriated to the production of grain, are Goede Reede, Sommelsdijk, Dordrecht A and B, Ridderkerk, Beyerland, Streijen and Brielle.

The cantons which must be considered as partly corn land, and partly butter and cheese land, are, Voorburg, Woubrugge, Katwijk, Noordwijk, Naaldwijk, Vlaardingen, Alphen, Hillegersberg, Vianen, Gorinchem.

6. To answer both branches of this so far as possible at once, the following view is given of the quality of the soil in the different cantons, according to the order and division which is found in the preceding query (No. 5,) from which, together with the answer to Question 3, the extent of each quality will be sufficiently evident.

A. Cantons which contain principally pasture land.

a. Rotterdam contains only low pasture land, that has much to suffer from the water, and derives its only value from its situation round such a populous and active commercial town.

b. Schiedam has some of the best pasture land, but its value is more immediately regulated by the great number of distilleries in the town of Schiedam, than by the intrinsic good quality of the soil, as by the refuse from the distilleries, it may be very advantageously employed in the fattening of cattle, which is of so much importance in this canton, that a great part, indeed, of the cattle for the supply of South Holland is brought here.

c. Delft. This canton is amongst those in which the best pasture land is found, and it also derives an additional value from advantages similar to those ascribed to Schiedam for the like purposes. The value of the land is in this canton, moreover, relatively enhanced by its contiguity to several populous towns.

d. Leyden consists of the town of this name, and the villages of Soeterwoude and Leyderdorp. This canton has very good and productive pasture land, very well adapted for grazing and the manufacture both of butter and cheese.

e. 'S Gravenhage has some good pasture land, but contains for the greater part a sandy soil, which on the sea coast is very unfertile. In this canton there are pretty extensive woods. The rising value of the land keeps pace with the increasing population of the town.

f. Woerden, for the greater part, lies very low, and contains, with the exception of some lands along the Rhine, in general but bad pastures. Cheese and butter are its principal productions, besides which, an important part of the population find their subsistence in numerous brick and tile-kilns.

g. Schoonhoven.—In this canton the pasture land bears much resemblance to that of Woerden, and consequently is generally bad.

h. Gouda is surrounded by lakes and fens, and but only indifferent pasture land, which, however, produces very good cheese. The eastern part of this canton is a low, unfertile and almost uninhabited district. The nursery grounds of Boskoop, situate in this canton, are very considerable, the soil in them is entirely tempered by art.

i. Haestrecht (also called Krimpener Waard.)—This canton lies low, has bad outlets for the water, and its land, therefore, is very indifferent. It produces abundance of cheese and hemp, and has considerable and well situate brick-kilns, which supply work to numerous labourers.

j. Sliedrecht bears a great resemblance to the foregoing canton; it also lies low between two rivers, and is overcharged with water; its outlets are, however, better, but on the other hand, the Alblasserwaard, in which this canton is situate, is continually exposed to inundations. Besides butter and cheese, it produces much hemp. The interwaarden

(pasture

(pasture lands along the rivers, and by the sides of the dikes) are very considerable in this canton.

B. Cantons appropriated principally to the production of corn.

a. Goede Reede } Forming the islands of Goede Reede and Flakkee, belong to those
b. Sommelsdijk. } parts of South Holland in which agriculture has attained the highest degree of perfection. Madder forms the principal article of culture, besides much wheat, barley, peas and potatoes, are produced. There is very little pasture land, so that the cattle are mostly sent elsewhere to pasture. The daily food of the cattle is supplied by clover, and as the breeding-yards are consequently few, the most of the manure must necessarily be brought from other quarters.

c. Dordrecht a. } Has a soil adapted for the production of almost all kinds of grain, but
d. — *b.* } which, from too low a situation, or imperfect water-outlets, is cold, so that not unfrequently some of the winter fruits fail. In other respects it is well situate for their export.

e. Ridderkerk contains fine pieces of land, fit for the production of all kinds of grain, and has good pastures, but the rents are low compared to those paid for good soils in other places.

f. Beyerland, } Contain much good and fruitful soil of a clayey nature, which after seven
g. Streijen, } years must be broken up and manured, and on which rapeseed, flax, wheat, barley, rye, oats and potatoes, are produced. Meanwhile the great enlargement of the farms, and a too thin population, have an injurious effect on the rent or selling prices, which, in proportion to the goodness of the soil, is not to be found so low in any other part of the province.

h. Brielle consists of the islands of Voome and Patten, and has a greater variety of soils than the above-mentioned adjoining cantons, whilst its lower situation exposes it to being more overcharged with water; but a more numerous population, and a better division of the land into farms, enhance the value of the latter. The same kinds of grain are produced here as in Beyerland and Streijen. The woods which line the downs are pretty considerable, and possess some value.

C. Cantons which produce partly grain and partly butter and cheese.

a. Voorburg.—The pasture land in this canton is very indifferent, but from its immediate vicinity to the Hague it has a proportionably greater value. The drained lands, on the other hand, are the best in South Holland, and well adapted for the cultivation of corn; it is in great demand and commands high prices; and it produces flax, wheat, barley and oats. The number of country seats also adds to the value of the land.

b. Woubrugge has very good soil for pasture land, and is well known for its butter and cheese. The drained lands consist of very good soils for the cultivation of corn.

c. Katwijk.—This small canton has some indifferent pasture land. At Valkenberg there is found very good arable land, which is well adapted for the production of potatoes. Most of the grounds are let in small parcels, which considerably enhances the selling prices and rents. On the south side there is found an excellent clay soil, very fit for common agriculture, and the growth of coarse garden vegetables, and it therefore has a high value.

d. Naaldwijk has, on the east side, mostly pasture land, which is rather of a good quality, and is only occupied by what are termed milk and cheese boors. In the south part there is very good arable ground, on which all kinds of corn are produced. On the west side it is mostly a sandy soil, on which rye, oats and potatoes are cultivated. For the rest, the canton is rich in good ground, adapted for gardens, which is particularly well worked, and where, with other fruits, the finest grapes are cultivated, which for the most part are sent to England. (There are years in which 80,000 Netherlands pounds have been exported.)

e. Vlaardingen has very good pastures, which are in every respect adapted for making butter and cheese; a part is very low and subject to inundation, which sometimes causes considerable mortality amongst the cattle. Some newly diked districts (polders) in this canton, with the adjoining island of Rozenburg, are very useful in the production of corn, yielding rapeseed, wheat, barley, rye, oats, &c.

f. Alphen.—This canton contains promiscuously very good and very bad pasture land. Some of it is particularly eligible for the firmness of the ground and its high situation. The butter and cheese are there excellent. On the drained lands corn is cultivated, the ground, however, is little adapted for it, being very spongy and muddy, and often too wet to receive the seed at the proper time.

g. Hillegersberg consists chiefly of drained lands, and is a pretty good soil for cultivation; a part of it, however, is bad and unfit for tillage, and some parts are overcharged with water. There is but little butter or cheese made here, but oats are raised to a considerable extent.

h. Vianen, bordering on Guelderland, has particularly good arable land, which produces wheat, rye, barley, hemp and flax, as also good pasture land. There are, however, numerous pieces of low swampy ground, covered with pernicious weeds. The defective outlets for the water in this canton, are in a great measure the cause of the slow improvement of the land. Here are many places for the breeding of horses.

i. Gorinchem, also bordering on Guelderland, contains various good clay soils, but low swampy ground is also frequently to be met with. Corn, potatoes and hemp are the chief productions of this district; butter and cheese are also made. This canton is much injured by water, notwithstanding its sluices are numerous and in good condition.

7. Large proprietors generally let their lands on lease to the peasantry; in a few instances, however, the proprietor goes halves with the tenant; in these cases he pays a fixed price for the seeds, the cultivation and manure, say 6*f.* or 7*f.* per morgen (equal to 2.104373 English acres), when one half of the crop falls to the proprietor and the other half to the tenant, who has, of course, no rent to pay for the grounds so cultivated. The average extent of these is, taking the pasture and the arable lands together, between 40 and 50 bunders, each bunder being 2.471143 English acres.

8. Large farms are from 70 to 90 and 100 bunders in extent.

The usual conditions under which the land is let are:

All straw, grass and hay, coming from the lands, to be given to the cattle on the premises.

The manure to be used on the lands, and no part of it to be sold or taken away.

No pasture land to be broken up for agricultural purposes without the consent of the proprietor.

Ditches and drains to be kept clean, and in due season to be deepened, and all the slime and sediment coming from them to be afterwards spread over the grounds.

Thistles and other weeds to be eradicated.

Not two successive crops of hay to be raised upon the same ground.

The cattle not to be kept at grass later than the 1st or 15th of November.

Before leaving the farm, the tenant shall keep his cattle in the stalls till the month of April, and leave the dung on the premises. He shall also sow a certain number of acres with early seeds, the half of the crop of which he shall enjoy after leaving the farm.

Some proprietors require that after a certain number of years the arable land shall lie fallow for one season.

The brushwood growing on the farm is also to be cut down for fuel at certain stated periods.

Proprietors who are lovers of the chase retain the range of their property for that purpose.

The term of lease is generally six years.

9. It is impossible to give a precise answer to this question; but what has already been stated in answer to the 3d Question, respecting the quality of land in the several cantons of the province, added to the following statement, may serve in some degree to answer it:

At the time of the registration of the land (Kadastratie), in order to ascertain the relative value of the land, a certain number of contracts of lease were collected, and by comparing the number of bunders contained in these leases with the amount of the therein stipulated rents, the approximate average rent was ascertained.

Perhaps that result may serve in some measure to elucidate the above question. The rents are taken from the years 1816 to 1826.

IN THE CANTONS.	Were produced.	Extending over.	Of which the Rent is.

TOTAL	15,986	73,686	2,258,514

10. The principal branch of cattle bred in South Holland consists in that of black cattle (rundvee), as well for the making of butter and cheese as for fattening. Besides these there are also horses and sheep, and pigs in some districts. Asses and goats are in a very limited number, and therefore not deserving notice.

The statement of the number of cattle, horses and sheep in the province of South Holland includes a series of years from 1816 to 1825, and is as follows:

YEARS.	CATTLE.	HORSES.	SHEEP.
1816	157,555	31,008	25,874
1817	137,761	30,058	18,518
1818	142,704	32,509	19,669
1819	152,300	33,474	20,088
1820	151,984	33,244	27,040
1821	152,878	33,984	28,539
1822	152,592	34,422	25,797
1823	153,883	34,273	30,448
1824	146,679	33,177	25,683
1825	148,673	32,295	23,543

11. Wheat is the grain principally cultivated in this province, being double the quantity of barley, which is next to it in frequency. Oats occupy about one-sixth of the extent of land which is employed in the raising of wheat. Rye, for which the humid and clayey nature of the soil was formerly looked upon as ill adapted, has been likewise considerably cultivated of late years, on account of the low price of wheat. Buckwheat is very rare in South Holland. Beans, clover, potatoes, rapeseed, flax and madder occupy much ground which might otherwise be made to yield grain.

12. The average quantity of grain produced upon one bunder of land is,

Wheat	42 ⅔ bushels.
Barley	72 —
Oats	80 —
Rye	37 ⅓ —

Wheat produces from 12 to 15 fold, ond other grains in proportion.

13. After the land has lain fallow (which is often the case here), rapeseed, winter barley or rye is sown, after which rapeseed, barley or wheat; and, farther, flax, beans, or oats, then summer grains, after which potatoes; farther, rye, oats, beans and clover: the following year the remainder of the clover, after which the land is again allowed to lie fallow.

14. Always in kind, except in the few instances when the proprietor goes halves with the tenant, as stated in No. 7.

15. The proprietor is subject to the following taxes: 1. The ground or property tax; 2. The dues upon dikes, drained lakes (polders), and water-mills. These taxes and dues are paid into the hands of the receiver, or the person appointed to act for the same.

16. The farmer is subject to the following taxes: 1. The personal tax; 2. Tax on servants.

17. There is no regular poor-tax in this country. In some villages a certain tax is levied for the poor, but the ground is not burdened with this, it being raised on each inhabitant as such, and not as a landlord or tenant. Besides this, the poor of each community is supported by the church to which they belong, and even, in some cases, out of the municipal funds. No tax is levied for religious purposes, unless the collecting of certain tithes, in as far as they are of ecclesiastical origin, may be reckoned as such, though these have been merged in the government taxes.

18. In South Holland there are eight or ten considerable towns, all of which have different regulations in this respect; but as the difference, especially in larger towns, cannot be great, perhaps the following tariff of articles of consumption, with the tolls they are subject to on entering Rotterdam, will give a tolerable idea of that of the other towns throughout this province.

Butchers' meat, pork, fresh, dried or salted, are subjected to the toll of 6 cents per Netherlands pound. 1,200 cents are equal to 1 *l.* sterling, and one Netherlands pound is equal to 2.031827 lb. Troy weight.

Peas (white)	6 0	– 10 –
Ditto (green)	7 90	– 13 2
Ditto (grey)	9 0	– 15 –
Potatoes per Netherlands lb.	2 5	– 3 5
Butter	0 77 3/4	– 1 3 6/10
Cheese from	0 17	– – 3 2/5
Cheese to	0 42	– – 8 2/5
Bread (white)	0 18	– – 3 3/5
Ditto (brown, unbolted)	0 13	– – 2 3/5
Ditto (rye)	0 8	– – 1 3/5
Beef	0 45	– – 9
Veal	0 65	– – 11
Mutton	0 45	– – 9
Pork (fresh)	0 50	– – 10
Ditto (smoked)	0 60	– 1 –

20. On an extent of 52 bunders are employed, on an average, regular farm servants, two; day labourers, two; maid servant, one. Of course it is understood that the family also assist, otherwise more servants are required.

21. The rate of wages per annum is,
For a regular farm servant, from 120*f.* to 150*f.*
For ditto, ditto on a dairy farm, from 80*f.* to 100*f.*
For a maid servant who thoroughly understands the making of butter and cheese, 100*f.*
For an ordinary maid servant, from 60*f.* to 70*f.*

The

The rate of day wages is,

In summer - - - - - -	18 to 20 stivers.
In winter - - - - - -	14 to 16 —

All paid in specie.

22. The various kinds of work are variously paid. Thus the wages

For threshing wheat and rye are	$6\frac{1}{2}$ stivers per mud.
For mowing grass - - -	$3f.$ per morgen.
For cutting grain - - -	$7\frac{1}{2}f.$ per ditto.
For binding ditto - - -	$1\frac{1}{10}f.$ per 100 sheaves.
General work - - -	28 stivers per diem.

23. The regular servants board and lodge with the farmer, and are provided with everything except clothing.

24. Regular servants, being looked upon as members of the household, eat of the same food and at the same table as the family. Most farmers bake their own bread, which is composed of wheat or rye, and sometimes a mixture of both. Potatoes are a chief article of food, together with cabbage, turnips, salads and French beans, which they cultivate in their own gardens; add to these, bacon, beef (fresh and salted), and frequently pancakes, prepared of buckwheat flour and bacon. The quantity of food is *ad libitum* to each individual.

25. The occupations of the women are the manufacture of butter and cheese, and all that pertains to the dairy department; weeding in the fields, the making of hay, and binding sheaves in harvest. The severer labour required in the making of cummin-seed cheese is generally performed by men; milking is likewise often left to the latter.

26. (No answer.)

27. The number of men embodied for the service of the national militia varies annually.

A bill is brought before the States General every year by the government, for the regulation of the levy for the ensuing year; but the maximum that can be levied for the militia was fixed by law in the year 1818, at one man in 300 souls.

The age at which young men become subject to the militia is 19 years, and the period of service is five years.

Every citizen, from his 25th to 35th year, is liable to serve in the schuttery (or National Guard), who also, in the time of war, take the field with the regular troops. The ratio for the ballot in every parish is fixed by law at two men in 100 souls.

The price of substitutes for the national militia before the Belgian revolution, and therefore in the time of peace, usually amounted to $300f.$ or $400f.$; but since 1830, from $1{,}200f.$ to $2{,}000f.$ have been paid by those few who have procured substitutes, either for the militia or schuttery, for the whole period of service.

28. Turf and coals are chiefly used for fuel in these parts; wood is less frequent. Turf, which is the most general article of fuel, more particularly in the country and the interior towns, and amongst the lower classes, is dug out of the low marshy grounds in Holland; it is further derived from Friesland, and the high heaths in Overyssel and Drenthe. The prices vary from 40 to 100 cents per ton (containing about 100 turfs), according to the quality, which is various.

Coals were chiefly supplied by Belgium before 1830, but are now furnished by England and the Prussian Rhine provinces. In most cases the preference is given to the English and Scotch coals.

Firewood is in part drawn from the surrounding country, especially the smaller kind, in faggots, and in part from the more woody provinces of Overyssel, Friesland, Guelderland, Utrecht, and North Brabant. A kind of brush or underwood is much in use; this is young oak-wood, which, at a certain height, is cut down in spring, and the trunks left to shoot forth again: it is then peeled, and its bark employed for the usual purposes of tanning.

29. Though in some of the provinces the ancient simpler dress still obtains among the peasantry, yet in South Holland the clothing of the labouring classes is very similar to that of the same classes in England. Fustians, velveteens, stout woollen cloths for the men; and cottons and linsey-woolsey stuffs for the women; all articles of dress are nearly the same in both countries, except in the single article of sabots, or wooden shoes, which are generally used in country places. Of late years these articles, though mostly of English manufacture, have been reduced to prices much upon a par with the prices in England.

30. In South Holland there are the following manufactories, and

1. Malt and corn-mills, 211 in number; viz.

18. Potatoe syrup manufacturers, 5 in number, in the parishes of Schiedam, Oudewater, Schoonhoven, Brielle.

19. Barley and rice peeling-mills, 9 in number, in the parishes of Rotterdam, Vlaardingen, Delft, Overschie, Hillegersberg, Steenvliet, Gouda.

20. Tan-yards, for tanning sails, &c., 4 in number, in Maassluis, Vlaardingen, Middelharnis.

21. Lacmus manufactories, 5 in number, in Kralingen, Dordrecht.

22. Hat manufactories, 2 in number, in 'S Gravenhage, Dordrecht.

23. Lead foundries, 4 in number, in Rotterdam, Maassluis, Dordrecht, and Perrius.

24. Candle manufactories, 25 in number, in Rotterdam, 'S Gravenhage, Leyden, Delft, Dordrecht, Gouda.

25. Sugar houses, 16 in number, in Dordrecht, Rotterdam, Alphen.

26. Soap manufactories, 15 in number, in Leyden, Gouda, Rotterdam, Delft, Dordrecht, Gorinchem.

27. Chocolate manufactories, 3 in number, in Rotterdam, 'S Gravenhage, Dordrecht.

28. Snuff mills, 13 in number, in Rotterdam, Kraalingen, Ryswijk, Brock, Hillegersberg, Dubbeldam.

29. Tarrass or cement mills, 9 in number, in 'S Gravenhage, Rotterdam, Ryswijk, Leyden, Aarlanderveen.

30. Cotton spinneries, 3 in number, in Leyden, Kraalingen, Dordrecht.

31. Crushing mills, two in number, in Rotterdam, Streijen.

32. Smoked salmon manufactories, 2 in number, in Hardinxveld.

33. Varnish manufactories, 3 in number, in Rotterdam, Oudshorn, Alphen.

34. Dye manufactories, 12 in number, in Alphen, Kraalingen, Rotterdam.

35. Clay mills, 10 in number, in Gouda.

36. Fulling mills, 9 in number, in Leyden, Leyderdorp, Soeterwoude, Gouda.

37. Oak-bark mills, 5 in number, in Rotterdam, Maasland, Delft, Gouda.

38. Chamois leather manufactories, 6 in number, in Rotterdam, Leyden, Delft, Gouda.

39. Finneer mills, 4 in number, in 'S Gravenhage, Rotterdam.

40. Button manufactory, 1 in number, in 'S Gravenhage.

41. Sheet copper manufactory, 1 in number, in 'S Gravenhage.

42. Cannon foundery, 1 in number, in 'S Gravenhage.

43 Litharge manufactories, 2 in number, in Kraalingen.

44. Manufactories for ruling books, 5 in number, in 'S Gravenhage, Leyden.

45. Glue manufactories, 5 in number, in 'S Gravenhage, Rotterdam, Leyderdorp, and Aegst-Geest.

46. Marble saw mills, 2 in number, in 'S Gravenhage, Rotterdam.

47. Paper-hanging manufactory, 1 in number, in 'S Gravenhage.

48. Coach, &c., manufactories, 30 in number, in 'S Gravenhage, Delft, Rotterdam.

49. Brass foundery, 1 in number, in 'S Gravenhage.

50. Herring smoking places, 19 in number, in Katwijk.

51. Bay salt manufactories, 1 in number, in Katwijk.

52. Blanket, baize, and duffel manufactory, 7 in number, in Leyden.

53. Parchment manufactories, 1 in number, in Leyden.

54. Calendars, 10 in number, in Leyden, Rotterdam.

55. Wool-spinners, 10 in number, in the parish of Leyden.

56. Cloth manufactories, 4 in number, in Leyden, Delft.

57. Train-oil manufactories, 5 in number, in Maasland, Vlaardingen, Leyderdorp, and Delftshaven.

58. Flattening mills, 1 in number, in Soeterwoude.

59. Thread manufactories, 38 in number, in Oudewater.

60. Purifying clay-mills, 3 in number, in Rotterdam, Delft, Vryenban.

61. Places for burling cloth, 7 in number, in Rotterdam, Delft.

62. Glazed tile manufactories, 8 in number, in Delft, Vryenban.

63. Places for washing hair, 2 in number, in Rotterdam, Hillegersberg.

64. Places for wool-combing, 2 in number, in Rotterdam, Moordrecht.

65. Black-lead mills, 1 in number, in Rotterdam.

66. Gas manufactory, 1 in number, in Rotterdam.

67. Shot founderies, 2 in number, in Rotterdam, Kraalingen.

31. The number of paupers in the rural districts is trifling compared to that in towns; some account has already been given in No. 7 of the provision made for them.

32. For a century back, the occupiers of farms have generally enjoyed the greatest prosperity; lately, however, from the low price of grain and a variety of other causes, their situation has become rather precarious; so much so, indeed, as to become a subject of consideration to the legislature. Their station in society is considered lower than that of the same class of people is considered in England.

British Consulate, Rotterdam, 10th April 1835. *Alex. Ferrier.*

— No. 17. —

Mr. Consul *Melvil* to *John Bidwell*, Esq.

Sir, Amsterdam, 3d Feb. 1834.

I HAVE the honour, in reply to your circular of the 26th Nov. last, to transmit to you hereinclosed, the information I have had it in my power to collect, in reply to the different Queries relating to the state of Agriculture and Population in the district of this consulate, sent me in that despatch.

I have, &c.
(signed) *Robert Melvil.*

Enclosure in No. 17.

Consulate of Amsterdam.—ANSWERS to QUERIES.

Answer 1. Province of North Holland.

2. The population, in the year 1830, consisted of

		Total.
Males	194,164	413,988
Females	219,824	
Whereof in towns, Males	125,282	275,941
Females	150,659	
Rural population, Males	68,882	138,047
Females	69,165	
Of which, Protestants	274,211	413,988
Roman-catholics	114,705	
Jews	24,117	
Other denominations	955	

POPULATION of the *North Netherlands* Provinces on the 1st January 1833.

	Population in 1832.	Births in 1832.	Deaths in 1832.	Marriages in 1832.
North Holland	419,424	13,644	13,707	2,660
South Holland	486,520	17,080	17,383	2,972
Vriesland	212,244	6,660	4,252	1,343
Guelderland	315,053	9,043	7,289	1,736
Zeeland	137,314	5,105	4,795	844
Utrecht	131,856	4,367	4,175	769
Overyssell	181,361	5,206	5,060	1,064
Groningen	162,085	4,866	3,564	998
Drente	65,397	1,866	1,373	379
North Brabant	349,700	10,261	9,668	2,144
TOTAL	2,460,954	78,098	71,266	14,909

3. The quantity of land is 242,438 Netherland bunders, (being the same with the French hectare), nearly equal to about 606,000 English acres; but the exact proportion of the different sorts of land I have not been able to ascertain. By far the greatest proportion is cultivated.

HOLLAND AND BELGIUM. No. 17.

(Enclosure.) Answers to Queries.

4. This proportion I have no means of ascertaining; it is very small, and chiefly confined to the sandy downs, which are rendered more or less productive by removing the sand.

5. The land in this province is principally pasture, there being only some few districts in which corn is partially cultivated, and some which are planted with coppice wood, generally oak, ash and alder, principally used for fuel, bean stakes or poles, and other similar purposes. The land is intersected by a number of canals and ditches, and includes besides, large lakes, some of which are drained, and afford excellent pasturage, being kept dry by mills at the expense of the proprietors of the soil; which is indeed the case with the greater part of the land in this province.

6. The soil is of a dark loam, and being very low, and generally below the level of the adjacent canals, is moist and damp, excepting along the coast, which is skirted by sandy downs, which are unproductive, except in some parts, from which the sand has been partially removed, so as to admit in some measure of the planting of coppice wood and the cultivation of potatoes.

7. The 242,438 bunders, or about 606,000 acres land, are possessed by 51,230 proprietors, but the quantity belonging to each I have no means of ascertaining. The average proportion, according to this rate, is about $4\frac{7}{10}$ bunders, or $11\frac{3}{4}$ acres to each proprietor.

8. The extent of the farms depends upon the quality of the land. On an average, 20 bunders or about 50 acres, compose a farm, on which 16 to 18 cows, 4 calves, 1 horse, 10 to 15 sheep, and a few pigs can be fed, if the quality of the soil is good; but more land is necessary when it is inferior, as the above number of cattle is required to enable the farmer to carry on the business with the prospect of success. The occupier is required to keep the land in good order, and to employ the manure of the farm on the spot for that purpose. The repairs of the farmhouse, &c., and the care of the ditches, drains and gates, belong commonly to the proprietor.

9. The rent depends upon the quality of the soil. The best pasture land is worth per annum, 50*f.* or 4*l.* 3*s.* 4*d.*, and the most inferior 18*f.* or 1*l.* 10*s.* the bunder, equal nearly to $2\frac{1}{2}$ English acres. Arable land rents on the best soils at 45*f.* to 50*f.* (3*l.* 15*s.* to 4*l.* 3*s.* 4*d.*) and on the inferior at 35*f.* to 36*f.* (2*l.* 18*s.* 4*d.* to 3*l.*) the bunder or $2\frac{1}{2}$ acres. Garden grounds or fields in particular situations near towns are exceptions, and frequently rent higher.

10. The stock fed on the pastures consist principally of horned cattle, horses and sheep. In the year 1825 the proportions were: 116,553 head of cattle; 15,753 horses; 105,386 sheep.

The farmers seldom keep above 20 sheep; no flocks of them are to be met with in this province. The island of Texel contains proportionably the greatest number.

11. The arable lands are never left fallow; rape and mustard seed, barley, oats, peas, horse and pigeon beans are cultivated on them, without any particular proportion of either sort being adhered to.

12. In a common harvest, on good soil, a bunder or $2\frac{1}{2}$ acres generally produces, of

Wheat	35 muds	or about	96 bushels.
Barley } Oats }	56 —	—	153 —
Rye	42 —	—	115 —
Rapeseed	35 —	—	96 —
Mustard seed	21 —	—	57 —
Beans and Peas	28 —	—	76 —

13. They are generally sown in the rotation mentioned in answer to query 11, although no fixed rule is observed. Mustard seed is not unfrequently sown year after year on the same land, and is sometimes succeeded by rapeseed or beans.

14. The rent is always paid in ready money, and in no other way.

15. The proprietor of the soil is subject to the ground rent or land tax, which is paid in money, by monthly instalments, and where mills are required for draining, to his proportion of the expense occasioned by them.

16. The farmer or occupier of the property is liable for the assessed taxes, also levied by monthly instalments, the excise payable to government on all articles of consumption subject to it, and used by him, and to his proportion of such municipal expenses as he is rated at by the magistrates of the parish to which he belongs.

17. None of the taxes, levied either on the proprietor or occupier, are paid for the relief of the poor, or directly for religious purposes. The last are provided for by government, out of the general revenue of the country.

18. The tolls on articles of consumption on entering towns, known by the appellation of octroi, are various in different places, according as funds are required for their maintenance, or for the payment of interest on the debts with which they are burthened. The octroi at Amsterdam is, on that account, heavy, and the principal articles pay as follows:

Brandy 4*f.* or 6/8	the vat,	equal to 22 gallons.
Geneva 8 - 13/4	- - -	ditto.
Wine 9 - 15/	- - -	ditto.

By

227

		Neth. lbs		a Head.		Eng. lbs.		a Head.
By a gradual scale.	Cattle of	300 to 1,000	-	9*f.* to 28*f.*	- -	600 to 2,000	-	15/ to 46/8
	Calves	50 to 350	-	1½ to 10⅔	- -	100 to 700	-	2 6 to 17/
	Sheep,	- under 50	-	50 *c.*	- - - -	under 100	- - - -	/10
	—	- above 50	-	1*f.*	- - - - -	above 100	- - - -	1/8
	Hogs,	from 50 to 200	-	1*f.* to 5½*f.*		from 100 to 400	-	1/8 to 9/2

One Neth. lb. of meat of all sorts, 6 *c.* or 1⅓ *d.* for 2 lbs. Eng.

One ton turf or peat, 15 *c.* or 3 *d.*

1,000 Neth. lbs. coals, 5*f.*, 2,000 lbs. Eng., 8/4

Fish from 1 *c.* to 25 *c.* a-piece, according to sort and size, equal to from ½ *d.* to 5 *d.*

All sorts of brick, tile, or stone for building, from 50 *c.* to 8 *f.* per 1,000; or 10 *d.* to 1¾ *d.* per 1,000.

Butter, 7 *c.* the Neth. lb. or 2⅔ *d.* for 2 lbs. English; besides a stamp duty of 10 per cent. on the amount.

19. The general price of beef in the country (where there is no toll or octroi), is 30 *c.* or 6 *d.* Pork, 40 *c.* or 8 *d.*; and bread 10 *c.* or 2 *d.* the Neth. lb. equal to 2 lbs. English.

20. A farm on which 20 cows are milked, requires one labourer and a maid, independent of the farmer and his wife.

21, 22, 23. Their wages are 80*f.* to 100*f.* or 6⅔ *l.* to 8⅓ *l.* sterling by the year, receiving no higher wages during the harvest, payable in money; and they board and lodge with the farmer, excepting the day-labourers, who earn one guilder or 20 pence for a full day's labour, which is of course less in autumn and winter. By working later in harvest time they obtain a slight augmentation, or are boarded by the farmer in lieu of it.

24. They take their meals at the table of the farmer, whose food consists of potatoes and other vegetables, dried beans and peas, barley, &c., and in a great measure on milk and butter-milk, thickened with buckwheat meal. They also get daily a sufficiency of animal food with substantial farmers, but no fixed quantity is allotted to them, it depending upon the manner in which the farmer himself lives. They frequently also get meat or pork for supper in winter.

25. The women are principally employed in the dairies, and in milking the cows, and seldom perform out-of-door work, excepting during haymaking.

26. Every male inhabitant attaining the age of 18 years, is liable to the military enrolment, and is obliged to serve in person or by substitute, if called upon, unless found to be unfit, or coming within the exemptions of the law; but only such a proportion of the able-bodied are yearly called out as is required by government.

27. The price of a substitute varies according to the political situation of the country, and the state of the population in regard to employment; the price in ordinary times is about 600*f.* (50 *l.*)

28. The fuel principally used is turf or peat (of which there are different qualities), and wood. In towns coals are made use of in parlours, but never for culinary purposes. The turf is dug out of the boggy parts of the country (chiefly in the province of Vriesland), or taken from the surface: the price is generally from 40 *c.* to 85 *c.* or from 8 *d.* to 17 *d.* the ton or barrel full, of the capacity of two Netherland muds, equal to about 5½ bushels imperial measure, including the excise duty. The wood used by the farmer is coppice, which is generally sold by public sale standing, and is cut down by or at the expense of the purchaser.

29. The clothing of a labourer, to enable him to appear respectably dressed, it is calculated will cost him about 60*f.* or 5 *l.* a year; but there are many, especially day-labourers, who spend much less upon it.

30. There are a few manufactories of twist, tape, thread and linen in this province, but they are of such little consideration, as hardly to be worth mentioning; one, however, has lately been erected at Haarlem, on an extended scale, for the purpose of weaving, bleaching, and getting up calicos for the Java market; but there are a considerable number of oil, paper and saw mills.

31. Paupers are pretty numerous; but are chiefly to be met with in towns. The poor are supported by voluntary contributions, administered to those belonging to any particular religious community, by the deacons or office-bearers of such society, and are relieved generally by persons appointed by the magistrates from a fund for which periodical charitable contributions are solicited, and after investigating into their situation; this relief, however, is so scanty, that it can only be considered as an aid to private charities, or to the exertions the paupers may be able to make themselves towards their own support. When found begging, however, they are liable to be forcibly confined in work-houses, or sent up to the agricultural colonies.

32. The general condition of the occupiers of farms is not prosperous.

HOLLAND AND BELGIUM. No. 17.

(Enclosure.) Answers to Queries.

Province of Vriesland.

Answer 1. District Grekerk, a small parish in the province of Vriesland.

2. One thousand four hundred souls.

The population of the whole province of Vriesland, in the years 1830, was :—

		Total.
Males	100,951	204,909
Females	103,958	
Rural population, Males	75,867	151,526
Females	75,659	
In towns, Males	25,084	53,383
Females	28,299	
Of which, Protestants	184,787	204,909
Roman-catholics	18,543	
Jews	1,555	
Other denominations	24	

(*See* Table p. 129.)

3. The land in this district consists of

Arable land	250 bunders, equal to	625	acres.
Pasture land	2,050 — —	5,125	—
Wood land	30 — —	75	—

The province Vriesland contains 268,503 bunders, equal to 671,000 acres, of various descriptions of land, divided amongst 35,698 proprietors, being 7 ½ bunders, or 18 ¾ acres to each proprietor.

4. None.

5. *See* Answer to Query, No. 3.

6. The variety in this district is

1st sort, clay land, or soil	100 bunders, or	250	acres.
2d ditto, ditto, good pasture	500 — —	1,250	—
3d ditto, ditto, inferior ditto	700 — —	1,750	—
Sandy soil	700 — —	1,750	—
Wood land (coppice)	30 — —	75	—
Marshy, and unfit for cultivation	300 — —	750	—

7. Not ascertained ; but by far the least proportion is cultivated by proprietors.

8. The common size of a farm is from 30 to 40 bunders, (75 to 100 acres.) The occupier must keep the land in good order, and must pay the village, district, and all other dues, excepting the land tax.

In other parts of Vriesland there are farms of 60 to 70 bunders (150 to 175 acres). They are generally let for five or seven years.

9. The best sort of land in this district rents at 12 *f.*, or 20 *s.* sterling; the 2d quality at 7 *f.*, or 11 *s.* 8 *d.*; the 3d quality at 5 *f.*, or 8 *s.* 4 *d.*; the 4th at 3 *f.*, or 5 *s.*; and the 5th at 2 *f.*, or 3 *s.* 4 *d.* the bunder of 2 ½ acres; and the marshy parts overgrown with reeds, and the unimprovable land at 1 *f.*, or 50 cents, 20 *d.* and 10 *d.* per ditto.

In other parts of Vriesland, the best clay pasture is worth from 36 *f.* to 50 *f.*, or 3 *l.* to 4 *l.* 3 *s.* per bunder, or 2 ½ acres arable, 28 *f.*, or 40 *s.*, or 2 *l.* 6 *s.* to 3 *l.* 6 *s.* per ditto ; the inferior of both sorts, 14 *f.* to 25 *f.*, or 1 *l.* 3 *s.* to 2 *l.* 1 *s.* per ditto.

In the sandy soils, the best pasturage lets from 18 *f.* to 30 *f.* (1 *l.* 10 *s.* to 2 *l.* 10 *s.*), and best arable from 10 *f.* to 18 *f.* (16 *s.* 8 *d.* to 30 *s.*) per 2 ½ acres.

10. Chiefly milch cows of 3, 4, 5, 6 and 7 years, which, to become fat cattle, must augment in weight 200, 250 to 300 Netherland lbs., or 400, 500 to 600 English lbs. One-fourth of the number is often reared from calves.

In the year 1825 the whole province of Vriesland contained, of horned cattle, 157,928 head ; horses, 23,631 head ; sheep, 88,312 head.

The profit derived from a milch cow, on a clay soil, is estimated to be from 30 *f.* to 50 *f.* or from 50 *s.* to 4 *l.* 3 *s.* 4 *d.* a year ; and on one fattened for slaughtering, 25 *f.* to 40 *f.* (41 *s.* 8 *d.* to 66 *s.* 8 *d.*); on sandy soils they yield on an average 15 *f.* to 30 *f.*, or 25 *s.* to 50 *s.* profit, and a sheep 12 *f.* to 18 *f.*, (20 *s.* to 30 *s*), but the last are only reared on clay soils.

11. According to the description of the soil, on the best sorts, winter corn, say, wheat, barley, rye, rapeseed; on the inferior sorts, summer grain, such as buckwheat and oats.

12. According to the quality of the soil,

Wheat generally yields	20 muds, or	55 bushels.
Barley	34 —	93 —
Rye	15 —	41 —
Rapeseed	20 —	55 —

Oats, 40 to 50 muds, or 109 to 139 bushels, if it succeeds well.

Buckwheat, 16 muds, or 44 bushels the bunder, or 2 ½ acres.

13. On

13. On fallow land, rapeseed; and the next year, wheat or barley; on wheat lands, barley or beans, flax or potatoes; on rye lands, buckwheat and oats.

14. Altogether in money.

15. The proprietor pays the land-tax, which is rated according to the value of the land, and is payable in monthly instalments.

In some parts of Vriesland he contributes his quota to dues for maintenance of dikes or dams, according to the degree of protection afforded his lands from them.

16. The assessed taxes, village, district, and all other dues; exception, those mentioned in answer to query 15.

17. None of the taxes levied on the proprietor or occupier go directly to the support of religious establishments or the poor, both these being provided for indirectly in another way.

18. The tolls (octroi) on articles of consumption, are confined to towns, to answer their particular expenses.

In the town of Haarlingen, wheat pays on entry 2*f.* 50 *c.*, or 4 *s.* 2 *d.*, and rye, 75 *c.*, or 1 *s.* 3 *d.* the 100 Netherlands lbs., or 200 English lbs.; other towns have different tolls, more or less heavy, according to their exigencies.

19. Beef, 25 cents or 5 *d.* the Netherlands lbs., equal to 2 lbs. English; potatoes, which are a staple article of food, the present price is 1 guilder, or 20 *d.* the ton, containing about 70 Netherlands lbs., or 140 lbs. English.

20. A farm of 40 bunders, or 100 acres, requires six persons, four men and two women; during harvest three or four extra hands must be employed.

21. The men receive in wages, according to their class, 100*f.*, 50*f.*, 30*f.*, (8 *l.* 6 *s.* 8 *d.*, 4 *l.* 3 *s.* 4 *d.* and 2 *l.* 10 *s.*) a-year; the women one-half, or thereabouts.

Where the soil is sandy the wages are lowest; day-labourers can earn in harvest time 4*f.* or 5*f.* (6 *s.* 8 *d.* to 8 *s.* 4 *d.*) a week, and in winter, 2*f.* to 3*f.* (3 *s.* 4 *d.* to 5 *s.*), with food, or 1 *f.*, or 20 *d.* more, providing for themselves.

22. They do not.

23. The labourers by the year board and lodge with the farmer, but day-labourers do not in general, though, as stated in No. 21, they sometimes obtain food.

24. All common description of vegetables and potatoes. The farmer usually slaughters an ox or cow, and one or two hogs every year, of which the whole family, including servants, partake.

25. Only during the harvest and haymaking.

26. Generally one out of 300.

27. From 400*f.* to 1,000*f.*, (41 *l.* 13 *s.* 4 *d.* to 83 *l.* 6 *s.* 8 *d.*), according to circumstances.

28. Turf and wood; the former costs from 25, 35, 40, 45 to 50 cents the ton, containing about 5½ bushels; say, 5 *d.*, 7 *d.*, 8 *d.*, 9 *d.*, 10 *d.* for that quantity.

It is extracted from the boggy parts of Vriesland, or taken from the surface, which last is inferior and cheapest.

29. Undefined, but may be estimated at a yearly expense of 20*f.*, or 1 *l.* 13 *s.* 4 *d.*

30. There are none in this parish.

In the province of Vriesland there are various manufactories, such as for making bricks, tiles, pottery, oil and saw mills, rope walks, distilleries, but none of much note.

31. The different religious denominations support their own poor; other paupers are relieved by the magistrates of the district, and are placed in houses where they are put to spin and work, according as their health and age admits of; professed beggars are sent up to the agricultural colonies.

32. The occupiers of farms have been in a declining state since the year 1825.

Amsterdam, 3 Feb. 1834. *Robert Melvil*, Consul.

HOLLAND AND BELGIUM. No. 18.

Mr. Consul Larpent to Viscount Palmerston.

— No. 18. —

Mr. Consul *Larpent* to Viscount *Palmerston.*

My Lord, Antwerp, 30 April 1834.

I HAVE the honour to transmit to your Lordship Answers to Queries, Nos. 1 to 32, relating to the state of Agriculture, inclosed in the circular of the 26th November 1833.

These Answers relate to the state of Agriculture in eight communes.

I have been promised some more Answers founded upon other communes, and shall send any additional information which I may be able to procure.

I have, &c.

(signed) *De Hochepied Larpent.*

Enclosure in No. 18.

ANSWERS to QUERIES relating to the State of Agriculture in *Belgium.*

(Enclosure 1.) Answers to Queries.

Answer 1. IN the district south of Malines (extra muros), there are eight communes, viz: Willebroeck, Heffen, Heyndonck, Ruysbroeck, Hombeéck, Blaesveldt, Thisselt and Leest.

	Inhabitants.
2. In the communes of Willebroeck - - - - -	3,030
Ditto - - Heffen - - - - - -	920
Ditto - - Heyndonck - - - - -	489
Ditto - - Ruysbroeck - - - - -	1,624
Ditto - - Hombeéck - - - - -	1,712
Ditto - - Blaesveld - - - - -	938
Ditto - - Thisselt - - - - -	1,615
Ditto - - Leest - - - - - -	1,291
	11,619

9,249 are employed in agriculture.

2,370 are occupied, according to their patents, in different trades.

The population of the town of Malines amounts to 23,547, of whom 432 are occupied in cultivating gardens.

3. In the Commune of *Willebroeck*:

	Hectares.
Arable land - - - - -	640
Pasture - - - - - -	172
Wood - - - - - -	14

Heffen.

Arable - - - - -	526
Pasture - - - - -	260
Wood - - - - -	8

Heyndonck.

Arable - - - - -	220
Pasture - - - - -	240
Wood - - - - -	6

Ruysbroeck.

Arable - - - - -	430
Pasture - - - - -	340
Wood - - - - -	16

Hombeéck.

	Hectares.
Arable - - - - -	510
Pasture - - - - -	230
Wood (copse) - - - -	80

Blaesveld.

Arable - - - - -	470
Pasture - - - - -	130
Wood - - - - -	35

Thisselt.

Arable - - - - -	796
Pasture - - - - -	8
Wood (copse) - - - -	0 ½

Leest.

Arable - - - - -	603
Pasture - - - - -	176
Wood - - - - -	15

The total of the communes amounts to 5,925 hectares.

N.B.—The hectare here alluded to is the same as the French hectare, which is about 2 ½ acres, English measure; but as I cannot procure any tariff of the exact equivalent, the board to which this is sent will easily supply the number of acres.

4. In the communes of this district all the land is cultivated. There cannot properly be said to be any uncultivated land.

5. The proportion of land in prairie, or meadows, but which is only in part used as pasture land, in this district, amounts to a quarter.

The arable land in this district amounts to 4,369 hectares.

6. In

6. In this district, the quality of the soil is best; in the communes of Hombeéck, Heffen, Leest and Ruysbroeck; that is, there is more land of the first class than in Willebroeck, Thisselt, Blaesveld and Heyndonck; but in the communes of Willebroeck, Ruysbroeck, Heffen, Leest and Heyndonck there are some excellent prairies.

As to variety of soil, it is commonly divided into four classes, as well for arable as for pasture land.

7. In this district, comprising the above-mentioned eight communes, the quantity of land cultivated by proprietors, arable, pasture and wood, amounts to 1,481 hectares, or acres.

As to the quantity cultivated by each proprietor, it varies much.

Some proprietors cultivate only half an hectare, others, 1, 2, 3, 4, 5, 6, 8 or 10; others from 15 to 20, or from 20 to 30 hectares.

8. The largest farms in these communes which are let, are from 40 to 50 hectares; others 20 to 30; from 10 to 12; from 5 to 10 *s*. Some labourers hire land, which they cultivate themselves, of no greater extent than half an hectare, one hectare, or two.

The conditions of the lease, for three, or six, or seven years, are to well cultivate the land, and to manure it properly; to pay all the contributions, and to pay the rent at the feasts of St. André, Christmas or Candlemas, to the proprietor or his receiver.

9. The average rate of rent of land amounts annually, in these communes, to 90 francs per hectare or more, or 3 *l*. 10 *s*. 10 $\frac{1}{2}$ *d*. sterling. For the farm the average rate amounts to 80 francs, or 3 *l*. 3 *s*. sterling per annum per hectare, comprising the farm-house and other buildings for the use of the farmer, which are greater or smaller according to the extent of the farm.

The land of different qualities is let in these communes at 80 francs (3 *l*. 3 *s*.) per hectare, like the farms.

10. In the environs of the town of Malines, in the valley of the Dyle, a district not comprised in the above-named cantons, the quantity of cattle does not exceed 800 fed on these pastures, with a proportion of cows one-fifth.

It is to be observed, that in the district comprising these eight communes, the pasture land is very seldom made use of to feed the cattle on the land, but the grass is cut either to make hay, or from time to time to give green food to the cattle, who are usually kept in the cow-houses, or metairies.

11. Half the quantity of land in a farm is cultivated in grain; viz., barley, wheat, rye and rapeseed; one-sixth in flax, another sixth in oats and buckwheat, the rest in clover and potatoes.

12. The wheat produces annually upon an average, 20 hectolitres per acre, or quarters per acre. Rye, 21 hectolitres; barley, 36 ditto; oats, 42 ditto; buckwheat and rapeseed, 21 ditto.

N. B.—2 $\frac{92{\cdot}5}{100}$ hectolitres make one quarter, imperial measure.

13. The flax, oats and clover, are sown at an interval of six years to six years; rapeseed, from two to three years; and all other grain may be sown alternately each successive year.

14. The rents of farms are paid in the above district generally in money, never in labour nor in produce. Some farmers are, however, obliged, where there is a gentleman's residence in or near the estate belonging to the proprietor, to afford at stated periods a few days' work.

15. The proprietor is subject, 1st, to the land-tax of all the land he cultivates himself or owns; 2dly, to the personal contribution on furniture, &c.; 3dly, the octroi municipal, and if beyond the age, he must contribute for the garde civique, in money.

16. The farmer, by the terms of this lease, is universally obliged to pay, 1st, the land-tax; 2dly, the contribution personal for his furniture, &c.; 3dly, the municipal octroi, &c., and pay his rate to all the commune charges.

17. Each *bureau de bienfaisance* has a fixed revenue arising from certain foundations; if this revenue be not sufficient for the maintenance of the poor, the commune must supply the deficiency from the caisse municipale.

The "disservants," as they are styled, or assistants to the curé or vicar, enjoy an annual stipend from the government; they receive likewise some addition from the commune.

The vicars have a gratuity of 211 *f*. 64 *c*. from the government, and the communes give them likewise a certain sum.

18. All articles of consumption for food, as well as fuel, are subject to an octroi, which is settled by the regence of the towns. There exists some difference between the tarif established in the different towns by reason of their situation; inhabitants, number of poor, &c.

19. Beef of the heifer, and veal, sells ordinarily at 1 *f*. the kilogram, or at 5 *d*. per lb.; mutton, 1 $\frac{1}{2}$ *f*. ditto, or 7 $\frac{1}{4}$ *d*. ditto; butter, 1 *f*. 80 *c*., or 9 $\frac{3}{4}$ *d*. ditto. Potatoes and all other vegetables are sold at the common market price, which may be reckoned for the farmer.

HOLLAND AND BELGIUM. No. 18.

Enclosure.) Anwsers to Queries.

20. In a farm of six horses there is commonly eight domestic labourers, including female servants.

In a farm of four horses, five domestic labourers, including the females.

In a farm where two horses are kept, three labourers; and in a farm where one horse is kept, there is two domestics, either male or female.

Six or seven hectares require one horse, and so in proportion.

21. The wages of labourers are at 150*f.*, or 5 *l.* 18 *s.* 11 *d.* sterling, yearly; domestics, *i. e.* those who are lodged and boarded in the house, 100*f.*, or 3 *l.* 18 *s.* 9 *d.*; and females at 60 *f.*, or 2 *l.* 7 *s.* 3 *d.* annually; they are all paid in money, and besides this, they generally have 11 yards each of linen, either bleached or not bleached, from the flax spun during the winter months.

22. The domestics, or those hired by the year, do not receive more, but the daily labourers receive more during the harvest.

23. The domestics and labourers who are engaged by the year, are all in this district lodged and boarded by the farmer.

24. They sleep upon a paillasse or bed of straw, and the common food consists of milk, potatoes, carrots and turnips. In the large farms a bull is ordinarily killed once a year, a cow and an heifer, with three or four pigs, and in the smaller farms a proportional number; of these the servants and domestics are allowed to partake.

25. The women work in the farms, to weed, to cut the clover, pick the turnips, carrots and potatoes. They likewise are employed upon the flax, to keep it clean, &c. in the ground, and to spin it in the winter. They are occupied in domestic affairs, cooking, feeding the cows, &c., and in taking care of their families.

26. The youths of 19 years old are annually called upon for the militia, upon an average of three per 1,000, and for a period of five years; at the expiration of this term they enter into the civic guard, divided into three bans, viz.: 1st ban, from 25 years to 30; 2d ditto, 30 years to 40; 3d ditto, 40 years to 50.

27. The price of a substitute for the army is commonly from 700*f.* to 800*f.*, or 27 *l.* to 31 *l.* 10 *s.*; and a substitute for one obliged to serve in the civic guard is about the same price.

28. Coals, wood and turf. Coals come from the neighbourhood of Charleroi. When there is no wood in the farm, it is brought from the Campine or extensive bruyères north of Antwerp, or from the wood of Soignies near Brussels. Turf is found in these communes.

Coals sell at 2*f.* per 100 kilograms, or 15 *s.* 9 *d.* sterling per ton; the wood at 7*f.* per sterre, or 5 *s.* 6 ½ *d.* per cubic mêtre. The cart load of one horse of turf, sells at 8*f.*, or 6 *s.* 3 ¾ *d.* sterling.

29. The common price of cloth for men's clothes is at about 10*f.* the ell, or 10 *s.* 3 *d.* per yard; that for women at 1 ½*f.* per ell, or 1 *s.* 6 ½ *d.* sterling per yard.

30. In these communes (extra muros) of the district of Malines, there are no manufacures, but there are some weavers of which the greatest part are without workmen.

31. The poor are rather numerous; they are fed and assisted by the bureau de bienfaisance, and by the alms and donations of the more wealthy and charitable.

32. The low prices of corn and grain at present, and the very high rents, render the situation of the farmers rather suffering instead of prosperous.

Antwerp, 30th April 1834. *De Hochepied Larpent*, Consul.

— No. 19. —

No. 19. Mr. Consul Fauche to Viscount Palmerston.

Mr. Consul *Fauche* to Viscount *Palmerston.*

British Consulate, Ostend,
May 27, 1834.

My Lord,

I HAVE the honour to enclose a Report on the state of Agriculture in West Flanders, in answer to certain queries transmitted by your Lordship's circular of the 26th November. These answers have been procured from the best sources, and I have bestowed considerable application to render them as comprehensive and accurate as it was in my power to accomplish.

I have, &c.

(signed) *G. A. Fauche.*

Enclosure

Enclosure in No. 19.

ANSWERS to QUERIES relating to the State of Agriculture in *West Flanders.*

Answer 1 & 2. ACCORDING to the 1st article of the Belgian constitution, Belgium is divided into nine provinces, of which the province of West Flanders constitutes the Ostend consulate. This province is again divided into eight districts, viz. Bruges, Ostend, Ypres, Courtrai, Dixmude, Furnes, Roulers and Thielt.

The population of Flanders, according to the last census, amounted to 607,276 souls. The province contains 15 towns, and 233 rural parishes, spreading over 320,224 hectares, or 792,110 acres.

	Population.	
1st. The district of Bruges contains:		
The town of Bruges	41,903	
39 rural parishes	52,693	
		9,4596
2d. The district of Ostend contains:		
The town of Ostend	11,390	
27 rural parishes	25,960	
		37,350
3d. The district of Ypres contains:		
The town of Ypres	14,950	
— Poperingue	10,000	
— Warneton	5,600	
— Werwick	5,450	
37 rural parishes	62,270	
		98,270
4th. The district of Courtrai contains:		
The town of Courtrai	19,100	
— Menin	7,900	
44 rural districts	114,800	
		141,800
5th. The district of Dixmude contains:		
The town of Dixmude	3,200	
25 rural parishes	40,100	
		43,300
6th. The district of Furnes contains:		
The town of Nieuport	2,850	
— Furnes	4,250	
26 rural parishes	21,600	
		28,700
7th. The district of Roulers contains:		
The town of Roulers	9,900	
— Iseghem	8,400	
— Thourout	7,600	
18 rural parishes	66,400	
		92,300
8th. The district of Thielt contains:		
The town of Thielt	11,500	
17 rural parishes	59,460	
		70,960
TOTAL		607,276

In order to establish the nature of the different soils, and the relative quantity of each, recourse must be had to the following table, which, although procured from and computed by the best authority, can only be considered as approaching to accuracy, in consequence of the changes which the face of the land is continually undergoing. It will nevertheless be found sufficiently correct for general purposes, being the result of the experience and study of the principal engineers and surveyors in West Flanders.

NATURE AND DIVISION OF THE SOIL.	Hectares.	Acres.	Surface of the Province.
Arable Land:			
Good quality	51,917	128,422 ½	
Middling	89,095	220,386 ½	
Bad	60,455	149,543	In Hectares.
Meadows and Pastures:			320,224
Good	16,021	39,530	
Middling	26,071	64,489 ½	
Bad	21,747	53,793 ½	
Woods and Marshes:			In Acres.
Good	6,773	16,854	792,110
Middling	12,615	31,204 ½	
Bad	14,300	35,372 ½	
Water	2,530	6,258	
Buildings	3,400	8,410	
Roads	9,300	23,004 ½	
Lands without produce	6,000	14,841 ½	

4. The annexed table shows that there is a certain quantity of land not bearing any produce, but much labour is daily bestowed on the cultivation of this land. The unproductive land may be divided into two classes; the heaths and the lands left by the sea, which latter, when drained, are called polders.

The heaths might all be made productive, and many proprietors have already turned their attention to the cultivation of them. The polders can only be cultivated by large capitalists, who can afford to lose the interest of their outlay for several years. The returns are finally very considerable. This sort of speculation is frequently tried in the Flanders.

5 & 6. The table annexed to the answer of the 3d query will also be found to answer the 5th and 6th.

7. The land in this province is generally cultivated by tenants. Very few proprietors hold their own land, unless it be from five to eight acres for pleasure grounds.

8. The larger farms are chiefly situated in the north of the province; there are some containing as much as 300 measures, or 325 acres, but then the polders form a large proportion of them. The average extent of farms is from 50 to 70 measures, or 54 to 76 acres. There are some also varying from 20 to 25 measures, or from 21 ½ to 27 acres. It is frequently the case that the whole farm does not belong to the same proprietor. The tenant, in order to enlarge his farm, rents from 5 to 12 measures of small proprietors, which are called running lands (loopende landen).

9. As there is every variety of soil in the province, from the best to the worst in all Europe, an average rate of the rent will hardly give any idea of the respective value of the land. The highest price of grass meadows, *i. e.* those used for grazing, varies from 100 to 125 francs per hectare, or from 1 *l.* 12 *s.* to 2 *l.* per acre. The rent for arable land varies from 15 *f.* to 16 *f.* per hectare, or from 5 *s.* to 19 *s.* per acre, on account of the great difference in the quality.

The average rate of rent is 25 *f.* per hectare, or 8 *s.* per acre.

10. Two three year old oxen are fed on 1 ½ hectare, or 3 ¾ acres. One milk cow or one heifer are fed on one hectare, or 2 ½ acres; the cow and the heifer receive some part of their food in the stable. Sheep are not limited to extent of pasture; the shepherds conduct them about, and they browse on the borders of dikes and fields, or on the lands after harvest, where clover is growing. Hogs are fed in the stye.

11. The assolement here is generally septennial. Wheat stands for one year, rye for one, beans for one, flax for one, barley for one, and oats for two. Potatoes and clover are grown at all times, according to the degree of consumption, and to the success or failure of other crops. Of all the different grains, rye and wheat are the most cultivated.

12. Wheat produces from 16 to 18 double hectolitres per hectare, or from 34 to 38 bushels per acre; colza (brassica arvensis), or rapeseed, 14 double hectolitres per acre, or 30 bushels per acre; rye, the same; barley, 24 double hectolitres per hectare, or 50 bushels per acre; oats, 16 double hectolitres per hectare, or 34 bushels per acre; potatoes, 200 sacks of 100 kilogrammes each per hectare, or 157 cwt. per acre; flax, which is only produced on very good soil, returns a value of from 600 *f.* to 700 *f.* per hectare, or 9 *l.* 12 *s.* to 11 *l.* 4 *s.* per acre.

13. In the light soils, such as those in the neighbourhood of Courtrai and the district of Ypres, the rotation is as follows: first year, wheat or rye; second year, beans; third year, what;

wheat; fourth, colza or rye: or, first year, wheat or rye; second year, clover; third year, flax, wheat or rye; fourth year, turnips or cabbage: or, first year, wheat or rye; second year, potatoes; third year, oats.

In strong or clay lands, such as those in the district of Furnes and the north of Bruges, as follows: first year, sucrion, a kind of barley, or colza, *i. e.* rapeseed; second year, beans; third year, wheat; fourth year, clover, flax or potatoes; fifth year, wheat or rye; sixth year, oats; seventh year, land lies fallow.

The lands bordering the left bank of the canals of Ghent and Ostend on one side, and the districts of Furnes and Ypres on the other, cannot be compared, as to their qualities, with the lands above mentioned.

These lands may be divided into three classes: first, the polders banked and totally brought under cultivation; second, strong lands which have been long cultivated; third, sands left by the sea, and heaths.

The rotation there is as follows:

First Class: Polders, banked, &c.—First year, oats or colza; second year, sucrion or colza; third year, sucrion; fourth year, beans, peas, vetches.

Second Class: Strong Lands.—First year, summer fallow and manure; second year, potatoes; third year, wheat; fourth year, wheat or barley; fifth year, beans, peas or vetches; sixth year, wheat or barley; seventh year, oats and clover; eighth year, clover; ninth year, wheat.

Nine following harvests may be obtained by abundance of manure; otherwise the land must be fallow after the fourth harvest.

Third Class: Heaths, &c.—This class must be subdivided into three other classes: first, lands from which the sea has receded; second, light woody lands, *i. e.* surrounded with hedges, coppice wood and trees; third, the clay, woody lands.

1. Lands from the Sea.—First year, potatoes; second year, rye, with manure; third year, rye; fourth year, oats and clover, with manure; fifth year, clover; sixth year, pasture or rye, with manure.

When these lands are sufficiently manured, they do not lie fallow; only they should be cleansed by several ploughings, and the weeds should be plucked up by the harrow and burned.

2. Light woody Lands.—First year, potatoes, with manure; second year, rye, with manure; third year, rye, carrots or flax; fourth year, turnips or beans; fifth year, rye, oats or clover; sixth year, clover; seventh and eighth years, pasture. The land lies fallow during the two years of pasture.

3. Clay woody Lands.—First year, colza, oats or pototoes; second year, wheat; third year, sucrion, barley or oats and clover, with manure; fourth year, clover, to be cut; fifth, sixth, seventh and eighth years, pasture.

Hops, tobacco and the red beet, are not mentioned among the regular produces, for the following reasons:

Hops are cultivated in many parishes of Ypres, but almost always by small proprietors. The plant lasts five years without being renewed.

Tobacco is cultivated in almost all the parishes, but the ground employed for the culture is commonly a small piece near the habitation.

The red beet is grown now more than it used to be, but has not yet entered into the regular rotation of sowing.

Some lands give two harvests a year, but they are very rare.

The soil returns from eight to ten times the quantity of the seed sown.

14. The general custom is to pay the rent in cash; sometimes, but very rarely, a small part is paid in labour or in kind.

15. The proprietor of the soil is subject to two sorts of taxes, which depend on the nature the land. The first is imposed on all immoveable properties, and is called land-tax. This depends on the extent and value of the land. It is paid to parish collectors appointed by government, and is regulated by the valuation of the old French government.

The "cadastre" or legal measurement, which was begun by Napoleon, is in a state of progression. The land-taxes will be regulated by this, when it is finished.

The second is imposed on lands lying adjacent to canals and small rivers, and is appointed to keep them in order and to prevent inundations. This tax is levied by an administration called "Wateringen."

16. The proprietor of the land is always subject to the land-tax, but it is paid by the tenant; that due to the "Wateringen" is commonly paid by the proprietor, and indemnification is thereby guaranteed to the tenant in the event of inundation.

17. In answering this question, the means of each parish ought to be known.

There are two sources from which the poor and the church are supported: 1st. The revenues which parishes may have from land belonging to themselves. 2d. A per-centage on the personal taxes, and a composition rate.

These composition rates were originally regulated by, and proportioned to, the consumption of the individual, but as it was found that the payment was evaded, it has latterly been raised in these three different ways: 1st. A rate proportioned to the personal tax. 2d. A rate proportioned to the presumed consumption of the individual. 3d. A rate proportioned to the apparent income of the individual.

This composition rate is proportioned to the wants of the parish, attested to by a certificate from the parish authorities.

The income of the parishes of this province is almost exclusively composed of the percentage on the personal taxes, and of the composition rate.

The rates for the years 1829–30, amounted together to 1,693,811 *f.* 11 *c.*, or 67,752 *l.* 8 *s.* 11 *d.*, and for the years 1831–32 to 1,701,460 *f.* 67 *c.*, or 68,058 *l.* 8 *s.* 5 *d.*

The only allowance made for religious purposes from the parish, consist of a small pension, granted to the curate of the parish proportioned to its funds, amounting from 1,000 *f.* to 1,500 *f.*, or 40 *l.* to 60 *l.* The vicars or curates sometimes receive pensions from government. Grants are allowed to every parish from government or the province, for the repairs necessary to the church or presbytery.

18. Almost everything is subject to pay a toll on entering towns; these tolls are regulated by the local authority, "la Régence," under the approbation of the king. The tarif of the tolls in each town is proportioned to and regulated by the wants and situation of that town; the proceeds from these tolls are appointed to defray the official expenses of the town. As an average of what the tolls of each town are, taken from the united amount of the tolls of all of them, would give no correct idea of what each separate town receives, the tolls of the town of Bruges are given:

1832:	*f.*	*c.*		£.	*s.*	*d.*
Receipts from the tolls	386,743	67	=	15,469	14	11
Expenses	383,974	40	-	15,358	19	6
Overplus	*F.* 2,769	27	-	£. 110	15	5

1833:	*f.*	*c.*		£.	*s.*	*d.*
Receipts	524,307	80	=	20,972	6	3
Expenses	523,178	65	-	20,927	2	11
Overplus	*F.* 1,129	15	-	£. 45	3	4

The tolls to be paid on entering Bruges are of five kinds: first, spirits; second, eatables; third, fodder; fourth, fuel; fifth, furniture and materials. These things are all stated in the Tarif of the tolls sent with the present papers.

When these articles only pass the town, and do not remain for use, the duty which has been paid at the gate by which they entered, is remitted at the gate by which they go out. Custom officers are placed at each outlet of the different towns for that purpose.

19. The average price of butcher's meat is from 4 ½ *d.* to 5 ½ *d.* of the country, per lb. The English shilling is worth 12 *d.*

Pure wheat bread from 20 *c.* to 24 *c.* per kilo., or from 1 *d.* to 1 ⅓ *d.* per lb.

Black or rye bread from 15 *c.* to 17 *c.* per kilo., or from ¾ *d.* to ⅞ *d.* per lb.

Unground wheat, from 12 *f.* to 14 *f.* per hectolitre, or from 3 *s.* 6 *d.* to 4 *s.* ¾ *d.* per bushel.

Unground rye, from 8 *f.* to 9 *f.* per hectolitre, or from 2 *s.* 4 *d.* to 2 *s.* 8 *d.* per bushel.

Butter from 90 *c.* to 1 *f.* per Flemish lb., or about 2 *f.* 10 *c.* per kilo., (10 *d.* per lb.)

Eggs from 5 *c.* to 6 *c.* a piece, (½ *d.*), but the price varies according to the season of the year.

Many different sorts of beer are browed in Belgium; the best is never sold at a greater price than from 35 *c.* to 40 *c.*, or 3 *d.* to 3 ½ per bottle.

20. The number of workmen on each farm is proportioned to the quality of the land, but as almost all the labour is performed by horses, there are never many except during the harvest, and then workmen are employed per day. The middling farms have not more than two or three regular servants. The number of servants employed is in general the same as the number of horses used on the farm, so where two horses are kept there will be two servants, one of each sex, and where there are 12 or 14 horses, there will be a dozen servants, *i. e.* six men and six women.

21. The wages of servants employed on farms, are always paid in cash.

The wages of a man servant are from 120 *f.*, (4 *l.* 16 *s.*) to 130 *f.* (5 *l.* 4 *s.*) per year.

Those of a woman from 60 *f.* (2 *l.* 8 *s.*) to 70 *f.* (2 *l.* 16 *s.*) per year.

The servants make part of the farmer's family, and are held nearly in the same rank with him.

22. The wages of the servants are not augmented in time of harvest, but when the harvest is gathered in, the farmers generally give them some little additional remuneration, such as beer, ham, cakes, &c.

23. The regular servants are always boarded and lodged by the farmers. When the work requires it, they employ additional labourers by the day, who are also lodged and boarded.

24. The servants belonging to the large farms are fed much better than those of the small ones; in the latter their food consists of black or rye bread, buttermilk and potatoes, and bacon on Sundays. In the large farms of the north they eat bacon every day, but very seldom fresh meat. In the south of West Flanders wheat bread is commonly used, as rye is scarce; the servants hardly ever are allowed beer; they drink milk and water, or coffee.

The food therefore consists of bacon, rye or wheat bread, potatoes and buttermilk; butcher's meat is not used.

25. Women are usually employed altogether on the land; when the nature of the labour requires exclusively men, they employ themselves in spinning flax; they do all kinds of work which are not beyond their strength.

26 & 27. According to the law made on the 8th of January 1817, which is still in force, one man in 500 is annually called upon for military service. The price of a substitute is from 800*f.* (32*l.*), to 1,200*f.* (48*l.*)

28. The fuel principally used, on account of the high price of wood, is pit-coal; this is dug in the provinces of Liege and Hainault; the price of it in the towns of West Flanders is from 26*f.* to 30*f.* per 1,000 kilo., or from 1*l.* 1*s.* to 1*l.* 4*s.* per ton.

29. Linen cloth, calico, and a kind of coarse cloth, which is manufactured in the province, are mostly worn.

The produce of flax in this country is beyond the consumption of it; this flax is spun in the country as before stated; cotton and wool are, on the contrary, spun in the towns by means of hand-machines.

The prices of linen are as follows:

Coarse linen 105 to 114 centimetres broad, or one yard 5 $\frac{1}{3}$ inches to one yard 8 $\frac{88}{100}$ inches, with from 1,400 to 2,000 threads to the warp, 1*f.* 3*c.* to 1*f.* 37*c.* a mêtre, or from 9*d.* to 1*s.* a yard.

Fine linen, with from 3,000 to 3,600 threads, 1*f.* 92*c.* to 2*f.* 55*c.* a mêtre, or from 1*s.* 5*d.* to 1*s.* 10 $\frac{1}{2}$ *d.* a yard.

The articles of clothing are in general much cheaper in England than here.

30. In Flanders, blankets, cloth, camelot, serge and coating, are manufactured with indigenous wool.

Blue and red dyes, soap, hats, thread ribbons, and printed linens are manufactured; there are also salt refineries, tanneries, potteries and distilleries, &c. Almost all these manufactories are placed in the towns.

Some manufactories with steam-engines have been lately established in this province.

White linen is generally made in the country, other goods of the same nature are made in the towns.

31. The poor are more numerous in Bruges than in any other part of the province; that town contains 17,000 paupers out of a population of 40,000; they are in general rather numerous in the towns.

There are two modes of providing for them established:

1st. Distributions in kind, from the "bureaux de bienfaisance," and from voluntary gifts, which are constantly accumulating in the church during divine service. The "bureaux de bienfaisance" possess very large landed properties, which have been made over to them during a long space of time by deeds of gift; they also annually receive a certain sum from the town.

2d. A large establishment for paupers, called "le depôt de mendicité," exists at Bruges; every one, who has no resource of his own, must be admitted there; if he knows any trade, he is employed in it; if not, he is generally taught that of a weaver.

Every individual is boarded, clothed and lodged, for 32*c.* a day (3*d.*), which the parish to which the individual belongs is obliged to pay.

This institution has become so rich, that it is now in contemplation to diminish the sum of 32*c.* to 25*c.* (2 $\frac{6}{15}$ *d.*)

32. The condition of the occupiers of the farms is generally prosperous, owing to the strict economy with which they live.

They, (speaking of the small farmers), are more prosperous than the French. The great farmers are generally wealthy in every country.

British Consulate,
Ostend, May 27, 1834.

G. A. Fauche, Consul.

Sub-Enclosure in No. 19.

(Referred to in Answer 18.)

(Sub-Enclosure.)

TAXES MUNICIPALES de la Ville de *Bruges*.

Les Bourgmestre et Echevins de la Ville de Bruges,

VU l'arrêté de Sa Majesté du 18 Juillet courant qui, entre autres tarifs de taxes municipales, approuve celui annexé à la délibération du Conseil de Régence de cette ville du 8 Février dernier;

ARRÊTENT que ledit arrêté de Sa Majesté, ainsi que la délibération du Conseil de

MUNICIPAELE TAXEN der Stad *Brugge*.

Burgemeester en Schepenen der Stad Brugge.

GEZIEN het besluyt van Zyne Majesteyt van den 18 July loopende maend die, onder andere taryfs van municipaele taxen, goedkeurd het gene gevoegd aen de deliberatie van den Raed van Regeering dezer Stad van den 8 February lest;

BESLUYTEN dat het gezeyde besluyt van Zyne Majesteyt, als ook de deliberatie van den

de Régence du 8 Février dernier, et le tarif y annexé, seront, avec le présent, imprimés dans les deux langues, publiés et affichés aux endroits accoutumés, pour l'execution de ce tarif avoir lieu à dater du 1er Août prochain.

Fait à Bruges, en l'Hôtel-de-Ville, le 26 Juillet 1833.

Le Bourgmestre,
Coppieters 'Twallant.

Par Ordonnance :
Le Secrétaire, *Scourion.*

den Raed van Regeering van den 8 February lest en het daer aen gevoegde taryf zullen, met het tegenwoordig, worden gedrukt in de twee taelen, afgekondigd en aengeplakt ter gewoone plaetsen, om de uytvoering van dit taryf plaets te hebben, te rekenen van den 1sten Ougst aenstaende.

Gedaen te Brugge, in het Stadhuys, de 26 July 1833.

Den Burgemeester,
Coppieters 'Twallant.

Ter Ordonnantie :
Den Secretaris, *Scourion.*

LEOPOLD, Roi des Belges,

À tous présens et à venir, salut :

Vu les nouveaux tarifs de taxes municipales votés par les Conseils de Régence des villes de Bruges, etc. province de la Flandre Occidentale, lesquels tarifs établissent les droits en francs ;

Sur le rapport de notre Ministre de l'Intérieur ;

Nous avons arrêté et arrêtons :

Art. Ier. Sont approuvés les nouveaux tarifs de taxes municipales ci-après désignés :

1°. Celui annexé à la délibération du Conseil de Régence de la ville de Bruges, en date du 8 Février dernier.

2°. Etc.

Art. II. Notre Ministre de l'Intérieur est chargé de l'exécution du présent arrêté.

Donné à Bruxelles, le 18 Juillet 1833.
(signé) LEOPOLD.

Par le Roi, le Ministre de l'Intérieur,

Par Ordonnantie :
Den Secretaris, *Scourion.*

EXTRAIT du Procès-verbal de la Séance du Conseil de Régence de la Ville de Bruges, du 8 Février 1833, présens Messieurs Jean-Baptiste Coppieters 'Twallant, Bourgmestre, Président ; Jacques De Net, Jacques Du Jardin, Echevins ; Jean Van de Walle-Vermeulen, Charles-Antoine Doudan, Philippe Versavel-Noë, Pierre Vander Ghote, le Baron Louis Legillon de Basseghem, Bernard Jooris, Philippe Le Maire-De Clercq, Charles De Penaranda, le Baron Maximilien De Peellaert de Steenmaere,

EXTRACT uyt het Proces-verbael der zitting van den Raed van Regeering der stad Brugge, van den 8 February 1833, tegenwoordig de Heeren Jean Baptiste Coppieters 'Twallant, Burgemeester, President ; Jacques De Net, Jacques Du Jardin Schepenen ; Jean Van de Walle-Vermeulen, Charles-Antoine Doudan, Philippe Versavel-Noë, Pierre Vander Ghote, den Baron Louis Legillon de Basseghem, Bernard Jooris, Philippe Le Maire-De Clercq, Chales De Penaranda, den Baron Maximiliaen

maere, Jean Vander Hofstadt-Goddyn, Conseillers, et Pierre Scourion, Secrétaire.

Le Conseil de Régence de la Ville de Bruges,

Vu la lettre de Monsieur le Ministre d'Etat, gouverneur de la province, du 14 du mois dernier, 2me division, N° 7, portant que, d'après les dispositions de la loi monétaire du 5 Juin dernier, No. 442, les taxes municipales doivent être converties en francs, et que cette conversion, d'après le tarif actuellement en vigueur, produira des fractions qui compliqueront la comptabilité; qu'en conséquence il est à désirer que les Conseils de Régence arrêtent de nouveaux tarifs; mais que, comme ce travail nécessitera de légères augmentations ou diminutions, il devra être soumis à l'approbation du Roi;

Vu la loi du 5 Juin 1832, No. 442;

Revu le tarif qui a été approuvé le 20 Octobre dernier, et qui est actuellement en vigueur;

Considérant qu'effectivement la conversion dont il s'agit est nécessaire, et qu'il convient en outre d'apporter, à cette occasion, des modifications à plusieurs articles dudit tarif, et notamment: 1°, de supprimer la distinction de la taxe du poisson de pêche nationale d'avec celui de pêche étrangère, attendu que celui qui a payé les droits d'entrée dans le royaume, doit être traité comme s'il était de pêche nationale; 2°, d'établir une taxe différente et plus élevée pour les huitres, les écrevisses et le saumon frais, salé ou fumé, articles qui, audit tarif, n'avaient pas été distingués du poisson ordinaire; 3°, de rectifier les taxes sur les chariots de fourrages et de bois à brûler, d'après la force des chargmens; 4°, de réduire à cinq pour cent, au lieu de quinze, la taxe des divers objets compris sous le titre général de meubles et matériaux;

Considérant en outre qu'il importe de déterminer les quantités des objets compris au tarif qui, pour les exportations, devront être pris en décharge des droits, afin de ne pas compliquer le service de la perception par des décomptes de peu d'importance;

Arrête le nouveau tarif des taxes municipales de cette ville, annexé au présent, ainsi que l'état qui le suit, des quantités des objets taxés qui seront pris en décharge des droits, en cas d'exportation.

Le Bourgmestre Président le Conseil,
(signé) *Coppieters 'Twallant.*
Par Ordonnance: le Secrétaire,
(signé) *Scourion.*
Pour extrait conforme,
Les Bourgmestre et Echevins de la Ville de Bruges,
Coppieters 'Twallant.
Par Ordonnance:
Le Secrétaire, *Scourion.*

TARIF

miliaen De Peellaert de Steenmaere, Jean Vander Hofstadt-Goddyn, Raeden en Pierre Scourion, Secretaris.

Den Raed van Regeering stad Brugge,

Gezien den brief van Mynheer den Minister van staet, gouverneur van de provincie van den 14 der voorige maend, 2de divisie, No. 7, houdende dat, ingevolge de schikkingen der muntwet van den 5 Juny lest, No. 442, de municipaele taxen moeten veranderd worden in francs, en dat deze verandering, volgens het tegenwordig in wezen zynde taryf, zal gebrookens voortbrengen die de comptabiliteyt zullen verwarren; dat het gevolgentlyk te wenschen is dat de Raeden van Regeering nieuwe taryfs vaststellen; maer dat, gelykerwys deze bewerking ligte verhoogingen of verminderingen zal veroorzaeken, de zelve zal moeten aen de goedkeuring van den Koning worden onderworpen;

Gezien de wet van den 5 Juny 1832, No. 442;

Herzien het taryf het welk den 20 October lest is goedgekeurd geweest en tegenwoordiglyk in wezen is;

Overwegende dat inderdaed de gedagte verandering noodzaekelyk is, en dat het bovendien ter dezer gelegendheyd betaemd aen verscheyde artykels van gemeld taryf, modificatien toe te brengen, en naementlyk: 1°, te vernietigen het onderscheyd van den tax van den visch der nationaele visscherye met den genen der vreemde visscherye, gemerkt dat den genen die de regten van invoer in het koningryk heeft betaeld, moet worden behandeld gelyk of den zelven van de nationaele visscherye was; 2°, een verschillenden en hoorgeren tax te stellen voor de oesters, de kreeften en den verschen, ge zouten of gerookten zalm, artykels die, in gemelde taryf, niet onderscheyden waeren geweest van den gewoonen visch; 3°, de taxen te verbeteren op de wagens van het voeder en van het brandhout, ingevolge de sterkte van de laedingen; 4°, te verminderen op vyf per cent in plaets van vyftien den tax der verscheyde voorwerpen begrepen onder den generaelen tytel van meubels en bouwstoffen;

Overwegende verder dat het belangd de kwantiteyten te bepaelen der voorwerpen begrepen in het taryf die, voorden uytvoer, moeten worden in ontlasting der regten genomen, ten eynde den dienst van den ontvangst niet te verwarren door afrekeningen van weynig belang;

Besluyt het nieuw taryf der municipaele taxen dezer stad, gevoegd aen het tegenwoordig, als ook den volgenden staet van de kwantiteyten der getaxeerde voorwerpen die in ontlasting van de regten zullen worden genomen, in geval van uytvoer.

Den Burgemeester Presideerende den Raed,
(geteekend) *Coppieters 'Twallant.*
Ter Ordonnantie: den Secretaris,
(geteekend) *Scourion.*
Voor gelykvormig extract,
Burgemeester en Schepenen der stad Brugge,
Coppieters 'Twallant.
Ter Ordonnantie:
Den Secretaris, *Scourion.*

TARYF

TARIF des TAXES MUNICIPALES à Percevoir dans la Ville de *Bruges*.

DÉSIGNATION des Objets de Perception.	Mode de Perception.	Taxes en Francs et Centimes.
BOISSONS :

ÉTAT des moindres quantités des objets compris au Tarif des Taxes Municipales de la ville de Bruges, qui seront prises en décharge des droits, en cas d'exportation et seulement pour autant que ces quantités soient exportées en une même fois:

Bière de toute espèce, quatre-vingt-huit litres.
Vinaigre de bière, trente-cinq litres.
Vin, dix-huit litres.
Eau-de-vie, dix litres.
Genièvre, vingt litres.
Fromage, vingt-cinq kilogrammes.
Beurre, vingt-cinq kilogrammes.
Stockfisch non trempé, cent kilogrammes.
Charbon de terre, cinq cents kilogrammes.
Graines oléagineuses, un hectolitre.
Savon noir ou vert, quinze kilogrammes.
Briques, huit cents.
Tuiles et carreaux de terre cuite, mille.
Pannes ou tuiles creuses, cinq cents.
Chaux, quinze sacs, faisant une croix.

Les quantités inférieures ne seront point prises en décharge, non plus que les liquides qu'on exporterait dans des cruches.

Arrêté par le Conseil de Régence de la ville de Bruges, en conformité de sa délibération de ce jour, en l'Hôtel-de-Ville, le 8 Février 1833.

Le Bourgmestre, Président le Conseil,
(signé) *Coppieters 'Twallant.*

Par Ordonnance: le Secrétaire,
(signé) *Scourion.*

Pour copie conforme:

Les Bourgmestre et Echevins de la Ville de Bruges,
Coppieters 'Twallant.

Par Ordonnance:
Le Secrétaire, *Scourion.*

STAET van de minste kwantiteyten der voorwerpen begrepen in het Taryf der Municipaele Taxen van de stad Brugge, die zullen in ontlasting van de regten worden genomen, in geval van uytvoer en alleenelyk maer voor zoo veel deze kwantiteyten in eene zelfde keer worden uytgevoerd:

Bier van alle slag, acht-en-tachentig liters.
Bier-azyn, vyf-en-dertig liters.
Wyn, achttien liters.
Brandewyn, tien liters.
Genever, twintig liters.
Kaes, vyf-en-twintig kilogrammen.
Boter, vyf-en-twintig kilogrammen.
Ongeweykten stokvisch, honderd kilogrammen.
Steen-koolen, vyf honderd kilogrammen.
Olieagtige zaeden, eenen hectoliter.
Zwarte of groene zeep, vyftien kilogrammen.
Bryken of gebakken steenen, acht honderd.
Gebakken tichels en vloer-steenen, duyzend.
Dak-pannen of holle pannen, vyf honderd.
Kalk, vyftien zakken uytmaekende een kruysse.

De mindere kwantiteyten zullen niet in ontlasting worden genomen, als ook niet de vogten, die men zoude uytvoeren in kruyken.

Besloten door den Raed van Regeering der stad Brugge, in overeenkomst ven zyne deliberatie van dezen dag, in het Stadhuys te Brugge, den 8 February 1833.

Den Burgemeester den Raed Presideerende,
(geteekend) *Coppieters 'Twallant.*

Ter Ordonnantie: den Secretaris,
(geteekend) *Scourion.*

Voor gelykvormige copie:

Burgemeester en Schepenen der Stad Brugge,
Coppieters 'Twallant.

Ter Ordonnantie:
Den Secretaris, *Scourion.*

ITALY AND AUSTRIAN STATES.

ITALY AND AUSTRIAN STATES. No. 20.

Mr. Acting Consul-general Tatam to Viscount Palmerston.

— No. 20. —

Mr. Acting Consul-general *Tatam* to Viscount *Palmerston.*

British Consulate General,
Venice, June 1st, 1834.

My Lord,

IN conformity with your Lordship's directions, under date the 9th May last (No. 3), I have the honour to transmit Answers to a set of Queries relating to the state of Agriculture, and the condition of the Population in the country about Venice, Trieste and Fiume.

I have, &c.
(signed) *W. C. Tatam.*

Nos. 1, 2 & 3.

ITALY AND AUSTRIAN STATES, No. 20.

(Enclosure 1.) Answers to Queries.

First Enclosure in No. 20.

ANSWERS to QUERIES relating to the State of Agriculture, &c. in the *Venetian* Provinces.

Answer 1.—THE system of agriculture in the Venetian provinces being so generally conducted on the some principles, the following answers will apply to the whole extent of these provinces. The condition of the population must of course vary, over a superficies of about 6,902 geographical square miles, which is the computed extension of these provinces.

2. The Venetian provinces contain, according to the best and latest computations about - - - - - - - - - - 1,894,437 inhabitants.

In cities, towns and boroughs - -	625,440	inhabitants.
In the country - - - - -	1,268,997	—

About one-third of the population, therefore, inhabit the eight provincial cities and 87 towns and boroughs of the Venetian provinces.

The following is the proportion of population per geographical square mile in the several Venetian provinces: In the province of Padua, 446.97; Polesine, 410.97; Vicenza, 357.29; Verona, 327.77; Venice, 327.29; Treviso, 326.88; Friuli, 171.43; Belluno, 122.19.

3. In the Venetian provinces there are calculated to be

Of Waste land - - - -	1,754	geographical square miles.
Wood land - - - -	98	—
Land in cultivation - -	5,050	—
Total - - -	6,902	

The smallest quantity of waste land is in the province of Padua, and the other provinces follow in this order: Polesine, Treviso, Vicenza, Verona, Belluno, Friuli; and the largest quantity is in the province of Venice, from the great extent of sea marsh which pervades it.

4. It is calculated that about one-tenth only, or 175 geographical square miles, is capable of cultivation. The sterile mountains to the north, the torrents which traverse these provinces, and the quantity of marsh and overflowed land in the neighbourhood of the lagoons and rivers, will account for this small proportion.

5. In the Venetian provinces there are

	Geographical Square Miles.	
Of Corn land - - - - - -	2,178	
Rice grounds - - - - - -	52	
Arable - - -		2,230
Of Meadow and plain pasture - - -	551	
Mountain and hill pasture - - -	2,269	
Pasture - - -		2,820
Total, Geographical Square Miles -		5,050

6. The low lands which are in the environs of the lagoon, consist of alluvial soil; the Venetian provinces, however, contain every variety of soil, not excepting volcanic; but no means exist of correctly ascertaining the extent of each variety.

7. The proprietor in this country may be said to be in general the cultivator; that is, the proprietor and his agents, with his stock, combine with the peasantry in working the soil.

8. A farm, in the English sense, is hardly to be found in the Venetian states. If an estate be let, it is with the view of saving trouble to the proprietor; the tenant becoming a sort of second proprietor, and not a farmer, as in England. In either case the proprietor (who pays all taxes) is considered as being entitled to one half the produce, and the tenant, for his labour, to the other half. The stock usually belongs to the proprietor. The cattle live on the soil, and contribute their labours. Increase of live stock, being produce, is divided equally.

9. The Answers to Queries, Nos. 7 & 8, explain that the land is seldom let. The rent of an estate would be calculated from an estimate of its produce, and not from its extent, or the quality of the soil.

10. By the latest calculations, there are stated to be in the Venetian provinces,

Horses - - - - - - - -	37,878
Mules - - - - - - - -	8,189
Asses - - - - - - - -	9,054
	55,122

Three-fourths of which are stated to be for agricultural purposes.

Horned

Horned cattle (about one-third being milch cows) - -	413,817
Sheep and lambs - - - - - - - - -	443,458
Goats and kids - - - - - - - - -	52,004
Total - - -	964,401

The following is the ratio per cent.:—Horses, 4; mules and asses, 2; oxen, &c., 28; milch cows, 14; small stock, 52.

11. The average produce of the principal sorts of grain in each year in the several Venetian provinces is as follows:

	WHEAT.		RICE.		MAIZE.		PULSE, and other Grain.	
	Some.	*Imp. quarters.*	*Some.*	*Imp. quarters.*	*Some.*	*Imp. quarters.*	*Some.*	*Imp. quarters.*
Venice - -	98,000	33,700	20,000	6,900	300,000	103,200	50,000	17,200
Padua - -	430,000	147,000	6,000	2,100	750,000	258,000	100,000	34,400
Polesine - -	174,000	59,800	1,000	350	350,000	120,400	36,000	12,400
Verona - -	210,000	72,200	120,000	41,300	280,000	96,300	50,000	17,200
Vicenza - -	250,000	86,000	38,000	13,000	550,000	189,200	60,000	20,700
Treviso - -	260,000	89,400	20	- - -	850,000	292,400	70,000	24,200
Belluno - -	8,000	2,700	- - -	- - -	110,000	37,800	30,000	10,400
Friuli - -	230,000	99,100	400	140	710,000	244,200	124,000	42,700
TOTAL - -	1,660,000	570,800	185,420	63,790	3,900,000	1,341,500	520,000	179,200
Consumption -	1,385,000	476,400	104,000	35,800	3,700,000	1,272,800	300,000	103,200
Overplus - -	275,000	94,400	81,420	27,990	200,000	68,700	220,000	76,000

10 some = 1 cubic metro: $3\frac{22}{50}$ imperial quarters = 1 cubic metro.

12. The quality of land is usually estimated in these countries by the number of measures of grain produced from one measure sown, and not from the produce of a given extent of land. The quantity of land commonly called a "campo," (that is a field), varies in every province, and sometimes also in districts of provinces, so that simple as this question appears in a country where agriculture is studied, and every calculation made, it is extremely difficult to answer it where production is almost left to nature, or is at least only assisted by an ignorant peasantry, following the same system which has been practised for centuries, without any attempt at improvement.

It is asserted that in the province of Venice the land is so poor as to produce only six measures for one measure of wheat sown. In the province of the Friuli, eight measures, and in the Polesine, the most productive province, twelve measures are expected from an average crop.

A measure of Indian corn produces double the quantity which results from a measure of wheat, but that is accounted for from its being planted in rows, like beans in England.

13. The usual method adopted in the Venetian provinces of working land, is to sow the first year wheat, the second Indian corn, and the third clover or other grass, and then return to wheat, and follow the same course. In certain situations, where the land is extremely rich, or where manure is to be had in abundance, rye is sown, and dwarf Indian corn follows the same year; but the second year such land lies fallow, or at best produces only grass.

The management of sheep in large flocks, and the culture of the turnip, is not practised in this country.

14. Under Queries No. 7 & 8, it has been stated that the proprietor takes a part of the produce for his rent, and the labourer a part for his labour. It is usually equally divided, but the quality of the land and other circumstances vary the proportions.

15. There is a law existing for the taxation of the land in Venetian Lombardy, which limits the amount to one-fourth of the produce; but the estimate on which this law has hitherto been enforced gives just cause to the proprietors to complain that their payments far exceed that proportion.

New regulations are annually looked for on this subject. The taxes are divided into two classes; viz. prediale, or state taxes, and communale, or county and parish rates; the latter are generally half the amount of the former, and cover the expenses of roads, bridges and works of public utility. The proprietors of land are under the obligation of calling or sending to the government offices to satisfy the demands made on them, and the expense of collecting is in consequence very trifling.

16. The proprietor pays all.

17. There are no poor rates, properly so called, but in most of the large towns there are hospitals, and establishments for foundlings, orphans, the aged and the infirm. These institutions are encouraged by the government, and when voluntary contributions are not adequate to their support, grants of money are made by the state to supply the deficiency; legacies and donations annually diminish the amount of these grants.

The clergy are provided for by church lands; and where these do not exist, or are insufficient, they have allowances from the state. The church fees, accustomed offerings, and voluntary contributions and legacies, are also very important resources for the clergy and church expenses in the Venetian provinces.

ITALY AND AUSTRIAN STATES. No. 20.

(Enclosure 1.) Answers to Queries.

18. The following Tariff (1.) is applicable to the cities and towns of Venetian Lombardy, as far as regards the consumption or excise duty levied by the state. The several places are classed according to their magnitude; large cities paying the greater duty, and towns the smaller; but the municipal authorities, as a general maxim, increase the tariff to double the duties therein stated, to cover the expenses of public works, lighting, paving, &c, &c.

To facilitate the commerce of the free port of Venice, the consumption duty is only levied on the articles contained in Tariff No. 2.

(1.)

Wine, beer, vinegar, imported from abroad —	13 69	4/7	2 32	/9 ½

19. The following may be considered as the average prices of meat, &c., in the Venetian provinces:—Beef (per lb. English), 3 ½ *d.*; mutton, 3 *d.*; veal, 5 *d.*; Pork, 3 *d.*; flour, 1 ½ *d.*; Indian corn flour, ¾ *d.*; butter, 8 *d.*; cheese, 6 *d.* to 1 *s.*; potatoes, per cwt., 3 *s.* 6 *d.*

20. It having been explained that there are no farms, according to the English acceptation of the term, this question does not apply to the Venetian states. The proprietor has cottages on his lands, and these are inhabited by families of peasants, to whom certain quantities of land are allotted. If the soil be heavy, or otherwise difficult to work, the allotment will of course vary from where there is great facility of cultivation.

21. The peasantry of the Venetian provinces are, as has been explained, paid in kind; if industrious, their gain, as well as that of the proprietor, is proportionably increased.

22. There is generally in the north of Italy a greater variety of occupation, from the nature of its produce, than the climate of England permits. Silk, the wheat harvest, the vintage, and the Indian corn-gathering, have each their season in this country, and these articles are all produced from an allotment of land cultivated by one or more families of peasants. The fine climate, therefore, and the number of hands which these several products keep regularly employed, render an increase of the usual number of labourers at any particular moment unnecessary. There is, therefore, no difference as to wages or pay in time of harvest.

23. The peasantry are lodged in cottages, but not boarded, under the Italian system of cultivation.

24. The food of the peasantry of the Venetian provinces is principally Indian corn flour formed into a paste, by mixing it with a little water and salt over a fire.

In the statement under No. 11 the consumption of Indian corn or maize is shown to be nearly double that of wheat. Maize flour so prepared is eaten with a small portion of salted fish, cheese, or any stewed meat or other substance highly flavoured, by all the low class of Italians; but the peasants rarely touch meat, and with the exception of an occa-

ITALY AND AUSTRIAN STATES No. 20.

(Enclosure 1.) Answers to Queries.

sional meal with pork or bacon, may be almost said to live without animal food. Beans (of the "French bean" kind) form also a considerable article of food for the peasantry. Their usual drink is small wine; that is wine and water, called by the French "boisson, or petit vin." The peasantry, although remarkably strong and well grown, are very badly fed in the north of Italy.

25. In Venetian Lombardy there are as many women who work on the land as men, as they have no other profitable employment on a large scale. In winter they occupy themselves in some of the silk operations; and in all their leisure moments, whether in the field or at home, knit stockings and spin.

26. There is no established number of conscripts per year, as the want of men varies according to circumstances; taking an average of years, the draft from the Venetian provinces is about 2,000 annually, out of a population of nearly two millions; that is, one per mille. The Austrian navy consists of between 4,000 and 5,000 men, and is chiefly supplied from the coast about Venice, precisely on the same system of conscription as is practised for the raising of the land forces. This district, therefore, supplies few men to the army, allowance being made for the number of seamen drawn. The period of service both in the army and navy is eight years.

27. The discipline of the Austrian army is so severe that it is very difficult to obtain substitutes for conscripts. Such as are obtainable are generally soldiers who have served their term of eight years, and who are willing to continue with the hope of promotion. They are, therefore, mostly men of good character, for if not, they would not be accepted in lieu of conscripts. Such a substitute costs from 25 *l.* to 30 *l.* sterling in time of peace.

Personal rank is no protection from the conscription; but young men of noble family are received into the army as cadets.

28. The fuel chiefly in use in the north of Italy is wood. The peasantry use Indian corn, reeds and other refuse, except for their cookery; and the land they work on generally supplies them enough wood for that purpose.

Wood is dearer or cheaper in proportion to the distance from the place of its growth. It will be seen, under Answer No. 3, that there is not a large portion of woodland in these provinces, and Istria supplies the deficiency to the amount of about 50,000 *l.* sterling annually in wood and charcoal. The whole supply of Venice comes from thence. From the variety in the kinds of wood used, and the fluctuation of price according to the season and other causes, it is difficult to give an idea of the cost of fuel but by comparison. It may, therefore, be stated, that English families, accustomed to good fires, find the cost of fuel at Venice equal to that of coals in London.

29. The clothing of the labouring classes in the north of Italy is generally very inferior to that used by the same description of persons in England, and costs much less. In general coarse woollen and cotton articles for such purposes are retailed in this country from 10 to 20 per cent. cheaper than in England.

30. There are no manufactories in the Venetian provinces deserving a specification, except the glass and glass-bead works at Murano, in the vicinity of Venice, where there is employment for from 2,000 to 3,000 persons.

The first preparations of silk afford much general employment to the country people; but these cannot be ranked among manufactories, the process being merely a domestic occupation for the peasantry.

31. Paupers are not numerous, except in some of the larger cities, as in Venice, for instance, where two-fifths of the population are without employment, and, from there being no poor laws, are dependent on the voluntary contributions of the richer inhabitants; but, taking the Venetian provinces together, there is not a great proportion of poor. Mendicants are taken away by the police, and confined in houses of correction and labour.

32. The proprietors of land in the Venetian provinces, who are, in fact, the managers of their own property, complain that the outgoings between expenses and taxes leave them but little advantage; and the low price of land, and the difficulty of finding buyers, are indications that such property is not considered a good investment, and, consequently, that the condition of the Venetian landowner is not generally prosperous.

Of course there are many exceptions to this statement, as land in certain situations is very valuable and difficult to be obtained; for instance, in the immediate vicinity of towns, or in situations which are known to produce superior wine, or which return a more than usual abundance of produce.

The agriculture of the Venetian provinces is, on the whole, in too low a state to afford any very interesting information in answer to the Queries; and the immediate vicinity of Venice being the most unproductive district of the north of Italy, and that in which agriculture is less attended to than in the others, renders it difficult for a resident in that town to collect from the other provinces such detailed particulars as might perhaps be obtained if a journey were undertaken for that object. But the answers herein given may be considered correct as regards the general state of agriculture, and the condition of the population in the Venetian provinces.

W. C. Tatam, Vice-Consul.

Second

Second Enclosure in No. 20.

(Enclosure 2.) Answers to Queries.

ANSWERS to QUERIES relating to the State of Agriculture, &c., in the District of *Trieste*.

Preliminary Observations.

THE districts belonging to the Consulate of Trieste are,

1st, The territory of Trieste;

2d, The maritime province of Istria.

Neither of these districts are important as respects agriculture. The population is dependent on maritime commerce; and without the port of Trieste and its extensive trade, the inhabitants of these sterile mountainous provinces would not have the means of subsistence. The whole country would not supply the city with corn. Its principal productions are wine, oil, fruits, and some vegetables, but none of them in sufficient quantity for the consumption of the inhabitants. Fuel is brought from a great distance. There is little butter; no cheese; a few cows only supply milk. Cattle for slaughter are brought from Hungary. There is neither hemp, flax, nor wool worth notice. Goats are preferred to sheep. The draught oxen and horses are good, but forage is very dear. These remarks will apply not only to the two districts above-mentioned, but to the whole extent of the country between Italy and Hungary, a distance of nearly 100 English miles from west to east.

Neither does the rural economy offer anything very interesting. The region now under consideration is only susceptible of cultivation in sequestered spots and patches. The general aspect of the country is so bare that there is neither a sufficiency of soil to encourage sowing, nor water for the purposes of pasture. The surface of the ground is so porous that neither streams nor lakes are formed, and the rain water finds its way through subterranean caverns, and is lost to agriculture.

The only exceptions are a few vales in the vicinity of Trieste, and some spots in Istria, which produce a little wheat, barley and maize, in fields, planted as in Italy with vines and olives.

Strictly speaking, there are no farms or farmers in this country. There is, however, some variety in the tenures of land. In the immediate vicinity of Trieste the occupiers are generally proprietors. Some are *Metayers*, and receive a part of the produce for their labour. Others are mere servants, and are subsisted on the estate, or remunerated by wages in money or kind. There is no such thing known here as rent of land, according to the English acceptation of the word. The fact is, there is very little land in these parts on which a family could subsist; and the poorer inhabitants, in addition to their rural occupations, work as masons, carpenters, coopers, smiths and the like.

Answers 1 & 2. THE territory of Trieste comprises about 26 millions of square klafters of Vienna, or about 24,000 English acres, and its circumference is about 20 English miles. The principal villages or parishes (exclusive of the suburbs of Trieste) are Santa Croce, Prosecco, Contovello, Opchina, Banni, Trebich, Padrich, Grupada, Bassovizza, Loughera, and Servola. The most populous of these do not contain more than 600 to 700 inhabitants. The whole territory, including the city (exclusive of strangers), contains about 60,000 souls.

Istria is a peninsula, extending from the confines of the territory of Trieste to Lovrana, near Fiume, and contains, according to the latest and best accounts, 58 square leagues (20 to a degree), and a population of 120,140 souls, or 2,088 to a square league.

The following table will show the relative proportion to other provinces of the Austrian empire:

	Per Square League.
Venice and Lombardy contain	5,000
Bohemia	3,304
Lower Austria, including Vienna	3,050
Moravia	2,829
Austrian Litorale, including Trieste	2,487
Gallicia—Austrian Poland	2,405
Upper Austria	2,400
Stiria	1,980
Hungary	1,933
Transylvania	1,717
Slavonia	1,694
Carinthia	1,390
Tyrol	1,310
Croatia	1,280
Dalmatia	1,024

ITALY AND AUSTRIAN STATES. No. 20.

(Enclosure 2.) Answers to Queries.

The principal towns in Istria are,

	Inhabitants
Muggia, containing	1,100
Capo d'Istria	5,120
Isola	2,780
Pirano	6,150
Umago	1,158
Città Nuova	1,832
Parenzo (Bishop's See)	2,090
Orsera	1,500
Rovigno	9,600
Buje	1,533
Pola	1,200
Dignano	3,500
Pisino	3,100

According to this calculation the population in the towns is about one-third of the whole. The most populous places are Rovigno, Pirano and Capo d'Istria. This last is considered as the capital of the province, although Pisino is the seat of government.

3. In the territory of Trieste about one-eighth is arable land; that is to say, plantations of vines and olives, with wheat, barley or maize intermixed; another eighth is woody, and serves also in part for pasturage. There is a wood which contains about 30,000 oak plants, but they are of little value. The rest of the land is rocky and uncultivated.

In Istria the proportion cannot be so accurately given. There is certainly but a small part of its surface cultivated. Much more might be rendered available by an industrious population, aided by the necessary capital. Much of the best land is gradually becoming waste from neglect, inundation, the stagnant water in the salt marshes, and the pestilential air which proceeds from thence. The celebrated forest of Montona, which was for ages guarded with jealous care by the Venetians, has been neglected and despoiled. The waters of the Quieto inundate and lay waste all the lower parts of the forest, and render the timber unfit for service, though allowed to have been as good oak as any in the world. On the whole, it may be assumed that the land in cultivation in Istria is less than an eighth part of the whole: that about as much more is susceptible of cultivation, but from various causes abandoned. Another eighth is covered with wood, and the remaining five-eighths are not susceptible of cultivation, being composed of rocky mountains, salt marshes and plains, too much exposed to the tempestuous winds of the Quaruero.

5. In the territory of Trieste every foot of land is industriously cultivated, and much is annually gained by the terrace mode of cultivation from the side of mountains, which 20 years ago were grey and bare, but are now covered with vines. The peasants of this district are all masons, and build their own own houses with the stones, which they find upon the spots destined for cultivation, and which they fence and support by walls, admirably constructed of rude stones, without cement. They are also employed in public works. They are at once cultivators, sailors, soldiers and artisans, and, though illiterate, display much talent and ingenuity.

In Istria there is less industry; much of the uncultivated land in that district might be rendered productive; it must have been formerly better cultivated. The district of Pola does not now contain 7,000 inhabitants; there is good authority for supposing that it once nourished 70,000, or ten times the present number.

5. The chief article of produce in these districts is wine; all others are only accessories. In the territory of Trieste about one-eighth of the cultivated land is arable; another eighth is woody, and serves also for pasture. There is very little meadow-land.

In Istria the whole of the cultivated land may be classed as arable. The pastures are mountainous and woody.

6. In the district of Trieste the soil is in general calcareous. In the bottom of the vallies there is some alluvial soil, which enjoys the benefit of the mountain streams. The soil on the sides of the hills, which are steep and cultivated in terraces, is little else than broken fragments of limestone; and the summits of the mountains, washed by the rains, and stripped by the violence of the wind, called "bora," which prevails here, are so bare as not to afford even pasturage for cattle. There is nothing in the whole territory which deserves the name of river. Contiguous to the salt-pans of Servola, there is a marshy meadow which yields a little coarse hay.

The soil of Istria is various. The inland parts are mountainous and rocky; the vallies near the sea are susceptible of cultivation, and produce good wine, oil and excellent fruits, especially melons. Maize is generally grown, and some wheat and barley. Parts of the country, especially the banks of the Quieto, are subject to inundation. There are many salt marshes, which infect the air; in the higher parts there is a great dearth of water, the soil being porous with subterranean cavities.

7. In the district of Trieste the land is chiefly cultivated by, or for account of, the proprietors, who are however of different classes:

1st. The owners of estates and country houses, who are generally resident in Trieste, engaged in trade, and occasionally retire to the country for recreation, chiefly in autumn, at the time of vintage. These employ servants and labourers, whom they subsist or hire

for

for daily pay or monthly wages; or more frequently they entrust the cultivation to a villico (farming steward), to whom they assign a portion of the produce.

2d. Proprietors, of ancient patrician families, who have been from time immemorial lords of the land, which they continue to cultivate, residing partly on the estates, and partly in the city, where they have houses and stores; these sell their own produce.

3d. Smaller proprietors, who are also freeholders, and cultivate their own little portions, which are inalienable, but being divided among such of the children as are not otherwise provided for, are sometimes insufficient for the subsistence of a family.

In Istria the lands are divided and cultivated in a similar way, with the difference, that in that district there are a certain number of baronies or counties, and of civil and ecclesiastical domains, some of which contain villages with a population of 500 to 1,000 souls. These belong to old Venetian families, or are annexed to bishoprics or canonries. The tenants of these estates pay to their landlords tithes and a land-tax, which, for want of money, are sometimes paid in kind. The rest of the land belongs to the rural cultivators, who pay the taxes to government.

8. From the answers already given, it will be seen that there are no farms, properly speaking, nor any leaseholds in these parts. The estates, be they large or small, are all freehold, with the exception of the feudal tenures in Istria, mentioned in the last number.

In Trieste, where estates are committed to a villico, or steward, for cultivation, his labour is paid by a share of the produce, but the terms are various, being regulated according to the nature and quality of the soil. Generally the actual cultivator receives one-half of the wine and corn, and all the garden stuff, paying his share of the general expense. The fact is, the expense of cultivation frequently absorbs all the profit, and sometimes more. Labourers must be paid, and the superintending villico, or steward, with his family, must be maintained, before anything can be set aside for the landlord.

9. It follows, from the foregoing answers, that there is no such thing as land-rent in this country.

10. At Trieste the oxen are of Hungarian breed, and are used both for ploughing and draught on the roads; they are strong, and extremely mild and docile; they are chiefly stall-fed; there is but little pasture. The cows of native breed are small, and from the nature of the fodder give but little milk. The sheep are few in number, and their wool is of little value. Goats are kept chiefly for their milk, which is in request in Trieste for invalids. Asses are used for the conveyance of flour, by the female peasantry of Servola, who in great part supply the city with bread, which they bake at their own houses in the country.

In Istria the excessively high price of salt operates to reduce the number of stock. This is the more surprising, as the country abounds in salt, which is a monopoly of government. The following will serve to show the proportion of the number of the different animals in Istria a few years ago:—There were then 7,740 oxen; 10,000 cows; 1,350 horses; 880 mules; 4,278 asses; 45,000 sheep; 4,000 goats; 8,545 pigs.

There is reason to suppose that the number at present is more considerable.

11. By far the greater part of the grain grown is maize. In Istria the sickle is little used. Wheat is to be seen in the vineyards of Trieste, as well as a little barley. Buckwheat is grown in the higher stony grounds. Wine is however, as has already been observed, the principal article of produce in these districts.

12. As grain, whether maize, wheat, or other, is only cultivated in beds between the rows of the vines, and there are, properly speaking, no fields of corn, the quantity per acre cannot be accurately calculated. Maize is far the most productive, and best rewards the labour of the cultivator. Next to this buckwheat answers best; but no comparison will hold between the lands of this district and those of Italy or Hungary. This is not a corn country. Attempts have been made to introduce potatoes into Istria, but without success; the natives dislike them as food, and have an aversion from German modes of cultivation.

13. There is neither rotation nor fallowing in these districts; the same seeds are sown perennially, but the soil is assisted, where it can be done, by manure.

14. Strictly speaking, there is no rent paid in this country. In some parts of Istria there is a land-tax paid to the proprietors of feudal estates, which, for want of circulating medium, is sometimes paid in kind; but all government taxes must be paid in money.

The system of paying in labour, called in Germany and Hungary "robott," which is a remnant of feudal servitude, is not in use here.

15. Throughout the Austrian empire there is a land-tax (steuer), payable by the proprietor (excepting only in the territory of Trieste, which, by its franchise, is exempt from it). This tax is levied by an annual assessment, and is very onerous, as it amounts to 15 per cent. on the gross produce. It is payable in Istria, where it is unequal, and at times oppressive. Government has been for many years occupied in taking an accurate survey of all lands, with a view to regulate this tax so as to make it less difficult of collection.

16. There are no farmers as distinct from proprietors, nor are there any poor or church-rates in these districts.

ITALY AND AUSTRIAN STATES. No. 20.

(Enclosure 2.)
Answers to Queries.

17. There are no taxes levied for the relief of the poor, and tithes only are levied for religious purposes. There is in Trieste an institution for the relief of the poor, which is supported by voluntary subscriptions, and there is an hospital amply endowed and maintained by a part of the excise duty on wine.

18. Not only Trieste, but the whole of Istria, is exempted from many duties to which other provinces are subject. The following are the tolls or excise duties, payable on articles introduced into the city for consumption :—

	Currency.		Sterling.
	Flors.	*Ks.*	
Wine, for every orna, or 12.33 gallons imperial measure	2	3	4/1 1/5
Spirits, vinegar, ditto	0	3	/1 1/5
Oxen, for every head	7	0	14/
Calves, ditto	1	40	3/4
Pigs, ditto	1	40	3/4
Ditto, sucking, ditto	0	40	1/4
Sheep and goats, ditto	0	40	1/4

19. Average price of butchers' meat and of the principal articles of food :

BUTCHERS' MEAT.	PRICES IN Currency.		Sterling.		
	Flors.	*Ks.*	£.	*s.*	*d.*
Beef, per lb. weight of Vienna, equal to 1.235 lb. avoirdupois	0	9	–	–	3 3/5
Pork	0	10	–	–	4
Veal	0	12	–	–	4 4/5
Bread	0	3 1/2	–	–	1 2/5
Butter	0	17	–	–	6 4/5
Cheese	0	25	–	–	10
Flour, wheaten, for 100 lbs. of Vienna, or 123 1/2 lbs. avoirdupois	7	0	–	14	–
Ditto, maize	4	0	–	8	–
Rice	10	0	1	–	–
Potatoes	1	30	–	3	–
Vegetables	4	0	–	8	–
Salt, for 1 lb. weight of Vienna	0	4	–	–	1 2/5
Common wine, per crua, equal to 12.33 imperial gallons	12	12	1	4	–

20. There are but few servants employed, and labourers only at certain seasons, such as seed-time, hoeing, harvest and vintage.

21. Labour in Trieste is well remunerated; in Istria not so well.

A field-labourer at Trieste receives per diem, 30 kreutzers (1 *s.* sterling); if board and lodging are given, one-half is deducted. A field-labourer in Istria, according to the quality of the work, 20 to 25 kreutzers (8 *d.* to 10 *d.*); ditto, acting as farmer, 30 kreutzers (1 *s.*); all paid in cash.

22. There is little variation in the price of agricultural labour; it is in proportion to the length of the day's work Labourers that sow or perform other important work, receive 10 kreutzers per diem more than at other seasons.

23. There is little distinction made in this country between the farmers (villici) and their labourers; they frequently lodge and board together.

24. Butchers' meat is seldom eaten by the agricultural labourers of those districts, except on festivals, and then only in the towns. The common food of the peasantry, including the farmers (villici, or land stewards) are cakes made of maize flour, or the flour itself, mixed with water till it becomes of a consistency to be easily divided and broken; this is called polenta. Good wheaten bread is only enjoyed by the labourers in the vicinity of Trieste, as also rice, with pork or mutton; they dislike potatoes, but are fond of chesnuts, grapes, melons and other fruits, which in their season are plentiful, such as cherries and prunes; they also eat salads, with French beans (fagiuoli); their common drink is water; wine only on holidays. On the whole, the labourers in the district of Trieste are well fed; those in Istria, in times of scarcity, suffer great distress, and numbers then flock to Trieste for relief.

25. The women occasionally assist in agricultural labour, independently of which, those near Trieste employ themselves profitably with washing; they also go to market with the produce of the garden, orchard or vineyard. The care of their families, though generally numerous, occupies but little of their time.

The women of Istria are a different race from those of Trieste, the former being Italians,

Italians, the latter Slavonians; both are attached to rural occupations and to independence; they will not go from home to serve as domestics, and all female servants at Trieste are procured from the interior of Carniola and Carinthia.

26. The natives of the territory of Trieste have always been exempt from the military conscription, a privilege which is enjoyed by no other part of the empire. The peasantry however, form a corps of militia (their usual national costume serving as uniform), and occasionally assist the garrison of Trieste, especially on festivals. During the late war they marched out of the district, and did good service, They are trained to arms, but never enter the regiments of the line; they receive no pay, and are officered by volunteers from among the principal patrician or other distinguished families.

Istria is subject to the conscription, but furnishes very few men for the army, because the inhabitants of the sea-coast are generally preferred for the navy. The natives of Pirano and Rovigno make good seamen.

27. The price of a substitute in Istria, and such parts of the province as are subject to the military conscription, is from 400 to 600 florins, or 40 *l.* to 60 *l.* sterling.

28. The fuel used for domestic purposes is wood, which is brought to Trieste partly by sea from Istria, and partly by land from the forests in Carniola; it is principally oak and beech. There is little wood in the environs of Trieste; a klafter, 6 feet in length or breadth, by 6 feet in height, and about 18 inches to 2 feet in depth, costs from 3 to 4 florins, (6*s.* to 8*s.*) It is a very expensive article in housekeeping in the city, but the country people find sufficient for their consumption. Charcoal is used by blacksmiths and manufacturers, and also for culinary purposes; it is brought from a district on the road to Fiume, near to Monte Maggiore, in sacks on horses, and is proportionably dear.

Istria produces coal, but it is only in use for sugar refiners. The steam-vessels are worked with coals from England, and in default of these, with wood. Some English families consume coals from Lancashire, but the natives have an invincible dislike to them, as well as the medical men, who consider the fumes arising from them to be noxious and offensive.

29. The peasantry of these districts, both male and female, are well clothed, except in times of general distress. There is however such a variety of costume, that it would be difficult to enumerate all the articles of clothing. The natives of the sea-coast differ but little in their dress from the Italians. The Slavonic tribes have each a distinguishing habit. On the whole, the natives of these countries devote a great part of their gains to provide decent clothing, and are fond of ornaments, as rings, chains, ear-rings, brooches, silver buttons and the like. There is little difference in the price of articles of necessary clothing between this country and England. Coarse linens and woollens, shoes and hats, are cheaper here, and so are perhaps British cotton goods, which are much worn.

30. There are a few manufactories in Trieste, such as candles, soap, cremor tartan, hats, for exportation. There are also some distilleries. There are no manufactories in Istria: there are mines of vitriol and alum, which give employment to a few workmen. The salt works are extensive, but this is a government monopoly. Formerly there was a great trade in salted fish, but the high price of salt has put a stop to that branch of industry, which gave bread to thousands. The population near Trieste find ample employment at good rates of wages, but a great part of Istria has been for many years in a declining state.

31. Paupers are numerous only after seasons of scarcity. There is an institution for the poor at Trieste, supported by voluntary subscriptions, and under private management, which has been found to answer the end for which it was established, viz., to provide for the aged and infirm, and for the children of the industrious poor. Here is also an hospital, amply endowed.

In Istria there is little provision made for the poor. In case of need government interposes to relieve, either by supplies of food, or by remission of taxes.

32. The general condition of the peasantry in the neighbourhood of Trieste, whether as cultivators of their own little freeholds, or as tenants at will, labouring on the lands of others, is prosperous, because in addition to the produce of the soil, which finds a ready market, they can employ their leisure time profitably in other ways, as artisans, masons, carriers and the like, in default of which they could not subsist. Their prosperity, therefore, does not arise from the flourishing state of agriculture, but from the commerce of the port and its freedom. Hence the population of the more distant part of Istria, and which does not immediately partake of these advantages, is in a comparative state of misery. On the whole, agriculture can only be considered as being in a very depressed and defective state in these districts.

Supplement.

Independently of the two districts described in the foregoing pages, there is a third which may be considered as an appendage to this consulate, inasmuch as it is included in the government of the Austrian Litorale (or coast land) of which Trieste is the seat. The district here meant is that of Gorizia and Grandisca, and is on many accounts very interesting;

ITALY AND AUSTRIAN STATES. No. 20.

(Enclosure 2.) Answers to Queries.

resting; it has the title of Princely County (Contéa Principesca), having, like the Tyrol, been for many ages under the immediate sovereignty of the princes of the House of Austria. As it is the smallest among the possessions of that illustrious dynasty, so is it the last enumerated in the emperor's titles. To the ancient territory of the county, a part of the Venetian province of Friule (Monfalcone), and also a small part of Carniola (Duino) has been annexed, Aquileja remaining in the territory.

The whole district contains a population of about 160,000 souls. There are 17 towns, each of which is the capital of the district in which it stands.

NAMES OF THE DISTRICTS.	Population.
	Souls.
Gorizia, contains	8,700
Flitech	8,053
Tolluiem	27,000
Canal	12,000
Quisca	9,075
Cormons	9,793
Monastero Aquileja	10,094
Ajello	8,469
Grafenberg	11,142
Grandisca	7,357
Duino	7,807
Schwarzenegg	9,260
Monfalcone	8,071
San Daniele	5,858
Santa Croce	6,060
Canziano	5,021
Reiffenberg	6,048

The territory is intersected by a noble river, the Isonzo, which, with its tributary streams' contributes much to the fertility of the soil. The celebrated Timavus is also included in this district, which boasts of many other natural curiosities.

It comprises every variety of soil and surface. The portion which it embraces of the Carso, as well as other parts bordering on Carniola, is barren, resembling what has been already described under Trieste and Istria. Other mountainous districts are covered with forests of towering pines and other valuable timber. The sea-coast about Aquileja is a pestilential marsh, while the plains, the valleys, and the hills on the side of Italy, are exceedingly fertile, the soil and cultivation being but little inferior to the most favoured spots in Lombardy.

The surface is equally diversified. To the north the land rises by gradations, from hills covered with vines to woody mountains, and alps of the elevation of 9,000 to 10,000 feet. To the southward are the bare hills which overlook the Adriatic. To the eastward is a lofty but fruitful valley, leading to the higher regions of Carniola, bounded by Mount Nanos, and to the west lie the beautiful plains which connect it with Italy.

There is a like variety in their inhabitants in their origin, their language and their habits. One moiety, that to the east and south, is Slavonic (Slavine), the other Roman-Gothic; both meet in the city of Gorizia, each preserving its distinctive marks of language, features and dress; these are called Furlain, those Slavi.

It is easy to conceive that the merely political union of lands and people so different has not altered the local laws or customs with regard to landed property, dominion, vassalage or servitude, or affected the tenures or conditions by which land is occupied and cultivated; these are as various as the face of the country or the nature of the soil. There are some extensive fiefs belonging to the Thurn or Torre, Colloredo, Strassoldo, Coronini, Attems and other noble families, the subjects of which are little better than serfs. There are also a great number of petty proprietors, free or copyholders, similar to those in the districts of Trieste and Istria. But the most important part of the country belongs to a middle class of proprietors, distinct from the higher nobility, and whose estates are cultivated under their own inspection by farmers, who retain the ancient denomination of *coloni*. Still, however, the conditions are various, each party making the best bargain he can. These operative farmers or coloni have generally the use of the buildings and stock, for which they pay a very small consideration as rent. The wine belongs exclusively to the proprietors, (landlords), and the occupier is remunerated by a portion of the remaining produce, chiefly maize, and sometimes the profit of the farm-yard. Trieste is a good market for their superfluous produce, wine, grain, geese, turkeys, poultry, eggs, fruits, vegetables, &c., as it also affords employment to numbers of the redundant male and female population.

The condition of the peasantry in Gorizia is in general better than that of Istria, though perhaps not equal to that of the free cultivators of Trieste; they are well clothed; their habitations are rude but solid; none of the native inhabitants of these provinces pay much attention to comfort or neatness in their dwellings or gardens; there is nothing like a Swiss or English cottage in these parts. The Slavonic tribes are more laborious than the Furlains, but the latter are more sprightly and ingenious; both races are hardy and healthy, and make

make good soldiers; both are totally illiterate, and strongly attached to the religion of the state.

There is an extensive sugar refinery at Gorizia, and manufactures of silk, cotton, leather, woollens and linens, ribbons, stockings, &c.; all these are in a flourishing and improving state.

The live stock on the farms is of a good quality; the pastures are excellent; the wines are of various sorts, and all good. The grain is maize, wheat, barley, buckwheat and oats; all kinds of pulse, fruit and vegetables, are plentiful, speaking of the fertile parts of the district.

The great feature of distinction between these countries and England is the comparatively small value of landed estates here, and the absence of anything like the English or Irish system of farming and renting, from which arises a relation of landlord and tenant which is scarcely known here. It strikes a native of these parts with wonder to hear that a campo (or acre) of arable land can be let or taken at a money rent, which in this country would be equal to more than the net produce of the soil, after deducting seed and labour. In consequence of the system prevalent here, the landed proprietor, receiving little or nothing in money from his tenants, and having to pay tithes, taxes and other charges, is under the necessity (like the colonial planter) of sending his own produce to market, and is dependent for his income on the seasons, fluctuation of prices, rate of interest of money (which he is at times obliged to borrow), and a variety of other circumstances. On the other hand, the poorer cultivators, that is to say, the most numerous class, are undoubtedly better off than common day-labourers in England and Ireland, and, having no parish relief to depend upon, they acquire habits of frugality, and are contented with a portion and a quality of food on which few Englishmen could perhaps subsist. A Furlain of Gorizia will live for months together on polenta (maize cake) and water; and there are porters and other day-labourers, natives of Friule, at Trieste, who earning 40 kreutzers per day, or about 9*s.* English per week, will save at least the half of it, which they send to their wives and families in the country.

Trieste, 31 Dec. 1833. *Henry Bequirer*, Vice-consul.

Third Enclosure in No. 20.

ANSWERS to QUERIES relating to the State of Agriculture, &c.

(Enclosure 3.)

Answer 1. THE districts within the consulate of Fiume, are the following; viz. the free port of Fiume, the free port of Buccari, the district of Buccari, the district of Hrellino, the district of Vinodol. The three latter are crown estates, under feudal laws.

2. The number of inhabitants of the afore-mentioned districts, taken from last year's conscription, is as follows; viz.

NAMES OF PLACES.	INHABITANTS.	
	Towns.	Rural.
City of Fiume and its district - - -	7,331	1,729
City of Buccari and ditto - - - -	1,720	7,767
CROWN ESTATES:		
District of Buccari - - - - -	- - -	2,757
Ditto of Hrellino - - - - -	- - -	2,360
Ditto of Vinodol - - - - -	- - -	13,313
TOTAL -	9,051	27,926

It is not possible to give anything like a correct return to this query, for the local authorities themselves appear to be not at all informed of the respective qualities and quantities of land within their jurisdiction; but I will state the result of my own observations during a long residence in Fiume, in addition to what I have been able to collect from well-informed persons.

The Hungarian Littorale is one continued line of mountain, of hard, calcareous rock, rising almost everywhere abruptly from the water's-edge; its length from west to east is about five German miles (23 English), and the only soil capable of cultivation is to be found either in the valleys, or artificially collected in ledges upon the sides of such mountains as are not too abrupt to admit of such shelves. On these ledges vines are cultivated, and they are looked upon as giving the principal return.

From this it must be perceived that any attempt to give a calculation of the quantity of land in cultivation would be fallacious, for even if one could ascertain the exact measurement of every vineyard and patch of soil dug up by the poor inhabitants, a considerable reduction would be to be made for the numerous stone walls which support the ledges, in addition to the many heaps of small stone and protruding rocks that are everywhere to be met with. It may, however, be stated, that by far the greater proportion of the country is a barren waste, affording only a little pasture; here and there may be found patches of

 stunted

ITALY AND AUSTRIAN STATES. No. 20.

(Enclosure 3.) Answers to Queries.

stunted shrubs and also a few trees, but the woodlands and forests which give some activity to the trade of Fiume, are distant about 20 English miles from the sea-coast.

4. I believe there is very little of any land in the vicinity of Fiume at all worth cultivation remaining uncultivated. There are some plains among the mountains, four or five English miles back from the immediate coast, which might be more extensively cultivated than they are, if there were not a want of population; but this want is again owing to the extreme unhealthiness of these plains.

5. Properly so called, there is no arable land in the whole Littorale; but small quantities of different kinds of grain are cultivated between the rows of vines; not anything like enough, however, for the consumption of the population, thin as that population may be.

Good pasture is very limited, but the peasants feed their flocks on the mountain tops and other waste land, which is abundant.

6. The quality of the soil is, in the higher vineyards, clay mixed with stones, and in the valleys, fine loam.

7. The landed property about Fiume and its dependencies consists of vineyards chiefly, not any of which can be considered as exceeding 30 to 40 acres; by far the greater part are very small, and include that proportion (which is by no means inconsiderable) of wall and unproductive spots.

8. There is no such thing as farms, properly so called, in this neighbourhood.

9. When proprietors of vineyards do not cultivate the land themselves, the usual way is, to give the vineyard into the hands of a peasant, who lives rent-free on it; the land is then cultivated at the peasant's expense, and he gives to the proprietor, in lieu of rent, half the produce in kind.

10. The pasture, as before stated, is very poor, consequently does not encourage the growth of stock, and only a few families keep on an average about a dozen ewes, principally for the sale of their lambs and for their wool, which they prepare themselves for home use. In the summer and autumn seasons, for want of good pasture near home, the peasants of the different villages generally unite and send their small stock, under the care of one or more shepherds, to a distance, in search of better wood.

11. Maize is the principal kind of grain cultivated, it being the chief nutriment of the peasantry. Wheat and barley are prejudicial to the vines, and therefore cultivated only to a very limited extent.

12. It would be very difficult to ascertain the average quantity of wheat and other grain produced on a given extent of such land as at Fiume; but I can state that vineyards of about 20 acres only produce, on an average, as follows; viz.

Wheat, about	14	metzen	=		to about	3	imperial quarters.	
Maize - -	25	-	-	-	-	5	$\frac{30}{100}$	—
Barley - -	2	-	-	-	-	0	$\frac{43}{100}$	—
Calavances	5	-	-	-	-	1	$\frac{7}{100}$	—

N. B.—Besides the crop of wine.

13. The rotation of sowing the different seeds, is, one year wheat or barley, the following year maize, and when these are reaped, either buckwheat or cinquantin (a kind of maize, of a very small grain; it generally ripens in 50 days, whence its name), is sown, and a second crop is got off the land. In other parts of the vineyard, calavances are sown, which, if the season is wet, yields well.

14. The rent is generally paid in kind, as before stated.

15. The proprietors of landed property at Fiume and within its district, pay the following land-tax; viz.

One karantan per brava, containing nine square Vienna klafter, equal to about 1 $\frac{3}{5}$ farthings sterling per 56.16 square feet English.

The proprietors of landed property at Buccari and within its district, pay the following tax; viz.

One-and-half karantan per brava, containing nine square Vienna klafter, equal to about 2 $\frac{8}{5}$ farthings sterling per 56,16 square feet English.

The local municipality annually collect the above tax from the proprietors of the soil.

16. The renters of landed property are not subject to any taxes or rates.

17. No part of the afore-mentioned taxes is reserved for the support of the poor, or for religious purposes. Besides surplus fees, the priesthood in general receive salaries or stipends from the government, or out of the municipality revenues, in lieu of tithes, which recently have been abolished throughout the Littorale.

18. The articles of consumption that pay toll on entering towns are, wine, spirits, oil and butchers' meat; these pay as follows; viz.

Wine, on entering the town, pays 1 *f.* 7 *ks.* per eimer, equal to about 2 *d.* sterling per gallon; and when retailed, it pays a further duty of 22 per cent. on the gross amount of what has been sold.

N. B.—Foreign wines, of which however the consumption is very limited, pays the same duty as spirits.

Spirits

Spirits pay 2 *f.* per eimer, equal to about 3½ *d.* per gallon.

Oil and vinegar pay only four kar. per eimer, equal to about the eighth part of a penny per gallon.

Butchers' meat:—The custom here is for the contractors undertaking from year to year to give meat to the inhabitants of the town at fixed rates, no other persons being allowed to sell meat; and for this privilege the contractors pay to the towns, in lieu of duty, a fixed sum, which the present year is as follows; viz.

At Fiume 5,000 *f.* = 500 *l.* sterling.
At Buccari 650 - 65 *l.* —

19. The contract retail prices at Fiume for the present year, are as follows; viz.

Beef, with the offal, at	6	kar per funto	=	2 *d.*	per lb. avoirdupois.
Pork - — -	7	- —	-	2¼ *d.*	—
Veal - — -	8	- —	-	2½ *d.*	—
Mutton and lamb -	5	- —	-	1¾ *d.*	—

N. B.—Many families pay an extra halfpenny per lb. to the butchers for best pieces of meat, and without offal.

Indian corn meal - - -	at 3 kar per funto	=	1 *d.* per lb. avoirdupois.
Best wheaten bread, at about 3 kar - - - -			1 *d.* —
Bacon, at from 20 *f.* to 22 *f.* per 100 funti		-	1 *l.* 17 *s.* per cwt.
Potatoes - - 45 *ks.* to 1 *f.* - -		-	1 *s.* 9 *d.* —
Cheese - - 30 *f.* to 40 *f.* - -		-	2 *l.* 15 *s.* —
Common table wine, at 12 kar per boccal		-	9 *d.* per gallon.
— olive oil, at 22 *f.* to 26 *f.* per orna		-	1 *s.* 2 *d.* —

20. As already stated, there are no "farms" in this neighbourhood, and the number of persons employed in the vineyards depends on the number in a family, and various local circumstances.

21. In those cases, which are few in number, where the proprietors receive the whole of the produce themselves, and keep a cultivator on the property, the usual wages given are partly in money and partly in kind, as follows; viz.

Annual salary, about 75 *f.* -	=	7 *l.* 10 *s.* sterling.
In kind, 15 metzen of maize - -		$3\frac{22}{100}$ imperial quarters.
— 15 funti of fat pork - -		18½ lbs. avoird.
— 15 funti of olive oil - -		18½ —
— 50 funti of salt - - -		61½ —

And where a rural maid-servant is kept, the proprietor pays her the following salary, but the cultivator must board her out of his allowance in kind.

Annual salary about 20 *f.*, equal to 2 *l.* sterling.
The day-labourer's wages are 25 *ks.* and 30 *ks.*, equal to 10 *d.* and 1 *s.* sterling.

22. They are not paid extra wages at harvest, the proprietors and renters of the soil, on such occasions, generally give them a good meal during the day.

23. Servants only are boarded and lodged by the occupiers of the vineyards.

24. The daily food of the peasantry is polenta, a kind of pudding made of Indian corn meal, simply boiled with a little salt, and seasoned with a little fat, or with a small salted fish; which, with either white or brown bread, forms their principal nutriment, as they make little or no use of butchers' meat throughout the year.

25. The women do a great proportion of the work on the land, as the men go out at day-work, as workmen on the roads, masons, labourers, &c.; they are besides employed in bringing to market heavy loads of hay, wood, &c., and occasionally carry across the mountains the smuggled goods; in general they are a laborious and industrious part of the population.

26. Military conscription is not in force, as this Littorale forms part of the kingdom of Hungary; men are only called out upon a grant passing the Diet; the last grant was 27,000 men upon the whole population of Hungary, which, taken at 8,000,000, would be about 3 in 1,000. This Littorale furnished 98, being somewhat less than its proportion.

27. There is no fixed price for a substitute for the army, and it seldom happens that one is required, nor is any allowed without the sanction of authorities at Vienna. In general, those that are selected for soldiers by the local authorities of this place, are persons of indifferent character, such as the communities are glad to get rid of.

28. The fuel in use is wood, and is brought from the islands in the vicinity, Istria, and from the interior; its cost is as follows; viz.

Averaging from 11 *f.* to 13 *f.* per Vienna cubic klafter, equal to 1 *l.* 2 *s.* sterling per English cubic fathom.

29. The average price of coarse woollen clothing is about 1 *f.* per braccio, equal to 2 *s.* 2 *d.* sterling per yard. It is not in my power to say whether, at such prices, it is dearer or

ITALY AND AUSTRIAN STATES No. 20.

(Enclosure 3.) Answers to Queries.

cheaper than in England; but I should presume the clothing in the end must be here cheaper to the peasants, by reason of the length of time they wear it.

30. The principal manufactory at Fiume is a large paper mill, worked by British capital and machinery, and established about five years ago. There are several small tanneries, wax and candle manufactories; these latter are on a very moderate scale.

31. Not very numerous, and there is no legal provision for the support of the poor; in general the distressed poor depend for relief on the alms of the charitable. There is at Fiume a poor-house, but it is the only institution of the kind in the Littorale, and it is supported by voluntary contributions, including a certain yearly aid from the municipal funds.

32. As the occupiers of vineyards are in general mere rural labourers, their condition can only be considered as prosperous, in so far as they appear to be quiet, contented people, their wants being limited to little more than an existence. Some of the country people earn and possess more money than the generality; this prosperity, however, does not proceed from cultivation, but from devoting themselves to the trade of carriers, and also the more precarious one of smuggling; the value of landed property in such a country as this neighbourhood, is scarcely more than nominal; it affords a living to the occupier and the labourers employed on it, but gives very little return to the owner, even though he be himself a peasant and the cultivator.

The valleys which are situated among the mountains some miles back, are principally cultivated with potatoes, turnips and cabbages; wheat and other grain do not answer, from the cold to which, in such high regions, they are exposed. These mountains are covered with very extensive forests, principally of beech and fir trees, the chief source of the export trade of this Hungarian Littorale.

Fiume, 26 Jan. 1834. *Chas. Thos. Hill*, Vice-Consul.

—No. 21.—

Mr. Vice-Consul *Nolan* to Viscount *Palmerston.*

No. 21. Mr. Vice-Consul Nolan to Viscount Palmerston.

British Consulate, Milan,
7th May 1834.

My Lord,

I HAVE the honour to transmit my replies to a list of Queries called for by the late Consul-general, in his letter of the 18th December last, herewith enclosed. After much inquiry, I return the most accurate Answers in my power to obtain, as no statistic reports are published here; one was far advanced, and suppressed, by order of government.

Should your Lordship wish it, I can obtain much information of this nature at Parma and Placenza.

I have, &c.
(signed) *Babington Nolan.*

First Enclosure in No. 21.

Mr. Consul-general *Money* to Mr. Vice-Consul *Nolan.*

Sir, Milan, 18th Dec. 1833.

(Enclosure 1.) Mr. Consul-general Money to Mr. Vice-Consul Nolan.

IN consequence of instructions which I have received from Viscount Palmerston, I have the honour of transmitting to you the inclosed Queries, to which I have to desire you to return the most accurate and comprehensive answers which it may be in your power to furnish, accompanied by any further statistical information which you may be able to collect, and which may appear to you likely to be interesting to His Majesty's Government. You will perceive that the printed Queries are confined to the state of agriculture and the condition of the population within the district of your consulate, but you will be pleased to extend your answers so as to embrace the whole of the territory under the government of Milan, or farther, if your researches will enable you to do so.

I am, &c.

(signed) *W. T. Money.*

Second Enclosure in No. 21.

Answer 1. MILAN.

2. The following is the latest statistical report of this province:—

Nos.	DISTRICTS.	Number of Communes.	Estimate of the Funds.	Number of Proprietors.	Population.
1	Milano - - - -	16	£. 7,055,207	5,066	149,652
2	Milano - - - -	24	1,018,748	200	7,816
3	Bollate - - - -	29	935,971	553	13,038
4	Saronna - - -	26	1,478,608	1,685	29,594
5	Barlassina - - -	23	958,475	1,788	22,757
6	Monza - - - -	22	1,391,062	1,220	34,855
7	Virano - - - -	25	714,985	900	15,147
8	Vemascati - - -	27	1,075,243	711	21,802
9	Gorgonzola - - -	23	1,772,679	1,181	32,347
10	Milano - - - -	28	1,730,058	456	11,541
11	Milano - - - -	25	1,921,447	243	10,024
12	Melagnano - - -	26	1,537,320	404	11,333
13	Callarate - - -	19	707,892	3,549	17,151
14	Caggiono - - -	22	1,040,060	2,562	19,609
15	Basto Orfizio - - -	18	870,914	2,441	21,353
16	Somma - - - -	26	579,911	3,627	13,387
		389	£. 24,788,587	26,586	431,406

The city of Milan contains 128,118 inhabitants; Monza, 15,383. The rural population consists of 13,483 inhabitants for every geographical square mile.

3. The quantity of waste land is 206 square miles; the quantity of wood land, private property, is 1,037 tornature: public property is 1,539 tornature; common wood land, 58 tornature; the wood land belonging to public institutions, 176 tornature.

N. B.—One tornature = 10,000 square metres, and 49,466,648 square metres = 1 English acre. Under the head of waste land are included rocks, roads, water, buildings, &c.

4. A great portion of the land is not cultivated in this province; it is called Brughiera, from the only shrub, and, indeed, the only substance, that will grow on this soil; it is a species of Erica. This is an extent of level country, the soil of which is subject to drought, which is occasioned by the lower stratum being composed of a deep bed of gravel, and absorbing all the moisture. The scarcity of water is the principal reason why this land is uncultivated, which lies at the depth of 220 feet. The government give permission to those who choose to cultivate any portion of this ground, which is but nominally taxed. They have it in contemplation to irrigate this land by means of a canal, which will bring the water from the lakes Maggiore, Lugano, and Pussiavo, through this at present sterile country. It is stated confidently by experienced engineers, when this takes place that this district will be the most fruitful in Lombardy.

5. A great portion of the land in Lombardy, particularly in Milan and Lodi, is in pasture or meadow land, called *marcata*. The cattle are seldom turned out to graze, but fed with green crop in the houses. The cow-houses, or bergaminos, in the provinces of Milan and Lodi, are the most extensive in Lombardy, and contain from 80 to 100 cows; more are not necessary, the daily produce of these animals being made into *one* cheese. From these cows is made the Lodigian cheese (known in England under the name of Parmezan); the Strachino and Gorgonzola cheeses are also the produce of these districts. The crops are varied, and produce from two to three returns. On the prairie, or meadow land, hay is cut four and five times in green crop during winter, and three times as hay in the summer; all ground not capable of irrigation is cultivated with wheat and other grain, the mulberry tree, and the vine; on a light mountainous soil the vine is also cultivated, except where preserved for wood land and sheep grazing. I cannot ascertain the exact proportion of arable and pasture land, as there are no authentic statistical reports on this subject.

6. In all parts of Lombardy every species of soil is to be met with, from the rocky soil of the mountain to the sand on the plain. The country is intersected by rivers, chiefly by the Po. The variety is so great that it is impossible to give the precise extent of each variety.

7. The farms in that part of the country which is irrigated, are generally from 4,000 to 10,000 perches, and are let to farmers who pay in money; a perch is equal to 65,451 square metres. In the parts not irrigated, the proprietors generally cultivate by means of stewards, the farming peasantry working upon shares, as in the United States of America.

8. The first part of this question is answered in the preceding one; and for the second part, the farming peasantry, finding their own seed, implements, and working oxen, receive sometimes one-third of the whole crop, and sometimes one-half; those belonging to the

ITALY AND AUSTRIAN STATES. No. 21.

(Enclosure 2.) Answers to Queries.

farm receive no money; money is only paid to those who come down from the mountains to work. When the farming peasantry are so poor as to be unable to find these articles, they receive less. The steward divides between master and man; and when the peasant's share is not sufficient for his maintenance, he receives supplies from his landlord. The peasant is frequently in debt to him, but he usually clears himself of it in the course of from one to two successive crops; all live stock is divided in the same proportion. In the bargain between the landlord and his servants, the house rent is included. The peasants work very hard, and without any superintendence.

9. The prairie, or meadow land, lets for from 30 to 40 livres; the other land from 4 to 10 livres of Austria (30 of these livres being equal to 1 *l.* sterling); that is to say, the land is let at this rate per perch per annum.

10. Stock fed on the pastures are few; oxen, pigs, and cows are kept in the bergaminos; sheep and goats on the mountains; few horses are reared in the north of Italy; mules or working oxen are generally preferred.

11. Wheat, rye, Indian corn, rice, millet, barley, beans, oats, and buckwheat, are generally cultivated. The proportions of the different kinds of grain depends on the quality and situation of the land; grass land is always the most valuable. Indian corn is the principal crop; on this the poor chiefly subsist.

12. The wheat crop seldom makes more than 8 or 10 returns, and frequently only 5; the Indian corn makes 30 returns. Indian corn is the most valuable to the cultivator; next in value are beans, which make nearly an equal return. The number of returns they can generally reckon on is calculated from the quantity of seed put in the ground, the quantity of manure in the soil, and the quality and quantity of water with which it is irrigated.

13. The following rotation takes place in five years. The first three years, in grass or meadow land; the fourth year in Indian corn, and the fifth in wheat; between the crops of the fourth and fifth years there are several intermediate returns, such as calavanses, beans, cabbages, few turnips, melons, pumpkins, &c., and Lucern grass.

14. I have already stated that in the irrigated land rent is paid in money; in the parts not irrigated the rent is paid in labour and in kind.

15. The proprietor pays all the direct taxes; these taxes are paid in money.

16. The indirect taxes, the chief of which is the capitation, or poll-tax, and the parish, or communale tax. The former for each person is 3 *livs.* 20 *c.*, and the latter 2 *livs.* 60 *c.* in Austrian money.

17. There are no taxes for the support of the poor. All charitable institutions are under a general administration of the local authorities, who keep a debtor and creditor account, rent and expense. The churches are all endowed, and have their own rents, arising from their landed property. In some few districts the rent is derived from the tenth, or the tithe of the produce; but in most other districts tithes are unknown.

18. All articles of consumption are subject to high tolls by a tarif.

19. Beef, 28 oz. to the lb., 8*d.* sterling; butter, 28 oz. to the lb., 1*s.* 2*d.*; bread, 28 oz. to the lb., from 2*d.* to 3*d.* per lb.; Indian meal, per bush., or 32 lb., from 1*s.* 6*d.* to 1*s.* 10*d.*

20. The peasant, his wife and children, all cultivate in proportion to their means. As few are employed as possible; in harvest time, however, great numbers come down from the mountains to the low country, and work for daily hire.

21. Hired men, in harvest time, from 1 *liv.* to 2 *livs.* per diem; at other times, from ½ *liv.* to 1 *liv.* per diem.

22. They do.

23. Yes, but in a rough manner; for instance, they have soup made from a little lard, in which are put rice and calavans, small wine, a sort of pudding made of Indian meal (called polenta), which last article they are abundantly supplied with. They sleep in outhouses.

24. Soup, Indian meal and second flour for bread, small wine, meat three or four times a year, such as Christmas-day, or on some other great festival.

25. They invariably work on the land; they also spin, weave and rear silkworms.

26. The quota for the conscription is five per cent., but the number called upon to serve, is only in general half that number.

27. I have never known a substitute to be procured under 100 *l.* sterling; besides which a promise of a pension is frequently exacted from the person requiring such substitute.

28. (Not legible.)

29. It is difficult to ascertain the price of clothing worn by the labouring population, as the cloth and linen are home-made, and seldom used as articles of trade. I should, however,

ever, consider them to be considerably dearer than in England, and very inferior coarse articles.

30. Yes; there are five potteries; 135 cotton and cotton thread manufactories. In this establishment 3,625 persons are employed, who also work in the fields when necessary. 51 coloured and brown thread manufactories, employing 527 persons, who also work in the fields. There are 98 silk spinning manufactories, employing many hundred persons. This last does not include the silk spun in private families; for in the districts where the silk worm is reared, two-thirds of the population are employed in this species of labour. There are 12 paper manufactories, and 4 sugar refineries. The total number of the houses of wholesale trade are about 1,340.

31. Paupers are very few, and for those in the whole of Lombardy, there are 12 orphan poor-houses for males, and 19 for females: 65 hospitals; 7 hospitals for lying-in women, 10 foundling hospitals, 8 lunatic asylums, 32 houses of convalescence, 11 houses of industry; 961 charitable institutions, besides the Monte di Pietà, where the distressed receive money, at the rate of six per cent., for goods deposited or pawned. The funds of this institution are supported upon a charitable speculation, under the control of government. The trade of pawnbroker is not allowed.

Mem.—The large hospitals have all rents belonging to them, from which the foundling and other charitable institutions receive supplies. When these last require more money than the large hospitals can afford, assistance is granted them by the government, or from the royal bounty. The total rent of all the charitable institutions amounted, in the year 1817, to 2,275,675 *livs.* of Italy.

32. The general condition of the occupiers of farms is very prosperous. A family in middling circumstances might be supported on a farm, which would furnish everything necessary, for a rent of from 35 *l.* to 50 *l.* sterling per annum. There are no gentlemen speculating in farms, as this is considered an ignoble employment. The term "peasant" is almost one of reproach, though quite unmerited, for in general they are of quiet, frugal, temperate, industrious habits, and superior in moral conduct to people of the same rank of life in towns.

Remarks.—Four sugar-refining houses were in full work lately. One has failed and involved several persons here; the other three houses are supposed to be doing very little business.

Attempts have been made by individuals to encourage the use of steam-engines, hitherto without any great advantage. Boats in thorough repair, having on board the most improved engines, may be purchased at Venice, Genoa and Plaisance for from 50 *l.* to 75 *l.* per cent., under first cost.

The silk business and the management of the dairy, or bergamino, are the first objects in Lombardy. A great failure had very nearly taken place a few days back by a silk speculator here, which would have involved several persons, both in London, Milan and Lombardy.

The viceroy, in order to prevent the ruin of all concerned here, set down his name for a subscription loan to the amount of 200,000 *livs.*; the example was quickly followed by all the nobility and bankers, merchants, &c., and the house goes on as before. The principal persons concerned in silk have come to a determination not to export on their account in future, but to oblige foreigners to come here to purchase at a sort of mart to be formed in Milan of the raw material.

The quality of soil throughout Lombardy is the best in Italy, and the bergamino the favourite object, and when well conducted, the most profitable; the management very simple, and might be introduced into the south of Ireland with very great ease and considerable advantage. A cow of the Swiss breed pays her first cost of 12 *l.* every year. Good ground, fit for dairy farm, capable of being watered (arosé) will fetch, in Lombardy, at a distance of 40 miles from Milan, 45 *l.* to 65 *l.* per acre, situated between Lodi and Codogna. Seven miles from thence, in Plaisance and Parma, the same quality of land can be had for from 10 *l.* to 13 *l.* per acre, although their wheat is of a better quality than that of Lombardy. The want of market, and duty on being introduced here, is the only way of accounting for the difference.

Any quantity of the finest description of oak can be had for shipbuilding in Plaisance, and the mines of copper and iron are most abundant.

If any further information is required, I shall be enabled now to give the fullest possible in a very short time, having come to the knowledge of the means of doing so; and I have returned the most accurate answers it was in my power to furnish on the present occasion, and I shall extend my inquiries farther if required of me.

British Consulate, Milan,
7th May 1834. } *Babington Nolan*, Vice-Consul.

It is a curious fact, in the dairies they use a small instrument, like brewers use to ascertain the saccharine quality of their wort, by which they discover if any water has been mixed with the milk; the dairymen can also describe the pasture on examining the milk.

ITALY AND AUSTRIAN STATES. No. 22.

Mr. Consul Stirling to John Bidwell, Esq.

— No. 22. —

Mr. Consul *Stirling* to *John Bidwell*, Esq.

British Consulate, Genoa,
29th May 1834.

Sir,

I HAVE the honour to enclose annexed the Answers to the Queries relating to the state of Agriculture and the condition of the Population within the district of this consulate.

I have been as accurate as possible in collecting the information required, which caused a great deal of trouble and expense.

I am, &c.
(signed) *J. Stirling.*

Enclosure in No. 22.

ANSWERS to the several QUERIES relative to the State of Agriculture, &c., within the British Consulate at *Genoa*.

(Enclosure.) Answers to Queries.

Answer 1. THE provinces of Genoa, Savona, Albenga, Chiavari, Levante and Novi.

2. The population of the province and town of Genoa is about 210,000, that of Savona 60,000, that of Albenga 55,000, that of Chiavari 95,000, that of Levante 65,000, and that of Novi 58,000. The inhabitants of the provinces along the sea coasts are principally employed in building ships, navigation and fishing. the rural population is reckoned scarcely one-fourth. In the interior, the rural population is about one-half.

3. The extent of the territory of the province of Genoa is 98,189 hectares, or 244,000 acres. I have not been able to obtain an exact information as to the different quality of land, nor the extent of the other provinces above mentioned.

The territory is generally hilly and rocky; the cultivated land in each of the aforesaid provinces is from one-fourth to one-third; the remainder of the land is woody, pasture and waste.

4. The soil in the aforesaid provinces is generally hilly; the uncultivated land being barren, would scarcely pay for the expense of rendering it productive.

5. The greatest part of cultivated land is arable; the pasture being limited to the woods, the mountains and the borders of the farms.

6. The soil is general sandy; wherever cultivation is practicable the earth is good and productive, particularly on flat grounds.

7. There is generally a little proportion of land cultivated by the proprietors; it is not in my power to find out the general extent of such properties, land being very much divided.

8. The size of farms depends upon the quality and situation of the land. Larger farms of good land near the towns are about 9,000 square canes, or six acres, and nearly the double in the interior.

The conditions upon which land is usually rented is by leases for three, five, seven and never more than nine years. In the provinces of Genoa, Savona, Albenga, and Chiavari the farmers usually pay the rent in cash or in produce, such as wine, olive oil, grain, &c., at a fixed price agreed upon in the lease. In the provinces of Novi and Levante, the produce is usually divided between the proprietors and the farmers; two-thirds of the seeds are usually furnished by the proprietors, and the other third by the farmers. Farmers are usually bound not to cut trees without leave from the proprietors, and to dig up a certain extent of land for the vines, &c.

9. The rent of land depends on its quality as well as its situation. The average rate of rent on one acre of cultivated land near Genoa is from 500 *f.* to 600 *f.*, or 20 *l.* to 24 *l.* sterling. One acre of wood and pasture in a good situation is about 300 *f.*, or 12 *l.* sterling; rocky land, where sheep and goats are sent to feed, pay about 2 *l.* per acre.

10. The description of stock fed on the pasture are cows, sheep and goats; and for labour, or cultivated land, oxen and horses. In the provinces of Genoa, Chiavari, Savona and Albenga, land is cultivated with the spade; asses and mules are the only animals used for labour.

11. The cultivation of grain is scarce worth notice in the provinces near the sea coasts. In the interior, one-half of the arable land is usually for wheat, the other half for other kind of grain.

12. Good land gives from four to six times the seed, according to the season; land tilled with spade produces nearly the double.

13. Wheat

13. Wheat and Indian corn are generally sown alternately, viz. every other year, in the same land. There is no fixed rule for the other kind of grain.

14. The rent is generally paid in cash or kind, according to the conditions set down in the leases, as answered in No. 8.

15. The tax to which land is subjected is fixed every year by government for the provinces of Genoa, Savona, Albenga, Chiavari and Levante; it is 5*f.* and 50 *c.*, or 4*s.* 5*d.* upon every 1,000*f.*, or 40 *l.* sterling of valued land, according to the public registers, called cadastro. All land in the aforesaid provinces is very much under-valued. The land-tax in the province of Novi and in the interior is much heavier upon the proprietors.

16. Farmers pay 2*f.*, or 1 *s.* 7*d.* to government yearly; and where the communes are deficient of funds, to pay for the commune's expenses and the support of the poor when sick, the farmers are subjected to an equal sum towards defraying the said expenses.

17. None.

18. The tolls to which the articles of consumption are subjected entering the town of Genoa are the following:

Wine and vinegar, in cask, 2*f.* 20 *c.* per ectolitre, or 1 *s.* 11 *d.* for 25 gallons.
Ditto - - - in bottles, 5 *c.* each, or ½ *d.* each.

Brandy and liquors, in cask, 10*f.* to 20*f.* per ectolitre, or 8 *s.* to 16 *s.* per 25 gallons.
Ditto - - - in bottles, 25 *c.* to 50 *c.* each, or 2 ½ *d.* to 5 *d.* each.

Porter, in casks, 10*f.* per ectolitre, or 8 *s.* per 25 gallons.
Ditto, in bottles, 25 *c.* each, or 2 ½ *d.* each.

	f.	*c.*		*s.*	*d.*	
Oxen	30	–	each	24	–	each.
Cows	12	50	–	10	–	—
Calves	10	50	–	8	5	—
Pigs	7	–	–	5	7	—
Rams, sheep and goats	–	90	–	–	9	—
Lambs and kids	–	40	–	–	4	—
Sausages and salted beef	10	–	per quintal	8	–	per 225 lbs. English.

Fish, according to the quality, from 5 *c.* to 50 *c.* per kil., or ½ *d.* to 5 *d.* per 2 ½ lb. Eng.
Ditto, cured, 8*f.* per quintal, or 6 *s.* 5*d.* per 225 lbs. English.

	f.	*c.*		*s.*	*d.*	
Cheese	10	–	per quintal	8	–	per 225 lbs. English.
Olive oil	10	–	—	8	–	—
Oil for soap, linseed oil, &c.	7	–	—	5	7	—
Charcoal	–	75	—	–	7	—
Coals	–	30	—	–	3	—
Wood	–	20	—	–	2	—
Tallow and fat	5	50	—	4	5	—
Tallow candles	8	–	—	6	5	—
Hay	–	25	—	–	2 ½	—
Barley and oats	1	85	—	1	6	—
Plaster and porcelain sand	–	08	—	–	3 ¼	—
Bricks	–	60	per 1,000	–	6	per 1,000.
Slates	–	5	each	–	– ½	each.
Soap	5	–	per quintal	4	–	per 225 lbs. English.
White paper	4	75	—	3	9	—
Coarse ditto	2	40	—	1	10	—

In some little towns, such as Sperria, venders of articles for consumption pay a certain toll to the commune.

19. Butchers' meat is from 75 *c.* to 96 *c.* per kilogramme, or 7 *d.* to 9 *d.* per 2 ¼ lbs. Eng.

	c.		*c.*		*d.*		*d.*	
Bread - from	30	to	40	per kil.	or	3	to 4	per 2 ¼ lbs. English.
Paste -	30	-	45	—	-	3	- 4 ½	—
Flour -	24	-	36	—	-	2 ¼	- 3 ½	—
Indian corn -	21			—	-	2		—
Rice -	24			—	-	2 ½		—
Potatoes -	8			—	-	– ¾		—
Wine - from	95	to	150	—	-	9	- 14 ½	—

20. Each farm of about four or five acres contain a family; four labourers are usually sufficient for its cultivation; during the harvest extra labourers are generally employed.

21. Labourers on the farms receive from 3 *l.* to 5 *l.* a year, besides board and lodging; labourers employed for the daily work receive from 5 *d.* to 8 *d.* per day, besides their diet, or 1 *s.* without diet.

22. Labourers' wages are generally the same in all seasons.

ITALY AND AUSTRIAN STATES. No. 22. — (Enclosure.) Answers to Queries.

23. When labourers have their abode far from the farm where they are employed, they are boarded and lodged by the farmers.

24. The usual food is Indian corn, that they call polenta, chestnuts, potatoes, beans, fruit; their favourite food is the minestra, made with paste, mixed with beans, greens and potatoes. They make very little or no use of meat.

25. Women work in the country, take care of the cows, prepare the diet for their family and labourers; they spin, weave, and are generally very industrious. Near Genoa they are often employed as nurses.

26. Government fix yearly the number of men that each province is to furnish. Agreeably to an estimate during the last ten years, it appears that one man and a half is called upon for the military service yearly upon every 1,000, or thereabouts.

27. The price for a substitute for the army may be reckoned from 900*f.* to 1,200*f.*, or from 36*l.* to 48*l.* sterling.

28. The fuel principally used is wood and charcoal, imported from Tuscany and Corsica. The price is 4*f.* 40*c.* per peso, or 3*s.* 6*d.* for 530 lbs., English weight of wood, and 2*f.* 80*c.*, or 2*s.* 3*d.* for each bag of charcoal, weighing 106 lbs. English weight, besides the expense for carriage.

29. The price of clothing usually worn by the labouring population is from 3*s.* to 3*s.* 6*d.* per yard for cloth for the winter, and from 8*d.* to 10*d.* per yard the common linen, or the burdatto and frustaneo, a stuff made in the country, and during the summer. The farmers wear velveteens and nankeens.

30. The principal manufactories in Genoa are vermicelli paste, sweetmeats, house-furniture, velvet, white lead and paper; in the province of Savona, common earthenware, cables, sail-cloth; in the province of Chiavari, linen, house-furniture, &c.; and in the province of Novi, silk manufactories. There is a refinery of sugar and one or two cloth manufactories.

31. Paupers are more numerous in towns than in the country; there are no provisions from government for their support. In Genoa there are two hospitals to receive the poor of the town when sick, and an establishment called Albergo des Poveri, where the poor who like to go are admitted. It is capable of holding from 1,500 to 1,800. There is a provision made, of a long standing, for the support of the poor, particularly for destitute noble families, of a private nature, generally administered by a board, called the Della Misericordia. The funds have been reduced very much since the failure of the bank of St. George.

32. From the information I have been able to collect, I cannot say that the occupiers of farms are in general in a prosperous condition.

J. Sterling.

— No. 23. —

Mr. Consul *Falconer* to Viscount *Palmerston.*

No. 23. Mr. Consul Falconer to Viscount Palmerston.

My Lord, Leghorn, 12th April 1834.

I HAVE the honour to return Answers to the Queries relating to the state of Agriculture, &c., in Tuscany, which were transmitted to me in the despatch under date of the 26th of November last.

I have taken much pains in procuring from various parts of this extensive duchy the most authentic information on the different heads referred to; I therefore trust its accuracy may be relied on, and my apology obtained for the time occupied in the investigation.

I have, &c.
(signed) *John Falconer.*

Enclosure in No. 23.

ANSWERS to QUERIES relating to the State of Agriculture, &c. in *Tuscany.*

(Enclosure.) Answers to Queries.

Answer 1. TUSCANY is not divided into parishes, but into corporations; there are 247 corporations or communities; over these corporations there is no public representative, or provincial council board. There are five superintendent corporate chambers, Florence, Pisa, Siena, Arezzo and Grosseto, which superintend the administration of the corporations, thus divided into five departments.

2 to 8. Tuscany numbers, 1,378,795 inhabitants, of which Florence contains 94,514, and Leghorn 72,924.

With the exception of these two larger cities, the average population of the other corporations is about 5,000 each.

The

The average net rent of each corporation, in lands and houses (exclusive of houses inhabited by the cultivators of the land, and exclusive of Leghorn and Florence), is about 150,000 Tuscan lire, or 5,000 *l.* sterling.

The estimate of the land-tax may be about one quarter under the real valuation.

Thus, the net average rent of land and houses, forming a community or corporation, would be about 150,000 *f.*, or 6,250 *l.* sterling.

The number of proprietors, the average extent, or the gradations of property, the distinction of culture, the quantity of arable land, wooded land and pasture, the quantity of uncultivated land, and every other question of this nature, can only be ascertained through the medium of government, who endeavour to conceal the same. These, and other questions, therefore, can only be answered by calculations, coming as near the truth as possible, but always very uncertain.

A statistical work, written in the year 1806, divided the 8,000 square miles of what was then the kingdom of Etruria, now Tuscany, in the following manner; viz.

With respect to the quality of the lands :

Rich lands, in the plains	1,000
Hill lands, and marine sediment	800
Gravel, sandy and shingle	1,200
Mountain, flint and sand	1,200
Calcareous	1,300
Slate and schistus	1,500
Hard, marshy, beds of rivers, land occupied by public roads and buildings	1,000
	8,000

As regards culture :

Cultivated lands	5,000
Wooded lands	800
Pasture ditto	200
Uncultivated	1,000
Incapable of cultivation	1,000
	8,000

The number of estates was, in the year 1792	117,607
They compute now (1834) about	160,000

In calculating the landholders in the different communities, there would appear of individuals belonging to families, proprietors of land :

In 1792	400,000
In 1832	600,000

Supposing, therefore, 120,000 proprietors in Tuscany, the average annual rent of each proprietor would be, between houses and land, 400 *f.* each, or 16 *l.* 13 *s.* 4 *d.* sterling.

The number of proprietors who cultivate their own land cannot be ascertained, but small farms are numerous.

Very few estates are let; almost all are cultivated according to the system of dividing the produce with the farmer.

It is computed that in Tuscany nine-tenths of the inhabitants live by agriculture; one-fourth inhabit the towns, the rest living in the country.

Many proprietors in Tuscany hold their lands and houses on paying a certain impost for the tenure in the first instance, and thereafter a small fixed rent and other dues; these, for the most part, are lands which, in former times, belonged to the state, to ecclesiastical bodies, or to pious foundations.

9. The value of land is calculated by the average of 10 years produce in corn, barley, beans, maize, &c., and lands are seldom let for annual rent in money, as the farmer (or contadino) finds labour, while the landlord furnishes the oxen, implements, seed and a cottage, each party dividing the net profit after the seed is replaced.

10. Each farm generally has one, two or three pairs of oxen for labour, with a small flock of sheep, perhaps an ass and a cow or two, but this not always. These cows are not milked in general, but kept only for breeding.

11. Wheat is the principal object of arable cultivation; barley, oats and Indian corn, all together, bear a proportion equal to wheat.

12. Few lands, except those near the foot of the hills, give more than seven or eight fold; and the fertility of a great part of the lower lands is obstructed by a deficiency in under-draining.

13. Wheat, barley, Indian corn, beans and oats, and wheat again.

14. Rent is sometimes paid wholly in money, but more frequently partly in money and partly in kind. From the farmer, who divides the profits, several small services are required; and some of these are exacted even from the tenant, who pays a fixed rent in money; such, for example, as the use of a horse and cart, at the will of the proprietor.

ITALY AND AUSTRIAN STATES. No. 23.

(Enclosure.) Answers to Queries.

The proportions of rent paid in kind and in money vary so much, that it would be difficult to give any satisfactory answer to this part of the question.

15. The proprietor is subject to a tax on the land, called *tassa prediale*, and to a tax for the use of the community, called *spese comunitative*; these together, on the average, are estimated at about 10 per cent. on the supposed net produce of the land. This year (1834) these taxes amount, in several places, from 14 to 20 per cent. on the above produce; they are levied by means of a printed intimation, signed by the camerlingo, or chamberlain of the community, to whose office every proprietor is bound to send his portion of the taxes at the expiration of every two months.

16. The farmer is subject to government for a small poll-tax only, which may vary from 5*s.* to 10*s.* annually for the entire family.

17. No proportion of the taxes is applied to the relief of the poor, nor in general to any religious purposes. The only foundations of any importance for the relief of the poor, are the hospital, an asylum for orphans, and another for foundlings; and all these institutions have their own funds, which are generally derived from the impost before mentioned. The curates of corporations are sometimes paid by the community, but more generally each corporation has its own particular fund for this purpose.

18. The following are amongst the principal tolls to which articles of consumption are subject:

Beef, veal and mutton, one soldo, or three quattrini, per Tuscan lb. of 12 ounces.
Poultry, irregular.
Wheat and vegetables do not pay.
Wine, six crazie per barrel of 20 flasks, each flask three quarts.
Oil, two pauls per barrel of 16 flasks.
Wood, six crazie the catasta.
Indian corn, one crazie the sack.
Beans, four of which are an imperial quarter.
Haricots, one crazia and four quattrini ditto.
Milk, one soldo per flask of three quarts.

N. B.—The paul is composed of eight crazie, the crazie of five quattrini. The paul may be estimated for these sort of calculations at 6 *d.* sterling.

19. The price of beef is 4 crazie the lb. Tuscan, of 12 ounces, in the country; but in towns it costs from 5 to 6 crazie. Of mutton and veal, from 6 to 8 crazie the lb. White bread, 1 crazie and 1 soldo; household bread, one crazie, per lb.

N. B.—The peasants and middling classes make their bread at home.

Haricots	24 pauls	per sack, 4 to the imperial quarter.
Wheat	24 do.	
Indian corn	12 do.	
Beans	10 do.	

Oil (on an average) from 50 to 60 pauls per barrel of 16 flasks, or 9 $\frac{3}{5}$ gallons. Wine (on an average) for common use, from 7 to 10 pauls per barrel of 20 flasks, or 10 $\frac{1}{2}$ gallons. Milk, 8 crazie the flask of 3 quarts.

20. In general, upon the smallest farms, the work is almost all performed by the family of the labouring cultivator, and no servants are kept; but when occasional assistance is required, it is usually obtained by a commutation of labour. When the farm exceeds 12 acres, a servant is sometimes necessary, and so on in proportion to its extent.

21. Such servants as are taken by the year, and lodged in the house, are fed and clothed, and receive 8 crowns, or about 2 *l.* sterling, per annum.

The day-labourer receives 6 crazie a day and his food, in winter, and 1 paul, together with his food, in summer. If the day-labourer is paid entirely in money, which is seldom the case, he generally gets 2 pauls in winter, and something more in summer; but this varies according to the work required.

22. The servants taken by the year, and fed in the house, do not receive higher wages in time of harvest; but day labourers do receive higher wages at that time; not unfrequently double the amount.

23. Servants taken by the year are generally boarded and lodged by the farmer.

24. The food of the farm servant, day-labourer and farmer is the same. It consists chiefly of bread, wine, and vegetables, with about half a pound of boiled beef for each person on Sundays, and other feast days. Two meals a day are considered to be sufficient in winter, and three in summer; the first meal consists of bread, made of Indian corn and wheat, with which other grains are sometimes mixed, and this, with garlick, onions, and wine, is the general breakfast. The other meals differ but little from the first, except that at one of them there is a sort of soup, made with haricots, or with cabbages boiled in water, a little salt and a small quantity of oil being added; and at the other meal there is generally a dish made up of salt fish, or cauliflower, or some other cheap ingredients, mixed with oil. The quantity of bread consumed by each labourer is three to four pounds a day; and one flask, or about three quarts, of very weak and sour wine is the usual beverage.

The following is considered to be the annual provision necessary for each labourer, the women consuming less: Six sacks of wheat, each sack equal to two bushels; but when Indian corn or other grain is mixed with the bread, a proportionally less quantity of wheat is required; one-third sack of haricots, or white beans; 18 barrels of wine. The farmers of the plains (those of the high lands producing their own) have to purchase for their families from 30 to 40 flasks of oil, at about four pauls a flask; salt, to the amount of about 10 pauls per annum each, and half a pound of meat for each person on Sundays and feast days.

25. The women constantly work on the land; they dig, hoe, reap, gather turnips and cut grass for the cattle; they also cut and mix the straw and herbage, and assist in all the work of the stable. When not otherwise employed, they spin; and by this alone they may earn from four to five crazie a day.

26. In the town of Pisa, which contains 10,000 males, 16 men only are annually called up for military service; and this may be taken as a general rule for Tuscany.

27. The price depends so much on circumstances, that no satisfactory answer can be given to this question. The lowest price, however, seems to be about 20 crowns.

28. The fuel consists chiefly of wood and charcoal. The cultivator has almost always a sufficient supply of wood from the cuttings of vines and the trees that support them. The wood consumed in towns is got chiefly from the woodlands in the neighbourhood. The price of wood varies from 35 to 65 pauls the catasta, according to the quality. The catasta measures six braccio (each braccio of nearly two feet) in length; it is two braccio high, and one and a half wide. The price of charcoal is three and a half pauls the hundred pounds Tuscan.

29. The articles of clothing absolutely necessary for a labouring man are as follows:

	Pauls.
One fustian jacket	15
One waistcoat	4
Two pairs of pantaloons	16
Two shirts	20
Two pairs of stockings	4
One pair of shoes	11
New soles for ditto	5
Hat	5
	80

or nearly 2 *l.* sterling.

To the above may be added a short cloak, or mantle, said to last ten years, and which costs 45 pauls. It to be observed, that linen is always made in the family.

30. The chief manufactures of Tuscany consist in paper, tanning, glass, silk, earthen and porcelain wares, coral, alabaster, marble and boracic acid.

31. There is no regular provision made for paupers, and the sick and aged are maintained by their respective families.

32. Throughout the plains of Tuscany generally the farmers who divide the produce of the land with the proprietors are apparently in good circumstances. They are all well lodged; there is no want of food, clothing and firing; and those who cultivate tolerably well, and act prudently, have it in their power to make some savings. These, joined to their habits of sobriety, render their situation infinitely preferable to those of a similar class in Great Britain.

P. S.—The above information has, after diligent search, been obtained from the most experienced farmers and other competent authorities, in different parts of Tuscany, and may, therefore, be relied on.

It has been found impracticable to procure satisfactory answers, separately, to the Queries from No. 1 to 8; but it is hoped that the general information given on them will be approved of.

John Falconer, Consul.

AGRICULTURE.

COPIES of INSTRUCTIONS addressed to, and REPORTS received from, His Majesty's Consuls Abroad, with respect to the State of AGRICULTURE, and CONDITION of the POPULATION, within the Districts of their Consulates.

(Lord Viscount Palmerston.)

Ordered, by The House of Commons, *to be Printed,*
8 *March* 1836.

[*Price* 1 *s.* 9 *d.*]

84.

CARLISLE AND GLASGOW ROADS.

RETURN to an Order of the Honourable The House of Commons, dated 25 August 1835;—*for*,

A RETURN, showing, in detail, the Amount of DEBT affecting the TURNPIKE ROAD from *Glasgow* to *Carlisle*, by *Beatock Bridge*, distinguishing the Amount owing to Government, from that to other Creditors; also the Rates of Toll Dues, and the whole Amount of Gross and of Net Income; also the amount of Toll Dues paid daily, and in the course of the year, for the only Mail Coach running along the aforesaid Road; with the Number and Description of any other Public Carriages running regularly along the aforesaid Road; also the Number of Turnpikes, and the average or usual Distance between each.

RETURN, so far as concerns the Road from *Carlisle* to *Beatock Bridge*, and from *Elvanfoot* to *Hamilton*.

THE capital amount of the Government debt is 50,000 *l.*

	£.	s.	d.
The amount of other debts at Whitsunday 1835 is - - -	32,263	5	–
Interest on - - ditto - - ditto - - - - -	8,006	15	–
	£. 40,270	–	–

But, on the other hand, there was in bank, for answering the interest due to the latter, or for such improvements as may be agreed to by them, the sum of 4,247 *l.* 15 *s.* 9 *d.*, at the said term of Whitsunday 1835.

The following is a table of the toll dues levied:

For every horse or beast drawing any coach, barouche, &c., each, 1 *s.*
For every stage-coach or carriage of that description, one-half more.
For every horse, ox or beast drawing any waggon, wain, &c., drawn by not more than two oxen or beasts of draught, each, 6 *d.*
If drawn by three horses, oxen or other beasts of draught, each, 10 *d.*
If drawn by four or more horses, oxen or beasts of draught, each, 1 *s.*

For every horse or mule, saddled or unsaddled, laden or unladen, and not drawing, each, 3 *d.*
For every ass, loaded or unloaded, 2 *d.*
For every score of oxen or neat cattle, 1 *s.* 8 *d.*
And so in proportion for any greater or less number.

For every score of calves, hogs, sheep, lambs or goats, 10 *d.*
And so in proportion for any greater or less number.

For every drove of horses or fillies unshod, per score, 2 *s.* 6 *d.*
And so in proportion for any greater or less number.

For every horse, ox or beast drawing carts or other carriages loaded with coal or fuel, hay, straw, &c., if not drawn by more than two horses, oxen or beasts of draught, each, 3 *d.*
If drawn by three horses, oxen or beasts of draught, each, 5 *d.*
If drawn by four horses, oxen or beasts of draught, each, 6 *d.*

Note.—It has been lately resolved to take 6 *d.* per horse off the tolls payable by stage-coaches, post-chaises, gigs and other such carriages, and one penny off each riding horse.

The amount of gross income for the year ending Whitsunday 1835, was 6,107 *l.* 7 *s.*; and the amount of net income for the same period was 1,653 *l.* 14 *s.* 10 *d.*
The amount of toll dues paid daily for the Glasgow and Carlisle mail-coach, which is the only stage-coach that travels the whole line, is 6 *l.* 12 *s.*; and the amount paid yearly is 2,409 *l.* There being no toll charged on one of the bars, which is situated in England.
The Port Patrick and London mail also pays toll at one bar, 12 *s.* daily, or 219 *l.* per annum.

There are no other stage-coaches travelling regularly along the whole road; but there are occasionally stage-coaches travelling across the country, which pass through single bars on their way to different places, and these are charged at the same rate as above stated for the mails.

The number of turnpikes are 12; and the shortest distance between any bars which do not run pass tickets with each other is five miles, and the greatest distance eight miles.

Laurence Hill, Clerk.

RETURN, so far as concerns the Road from *Beatock Bridge* to *Elvanfoot.*

The amount of the capital debt is 13,230 *l.* 15 *s.* sterling. There is no debt due to Government.

The following are the rates of toll dues:

For every horse or beast drawing any coach, barouche, &c., 1 *s.*

For every stage-coach or carriage of that description, one-half more.

For every horse, ox or beast drawing any waggon, wain, &c., drawn by not more than two oxen or beasts of draught, each, 6 *d.*

If drawn by three horses, oxen or other beasts of draught, each, 10 *d.*

If drawn by four or more horses, oxen or beasts of draught, each, 1 *s.*

For every horse or mule, saddled or unsaddled, laden or unladen, and not drawing, each, 3 *d.*

For every ass, loaded or unloaded, 2 *d.*

For every score of oxen or neat cattle, 1 *s.* 8 *d.*

And so in proportion for any greater or less number.

For every score of calves, hogs, sheep, lambs or goats, 10 *d.*

And so in proportion for any greater or less number.

For every drove of horses or fillies unshod, per score, 2 *s.* 6 *d.*

And so in proportion for any greater or less number.

For every horse, ox or beast drawing carts or other carriages loaded with coal or other fuel, hay, straw, &c., if not drawn by more than two horses, oxen or beasts of draught, each, 3 *d.*

If drawn by three horses, oxen or beasts of draught, each, 5 *d.*

If drawn by four horses, oxen or beasts of draught, each, 6 *d.*

The amount of gross income for the year ending Whitsunday 1835, was 745 *l.* 10 *s.*; and the amount of net income for the same period was 566 *l.* 11 *s.* 5 *d.*

The amount of toll dues paid daily for the mail-coach is 24 *s.*, or 438 *l.* per annum.

There are no other public carriages running regularly along this road.

The number of turnpikes is two, and the distance between them is six miles nearly.

Laurence Hill, Clerk.

RETURN applicable to the Road from *Glasgow* to *Hamilton,* being the only part of the *Carlisle* Road for which I am Clerk.

I.—Debt.

The debt at present affecting the Glasgow and Shotts turnpike-roads is 9,983 *l.* 12 *s.* 7 *d.* That debt, however, affects the whole of the Glasgow and Shotts turnpike-roads, reaching eastward, to the confines of the county of Edinburgh, and embracing various branch roads, in all about 62 miles, of which only about 10 miles, viz., from Glasgow to Hamilton, are in the line of the road from Glasgow to Carlisle. No part of this debt is due to the Government.

II.—Rates of Toll Dues.

The rate of toll-dues at present levied upon the whole road, is as follows:

Stage Coaches:

1. For every horse or beast of draught, drawing any stage-coach, long coach or diligence, or carriage of the like kind, 9 *d.*

Private Carriages, &c.

2. For every horse or beast of draught, drawing any coach, barouche, chariot, landau, chaise, calash, chair cart, now or formerly known by the name of a taxed cart, on any hearse or other such carriage, 6 *d.*

Waggons and Carts:

3. For every waggon, wain or cart, or other such carriage, having more than two wheels, used for the purposes of trade, commerce or husbandry, or other like purposes; if drawn by one horse or beast of draught, 6 *d.*; by two horses or beasts of draught, 1 *s.*; by three horses or beasts of draught, 2 *s.*; by four horses or beasts of draught, 3 *s.*; by five horses or beasts of draught, 4 *s.*; by six or more horses or beasts of draught, 5 *s.*; for every waggon,

waggon, wain, cart, or other such carriage, having only two wheels, used for the purposes of trade, commerce, husbandry, or other like purpose; if drawn by one horse or beast of draught, 6 *d.*; by two or more horses or beasts of draught, 9 *d.*

Tolls for overweight, on Waggons and Carts:

When the waggon, wain or cart, whether with two or more wheels, with the loading, exceed 33 cwt. of 112 lbs. to the cwt., and does not exceed 40 cwt., then over and above the aforesaid tolls and duties, for every cwt. above 33 cwt., 1 *d.*; and if such waggon, wain or cart, with its loading, exceed 40 cwt., then over and above the aforesaid tolls and duties, for every cwt. above 40 cwt., 2 *d.*

Horses, Cattle, &c.:

4. For every horse or mule, with or without a rider, laden or unladen, and not drawing, 2 *d.*; For every ass, laden or unladen, and not drawing, 1 *d.*; for every ox or neat cattle, 1 *d.*; for calves, swine, hogs, sheep, lambs or goats, per score, 6 *d.*; and so in proportion for a greater or smaller number.

Note.—Manure, and stones for building and other purposes, as well as coals, pay a smaller rate of toll, and carts or carriages, having cylindrical wheels of certain breadth, also pay a restricted rate of toll-duty.

III.—Amount of Gross and of Net Income.

There are two turnpikes between Glasgow and Hamilton, one nearest to Glasgow, rented at	£.	3,945	– –
But this turnpike applies also to another line of road. And the other at		965	– –
Together	£.	4,910	– –

But the above sum is not the gross revenue of this portion of road, being to a great extent derived from other sources, viz., the line of road from Glasgow to Edinburgh, by Airdrie, which is entirely separate from the road in question. The revenue is also partly derived from the line of road from Glasgow to Edinburgh, by Shotts, which joins the Carlisle-road, about five miles from Glasgow. It is therefore impossible for me to state the gross revenue of the portion of road from Glasgow to Hamilton. Nor can I state the net revenue, because the funds drawn at the turnpikes above-mentioned, are applicable also to the support of other parts of the Glasgow and Shotts Trust, which, as I have already mentioned, extends to about 62 miles. On this point I have merely to add, that a very small proportion of the revenue at the turnpikes above-mentioned, indeed a mere fraction, is derived from through-going travellers, between Carlisle and Glasgow.

IV.—Toll Dues for the Mail, and Number and Description of other Carriages.

The amount of toll dues paid daily for the mail-coach running along this portion of the road is 8 *s.*, being 2 *s.* for each time of passing and repassing each of the two turnpikes, and amount annually is 146 *l.* sterling.

The number and description of other carriages at present running regularly along the aforesaid road are as follows, viz.:

Two coaches from Glasgow to Lanark, by way of Hamilton;

One coach from Glasgow to Strathaven, also by way of Hamilton;

Four coaches from Glasgow to Hamilton.

All these are drawn by two horses; and in summer there are usually two or three additional coaches of the same description.

V.—Number of Turnpikes, and the average or usual distance between each.

There are three turnpikes between Glasgow and Hamilton; but one being a check-bar, passengers only pay at two, between which the distance is fully five miles. The average distance between the turnpikes upon the whole roads is considerably greater.

Which Return is humbly submitted, having been subscribed by me at Glasgow this 16th day of October 1835.

Hugh Moncrieff,
Clerk to Glasgow and Shotts Road Trustees.

Statement suppplementary to the foregoing Return.

	£.	s.	d.
The amount of the Government debt	50,000	0	–
The amount of other debts is £. 32,263 5 –			
Interest on ditto at Whity, 1835 8,006 15 –	40,270	0	–
	90,270	0	–
Deducting the sum in bank	4,247	15	9
Leaves net debt	86,022	4	3

	£.	s.	d.
The amount of the gross annual income, including rents of toll bars and sums payable by mail coaches, is	6,107	7	–
The expenditure is	4,453	12	2
And the net income	1,653	14	10

Of the above 6,107 *l.* 7 *s.*, the Carlisle and Port Patrick mail pays daily for passing through the bar of Allison's Bank, or Gretna, 12 *s.*, or per annum 219 *l.*

Besides which, after leaving the line of the Glasgow and Carlisle road, a little north of Allison's Bank, this mail pays tolls to the trustees of the Dumfriesshire roads, of which the reporter has no note.

Of the said 6,107 *l.* 7 *s.* the Carlisle and Glasgow mail pays at the following bars, viz. at Allison's Bank, or Gretna Bar, Ecclefechan Bar, Lockerby Bar, Dinwoodie Green Bar, Palace Know, or Beatock Bar, and at Elvan-foot Bar, Abington Bar, Douglas Mill Bar, Lesmahago Bar, Canderdy Rehead Bar, and Avonbridge or Hamilton Bar;—

	£.		
Daily	6	12	–
Yearly	2,409	–	–

Besides these tolls, the Glasgow and Carlisle mail pays for passing through the following bars, which are on portions of road on the same line, but not under what is termed the Glasgow and Carlisle Trust, viz., the bars on the Evanwater Road or Trust, interjected between Beatock Bar and Elvan-foot Bar, say at Raecleugh Bar and Newton Bar;—

	£.		
Daily	1	4	–
Yearly	438	–	–

And also the bars on what is termed the Glasgow and Shotts Road Trust, between Hamilton and Glasgow; at Clydeside Bar and Gallowgate or Glasgow Bar;—

	£.		
Daily	–	8	–
Yearly	146	–	–

So that the Glasgow and Carlisle mail appears to pay daily of tolls to the three trusts 8 *l.* 4 *s.*; and yearly 2,993 *l.*

On the Evanwater Road or Trust, the debt and revenue of which are quite distinct from the Glasgow and Carlisle Trust, the gross debt is, 13,230 *l.* 15 *s.*

	£.	s.	d.
The gross annual revenue	745	10	–
The expenditure	178	18	7
The net revenue	566	11	5

Of the above gross revenue the Glasgow and Carlisle mail, as already stated, pays daily 1 *l.* 4 *s.*, or yearly 438 *l.*

On the Shotts Trust, or between Hamilton and Glasgow, there is some debt and a considerable revenue, but the Reporter refers to the Return made out by Mr. Moncrieff, the clerk of that road, for any further requisite information as to the same.

Laurence Hill.

THE Order of the House of Commons, dated 25 August 1835, requires answers in detail to several questions regarding the road between Glasgow and Carlisle, which answers could only be returned by the clerk of each trust separately, and such answers have been returned. But of the three trusts which form the entire line of road, two of them are so intermixed, although under the care of the same clerk, that nothing short of a description of the entire road in several sections can render the Return satisfactory or even intelligible to any enquirer not locally or officially acquainted with the road; and as the Order of the House of Commons describes the road as extending "from Glasgow to Carlisle," the sections shall be enumerated and described from north to south accordingly.

1. From Glasgow to Hamilton, the mail-coach road to Carlisle is part of the Glasgow and Shotts turnpike road, being, in fact, 11 miles (in a south-east direction) of the road which terminates at the border of the county of Edinburgh.

2. From Hamilton to Abington, or Elvan-foot, is the northern section of a trust which recommences after a considerable interruption. This northern section may be deemed a new road, made under the Act of 1816, and is about 24 miles in length.

3. From Elvan-foot to Beatock Bridge, a space of nearly 20 miles, the old road was at first deemed sufficiently improveable by its own resources, and therefore omitted in the Act of 1816; but comparison with the new road north and south of this section, afterwards induced application for a distinct Act of Parliament, which consequently created an intermediate trust, and unavoidable necessity for a separate Return.

TURNPIKE ROAD FROM GLASGOW TO CARLISLE.

4. From Beatock Bridge to Carlisle, a space of 40 miles, forms the southern section of the trust partly described (No. 2.); about one-half of this section of road is new, the other half an improvement of the old road. The south end of this section (about 10 miles) is part of the road between Carlisle and Port Patrick, serving a double purpose, in like manner as the road between Glasgow and Hamilton (No. 1.)

Edinburgh, 22d July 1836.

This Return prepared from Returns made to me by the different Persons suggested by the Sheriff Clerks of the Counties of Scotland, as the parties who could give the necessary information.

E. Cleghorn,
Crown Agent in Scotland.

TURNPIKE GATES (SCOTLAND).

RETURN of the RENTS of all TURNPIKE GATES in each County in *Scotland*, for the last Three Years preceding Whitsunday 1835.

(*Mr. Fox Maule.*)

Ordered, by The House of Commons, *to be Printed,*
1 *August* 1836.

297

AN ABSTRACT OF THE GENERAL STATEMENTS

OF THE

INCOME AND EXPENDITURE

OF THE SEVERAL

TURNPIKE TRUSTS

IN THE DIFFERENT COUNTIES OF

ENGLAND AND WALES,

FROM 1 JANUARY 1834 TO 31 DECEMBER 1834,

Pursuant to the Act 3 & 4 WILL. IV., c. 80.

Ordered, by The House of Commons, *to be Printed,*
4 *February* 1836.

[*Price* 1 *s.* 4 *d.*]

JAMES M'ADAM.

THE GENERAL STATEMENTS OF THE INCOME AND EXPENDITURE OF THE SEVERAL TRUSTS

are arranged in 41 Columns, under the following Heads:—

Col. 1.—NAMES OF TRUSTS; alphabetically arranged, in their respective Counties.

INCOME:

2.—Balance in Treasurer's hands, 1 January 1834.
3.—Revenue received from Tolls.
4.—Parish Composition in lieu of Statute Duty.
5.—Estimated Value of Statute Duty performed.
6.—Revenue from Fines.
7.—Revenue from Incidental Receipts.
8.—Amount of Money borrowed on the Security of the Tolls.
9.—TOTAL INCOME.

EXPENDITURE:

10.—Balance due to the Treasurer, 1 January 1834.
11.—Manual Labour.
12.—Team Labour, and Carriage of Materials.
13.—Materials for Surface Repairs.
14.—Land purchased.
15.—Damage done in obtaining Materials.
16.—Tradesmen's Bills.
17.—Salaries of Treasurers.
18.—Salaries of Clerks.
19.—Salaries of Surveyors.
20.—Law Charges.
21.—Interest of Debt.
22.—Improvements.
23.—Debts paid off.
24.—Incidental Expenses.
25.—Estimated Value of Statute Duty performed.
26.—TOTAL EXPENDITURE.

DEBTS:

27.—Bonded or Mortgage Debts.
28.—Rate of Interest per Cent.
29.—Floating Debts.
30.—Unpaid Interest.
31.—Balance due to Treasurer, 31 December 1834.
32.—TOTAL DEBTS.

ARREARS OF INCOME:

33.—Arrears of Tolls for current Year.
34.—Arrears of Parish Composition for current Year.
35.—Arrears of other Receipts for current Year.
36.—Arrears of former Years.
37.—Balance in Treasurer's hands, 31 December 1834.
38.—TOTAL ASSETS.

39.—Names of Treasurers.
40.—Names of Clerks.
41.—Names of Surveyors.

AN ABSTRACT of the General Statements of the INCOME and EXPENDITURE of the several TURNPIKE TRUSTS in the different Counties of *England* and *Wales*;—viz.

The Affidavits filed with the Clerk of the Peace are only signed by one Magistrate; the License by two at least, but as that is always given to the person licensed, the Clerk of the Peace cannot say who the other Magistrates are; but the Magistrates before whom the Affidavits were made (above-named) always signed the License with some other Magistrate or Magistrates.

March 15, 1836.

John Flood,
Clerk of the Peace for said County.

COUNTY OF THE CITY OF KILKENNY.

In laying the foregoing Return before the Honourable The House of Commons, I humbly beg leave to certify, that I have no document in my Office to enable me to comply with that part of their Order of the 18th February last, which requires the names and residences of the Magistrates who signed the Licenses to the foregoing persons to keep Arms, the said names being attached to the Licenses delivered to such persons on registering their Arms.

Waterford,
9 March 1836.

Bat. Delandre,
Clerk Peace, County Waterford.

CITY OF WATERFORD.

No.	Name.	Residence.	Number and Description of Arms.
1	John Blake	Waterford	One gun.
2	Henry Denny	ditto	Two guns and two pistols.
3	Rev. W. Frazer	ditto	One fowling-piece.
4	Laurence Forrestal	ditto	Two guns.
5	Thomas Fennelly	ditto	One gun.
6	William S. Hill	ditto	Two guns.

			Lbs.	18 8

County of Armagh, to wit, } I, John Hyde Cardwell, of Loughgall, in the said county, do declare that the above return of names and residences, also the quantities as specified opposite each individual's name in the said account, is, to the best of my knowledge and belief, true and correct.

John H. Cardwell.

Sworn before me, this 25th day of February 1836,

John Hardy.

M O Y.

County of Armagh, to wit. } John H. Jackson came this day before me, and made oath on the Holy Evangelists, and saith, that the annexed return of sales is correct to the best of his knowledge; and also that he believes he swore to the original of the same before Captain Hay, in Moy, at a former period.

Sworn before me, at Moy, this 25th February 1836,

James Hay,

J. P. for Counties Tyrone and Armagh.

John H. Jackson.

GUNPOWDER.

A RETURN of the GUNPOWDER Sold by the Licensed Retailers of Gunpowder in *Armagh, Loughgall, Moy* and *Charlemont*, between the 15th and 30th January last.

(*Mr. Finn.*)

Ordered, by The House of Commons, *to be Printed,*
18 *March* 1836.

527

HIGH SHERIFFS, IRELAND.

RETURN to an Order of the Honourable The House of Commons, dated 18 February 1836;—*for*,

A RETURN of the several Persons Recommended by the Judges to fill the Office of High Sheriff in the respective Counties of *Ireland*, for the present Year, and for the last Five Years; and also of those Persons who have actually been Appointed; specifying those (if any) who have received a notification of Appointment, and were subsequently set aside; and also specifying those instances (if any) in which the Three Persons returned by the Judges were passed over, and whether it was without the concurrence of such Persons; also, whether any Appointments have been made without reference to the Judges.

(*Colonel Perceval.*)

Ordered, by The House of Commons, *to be Printed*,
25 *March* 1836.

J. DRUMMOND.

CONSTABULARY FORCE, IRELAND.

A STATEMENT of the Amount of CONSTABULARY FORCE employed in each County, County of a City and County of a Town, in *Ireland*, on 1st January 1836, &c.

(Mr. W. S. O'Brien.)

Ordered, by The House of Commons, *to be Printed*
28 *April* 1836.

535

BOARD OF CHARITABLE BEQUESTS (IRELAND.)

RETURN to an Order of the Honourable The House of Commons, dated 12 April 1836;—*for*,

A RETURN of the SUMS of MONEY now in the hands of the BOARD OF CHARITABLE BEQUESTS in *Ireland*, and whether the Board is bound by any Resolution to apply that Sum in any particular Mode or to any particular Charity.

	£.	s.	d.
Government Old Three-and-a-half per Cent. Stock - - -	50,246	17	2
Ditto New - ditto - - - ditto - - - - -	28,469	19	6
Ditto Reduced ditto - - ditto - - - - -	845	17	3
Ditto Three per Cent. Consols - - - - -	19,533	17	2
Debentures - - - - - - - - - -	700	–	–
Government Stock standing in the Name of the Commissionerss of Charitable Donations and Bequests jointly with other persons - - - - -	10,446	9	4

The foregoing Sums are applicable to several distinct Charities, and the Interest and Dividends are, from time to time as they accrue due and become payable, applied according to the directions of the respective Donors and Testators, or as near thereto as circumstances will permit. There is not any general Resolution for the application of the Funds under the management of the Commissioners in any particular mode; but on each Sum being paid to their credit or recovered, an Order is made for its application in strict accordance with the directions of the Donor or Testator.

By Order.

William P. Matthews,
Secretary to the Board.

Board Room, Dublin Castle,
29 April 1836.

BOARD OF CHARITABLE BEQUESTS, (IRELAND.)

A RETURN of the Sums of Money now in the hands of the Board of Charitable Bequests in *Ireland*.

(*Mr. French.*)

Ordered, by The House of Commons, *to be Printed,*
13 *May* 1836.

REGISTRATION OF DEEDS (IRELAND).

RETURN to an Order of the Honourable The House of Commons, dated 3 March 1836 ;—*for,*

A RETURN, showing the Receipts and Expenditure of the Office for the Registration of Deeds in *Dublin* for One Year, in continuation of the Return presented to The House in 1835; distinguishing the Ordinary from the Extraordinary Expenses; stating the Total Number of Registries and Searches made during the Year, and the Average Cost of each; and also specifying the Surplus Receipts which have been paid into the Treasury since the Year 1830 by the Registries; also specifying the Progress made in forming new Indexes.

YEAR ending 31st December 1835.

RECEIPTS:

DEEDS.	Negative or Certified Searches.	Head Clerks or Common Searches.	Miscellaneous Matters; Comprising attested Copies of Memorials, Searches made by the Public, anonymous Partnership Deeds, Satisfactions of Mortgages and Memorials to Assizes, Masters' Offices and the Courts.	Abatements made from Clerks, in pursuance of 4 & 5 Will. IV.	GROSS AMOUNT.
£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.
3,872 5 6	2,178 10 –	2,131 1 –	1,239 15 4	45 9 3	9,467 1 1

EXPENDITURE:

CLERKS.	Parchment.†		Stationery and Bookbinding.†		Fuel and Care of Apartments.	Sundries.	Assistant Registrars and Clerks.	Registrar.	Gross Amount.	Lodged in Bank to the Credit of the Teller of the Exchequer. *
	Ordinary.	Extraordinary.	Ordinary.	Extraordinary.						
£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.
3,903 5 1	490 – –	680 – –	265 9 1	987 11 2	66 15 1	8 7 1½	1,670 17 9½	1,500 – –	9,572 5 4	119 9 4

NUMBER AND AVERAGE COST OF REGISTRIES AND SEARCHES.

REGISTRIES.		SEARCHES.				SURPLUS RECEIPTS,	
		Negative or Certified.		Head Clerks, or Common.		Paid into the Treasury between May 1830 (the period at which the late Register, Lord Kilwarden, died, and at which these Payments commenced) and the 31st December 1835.	
Number.	Average Cost of each.	Number.	Average Cost of each.	Number.	Average Cost of each.		
*	£. s. d.		£. s. d.		£. s. d.	£. s. d.	
6,682	– 11 7	356	6 2 4½	1,459	1 9 2½	9,722 18 10½	It is to be observed, that these lodgments have somewhat exceeded the surplus Receipts, inasmuch as in the Quarter's Account, ending 31st December 1835, there is a balance in favour of the Register of £. 224. 13. 7.

† With respect to the Expenses under the head of Extraordinary, in the articles of Parchment, Stationery and Bookbinding, it is to be observed, that a considerable portion of these has been incurred in the preparation of the New Series of Indexes of Lands and Parties' Names, directed by the 2d & 3d Will. 4, for the period between the 1st January 1836 and 1st January 1840. The remainder of these Expenses has been incurred principally in re-binding the old Office Books.

In consequence of the want of sufficient accommodation in space for additional Clerks to be employed in the re-construction of the old Indexes (which the Register presumes is what is meant in the Order by the term "New Indexes,") the progress of this work has been hitherto limited to the preliminary process of forming Abstract Books, and this has been carried through 16,800 Memorials. But little sensible progress, however, can be expected in the preparation of these Indexes until such additional accommodation be supplied. Since the passing of the 2d & 3d Will. 4, the Register has had several communications with the Commissioners of Public Works on this subject, the result of which has been to hold out an expectation that in the range of Buildings about to be erected at the Four Courts, a new set of Apartments will be assigned for this Office sufficiently capacious for all purposes.

George Moore, Regr.

RETURN

Showing the Receipts and Expenditure of the Office for the Registration of Deeds in *Dublin* for One Year.

(*Mr. Jephson.*)

Ordered, by The House of Commons, *to be Printed,*
23 *March* 1836.

539

Ordered, by The House of Commons, *to be Printed,*
18 *April* 1836.

RIVER SHANNON.

RETURN to an Order of the Honourable The House of Commons, dated 17 February 1836;—*for*,

A COPY of the INSTRUCTIONS given to the Commissioners appointed under the 5 & 6 Will. IV. c. 67, for the Improvement of the River *Shannon*; with the Date of their Appointment, and the Date of their First Meeting in their capacity of Commissioners.

Whitehall, Treasury Chambers, 26 February 1836.

F. BARING.

COPY of TREASURY MINUTE, dated 24 November 1835.

MY LORDS read the Act of the last Session for the improvement of the River Shannon, and also the Report of the Select Committee of the House of Commons on the same subject, ordered to be printed on the 29th July 1834; they have also before them the Reports of Captain Mudge and Mr. Rhodes.

5 & 6 Will. 4, c. 67.

My Lords advert to the preamble of the 5th & 6th William IV., in which it is recited that the improvement of the River Shannon from its source to the mouth will greatly contribute to the general prosperity of the commerce, agriculture and revenue of Ireland, and also to the advantage and improvement of the counties and districts adjoining such navigation, and that an expenditure necessary to effect such improvement shall, when the surveys, estimates and conditions are approved of by Parliament, be carried into effect out of the public revenue, one-half of such expenditure being afterwards repaid by the districts interested.

Sess. Papers, No. 532, 1834.

Under the provisions of this Statute, this Board is bound to appoint three or more Commissioners to carry into effect the objects of the hereinbefore recited Act, and more especially,

1. To ascertain the works necessary to be executed for the improvement of the navigation of the River Shannon.

2. To make estimates of the expenses of such works.

3. To determine the districts or counties which may be considered directly benefited by these improvements.

4. To consider in what proportion the counties or districts so benefited may justly be made to contribute to the repayment of advances made by the public.

5. To inquire into and adjudicate upon claims for compensation, taking into account not only the loss which particular owners or occupiers may sustain by the proposed works, or any part thereof, but the benefit which may accrue to such owners or occupiers by the improvement of the navigation.

6. To determine the amount of toll which ought hereafter to be imposed on the Shannon navigation when improved, for maintaining such improvements and repaying the sums advanced.

7. To ascertain the proper places for the formation of necessary havens, piers, wharfs, and landing places; distinguishing such as ought to form part of the intended works from such as may justly be left to individual enterprize.

My Lords, considering the important duties which are thus prescribed to the future Commissioners, have felt the utmost anxiety to select persons who from character, professional skill, experience and habits of business, are most competent to carry into effect the

intentions

intentions of the Legislature, unswayed by any local bias or interest. With these views My Lords have selected, and by this Minute do constitute and appoint the following persons to be Commissioners, under the provisions of the 5th & 6th Will. IV. c. 67.

Colonel J. F. Burgoyne, of His Majesty's Royal Engineers, First Commissioner of Public Works, to be Chairman of the new Board.
Captain Jones, Royal Engineers.
Richard Griffith, Esq. civil engineer.
W. Cubitt, Esq. civil engineer.
T. Rhodes, Esq. civil engineer.

Write to Colonel Burgoyne for the purpose of notifying to him his appointment, directing him to make the same known to the other Commissioners; and request him to take the most immediate steps for carrying the intentions of the Board into effect, as it is the earnest desire of My Lords that the whole question should be brought before Parliament early in the ensuing Session.

Let copies of all the Papers and Reports on the subject of the improvement of the River Shannon, together with the original surveys, plans, maps and estimates, where the same are necessary for the purposes of this Minute, be placed in the hands of Colonel Burgoyne for the use of the Commissioners.

Transmit also a copy of the Act 5th & 6th Will. IV. for their guidance.

My Lords conceive that these documents will furnish the Commissioners with a great mass of valuable information, both in relation to the present state of the river and to the plans which may be adopted for its improvement. These plans the Commissioners will carefully consider; adopting, rejecting or modifying them, should they think fit so to do upon deliberate and careful examination of the documents, and after an early and careful inspection of the river and the districts adjacent where it may be required. For the executive purposes of survey it may be necessary to employ subordinate officers and workmen, with respect to whom and to the rates of remuneration it is My Lords' pleasure that the opinion of Colonel Burgoyne should be communicated to this Board, and they desire that this branch of the expenditure may be kept within as narrow bounds as is consistent with a due discharge of the duties of the Commission.

My Lords feel themselves bound to direct the attention of the Commissioners specially to the provisions of the 7th section of the Act, by which they are required to adjudicate upon claims for compensation or for damages arising under the execution of the proposed improvements. It is stated in the Report of the Select Committee to be very doubtful whether the owners of such eel-weirs as are encroachments on the Royalties of the Crown, are entitled to any compensation whatever. In this and in analogous cases it becomes of the most extreme importance that no claim that is not shown to be a matter of legal right, should be entertained as a subject of compensation. The Commissioners, when they have collected the facts, will lay them, if necessary, before the law-officers of the Crown for their opinion, and will proceed to frame the rules directed to be published under which claims for compensation are to be prepared and awards made. For the purpose of enabling them to perform effectually these legal functions, My Lords appoint the Crown Solicitor for the Munster Circuit to act as solicitor to the new Board. The Commissioners will seek to impress upon the minds of all the parties concerned, the importance that a great national work about to be undertaken by Parliament with a view to general interests, should not be impeded by any unreasonable claims for compensation on the part of private individuals. My Lords direct the Commissioners to frame their plans and estimates with the utmost expedition and care, including in such estimates the amount of compensation which may be awarded. In the Report which My Lords expect to receive on the subject, the Commissioners will include a statement of any further legislative measures which may be considered necessary, and a statement of the time which may be required for the completion of the work.

It is the intention of My Lords, whilst nothing is omitted that is requisite for the substantial and permanent character of the works, that the whole should be executed in the most plain and economical manner; all extra expense for decoration and ornament being rejected, as the magnitude and importance of the work will, in fact, be its most appropriate ornament. The main object will be to establish a good navigation in the Shannon, in no part inferior to that of the two great canals; bearing constantly in mind the necessity of providing such additional capabilities as may be necessary for the free passage of an appropriate class of steam vessels, suited to the river and lake navigation.

The Commissioners will seek, as far as may be practicable, to combine with this main object a useful drainage of the neighbouring lands; and such substitution of new mill sites and water power as may be the best compensation for mills, dams, weirs and watercourses, with which the proposed works may interfere.

The Commissioners will also consider the engagements and liabilities with respect to the navigation entered into by the Grand Canal Company, the extent to which these engagements have or have not been fulfilled, the steps that may be recommended thereon, and the recommendation of bringing the whole navigation of the River Shannon under one authority for its maintenance and management.

My Lords will from time to time give the Commissioners such further instructions and authority as circumstances may require, and they desire that a letter may be written to Lord Morpeth, communicating to him, for the information of his Excellency the Lord-lieutenant, the appointment of this Commission, and requesting him to move his Excellency to afford to the Commissioners such assistance and authority as may appear to him necessary.

Transmit copies of this Minute to Lord Morpeth and Colonel Burgoyne.

Write at the same time to the Secretary of the Ordnance, and desire he will state to the Master-general and Board, that My Lords being desirous to avail themselves of the assistance of Captain H. Jones of the Royal Engineers, upon this temporary but important service, their Lordships request that he may receive the authority of the Master-general and Board to undertake it, and to proceed to Ireland for that purpose.

THE Commissioners were appointed by the foregoing Minute, dated 24th November 1835.

The Minute was received in Dublin on the 30th of November.

The five Commissioners assembled and sworn in according to the Act of Parliament, and proceeded with the service on the 9th December.

N. B.—Several meetings on the business took place between 30th November and 9th December, of the different Commissioners as they arrived by degrees in Dublin.

J. F. Burgoyne.

581

SHANNON NAVIGATION.

COPY of the REPORT of the COMMISSIONERS appointed pursuant to the Act 5 & 6 WILLIAM IV. c. 67, for the IMPROVEMENT of the NAVIGATION of the River *Shannon*.

Whitehall, Treasury Chambers,
28 March 1836.

T. BARING.

TO THE LORDS OF HIS MAJESTY'S TREASURY.

May it please your Lordships,

THE undersigned Commissioners of the Shannon Navigation, appointed by a Treasury Minute on the 24th of November 1835, and acting under the powers vested in them by 5 & 6 William IV. c. 67, have to report as follows:—

That in pursuance of Instructions contained in the aforesaid Treasury Minute, they have lost no time in inquiring into and making themselves acquainted with the important subject committed to their investigation, by taking a personal view of the whole of the River Shannon from the Sea at its mouth, to its source in Lough Allen, in order to observe the general state of navigation, and the flooded lands on each side during the winter season.

The result of this inspection in the minds of the Commissioners has been, that it will require at least one entire season to enable them to complete a detailed investigation on the several points connected with the inquiry; but from what they have seen, and referring to the matter which has been so ably set forth, and on such correct principles, by Captain Mudge and Mr. Rhodes, it appears to them that the subject may be fairly brought under five separate and distinct heads for consideration, each of which would form an entire subject of itself, and would make a perfect and useful whole independent of the others; and if allowed to treat the subject in this manner, the Commissioners hope to be able to investigate into the detail of any one (and perhaps the most important) division, so as to be ready to present a definite report and recommendation on it during the present Session of Parliament.

The necessity for the proposed subdivision originates in the peculiarity of the River Shannon, which in different parts presents characters so distinct, that it will be necessary to vary the scale and description of the navigations to be proposed, so as to suit them to the circumstances of each particular portion.

That part of the River Shannon comprehended between the Western Headlands at its mouth and the City of Limerick, and also the River Fergus to Ennis, will naturally form the first division; these are tide rivers, and partake more of the character of great sea estuaries than of rivers.

Above Limerick and as far as Killaloe, the River is comparatively rapid, and its breadth is less imposing than in the upper portions; the distance between these points is 15 miles, and the fall is 88 feet 8 inches; the navigation is effected partly by the river and partly by side canals with locks.

But above Killaloe and as far as Tarmunbarry, in the county of Longford, a distance of 85 miles, the fall is but 16 feet 8 inches; here the Shannon rather presents the character of a chain of large and deep inland lakes than of an ordinary river. This is, perhaps, the most interesting and important part, inasmuch as it passes through the centre of the country, and can be rendered navigable for steam vessels of a large class at a comparatively moderate expense. This portion comprehends the great Lakes of Lough Derg and Lough Rhee, and receives the tributary streams of the Scariff, Woodford, Ballyshrule, Brusna and Suck, forming together a vast

extent of waters, which at present, with the exception of Lough Derg, is very deficient, either as a medium of navigation or of drainage.

Above Tarmunbarry and as far as Leitrim, a distance of thirty miles, though the River still preserves the same character, still the lakes are smaller, the connecting river narrower, and the fall more rapid than in the foregoing division; while above Leitrim and as far as Lough Allen the River becomes still smaller and more rapid, and in these respects resembles the second portion, or that between Limerick and Killaloe; in this part an imperfect Canal has been formed to avoid the rapids of the River.

In order to bring the whole subject into view, it may be well to state as briefly as possible the nature and circumstances of each of the above divisions of the River; for although the Reports of Captain Mudge and Mr. Rhodes give a very correct description of the state of the navigation from one end to the other, yet as they are too long to transcribe, and as it has been proved by experience that whenever new means of intercourse have been opened, whether by roads or navigation, an increase in agriculture and commerce has followed in a proportion far exceeding what could have been anticipated from the expense incurred, the Commissioners deem it best to set forth the state of the navigation, &c. as it appeared to them on a primary view, with their ideas generally as to the best mode and scale of improvement, referring to the Reports above mentioned, for the plans and more detailed information on the subject. And—

1st.—Of Division No. 1, on the *Lower Shannon*, from the Sea to *Limerick*, including the River *Fergus* to *Clare* and *Ennis*.

The state of these Rivers is very minutely described by Captain Mudge, in his Reports of 1831; the navigable channels are good, with the exception of a few points, which can be improved at a comparatively small expense; but they are exceedingly deficient in beacons, buoys and marks to guide vessels in navigating them; neither is there any conservation of the navigation, nor any funds applicable for its improvement and maintenance.

The shores on either side abound with suitable places for small harbours, piers or landing quays, which would be very beneficial to the country, and more particularly since the establishment of daily steam packets up and down the Shannon, which by opening an easy, cheap and expeditious intercourse between Limerick and the country on both sides, are calculated to give a great stimulus to internal commerce; but the means of landing and shipping goods and passengers at important stations on either side are very deficient, and no considerable trade can be carried on until suitable piers and landing wharfs shall have been erected.

The present feeling of the Commissioners from the first view of the locality is, that to propose and lay down any definite plan which should comprise all that is necessary to be done to complete the Navigation of the Lower Shannon and Fergus at any given expense would be totally impossible, as the operations must, from their nature and causes, be progressive, although there is no doubt that a moderate sum might be most usefully laid out in improving the Navigation and Harbours of these rivers below Limerick and Ennis.

As regards the question of raising the necessary funds for the above purposes, it appears to the Commissioners that as far as the Navigation of the River is concerned in the erection and maintenance of beacons and buoys, &c., let the first cost come from what source it may, whether by public grant, general or local district assessments, or a combination of all, the conservancy and maintenance thereof at least should be defrayed by a fair and equitable tax upon all and every vessel navigating the River.

For this purpose it would appear advisable to place the conservation of the River Shannon below Limerick in the hands of the Limerick Dock Commissioners, giving them the power to punish offenders, and authorizing them to levy dues, according to a fixed graduated scale, from all vessels navigating the River; and that similar powers be granted to the Commissioners at Ennis respecting the River Fergus.

With

With respect to the question of Harbours, Piers and Landing Places, the Commissioners are of opinion, that although it would be necessary and publicly useful to establish such at several important situations, yet as all other places but those chosen would think themselves equally entitled, and as local and individual enterprise should lead in these matters, it appears desirable to establish some just regulations for most cases, namely, that as soon as any individual landed proprietor or commercial body, or local subscription, or all together, shall come forward with a fund, calling upon the Commissioners to form a harbour or erect any pier or landing place under the powers of this Act, they will decide on the measure, and apportion such additional funds, by way of grant or district assessment, as may seem best adapted to the case, under certain rules and regulations, which the Commissioners could frame for the purpose.

2d.—Of Division No. 2, or the Navigation of the *Shannon* from *Limerick* to *Killaloe.*

In this division a navigation of fifteen miles is effected by means of artificial side cuts or canals, with locks capable of passing boats of fifty tons burden, such as navigate the Grand and Royal Canals, and being part river and part canal, is subject to all the difficulties and delays of a river navigation; and it appears a question with the Commissioners, whether it would not be better to complete it as a canal navigation for the whole distance, rather than to improve the present river and cuts; but as some surveys are requisite to ascertain these facts, and as the subject does not require the immediate decision which is called for respecting the other parts of the River, the question must stand over till plans and estimates can be prepared, and a detailed recommendation given on the subject.

Division No. 3, comprising the River *Shannon* from *Killaloe* to *Tarmunbarry.*

This division of the Shannon, in a direct course of eighty-five miles, includes the two great inland lakes of Lough Derg and Lough Rhee, and comprises above two hundred miles of coast, with the entrances to the Grand and Royal Canals, and the mouths of several rivers, either navigable or capable of being easily made so; it is by far the most important division of the whole, and is worthy of immediate and distinct consideration. The Commissioners are decidedly of opinion that its navigation may be improved, and the drainage of the adjoining lands effected, upon the principle so ably set forth and explained by Mr. Rhodes in his Reports on the subject in 1832, with very little alteration or modification of the particular plans laid down by him for each point, but which modification will require some additional surveys and researches. To prove the great importance of this portion of the Navigation, a return is inserted in the Appendix, showing the great increase of trade and produce brought from the Shannon, *viâ* Dublin, to Liverpool, during the last three years, being in the half-year ending in the present month, more than twelve times the quantity during the half-year ending in February 1833, viz. 3,434 sacks of oatmeal and wheat-flour in the half-year ending in February 1833; and 44,486 sacks of the same in the half-year ending in February 1836. The City of Dublin Steam Navigation Company have several small steam boats which can navigate from Portumna Bridge to Athlow (a part of the Navigation at present under the control of the Grand Canal Company), and included in this division, but they are not fitted for the navigation of the large lakes and broad waters; they have also one steamer in Lough Derg, the "Lady Lansdowne," a very fine vessel of nearly three hundred tons burden, and impelled by engines of one hundred horse power; this vessel can navigate Lough Derg from Killaloe to Portumna Bridge in all weathers, and draw after her four large barges each of fifty tons burden, collecting them at the various stations and little harbours along the Lough, and delivering them either at Portumna, on their way to the Grand Canal, or at Killaloe, on their way to Limerick, as the case may be; and were this division of the River improved as proposed, the same class of steam vessels and the same means for facilitating trade and intercourse would be extended from Killaloe to the entrance of the Royal Canal near Tarmunbarry, and thus bring into immediate and improved action all the navigations of the River above and below those points, even in their present defective state. To effect this great object would require two locks only,

three weirs, four swing bridges, and the river to be cleared from obstructions; in doing which, many thousand acres of valuable land could be secured from floods, and the agriculture, trade, navigation and intercourse of a vast extent of country greatly improved.

Such are the general reasons (without going into particulars) which induce the Commissioners to look upon this division as the most important part of the inquiry; and further, from the consideration, that if all the other divisions were completed, and this left undone, little or no benefit would be effected; whereas if this were completed, and all the others left in their present state, a great public benefit would be gained.

The Division No. 4, from *Tarmunbarry* to *Leitrim*.

This division of the River, which comprises about thirty miles, the Commissioners recommend to be improved upon the same principles as the foregoing, but on a smaller scale than that laid down by Mr. Rhodes, as a much smaller class of steamers will be capable of conducting the trade through it, and be amply sufficient for all the present and prospective wants of the country; and the same advantages, with regard to the drainage and regulation of the flood waters, would be obtained, as if the Navigation were on a larger scale.

Thus these two divisions will be made available for trade by means of tug steam-vessels to tow fifty-ton barges, similar to those which navigate the Grand and Royal Canals and the other portions of the Shannon.

The Division No. 5, or the Canal Navigation from *Leitrim* to *Lough Allen*.

All that is required in this division, is to put the present work in an improved state of repair, and to regulate the flood waters of Lough Allen, and to clear the River, as proposed by Mr. Rhodes.

Such are the general views taken by the Commissioners in consequence of their first inspection of this important Navigation, the capabilities and extent of which are little known and less understood.

To bring the whole subject to a conclusion, according to the tenor of their Instructions, would be impossible in one season; but with great exertion, and with liberty to turn their attention to and give directions for the immediate prosecution of what they conceive to be the most important division of the works, viz. from Killaloe to Tarmunbarry, they entertain hopes of being able to come to a final report and recommendation on that part before the close of the present Session of Parliament.

LUNATIC ASYLUMS, IRELAND.

RETURNS to several Orders of The Honourable The House of Commons, dated 22 July 1835;—*for*,

—(1.)—

A RETURN of each DISTRICT LUNATIC ASYLUM established in *Ireland*; specifying the Name, the Year in which opened, the Number of Patients for which it was intended, the Quantity of Land purchased, the Price by the English Acre, Amount of Purchase Money, Cost of Building, Amount of Furniture, Bedding and other Contingencies, and Total Expenditure; also, the Names of the Counties attached to each, with the Population as in 1831, and the Total Population of each District.

—(2.)—

A RETURN of the PROPORTION which each County was to pay of the first Expense of each DISTRICT LUNATIC ASYLUM, the Amount and Date of Payment of each Instalment paid by each County, and the Sum still due by each County.

—(3.)—

A RETURN of the EXPENSE of each DISTRICT LUNATIC ASYLUM in each Year ending 5 January, since its Establishment, the Number of Lunatics in each Asylum from each County on 5 January in each Year, the Total Expense of a Patient in each Year, and the Sum charged to each County in each Year ending 5 January.

—(4.)—

A RETURN of the Number of PATIENTS in each ASYLUM on each 5th Day of January, and of those who were Admitted, were Discharged or Died; distinguishing those Discharged, as Cured, as Relieved, or as Harmless and Incurable, in each Year.

—(5.)—

A RETURN of the EXPENSE of each DISTRICT LUNATIC ASYLUM in each Year since its Establishment; stating the Date of the Day the Year ends, the Total Expenditure, the Total Cost per Head, calculated from the Average Number of Patients during the Year; the Expenditure in Furniture, Linen and Bedding; the Expenditure in Fixtures, Additions, Alterations, Workmen's Bills, &c.; the Expenditure in Clothing, Cost per Head in Clothing calculated only from the Average Number; the Expenditure in Salaries and Servants' Wages, Cost per Head per Annum for Salaries and Servants' Wages calculated from the Average; the Expenditure in Food only, Cost per Head per Annum in Food only, Cost per Head per Week in Food only, Cost per Head per Diem in Food only.

(Sir Robert Ferguson.)

Ordered, by The House of Commons, *to be Printed*,
2 *March* 1836.

A RETURN of each DISTRICT LUNATIC ASYLUM established in *Ireland*; specifying the Name, the Year in which opened, the Number of Patients for which intended, the Quantity of Land purchased, the Price by the English Acre, Amount of Purchase Money, Cost of Building, Amount of Furniture, Bedding, and other Contingencies, and Total Expenditure; also, the Names of the Counties attached to each, with the Population as in 1831, and the Total Population of each District.

Name of the District Asylum.	Year opened.	Number of Patients intended for.	Land purchased. English.	Price per Acre. English.	Amount of Purchase Money.	Amount of Building.	Furniture, Bedding, and other Contingencies.	TOTAL.

I beg reference to my letter, dated 4th ult., in which I have fully explained the 16 instalments raised instead of 14, which repaid the original sum advanced, 6,018 *l.* 9 *s.* 4¾ *d.* The governor of Armagh Asylum can furnish the other particulars.

Sir, Secretary's Office, Armagh, 17 Aug. 1835.

I have the honour to acknowledge the receipt of your letter, with its enclosure, dated 7th June; and, in reply thereto, beg leave to state, that the information you seek can most accurately be furnished by the governor of the Armagh District Lunatic Asylum.

The county grand warrant does not give the information required. I have given what falls within my department; and I am of opinion, that I best consult the public interest by thus referring you to the governor, Thomas Jackson, esq., a zealous and efficient officer.

I have, &c.

From 31 Oct. 1832 To 31 Mar. 1834	2,674 5 3	53 9 8½	143 3 [illegible]1	657 4 1	197 12 1	3 19 –½	705 4 7	14 – 5	450 17 7	6 7 –	2 5½	– 4¼
To 31 Mar. 1835	2,306 15 9	28 7 3	184 4 –	224 6 5	129 4 6	1 11 9½	615 5 1	7 11 2½	752 10 9	7 2 9	2 8½	– 4¾

GENERAL EXPENDITURE:—The heavy expenses for outfit and additional buildings in the first and second years, calculated from the small average number of patients supported, makes the rate per head appear high. Average, 1st year, 50 patients; 2d year, 81 ½ ditto.

CLOTHING:—Materials for clothing were purchased for the full number; but the calculation is made from the average number supported, as ordered.

FOOD:—The keeper's and servants' food is included under this head, and they receiving a larger and more expensive allowance than the patients, the rate per head may appear high.

RICHMOND ASYLUM,

Comprising the Counties of *Dublin, Dublin City, Drogheda County Town, Louth County, Meath County, Wicklow County.*

The *Richmond* Lunatic Asylum was built in the city of Dublin in the year 1815, by Parliamentary grant, for admission of all Pauper Lunatics throughout Ireland. By the Act of 11 Geo. 4, c. 22, it was created a District Asylum, subject to the rules and regulations contained in the Acts of 1 & 2 Geo. 4, c. 33, for the erection of asylums in Ireland. His Excellency the Lord Lieutenant, pursuant to the powers invested in him by the Act of 11 Geo. 4, was pleased to allot thereto the following counties to form the district, viz. county of city of Dublin, counties of Dublin, Meath, Wicklow, Louth, also the county of the town of Drogheda.

Population in 1831.

County of City of Dublin - - - - - - -	204,155
County of Dublin - - - - - - - -	176,012
County of Meath - - - - - - - -	176,826
County of Wicklow - - - - - - -	121,557
County of Louth - - - - - - - -	107,481
County of Town of Drogheda - - - - - -	17,365
Total Amount of Population - - -	803,396

This asylum was intended for 257 patients, but from the press of patients for admission, apartments not originally intended for patients have been within the last few years appropriated for their use, and the asylum now contains 286 patients.

This asylum was constructed and furnished by means of Parliamentary grants, and without charge of any particular county, as a general asylum, and was used as such until the year 1831, when it was declared by the 1 & 2 Geo. 4, c. 33, a District Asylum, and appropriated accordingly.

RETURN of PATIENTS in the *Richmond* District Lunatic Asylum.

Number of Patients on 5 January in each Year.	Admitted.	Discharged, As Cured.	Discharged, As Relieved.	Discharged, As Harmless and Incurable.	Died.	Total Discharged and Died. RETURNS

RELATING TO

DISTRICT LUNATIC ASYLUMS IN IRELAND.

(Sir Robert Ferguson.)

Ordered, by The House of Commons, *to be Printed*,
2 *March* 1836.

6/3

CROWN LAND EXPERIMENTAL IMPROVEMENTS, AND CORK AND KERRY NEW ROADS.

COPIES OF FURTHER PAPERS relating to Experimental Improvements on the Crown Lands at *King William's Town*, in the Barony of *Duhallow* in the County of *Cork*; and to the New Lines of Public Road in course of construction through the district in which the said Lands are situated, in the Counties of *Cork* and *Kerry*; for the purpose of encouraging the Employment of the Labouring Poor in similar Improvements on other Estates in *Ireland*.

IN submitting a further Report from Mr. Griffith on the subject of the Experimental Improvements on the Crown Lands of King William's Town, in the county of Cork, the Commissioners of His Majesty's Woods, &c., are anxious to recal to the recollection of Parliament, the circumstances under which the reclamation of this property was in the year 1831 first undertaken.

It having been thought desirable to try some experiments in Ireland in reclaiming waste land, a mountainous estate belonging to the Crown was selected, in a situation almost at that time inaccessible, and where no species of Improvement had ever been attempted. Under the authority of Parliament, the Commissioners of His Majesty's Woods commenced a Road from Roskeen-bridge, between Kanturk and Mallow, in the county of Cork, to Castle Island, in the county of Kerry, passing through the centre of the Crown property; and at the same time commenced a village and other improvements, the extent of which has been submitted to Parliament in former Reports.

The Commissioners have the satisfaction of finding that the improvements that have taken place, have thus far exceeded the utmost expectations which were entertained on the subject, and that a wild sterile bog and moor is becoming every day more fertile and valuable; and it is hoped the example thus set will be extensively followed by those who have property of a similar description.

The Commissioners cannot conclude these observations without expressing how much they are indebted to Mr. Griffith, the Civil Engineer, under whom the works have been carried on, for his constant and unwearied attention in enabling them to give a fair trial to these Experimental Improvements.

DUNCANNON.
B. C. STEPHENSON.
A. MILNE.
} Commissioners of His Majesty's Woods, Forests, Land Revenues, Works and Buildings.

Office of Woods, &c., June 8th 1836.

Mr. *Griffith's* Further Report of the progress made on the New *Cork* and *Kerry* Roads, and of the Improvements on the Crown Estate of *King William's Town*, County Cork.

My Lord and Gentlemen, Irish Office, London, 3 June 1836.

IN the month of January 1834, I had the honour to communicate to your Board a statement of the progress that had been made on the New Cork and Kerry Roads, towards the formation of which Parliament had granted the sum of 17,000*l.*, and presentments were made respectively by the grand juries of the counties of Cork and Kerry, to the amount of 7,937*l.*, making a total of 24,937*l.*

Upwards of two years having elapsed since the date of my former Report, I have now to Report that one of the roads, namely, that from Killarney to Mallow, which commenced at Sharmogh Cross on the road from Killarney to Cork, and terminated at Roskeen Bridge, over the river Blackwater, six miles west of Mallow, has been completed and transferred during the last year to the care of the Commissioners of Public Works; and that the other, which extends from Castle Island in the county of Kerry towards the city of Cork, has been completed between Clonbanin, where it joins the new road from Killarney to Mallow, and the summit of Knocknaboul, two miles to the west of King William's Town; and the remainder between that point and Castle Island, a distance of about eight miles, is in such a state of forwardness that I expect to be able also to finish and transfer it to the Board of Public Works before the termination of the present year.

 The

The entire length of the new roads completed, and which are now open to the public, amounts to 34 miles; and I have the pleasure to state that the whole continued sound during the last wet winter, and the surface of the metalling is now becoming firm and smooth. In part of the road, particularly towards the eastern extremity, the traffic is very considerable, and it is increasing daily throughout the line. At present the intercourse from Castle Island by King William's Town to Cork is not considerable, but I have no doubt that the new inn, as well as the shops at King William's Town, will have abundance of business as soon as the whole line shall have been completed.

As above-mentioned, the entire sum granted for the service of the roads, including the presentments, amounts to - - - - - - - - - - -		24,937
And in respect to the expenditure; I have to state that the sum paid for work done up to the 31st March 1836, amounted to - - - -	20,081	
And, after a careful examination of the portion of the road which is still unfinished, I am of opinion that it will be completed for the sum of -	3,256	
Making together the Sum of - - £.		23,337

So that there will be a residue of about 1,600 *l.*, after the main lines of the Cork and Kerry roads have been completed, which sum may be most usefully expended on road improvements, formerly contemplated; the most important of which will be the opening a new branch road from King William's Town to Mount Infant, mentioned in my former report, and originally recommended by Mr. Weale, in his first valuable communication suggesting the roads and other improvements at Pobble O'Keeffe. The completion of this road would tend much to the advantage of the Crown estate, not only by opening a direct communication with Mill-street, and the country to the south, but also by diminishing the distance by the road from the Carrigdulkeen limestone quarries, in the county of Kerry, both to the tenantry resident on the southern portion of the estate, and also to King William's Town; and thereby enable the crown tenants to draw two loads of limestone each day instead of one, which is the most that can at present be effected. In addition to which I expect I shall be enabled to complete the several other short but useful farm-roads through the estate, without exceeding the limits of the original grant.

As it is desirable that the Mount Infant road should be commenced as soon as possible, I have to suggest that I may be authorised to apply to the grand jury of the county of Cork for a presentment, at a nominal price, say 1 *s.* a perch, to enable me to open the road for a short distance near its termination at Mount Infant, where it will pass through the estate of Mr. Cronin. I do not anticipate any objection on the part of that gentleman, as his tenants are anxious for the road, and I have no doubt the grand jury of the county of Cork will feel pleasure in giving its authority for the completion of so useful a work. On a former application from me the Cork grand jury granted a presentment for a new road (altogether at the cost of the county), which passes through the crown lands, and connects King William's Town with the town of Newmarket, and the southern part of the county of Limerick; and the Mount Infant road will, in fact, be a southern continuation of the Newmarket road, which is now nearly completed.

Of the Improvements on the Crown Lands.

In my last Report I also described the situation and character of the soil and climate of the Crown estate of Pobble O'Keeffe, on which estate some interesting agricultural experiments are now being carried on under my direction.

These experiments, as you are aware, were commenced by the inclosing, draining and cultivating four English statute acres of an unusually wet and spongy bog, the aspect of which was so unpromising that, had not circumstances required it, I should not have thought it advisable to attempt so hopeless an undertaking; but I am happy to say the result has much exceeded my expectations, and that although the outlay has been considerable, still the returns are sufficient to warrant the expectation that the whole expenditure will be more than repaid at the end of a few years.

I shall here beg to insert a statement of the system of reclamation adopted by me as suited to different varieties of bog, and also of the expense and probable return. This statement was prepared by me last summer, at the request of the Irish Public Works Committee of the House of Commons, and is included in the Appendix to their Report, page 329.

The bog and moor-lands of this district may be divided into three classes; viz.

1st. Flow-moss or bog, varying from five to 20 feet in depth; the surface is composed of bog-moss (sphagnum) in vegetation, and a few tufts of heath; the subsoil is gravelly clay.

2d. Close-grained mountain-bog, surface covered with coarse grass and some moss (sphagnum), in vegetation; the depth of bog varies from two to ten feet.

3d. Shallow mountain bog or moss; depth of bog from six inches to three feet, subsoil clay or clayey gravel; the surface frequently uneven and tufty; the vegetation consists of coarse grass, heath and rushes. The system followed in reclaiming these several varieties of bog will differ in the detail according to circumstances; but the following may be taken as the average process:

1. Flow-moss: this is by much the most expensive; and, in proportion to the outlay, the least remunerative subject for reclamation; and in mountain districts, where the second and third classes are most abundant, its reclamation should not be attempted, unless under very peculiar circumstances; but its surface may be drained, with a view to the improvement of the quality

quality of the turf or peat for fuel; and if young cattle are allowed to run on it in summer, the surface will soon be found to yield a crop of coarse grass, mixed with heath.

For the reasons stated in my Report on the Crown Land Improvements of Pobble O'Keeffe, and printed by order of the House of Commons, the 26th March 1834, the reclamation of about 20 acres, English statute measure, of the worst variety of flow-bog, varying from six to 14 feet in depth, has been attempted; and in proportion to the progress made, the success has been fully as great as could have been anticipated.

The bog was, in the first instance, surrounded by a drain to cut off the water from the adjoining hills, and also from that part which it was not intended to reclaim; drains were then cut through the bog, both lengthways and across, so as to divide it into squares, each containing four statute acres. Owing to the extreme wetness and pulpiness of the bog, these drains could not be opened at once, but required considerable caution and attention in the progress; an opening, four feet wide and three feet deep, would nearly close up in 24 hours; consequently the commencement was made by a narrow and shallow drain, which was gradually widened and deepened, and upwards of a year had elapsed before the principal drains in a considerable portion of the bog were in a sufficiently forward state to admit of the commencement of the small drains intended to dry the surface.

The large drains, when completed, were six feet broad at top, two feet at bottom, and four feet deep.

The second class, or surface-drains, were next cut parallel to each other, at the distance of eight yards. The upper part of each of these drains consisted of an excavation, two feet broad and two feet deep; in taking out the stuff care being taken to cut the sods with a broad spade or draining-tool, so as not to break them: the sods were laid on the surface of the bog, to consolidate. Subsequently, when the sides of the drain became more compact by exposure to the air, a second drain, four inches broad and twelve inches deep, was cut in the centre of the bottom of the two-foot drain; thus leaving a shoulder on either side, ten inches in breadth: afterwards, where the sides of the lower drains had consolidated, and exhibited no tendency to collapse, the surface-sods, cut in the first instance, were placed with their upper surface downwards on top of the four-inch drains, and were supported in that position by the trenches or shoulders on either side; the remainder of the bog-soil excavated from the drain was then thrown on top of the sods, till the excavation was filled up; and thus a covered drain or sewer was formed, at the depth of three feet below the surface of the bog.

To facilitate the discharge of the water from the under-drains, one open drain was cut through the centre of each of the four-acre fields, to receive the water and discharge it into the principal or surrounding drains.

Six months after the completion of the drains, the surface of the bog was dug up and left in a rough state, exposed to the air during the winter, and in the following spring it was chopped or cut by the spade into small pieces, so as to render it as fine as possible; the surface was then covered with clay to the depth of nearly four inches. The clay was drawn for a distance of about 600 yards by means of a moveable wrought-iron railroad *, and afterwards the surface was covered with lime, in the proportion of 37 barrels, each containing 42 gallons, to an acre.

On the surface thus prepared, potatoes were planted, and a moderately good crop produced.

Following the cropping of one portion of the bog, the tillable surface of which, owing to building and plantations, from four acres has been reduced to 2 A. 3 R. 13 P. The second year a portion, containing 2 A. 0 R. 34 P., was again planted with potatoes, and the remainder, containing 2 R. 19 P., with turnips; the potato land being manured with 20 barrels of lime to the acre, in compost mixed with clay; and the turnip land, partly with lime, partly with peat ashes, and partly with stable dung. Owing to the unusual coldness and wetness of the season, the potato crop was inferior to what was anticipated; but the turnips were excellent. At present the potato land has been laid down, and sown with oats, York meadow-grass and white clover; and at this moment, in the beginning of July, the appearance of the crop is very favourable, and it is probable will be as productive as can be expected from reclaimed bog, which usually yields abundance of straw, but a small weight of corn, as compared with sound

* The moveable railroad is formed of wrought-iron bars, usually about twelve feet long, two inches broad, and half an inch thick. These bars are supported on planks made from young Scotch fir, or larch-trees. They are prepared by sawing off the outside slabs, on two opposite sides, and then running a cut through the centre. The planks thus formed are four inches broad at top, six inches at bottom, and three inches thick, the length being usually 12 feet.

On each of these planks an iron bar is fixed on edge, by means of two cast-iron chairs, or stands, spiked to its upper side, at the distance of one foot six inches from either extremity; one end of the bar being fixed in one chair, and the other, passing through the second chair, projects three feet beyond it, when a second plank and rail is placed in continuation of the length beyond the first; the projecting end of the first bar is fixed into the first chair of the second plank, and by this means the joining of the rail is always placed one foot six inches beyond the termination of the planks, and thus a firm joint is obtained.

In laying down this moveable railroad, two parrallel lines of planks, with rails attached, are laid on the bog, and the proper distance between each is preserved by the insertion of an half-inch square wrought-iron bar, crooked or bent at both extremities, into staples attached by spikes to the under surface of each plank.

For the further strength and security of the joining of the planks, thimbles, made of sheet-iron, of a triangular form, are attached to one end of each plank, and the end of the next having been cut into the same shape, is inserted into the sheet-iron thimble. The cost of a moveable railroad, of the above description, is 3 *s.* 3 *d.* per yard, including both sides, and when laid level a man can with ease push on a waggon containing 18 cwt.

sound upland. A crop of mangel-wurzel has been sown on the turnip land of last year; it also looks well; but this portion of the bog, together with other reclaimed fields now under crops of potatoes and turnips, has been dunged from the cowhouse and stable; in the former four cows were stall-fed, during the last winter, on the turnips and a portion of the very small potatoes.

In calculating the amount of the expenditure in all departments of reclamation and cultivation, from the commencement to the present time, the outlay and return per acre is as follows:

Flow-Bog, No. 1.

	£.	s.	d.
Reclamation:			
Fencing, with double ditches, per acre	–	12	–
Draining*	1	17	–
Digging up and chopping the surface, &c.	1	10	–
Covering with clay, by means of a moveable railroad, to the depth of nearly four inches	5	10	10
Total Cost of Reclamation	9	9	10
Manure:			
Lime, 37 barrels, each 42 gallons, at 1*s.* 6*d.* per barrel	2	15	6
Cultivation:			
First year: cost of seed potatoes, planting and digging, per acre	4	12	4
Second year: ditto – – – – – ditto	4	2	4
Additional lime, 20 barrels	1	10	–
Third year: seed oats, tilling, sowing, reaping and threshing	1	18	6
Hay-seed and clover	–	16	–
Fourth year: mow and sow hay	–	8	–
£.	25	12	6

Produce or Return.

	£.	s.	d.
First year: value of potato crop 816 stone, at 2½ *d.* per stone	8	9	2
Second year†	8	5	6
Third year: expected produce of oat crop 105‡ stone, at 9 *d.* per stone – 3 8 9			
Value of straw – 1 – –			
	4	8	9
Fourth year: expected value of hay crop, two tons York meadow-grass and clover hay, each 1 *l.* 10 *s.* per ton	3	–	–
Total produce of one acre, for four years	24	3	5
Total expenditure	25	12	6
Portion of Outlay not returned at the end of Four Years, at which time the reclaimed Bog laid down in Pasture would be worth about 10 *s.* per acre	1	9	1

Of the Second Class of Bog.

This variety is naturally very superior to the first, its texture is close and compact, and when burnt it yields a considerable portion of red or yellowish red ashes, while the residuum from burnt flow-bog consists of a very small quantity of white ashes, of no agricultural value. In reclaiming compact bog, a coat of two inches and a half of clay will be sufficient, while flow-bog requires at least a depth of four inches.

The general system pursued in reclaiming compact bog is similar to that adopted for flow-bog, but the draining is not so expensive, and the digging and chopping the surface is more easily effected.

Expense of Reclaiming an average Statute-Acre of Compact Bog.

	£.	s.	d.
Fencing-in six-acre fields, with double ditches, top sown with furze seed	–	12	–
Draining	1	2	–
Levelling and digging surface	1	8	–
Covering surface with clayey gravel, two inches in depth, the clay being raised from the surrounding fences, and from the bottom of the drains	2	9	–
Making compact heaps with alternate layers of surface sods and lime, including turning and spreading	–	12	–
Total Cost of Reclaiming and Fencing per Acre	6	3	–

* The usual cost of draining is about 1 *l.* 4 *s.* per acre, but in very wet spongy bogs the extra labour of opening the drains adds considerably to the cost.

† The second crop of potatoes is usually much better than the first; but, owing to the wetness of the season of the year 1834, in the West of Ireland, the produce of potatoes in the mountains was much below an average crop.

‡ The actual produce has been 135 stone, of 14 lbs. to the acre.

	£.	s.	d.
Manure :			
37 barrels of lime at 1 *s.* 6 *d.* per barrel - - - - - - - - -	2	15	6
Amount of expenditure for four years, cultivation same as flow-bog, or class No. 1. - - - - - - - - - - - - - - - -	13	7	2
Total Expenditure on Reclamation and Four Years' Cultivation - -	22	5	8
The produce of each crop raised on reclaimed compact bog will be superior, both in quantity and quality, to that raised from flow-bog; but supposing the return to be the same as that from flow-bog, as given above, the amount of the Return on four years' crops, two of potatoes, one of oats, and one of hay, will be - - - - - - - - - - - -	24	3	5
There will therefore be a Profit of - - £.	1	17	9

per acre in four years' cultivation; at which time the land laid down in grass will be worth about 12 *s.* 6 *d.* per acre.

Of the Third Class of Bog.

This class is described as compact bog, of variable depth, and which, in its natural state, yields coarse mountain pasture for cattle during the summer months; the least expensive and most profitable mode of treating this variety of bog will be to improve the quality of the herbage, and render it capable of producing good meadow and pasture.

This can be effected by fencing, draining and liming the surface, at the following rate per statute acre :

	£.	s.	d.
Cost of fencing-in six-acre fields - - - - - - - - -	–	12	–
Draining, as in the flow-bog, but with less, owing to the solidity of the bog -	1	4	–
Covering the surface with lime, 37 barrels to the acre, at the rate of 1 *s.* 6 *d.* per barrel - - - - - - - - - - - - -	2	15	6
Total Cost of Reclaiming an Acre of coarse Mountain Pasture, so as to render it worth 10 *s.* per acre for Meadow and Pasture - - £.	4	11	6

The foregoing details have been extracted from the accounts of the actual expenditure on the different departments of reclamation and cultivation, at the Crown-farm of Pobble O'Keeffe; but it is to be observed, that the works are conducted with great system and regularity, and with strict attention to economy; and unless similar methods be taken in other places, the same results will not be obtained: but it is likewise to be observed that the cost of lime at the Crown-lands is considerable, and it is only in the summer months it can be obtained at so cheap a rate as 1 *s.* 6 *d.* per barrel; in favourable situations it may be obtained at 1 *s.* per barrel, and even less. Were this the case, the third class of bog could be fenced, drained and manured, at the rate of 3 *l.* 13 *s.* instead of 4 *l.* 11 *s.* 6 *d.* per statute acre.

Encouraged by the success of the first experiments, improvements were commenced on a large scale, not only on the remainder of the bog adjoining the four-acre farm already alluded to, but on different qualities of moory and mountain land; which latter, as has been shown, can be reclaimed at a less expense, and in the end will be more valuable than the flow or spongy bog.

The extent of bog or boggy mountain land, at present under tillage or in progress of improvement, amounts to 154 acres, of which 95 acres are under tillage, and the remainder consists of mountain meadow and pasture land, which has been drained, and in part covered with lime on the surface.

It is to be observed that, previously to the commencement of the improvements, nearly the whole of this land was in an unprofitable state, having been valued by Mr. Brassington the Crown Surveyor, at an average rate of 4½ *d.* per acre per annum; but the greater part of which is now capable or producing fair crops of turnips, oats, potatoes and meadow. In addition to which, I have to state that 50 acres of the mountain land have been drained, fenced and planted, with a view to shelter the improvements from the west and south-west winds; and 1815 perches of large rampart fences, consisting of a high bank or dike in the centre and a grip or trench on either side, have been made for the purpose of dividing new farms in the northern portion of the estate.

The detail of the expenditure, arranged under different heads, will be found in the Appendix; but I shall here state a few of the most important items :

	£.	s.	d.	£.	s.	d.
Cost of draining, claying, liming, cultivating and improving bog-land at King William's Town, including dung, seed, and the saving of the crops - - - - - - -	1,155	14	4½			
Fencing and improving kitchen-garden and nursery, including planting in the nursery - - - - - -	129	1	10½			
Expenses of draining, fencing and planting 50 acres of screen plantation - - - - - - - - -	498	8	6			

	£.	s.	d.	£.	s.	d.
Expense of erecting a large lime-kiln, and making a road thereto	61	1	1			
Cost of opening Culm Colliery, discovered in 1835	30	15	9½			
Cost of five draught-horses	80	5	–			
Forage of farm-horses for three years, farming implements and forge implements	231	16	10			
Cost of railroad, including timber, waggons, &c.	132	12	7½			
Fencing, and embanking the New-river course at King William's Town, so as to prevent inundations from the river Blackwater	132	5	4½			
Inclosing and fencing new farms in Lower Carrigans, together with sundry other improvements not connected with King William's Town farm	184	1	7			
Expenditure for sundry purposes; for detail of which see Appendix	499	7	3½			
Total Expended on Improvements to 31st March 1836			£.	3,135	10	4
Amount of buildings in King William's Town, together with the erection of three slated farm-houses, each two stories in height; for details see Appendix				2,120	13	4½
Total Expenditure on Pobble O'Keefe, up to 31st March 1836			£.	5,256	3	8½

From the foregoing statement it appears that a large sum of money has been expended, and that as yet a comparatively small return has been made; but it must be recollected that, in effecting improvements in a country which, in the commencement, was nearly as inaccessible as the wilds of America, considerable expenditure must be incurred in the erection of buildings and forming of establishments, which would not be required in other places; but now that all these preliminaries have been completed, the effect will be much more striking and productive when compared with the sum expended.

During the present year, the produce of the crops will be considerable, the extent under cultivation being altogether, as already stated, 154 acres, the detail of which is as follows:—

	A.	R.	P.	A.	R.	P.
Extent of bog-land at present sown with Oats	33	1	26			
— Turnips	20	1	7			
— Mangel-wurzel	–	3	–			
— Potatoes	17	3	24			
— Rye	3	1	33			
— Rape	16	–	11			
— Spring vetches	2	–	–			
— Clover and grass seeds	1	2	32			
Total Arable				95	2	13
Meadow, which has been drained and partly limed				58	2	8½
Total Acres				154	0	21½

This statement shows that much has been effected during the last year; and if no more were attempted, sufficient has been accomplished to prove that mountain land may be improved with success; but as, in fact, the experiments are only in their infancy, it is very desirable that they should be continued until it has been ascertained what system of cultivation is best suited to the improvement of a mountain district, situated near to the south-west coast of Ireland, in an elevated position, exposed to cold and wind, and having naturally a poor soil, consisting of a surface of boggy turf, with a subsoil of clay or clayey gravel.

From what has already been effected, I am of opinion that the cultivation of turnips and other green crops should be preferred to oats and potatoes, excepting as far as straw may be required for manure, and potatoes for the use of the inhabitants.

During the last year there were four acres two roods British statute measure of bog land under turnip crop, which produced altogether 86 tons 17 cwt. of turnips of various kinds, namely, Swedes, globe, greentop, white and red Norfolk, &c.; the average produce being nearly equal to 20 tons per acre.

	£.	s.	d.	£.	s.	d.
During the last winter 14 cows were fed on these turnips, which, when put into the stalls, had cost	53	5	3			
To this sum must be added the cost of raising the turnips, including all expenses	42	8	4			
Also the cost of hay, and other fodder, provided for the cattle, together with straw for litter	11	7	3			
Also payments made to attendants	5	15	–			
Total Outlay				112	15	10

	£. s. d.	£. s. d.
Amount received on sale of 14 fat cows	121 12 7	
To which must be added the value of 360 cubic yards of cow-house manure, at 1 *s.* 4 *d.* per cubic yard	29 – –	
Total Value		150 12 7
Leaving an actual Profit, on Feeding 14 Cows, from the produce of Four Acres and a Half of Turnips grown on an improved Bog, of rather more than 8 *l.* per Acre £.		37 16 9

The foregoing result proves the great advantage to be derived from the cultivation of turnips on mountain land for the purpose of feeding cattle, not only from the immediate profit to be derived, but from the produce of vast heaps of manure, which could not be obtained through any other means. It will be observed that this year there will be upwards of 20 acres of turnips, which will enable us to feed about 50 head of cattle during the next winter, and perhaps more, should the season prove favourable.

During the last year great pains were taken to ascertain the exact produce per English statute acre of the different crops raised from the bog-field, and the result has been as follows:

	Tons.	Cwts.	Stones, of 14 lbs.
Oats, per statute acre	0	16	17
Straw	1	5	4
Swedish turnips, manured with lime, clay, and a little dung	17	17	6
Globe turnips, manured with lime, clay, and some ashes	18	14	–
Globe and white and red Norfolk turnips, manured with lime, clay, and some bone-dust	20	6	–
Mangel-worzel, manured with lime, clay, and some dung	11	–	–
Potatoes, manured with lime, clay, and some dung, raised from bog, which had been in cultivation for three years	5	7	–
Ditto, raised from bog, manured in a similar manner, and raised from a very wet, spongy variety of bog, being the second crop	2	14	–

On comparing the productiveness of the different crops raised from the bog, under similar treatment and general circumstances, I have found from the foregoing, as well as from other facts of the same kind, that the value of the turnip crop per acre is more than double that of any other; and the relative difference becomes more apparent when the bog-land on which the crops are raised has not been perfectly reclaimed:

In one part of the improved bog, situated immediately to the south of the new village called King William's Town, crops of turnips and potatoes were raised last year, each crop having been cultivated and manured in exactly a similar manner.

	£. s. d.	£. s. d.
The produce of the turnips (red Norfolk) was 17 tons 10 cwt. per statute acre, which, at 15 *s.* 6 *d.* per ton, the ascertained value of white turnips raised at King William's Town during the last year, amounts to	13 11 3	
Deduct cost of tillage, &c.	5 18 –	
Profit per Acre £.		7 13 3
The produce of potatoes raised on a similar bog, adjoining the turnips, was two tons 14 cwt. per acre, the quality inferior, and not worth more than 20 *s.* per ton, value of crop, per acre	2 14 –	
Cost of tillage, including manure	5 12 4	
Loss per Acre £.		2 14 8

This is a very striking difference; and it induces an opinion that on light spongy bog, similar to that at King William's Town, turnips are much to be preferred to potatoes as an initiatory crop.

It may be alleged with truth, that turnips grown on newly reclaimed spongy bog would be inferior in point of quality to turnips grown on sound upland. I have not yet had an opportunity of ascertaining the proportion, but I should think that one ton of upland turnips, say of globe or Norfolk, will be equal to one ton and a half of similar kinds of turnip grown on bog. I have ascertained that a single cow can consume one and a half cwt. of 112 lbs. in one day, of globe or Norfolk turnips grown on bog, and not more than half that quantity of Swedish turnips; but it is to be observed that the latter were raised from bog in a more perfectly reclaimed state than that which produced the Norfolk turnips.

In respect to the preparations made for additional plantations, I have to state that the nursery contains 29,667 of three years old trees, consisting of sycamore, alder, spruce, larch, and Scotch fir; also 200,000 of seedling oaks, and 51,000 of seedling Scotch fir. The oaks were produced from acorns sent from the Royal Forests in England, by order of the Board; and the Scotch fir (pinus sylvestris), were produced from a bag of Norway fir cones, presented to me by Mr. John Musgrave of Tuorin, county of Waterford, for the benefit of the Crown

estate*. I am happy to say that the seedling firs which have been transplanted are doing extremely well, as are also the oak seedlings.

Among the new features which distinguish the progress of the improvements for the present year, may be mentioned the erection of a large lime-kiln for burning lime for agricultural purposes, and the discovery and opening of a culm colliery; the first was rendered necessary in order to derive full advantage from the acquisition of the two limestone quarries, mentioned in my former Report, and which have been occupied and worked during the last six months; and from one of which, Carrigdulkeen quarry, in the county of Kerry, sufficient limestone has already been drawn to produce upwards of 3,000 barrels of lime, of 42 gallons each, a quantity sufficient to manure about 75 acres of land; but in effecting this object the whole of the turf prepared for lime-burning was exhausted; and had it not been for the fortunate discovery which I made of a thin bed of anthracite or culm on the Crown estate, within a mile of King William's Town, we should have been obliged to discontinue lime-burning till the month of August next, as the new turf could not have been dry and ready before that time.

In my former Report (page 43), I mentioned that "the strata of the country in which the Crown-lands are situated, consist of alternations of hard quartzy sandstone, hard sandstone-slate, graduating into sandstone-flag, and gray and black shale, the whole forming a portion of the great southern coal-district of Ireland, many parts of which contain thick and valuable beds of non-flaming coal or mineral charcoal, similar to that of Kilkenny, and of anthracite or culm, which latter is much used in the country for burning lime for agricultural purposes; but that hitherto no traces of coal or culm had been discovered within the boundaries of the Crown-lands;" but, fortunately, this is no longer the case, as I have already discovered two beds of culm on the lands of Glencollins, and I think it probable that others may occur which have hitherto escaped my observation. The culm-bed, on which workings have been commenced, is favourably circumstanced for being unwatered, by means of an adit or subterranean gallery, which has been already conducted by excavation from the level of a neighbouring stream through the strata of the hill till it struck the bed of culm, which, being thus freed from water, can be worked with facility and economy. The direction or strike of the culm-bed is nearly east and west, and the dip or inclination is to the north, at an angle of about 70 degrees from the horizon. The culm-bed rarely exceeds 16 inches in thickness; this is unfavourable; but, owing to its nearly upright position, it can be wrought, without difficulty, on the same principle as a metalic vein; and the culm can be raised, at the cost of about 4*s.* per ton. By means of the culm we shall be enabled to burn lime at the rate of from 10*d.* to 1*s.* per barrel; while, formerly, the lime purchased cost from 1*s.* 6*d.* to 1*s.* 7*d.* per barrel; and, on the whole, I have no doubt there will be a saving of 6*d.* on each barrel of lime, which will make a reduction of 1*l.* per acre on the manuring of the land; in addition to which we shall not be restricted in quantity. There will be no difficulty in raising any quantity of culm required; but it would have been nearly impossible, from a want of a sufficient number of labourers, to prepare a supply of turf, or to have kept the limekiln constantly at work.

Having thus provided the means of supplying abundance of lime, which must be considered to be the foundation of improvement, I would, in conclusion, suggest the propriety of exertions being made to induce the tenantry to cultivate turnips and other green crops on their separate farms: if they once began, they would immediately see the advantage to be derived from it. The cultivation of turnips and green-crop husbandry have been introduced with success on the estate of the Earl of Gosford, and in the neighbouring district of the counties of Armagh and Tyrone, through the exertions of Mr. Blacker; in the county of Meath, by the Marquess of Westmeath, and Mr. Charles Hamilton, of Hamwood; and likewise, in the county of Roscommon, by the Marquess of Westmeath, and by other persons: but these valuable improvements have been hitherto confined to lowland and comparatively fertile districts. It remained for us to introduce green-crop husbandry into the boggy and hitherto unfruitful mountains of Cork and Kerry; and, from the success of the experiments that have been made, no doubt can be entertained as to the successful result. Already have the landed proprietors of the rich lowland country been surprised at the invasion of fat cattle from the mountains, competing, at the Easter markets, with the stall-fed cattle from their demesnes, where alone turnips have hitherto been grown; but I trust the day is not far distant when not only the lowland but the mountain farmers will be enabled, by means of green crops, to feed cattle during the winter; and though they may not fatten many beasts, still they will double or quadruple the quantity of milk now produced during the winter months by their wretched half-starved cows: they will likewise produce four times the quantity of manure, and thereby be enabled to derive from the cultivated land a proportional return of corn, not only in point of quantity, but vastly superior in quality to the dwindled grain now produced from their worn-out lands.

I have the honour to be,
My Lord and Gentlemen,
Your most obedient Servant,
(signed) *Richard Griffith.*

The Commissioners of
His Majesty's Woods, &c.
Whitehall-place, London.

---

* Mr. Musgrave made a considerable importation of fir cones from Norway, which he distributed gratuitously among the landed proprietors of Ireland, with a view to the improvement of the quality of the fir timber grown in Ireland, it having been fully ascertained that the timber produced from the American seed is very inferior to that produced from the Norway seed; and unfortunately, American seed is at present almost exclusively used throughout Great Britain and Ireland.

APPENDIX.

EXPENSE incurred in Farming Improvements at *Pobble O'Keefe*, from the commencement up to the 31st March 1836.

Expenditure connected with the Land Improvements.	£.	s.	d.	£.	s.	d.
Cost of draining, fencing and improving Four-acre Farm	119	1	6½			
Draining, fencing, manuring and cultivating bog-fields, north-east of King William's Town	221	10	1½			
Draining, &c. nine new fields, each containing three acres, situated to the east of the above	225	16	3			
Levelling, draining and improving fields between the village and the river	83	8	9½			
Improving middle division of Model-farm, including draining, fencing, &c.	127	2	5			
Improving north division of ditto	16	13	6½			
Improving south division of ditto	168	6	4½			
Quarrying and draining limestone, and burning lime	193	15	4			
				11,55	14	4½
Nursery at King William's Town, including draining, reclamation, trees, planting, &c.	90	6	10½			
Kitchen-garden, fence-walls, draining, levelling, manuring and cultivating	38	15	–

CITIES AND TOWNS IMPROVEMENT, IRELAND.

RETURNS to several Orders of the Honourable The House of Commons, dated 15 February and 2 March 1836;—*for*,

— No. 1. —

A RETURN of the Number of Towns in *Ireland*, in which Meetings of the Inhabitants have been convened under the Provisions of 9 Geo. 4, c. 82, intituled "An Act to make Provision for the Lighting, Cleansing and Watching Cities, &c. in *Ireland*;" specifying Names and Dates.

A RETURN of the Names of Towns in which the Provisions of the said Act have been adopted, either wholly or in part.

A RETURN of the Names of Towns in which the Act is at present in Operation.

(Mr. Jephson.)

— No. 2. —

A RETURN of the Names of those Towns in *Ireland*, in which the Act of 9 Geo. 4, c. 82, has been brought into operation; of the Total Number of Houses and other Tenements in each Town, which have been assessed as of the annual value of 5 *l.* and upwards, distinguishing the number rated at 5 *l.* and under 10 *l.*, at 10 *l.* and under 20 *l.*, at 20 *l.* and upwards;—Also the Total Amount of Rate raised in each Town in each Year since the adoption of the Act, specifying the Rate per £. 1. as a per centage upon the property assessed.

(Mr. W. S. O'Brien.)

Ordered, by The House of Commons, *to be Printed*,
7 & 14 *June* 1836.

SCHEDULE.

Towns in which Meetings have been convened.	Towns in which the Provisions of the Act have been adopted, either wholly or in part.	Towns in which the Act is at present in Operation.

— No. 1. —

RETURNS of the Number of Towns in *Ireland,* in which Meetings of the Inhabitants have been convened under the Provisions of Act 9 Geo. 4, c. 82; of the Names of Towns in which the Provisions of said Act have been adopted, either wholly or in part; and of the Names of Towns in which the Act is at present in Operation.

ARMAGH.

An application was made in the year 1833, by the inhabitants of the city of Armagh, to the Lord Lieutenant to adopt the Act of the 9 Geo. 4, c. 82, for cleansing, lighting and watching the city of Armagh.

In the month of November 1833, at a meeting held of the inhabitants, the provisions of the Act were complied with, under the approval of His Excellency the Lord Lieutenant, and commissioners appointed.

The Act has since been in operation and continues so.

All vacancies among commissioners filled up agreeably to Act of Parliament.

Meetings held first Monday of every month, in the forenoon.

2 March 1836. *Arthur Kelly,* Sovereign.

ATHLONE.

A meeting of the inhabitants of Athlone was convened, under the provisions of the Act of 9 Geo. 4, c. 82, which was adjourned *sine die,* but as to the exact period, I have no means of ascertaining, as there is no record of it, but I believe it was immediately after the passing of the Act.

The provisions of said Act have not been adopted in this town, either wholly or in part, and consequently the Act is not at present in operation here.

9 March 1836. *William Marshall,* Vice-Sovereign.

BANDON BRIDGE.

A meeting of the inhabitants of this borough was convened, under the provisions of the Act of 9 Geo. 4, c. 82, on the 17th day of March 1835.

The provisions of said Act of 9 Geo. 4, c. 82, except so far as relates to paving and flagging, were at said meeting, on said 17th of March 1835, adopted in this borough and the suburbs thereof, to certain specified limits.

The said Act, except so far as it relates to paving and flagging, is at present in operation in this borough and suburbs specified; but an application was made in the latter end of the last Hilary Term to His Majesty's Court of King's Bench, in Ireland, at the relation of John Wheeler Sullivan, an inhabitant of said borough, for liberty to file an information in the nature of a writ of *quo warranto* against the commissioners under said Act; and the judges of said court, owing to the lateness of said application, were pleased to order that it should stand over for the next term.

8 March 1836. *Edward Doherty,* Town Clerk.

CARLOW.

There were two meetings held in this town, under the Act 9 Geo. 4, c. 82, and the inhabitants were convened by me, and they almost unanimously came to the resolution of not carrying the provisions of that Act into effect, in consequence of the great expense it would involve on them, and which they could not think of laying on the town or parish in their distressed state.

No account or dates of these meetings have been kept.

5 March 1836. *William Fishbourne,* Sovereign.

CARRICKFERGUS.

A MEETING of the inhabitants of this town, was held under the provisions of 9 Geo. 4, c. 82, intituled "An Act to make Provision for the Lighting, Cleansing and Watching Cities, &c. in Ireland," on the 22d day of December 1828.

The meeting resolved to adopt the provisions of said Acts. Thirteen commissioners were appointed, but many having resigned, the object was at length abandoned, it being alleged by some, that the Act did not give power sufficient to levy the money. Since that time, there has been no meeting of the inhabitants of this town in pursuance of said Act.

Adam Cunningham, Clerk of the Peace.

CASTLEBAR.

RETURN showing the Names of Inhabitants of *Castlebar*, convened under Act of 9 Geo. 4, c. 82, for cleansing the Town, with the Dates of such Meetings; showing also how far the Provision of the Act has been adopted, and whether the Act is in Operation at present.

DATES OF MEETINGS.		Whether Act has been carried into effect in whole or part.	NAMES of the COMMISSIONERS.	Casualties in Commissioners List, cause of such, and by whom replaced.
5 Jan. 1829	1 Nov. 1830	Act carried into effect only for cleansing.	O. O'Mally, Chairman	-- St. Clair O'Mally, elected, *vice* Owen O'Mally, at meeting of commissioners, on 2 August 1830.
21 ditto —	15 ditto —			
13 Feb. —	6 Dec. —		C. Mally, Treasurer.

14 ditto —	26 ditto —			
4 Oct. —	30 ditto —			

Observations:—General board-day first Monday in every month.

The commissioners have declined to elect successors. The Act has been thus virtually put an end to in this place.

J. S. Ireland, Clerk of the Peace.

631

CAVAN.

THERE was a meeting of the inhabitants convened under the Act 9 Geo. 4, c. 82, in February 1829, and commissioners appointed, and their being called on to be sworn, they refused, inasmuch as no valuation of houses had then taken place, in consequence thereof no part of said Act was carried into effect.

The said Act was not carried into effect in said town, either wholly or in part.

No part of the said Act in operation in said town.

W. Burrowes, Vice-Sovereign.

CLONMEL.

FIRST appointment under the Act of 9 Geo. 4, c. 82, took place on the 25th September 1828, when 21 persons were appointed commissioners for watching and lighting this town and borough, pursuant to said Act.

Second appointment under said Act took place on Monday the 4th of July 1831, when 21 persons were appointed for the like purpose.

Third appointment under said Act took place on Monday the 2d of July 1834, when 21 persons were appointed for the like purpose, and are now acting.

The paving and cleansing of the said town and borough have remained in the hands of the corporation.

3 March 1836. *Ed. Laharte*, Town Clerk.

COLERAINE.

A MEETING of the inhabitants of this town was held in January 1829, for the purpose of carrying the provisions of the Act 9 Geo. 4, c. 82, into operation, at which meeting it was resolved, that the provisions of said Act should be adopted, and same were accordingly then adopted, and have remained in operation ever since; this town being lighted and cleansed, and a night-watch established under the control of the commissioners elected pursuant to said Act.

8 March 1836. *Samuel Wright Knox*, Town Clerk.

DOWNPATRICK.

AFTER the requisites had been performed agreeable to the Act 9 Geo. 4, c. 82, a meeting of the inhabitants of this town took place on the 20th February 1829, and the Rev. Charles Archbold and myself presided as magistrates, at which it was at first proposed that all the provisions of the Act for lighting, cleansing and watching, should be carried into effect, which was rejected; it was then proposed that the cleansing should be carried into effect, this was opposed, and on a poll, rejected; it was then proposed that watching should be carried, this was also opposed, and on a poll, rejected; it was then proposed that lighting should be carried, which was opposed, and on a poll, carried; and ever since the town has been lighted with oil.

Agreeably to the Act, 19 commissioners were appointed, who held their meetings on the first Monday in each month, agreeable to the Act, until July 1831, when new commissioners were elected agreeable to the provisions of said Act, when 13 of the old commissioners were re-elected, who continued to hold their meetings monthly, until July 1834, (with the exception of five months, when a sufficient number of commissioners did not attend to constitute a meeting). In July 1834 new commissioners were elected, agreeable to the Act, and 15 of the former commissioners re-elected, who continue in office to the present day, holding their monthly meetings as directed by the Act.

Agreeable to the provisions of the Act, when any commissioner resigned or died, new ones were elected in their room, from time to time, keeping up the number of 19 commissioners.

The commissioners have been in the habit of holding extra meetings when any particular business required it, when summoned by their chairman.

5 March 1836. (signed) *Alexander Miller*, Seneschal.

DUNDALK.

A MEETING of the inhabitants of the town of Dundalk, in the county of Louth, was held on the 1st day of February 1832, at which meeting the Act of the 9 Geo. 4, c. 82, intituled "An Act to make Provision for the Lighting, Cleansing, and Watching Cities, Towns Corporate, and Market Towns, in Ireland, in certain cases," was adopted wholly, and such Act continues still in force in the said town.

5 March 1836. *John Tallan*, Town Clerk.

DUNGANNON.

At a meeting of the householders of this borough, held at Dungannon, on the 15th of October 1834, the following persons were unanimously elected commissioners, under the Act 9 Geo. 4, c. 82, s. 3;

John Falls, Richard Murray, Andrew Newton, Philip Geraghty, Thomas Kinley, William Dawson, George Slevin, John Hughes, John Peebles, Thomas Greeves, William Rodgers, Richard Simmons, Henry Speer, James Ogle, Wesley Trotter, Samuel King, William M'Clelland, Thomas Agnew, Edward Evans, John Wilson, John Armstronge.

Edward Evans, John Wilson and John Armstronge, having declined to act as commissioners. John Mullan, Alexander Anderson and James Dickson were afterwards duly elected in their stead.

Patrick Fullan,
Clerk of the Commissioners.

22 March 1836.

ENNISKILLEN.

There was a vestry held in Enniskillen, parish of Enniskillen, on the 19th of January 1829, convened under the provision of 9 Geo. 4, c. 82, for the purpose of taking into consideration the propriety of adopting certain measures for carrying into effect the lighting, cleansing and watching the said town of Enniskillen, Hamilton Irvin, esq., the then provost, in the chair, in consequence of some informality in the service of notices, the meeting dissolved without anything definitive being done.

There was a second meeting called on the 2d February following, which terminated as the former.

8 March 1836. *Charles Ovenden,* Provost.

GALWAY.

There have been meetings of the inhabitants, for the purpose of lighting, cleansing and watching this town, under 9 Geo. 4, c. 82, but the clerk of the peace has not been able to ascertain the dates of the same, he not having any official connection with such meetings, and no record having been kept of their proceedings.

The provisions of said Act have not been adopted in this town, either wholly or in part.

The said Act is not at present in operation in this town.

John M. O'Hara,
Deputy Clerk of the Peace.

633

KILKENNY.

THE late Nathaniel Alcock, esq., deceased, who was mayor of the city of Kilkenny, in the month of July 1829, did, in pursuance of the direction of the then Lord Lieutenant of Ireland, convene, by public advertisement, a meeting of the householders of said city, on the 27th day of said month of July, for the purpose of carrying the aforesaid Act into execution, and that at said meeting the measure was opposed, and a motion for an adjournment *sine die*, was moved and carried, therefore the provisions of the said Act were not then or since adopted, either wholly or in part, in said city of Kilkenny.

11 March 1836. *Patrick Watters*, Town Clerk.

LISBURN.

A MEETING was called in Lisburn, in October last, to take into consideration the expediency of putting this town under the provisions of Act 9 Geo. 4, c. 82, for the lighting, cleansing, &c.

That said meeting separated, without coming to any conclusion on the subject.

4 March 1836. *W. R. Gregg*, Seneschal.

LONGFORD.

THIS town has been regulated by commissioners, duly elected at a public meeting, held on 1st December 1828, conformable to 9 Geo. 4, c. 82. Those commissioners are re-elected, according to the provisions of said Act, and meet on the first Monday in each month, or at such other times as they may adjourn to.

The town is cleansed and watched, but not lighted.

8 March 1836. *John Crawford*, Deputy Sovereign.

MALLOW.

A MEETING of the inhabitants of this town was convened under the provisions of 9 Geo. 4, c. 82, intituled "An Act to make Provision for the Lighting, Cleansing and Watching Cities, &c., in Ireland," on the 20th day of November 1828, when all the provisions contained in said Act were rejected by a majority of the said inhabitants; and no other meeting has been since held here, pursuant to said Act.

10 March 1836. *Henry Hume*, Seneschal.

MONAGHAN.

IN August last, a meeting was held in Monaghan, for the purpose of carrying the Act 9 Geo. 4, c. 82, into force, but was rejected by a majority of the inhabitants then present, and consequently is not in operation here.

I beg leave to state, that the respectable portion of the inhabitants of Monaghan would prefer the said Act to be in operation in this town.

9 March 1836. *James M'Knight*, Town Clerk.

MULLINGAR.

A MEETING of the inhabitants of Mullingar was called, under 9 Geo. 4, c. 82, for the 12th of December 1828; but in consequence of the following letter, the meeting was not held.

Dublin Castle, 11 December 1828.

"Sir,—I HAVE to acknowledge the receipt of your letter of the 3d instant, respecting the qualification for voting at a meeting held under 4 the Geo. 4, c. 82, s. 4, and to acquaint you, that the matter was submitted to the law adviser of the Crown, who observes, that the difficulty of coming to a decision on the above subject has occurred in other cases, and renders it impossible to proceed under the Act, until amended.

"I am, Sir, your most obedient servant,

"John Lyons, Esq., Mullingar." "*W. Gregory.*"

John Lyons, C. M.

NEWRY.

THE provisions of 9 Geo. 4, c. 82, intituled "An Act to make Provision for the Lighting, Cleansing and Watching Cities, &c., in Ireland," were first adopted in the town of Newry on the 29th of September 1828, and the commissioners appointed under said Act held their first meeting on Monday the 6th of October 1828, and the said Act is at present in operation in the said town of Newry.

M. Fagan, Clerk to the Commissioners.

7 March 1836. *Isaac Glenny*, Seneschal.

NEWTOWNLIMAVADY.

PROCEEDINGS adopted under 9 Geo. 4, c. 82, intituled "An Act to make Provision for the Lighting, Cleansing and Watching Cities," &c.

Application to the Lord Lieutenant by thirty-two of the most respectable Inhabitants, on the 20th of November 1828.

23d December 1828: Meeting of the inhabitants, who agreed that so far of said Act as provided for cleansing the streets, and procuring a supply of water to the said town, should be adopted; and 15 commissioners were then duly elected, and sworn into office, on the 2d of January 1829.

Commissioners continued to meet from time to time, until the expiration of their office on the 31st of July 1831, when a meeting of the inhabitants again took place. It was proposed to elect new commissioners for the three successive years, when it was unanimously resolved, not to elect new commissioners; and the Act has not been in operation since, nor any attempt or wish expressed to revive it, in consequence of the misapplication of the funds raised, and the commissioners attempting to force a supply of water to the town, whereby some of them were involved in legal proceedings, and two verdicts obtained against them.

30 March 1836. *Robert Ross*, late Clerk of the Commissioners.

OMAGH.

A MEETING took place in the town of Omagh, 4th February 1829, when 21 commissioners were appointed to carry the provisions of 9 Geo. 4, c. 82, into effect.

The provisions of the above Act were in force in the town of Omagh, in the county of Tyrone, from 4th February 1829 to the 4th July 1831.

The above Act is not now in operation in the town of Omagh, the meeting of the 4th July 1813, having declined to appoint commissioners for the then ensuing three years.

Thomas Stark.

ROSCOMMON.

A MEETING was regularly convened and held in this town, and finally adjourned, without adopting any of the provisions of the Act 9 Geo. 4, c. 83.

As there are no commissioners or other local officers in the town of Roscommon, no information can be had as to the precise date of the meeting; but it took place immediately after the passing of the Act.

A. Crossley, C. M. P.

STRABANE.

THE Act of 9 Geo. 4, c. 82, intituled "An Act to make Provision for the Lighting, Cleansing and Watching of Cities, &c., in Ireland," has been partly carried into effect in this town; viz. so far as regards the supplying of the inhabitants with pipe-water and the cleansing of the streets.

The provisions of said Act, so far as before mentioned, are at present in operation in the town of Strabane.

The first meeting of the inhabitants held under said Act was on the 26th September 1829, in order to apply to the Lord Lieutenant to have said Act carried into effect in the town of Strabane.

The second meeting of the inhabitants was held on the 27th October 1829, in pursuance of the directions of the Lord Lieutenant, at which it was agreed to carry the provisions of said Act into effect, so far as regarded the supplying of the inhabitants with pipe-water and the cleansing of the streets.

The third meeting of the inhabitants was on the 2d July 1832, when it was agreed to continue the provisions of the Act for three years longer, and to appoint new commissioners.

The fourth meeting of the inhabitants was on the 6th February 1835, when it was again agreed to continue the provisions of the Act for three years longer, and to appoint new commissioners.

7 March 1836. *William Elliott*, Town Clerk.

TRALEE.

THERE was a meeting on the 5th of June 1832, in this town, convened by public advertisement, in the "Kerry Evening Post," conformable to the 9 Geo. 4, c. 82, at which it was proposed to clean, light, watch, and erect public pumps.

This proposal was rejected by those householders paying the least taxes, who preferred danger, dirt and darkness to taxation.

Pumps were afterwards erected by partial subscription.

4 March 1836. *John Weekes*, Town Clerk.

WESTPORT.

RETURN of Towns in *Westport* District, according to the Act of 9 Geo. 4, c. 82, agreeable to a Circular, dated 15th February 1836.

Names of Towns in which the Provisions of said Act have been adopted, either wholly or in part.	Names of Towns in which the Act is at present in Operation.	Dates of the Meetings agreeable to the above Act.		REMARKS.

Westport, 12 April 1836. *J. M. Fortescue*, Chief Constable.

WEXFORD.

IN the year 1830, a meeting of the inhabitants of the town of Wexford, was convened, under the provisions of 9 Geo. 4, c. 82, to make provision for the lighting the streets of said town, but was rejected by a majority of the inhabitants so convened.

And in the year 1833, another meeting of the inhabitants was convened, under the said Act, for the same purpose, which was rejected by a majority of the inhabitants at the meeting. The dates cannot be more particularly furnished.

None of the provisions of said Act are in operation in the town of Wexford.

5 March 1836. *Benjamin Vicary*, Town Clerk.

YOUGHAL.

I, JOHN JENKINS, town-clerk of Youghal, in the county of Cork, in Ireland, do humbly certify that a meeting of the inhabitants of the said town of Youghal was duly convened and held on the 16th day of February 1830, by and before the mayor of Youghal, under the orders and directions of His Excellency the Lord Lieutenant of Ireland, bearing date the 23d day of January 1830, and grounded on the application of 55 householders of the said town, to consider the expediency of adopting and carrying into effect in the said town of Youghal the provisions of the Act 9 Geo. 4, c. 82, for lighting, cleansing and watching towns in Ireland.

I also certify that at the said meeting so held at Youghall on the 16th of February 1830, the provisions of the said Act were adopted in part, that is to say, for the purposes of lighting and cleansing only, and not for any other purpose.

I further certify that the said Act of the 9 Geo. 4, c. 82, is at present in operation in the town of Youghal for the said two purposes of lighting and cleansing the town; that a gasometer has been erected, and the town of Youghal is now well lighted with coal gas, and the streets are kept clean.

John Jenkins, Town Clerk.

— No. 2. —

A RETURN of the Names of those Towns in *Ireland*, in which the Act of 9 Geo. 4, c. 82, has been brought into Operation; of the Total Number of Houses and other Tenements in each Town, which have been assessed as of the annual value of 5 *l.* and upwards, distinguishing the number rated at 5 *l.* and under 10 *l.*, at 10 *l.* and under 20 *l.*, at 20 *l.* and upwards;—Also, the Total Amount of Rate raised in each Town, in each year since the adoption of the Act, specifying the Rate per 1 *l.* as a per centage upon the property assessed.

ARMAGH.

The Act 9 Geo. 4, c. 82, was adopted in this city, and is still in operation, since 1833. The following is an account of the houses under the different assessments, with their rates:—

522 houses under the value of 5 *l.*, and not rated.

		£.	s.	d.
510 houses of the value of 5 *l.*, and not 10 *l.*, at 6 *d.* per 1 *l.* -	-	83	16	–
306 - ditto - 10 *l.*, and not 20 *l.*, at 9 *d.* ditto -	-	150	8	3
330 - ditto - 20 *l.*, and upwards, at 1 *s.* ditto -	-	850	3	6
1,146 - Total houses rated. Amount of assessment £.		1,084	7	9

The above is the return made of the value of houses and tenements, in the year 1833, by the valuators appointed in that year; but on appeal against that valuation, the commissioners reduced the sum payable to 850*l.*, or thereabouts, yearly, which has been paid the last three years.

12 April 1836. *Arthur Kelly*, Sovereign.

BANDON BRIDGE.

I most humbly certify, that the Act of 9 Geo. 4, c. 82, save so far as it relates to paving and flagging, has been brought into operation in this borough and the suburbs thereof, to certain specified limits, at a meeting convened on the 17th March 1835; and the total number of houses and other tenements in said town of Bandon and suburbs, which have been assessed, as of the annual value of 5 *l.* and upwards, distinguishing the number rated, is as follows:—

126 at 5 *l.*, and not 10 *l.*, at 6 *d.* per 1 *l.*
177 at 10 *l.*, and not 20 *l.*, at 9 *d.* ditto.
145 at 20 *l.*, and upwards, at 1 *s.* ditto.

At which rates per 1 *l.* the sum of 93 *l.* 7 *s.* 6 *d.* was raised for the proportion of the year ending the 31st of July 1835; and that no other sum has been since levied in said town and suburbs, under said Act.

15 April 1836. *Edward Doherty*, Town Clerk.

CLONMEL.

The number of 5 *l.*, and not 10 *l.* premises, are - - - -	405
Ditto - 10 *l.*, and not 20 *l.* - - are - - - -	253
Ditto - 20 *l.*, and upwards, - - are - - - -	430
Total - - -	1,088

The 5 *l.* premises are rated at 3 $\frac{3}{4}$ *d.* per 1 *l.*; the 10 *l.* ditto, are rated at 5 $\frac{5}{8}$ *d.* per 1 *l.*; the 20 *l.* ditto and upwards, are rated at 7 $\frac{1}{2}$ *d.* per 1 *l.*, amounting in the whole to the sum of 734 *l.* 19 *s.* 6 $\frac{1}{2}$ *d.*

Edward Laharte, Town Clerk.

637

COLERAINE.

VALUATION, September 1834.

Rates of Valuation.	Number of Houses and Tenements Valued.	Rate of Assessment agreeable to the Act 9 Geo. 4.
£. 5 and not 10 *l.* -	180	6 *d.* per £. 1.
£. 10 and not 20 *l.* -	137	9 *d.* per £. 1.
£. 20 and upwards -	127	12 *d.* per £. 1.
TOTAL - -	444	

Gross Amount of TAX Levied in each YEAR, since the Adoption of the Act 9 Geo. 4.

Date.	Gross Amount of Tax.	Rate per £. 1. on the Valuation.
	£. s. d.	
1829 - -	- - - -	6 *d.*, 9 *d.* & 12 *d.*
1830 - -	- - - -	6 *d.*, 9 *d.* & 12 *d.*
1831 - -	- - - -	4½ *d.*, 6¾ *d.* & 9 *d.*
1832 - -	- - - -	4½ *d.*, 6¾ *d.* & 9 *d.*
1833 - -	- - - -	6 *d.*, 9 *d.* & 12 *d.*

13 April 1836.

John Townley,
Chairman to the Commissioners of Paving and Lighting.

DUNGANNON.

The Act of 9 Geo. 4, c. 82, came into operation in this borough on the 15th day of October 1834, the total number of houses as assessed therein is 371, and the total amount of rates raised thereon, since the adoption of the Act up to the 31st of July next, being for one year and three quarters is 507 *l.* 8 *s.* 11 *d.*, and for one full year, ending at that period, 289 *l.* 19 *s.* 9 *d.*, being at the rate of 6 *d.* per 1 *l.* for all houses rated at 5 *l.* and under 10 *l.*; 9 *d.* per 1 *l.* for all houses rated at 10 *l.* and under 20 *l.*; and 1 *s.* per 1 *l.* for all houses rated at 20 *l.* and upwards. The following is a return of the number of houses and other tenements assessed in this borough under the said Act:

Number of houses rated at 5 *l.* and under 10 *l.* - - - -	142
Number of houses rated at 10 *l.* and under 20 *l.* - - - -	123
Number of houses rated at 20 *l.* and upwards - - - -	106
Total Number of rated houses in this borough - -	371

It may be right to state that this borough is under the full operation of the Act, as regards lighting, watching, cleansing and paving. Since the Act came into operation here a gas company has been formed, and the commissioners contracted with them for the lighting of the town.

John Falls,
Chairman of the Commissioners.

Robert Kingsmore,
Provost of the Borough of Dungannon.

15 April 1836.

Patrick Fullan,
Clerk of the Commissioners.

LONGFORD.

The 9 Geo. 4, c. 82; the provisions of this Act was adopted in December 1828, and still continues in operation in this town.

Average from 1828 to 1834:	£. *s.* *d.*
93 houses value above 5 *l.* and under 10 *l.*, at 2 ½ *d.* per 1 *l.* yearly - -	7 5 1½
48 ditto - ditto - 10 *l.* - ditto - 20 *l.*, at 3¾ *d.* — - -	12 5 –
84 ditto - ditto - 20 *l.* and upwards, at 5 *d.* — - -	54 – –
Yearly assessment - - - - £.	73 10 1½

In consequence of an increase of buildings, and a larger sum being required for town purposes, a valuation took place in 1834; viz.—

	£. *s.* *d.*
98 houses, value above 5 *l.* and under 10 *l.*, at 2¾ *d.* per 1 *l.* - -	8 17 10
77 ditto - ditto - 10 *l.* - ditto - 20 *l.*, - 4 ½ *d.* ditto - - -	21 8 9
106 ditto - ditto - 20 *l.* and upwards, - 5 ½ *d.* ditto - - -	74 7 6
281 present yearly assessments. £.	104 14 1

John Crawford, Deputy Sovereign.

NEWTOWNLIMAVADY.

Number of Houses.		Annual Value.	Rate.	Amount of Assessment.
			d.	£. *s.* *d.*
First class - -	60	20 *l.* and upwards -	8	72 10 8
Second class -	85	10 *l.* to 20 *l.* - -	6	28 – 4
Third class -	72	5 *l.* to 10 *l.* - -	4	7 14 8
TOTAL - -	217	Total assessment - - £.		108 5 4

The above amount was assessed and paid for the year of 1829, the same amount was assessed for the year of 1830, but from the mismanagement of the funds and legal proceedings against the commissioners, the inhabitants refused paying; and at the expiration of the commissioners' term of office, 31st July 1831, the Act was not renewed; so the above sum of 108 *l.* 5 *s.* 4 *d.* was all that was collected in this town, under the Act of 9 Geo. 4, c. 82.

Robert Ross,
Clerk to the Commissioners.

13 April 1836.

NEWRY.

N. B.—The reduction, in the present year's assessment, from the maximum taxation, was in consequence of the debt incurred for the erection of gas works having been considerably liquidated.

(Examined by John Jenkins, Town Clerk of Youghal.)

Youghal, 13 April 1836.

B. Jackson, Chairman.
H. Browne, Clerk.

CITIES AND TOWNS IMPROVEMENT, IRELAND.

— No. 1. —

A RETURN of Towns in *Ireland*, in which Meetings of the Inhabitants have been convened under the Provisions of Act 9 Geo. 4, c. 82, &c.

(Mr. Jephson.)

— No. 2.—

A RETURN of the Towns in *Ireland*, in which the Act of 9 Geo. 4, c. 82, has been brought into Operation, &c.

(Mr. W. S. O'Brien.)

Ordered, by The House of Commons, *to be Printed.*
7 & 14 *June* 1836.

WEXFORD HARBOUR.

RETURN to an Order of the Honourable The House of Commons, dated 12 May 1836;—*for*,

A RETURN of the Sums Received by the Corporation for Improving the Bar, Town and Harbour of *Wexford*, in each Year during the last Ten Years, on account of any Tolls, Charges or Sums of Money Levied or Paid under the Provisions of an Act, passed in the 36th Year of the Reign of his late Majesty King *George* the Third, intituled, "An Act for the Improvement of the Town and Harbour of *Wexford*, and for Building a Bridge or Bridges over the River *Slaney*, at or near said Town;" or any Act amending same: distinguishing the Sums received in each Year, and on what particular account each Sum was received; and also stating, in Detail, the mode in which the Sums Received in each Year were Expended, and by what Authority.

(The Attorney General for Ireland.)

Ordered, by The House of Commons, *to be Printed*,
17 *August* 1836.

Credits: Cash due by Treasurer, 5 January 1828		330	6	1¼

Report.

In the two years' accounts, ended 5 January 1826 and 1827, we disallowed the sum of 84 *l.* 4 *s.* 7 *d.*, being a per centage paid to the Treasurer on the amount of the debentures, the interest of which was reduced from six to five per cent.; because as he had received a per centage on the original issue of the debentures, we did not consider him entitled to a similar allowance on the re-issue of them: and the accountant having again claimed credit for this sum in the present account, we have admitted it, in consequence of the explanation contained in the following order of the Chairman of the Ballast Corporation, authorizing the Treasurer to take credit for this said sum in his accounts, and which explanation we deem sufficiently satisfactory:

"Ballast-office, Wexford, 22 April 1828.

"You are hereby allowed to take credit in your account for the year, ending 5 January 1828, for the sum of 84 *l.* 4 *s.* 7 *d.* per centage disallowed by Commissioners of Public Accounts in the last year, it appearing to this corporation that you are entitled thereto by law, the same not being claimed on amount of debentures, the interest on which was reduced (as stated) from six to five per cent., but was paid on an actual issue of new debentures at a reduced rate of interest which was procured by you from sundry individuals, which enabled this corporation to pay off the holders of six per cent. debentures who objected to submit to a reduction of interest. That this corporation consider that the Act 34 Geo. 3, c. 26, s. 29, which grants you 2½ per cent. on all such sums of money as you shall receive by virtue of your office of treasurer, was sufficient authority for allowing your claim; but in addition, they are quite confident that they have power, under the 11th clause of the Act passed in 1813, (53 Geo. 3,) to grant you this allowance, as treasurer, it appearing to them reasonable."

The above account, as amended, is just and true.

TOTAL DISCHARGE - - - - £.		2,058 7 6½
Balance in favour of the Public		715 3 11½
The Charge as above - - - - £.		2,773 11 6

By the Commissioners of Public Accounts.	£.	s.	d.
The above balance is increased by the correction of an error which appeared in the face of the original account.			
To which must be added the difference between the corrected balance in favour of the public accountant to 5 January 1829, and the balance carried to the account of the succeeding year to 5 January 1830, the same having been omitted to be charged against the accountant in the latter account, £. 7 6 –			
And the following sums disallowed by us: an overpayment to John Guilfoyle, for repairing a wall, by the credit being taken in Irish instead of British currency – – – – 1 8½			
The like to F. Harper, for timber, by an error in casting – – 1 –			
Addition to Charge and Final Disallowances – – –	7	8	8½
	722	12	8
From which must be deducted, being a payment to R. Hughes for iron-work, as per vouchers, more than taken credit for – – – – – –	–	–	6
The true Balance in favour of the Public is – – – – £.	722	12	2

State of the above Balance.

Amount paid the late Richard Nevill, in part of a bond for 500*l.* to the late C. Grogan, disallowed by commissioners of accounts till a final settlement –	184	12	3¾
Balance due by Treasurer – – – – – – – £. 530 11 7¾			
Deduct the above under credit – – – – – – 6			
	530	11	1¾
Addition to charge, as above detailed – – – – – – – –	7	6	–
In the hands of John Guilfoyle, as above disallowed, and to be refunded by him	–	1	8½
In the hands of Francis Harper, as above disallowed, and to be refunded by him	–	1	–
The true Balance as stated above – – – – £.	722	12	2

Report: As amended, this account is just and true.

Balance in favour of the Public		993 7 1½
THE CHARGE, as above £.		2,897 4 3

BY THE COMMISSIONERS OF PUBLIC ACCOUNTS:

The above Balance brought down	993 7 1½
To which must be added, in consequence of the corrected balance of last account not having been brought forward	7 18 2½
	1,001 5 4
From which must be deducted a payment to William B. Hughes for per centage on Pipe-water collections, more than credit for receipt produced	1 – –
The true Balance in favour of the Public, is £.	1,000 5 4

REPORT.

This account, as amended, is just and true. In the state of the balance furnished to us, it appearing that so large a sum as 808 *l.* 14 *s.* 9¾ *d.* was in the hands of the treasurer, we required to know why a sum of such magnitude had been allowed to remain there; to which the following answer has been returned.

"The balance at present in the treasurer's hands is very small, as debentures to the amount of 800 *l.*, late Irish currency, which bore interest at six per cent., have been paid off."

STATE OF THE ABOVE BALANCE:	£. s. d.	£. s. d.
Amount paid to the late Richard Nevill, in part of a bond to the late C. Grogan, and disallowed by Commissioners till a final settlement		184 12 3¾
Cash in treasurer's hands £.	808 14 9¾	
From which deduct the above overcredit	1 – –	
		807 14 9¾
The above additional charge		7 18 2½
The true Balance, as above £.		1,000 5 4

DEBTS AND CREDIT:

	Irish Currency.	
Debts:		
In 5 and 6 per cent. debentures £.	5,100 – –	
Balance of bond for 500 *l.* not paid, the bond not being forthcoming	300 – –	
Is		4,984 12 4
Amount due to the Consolidated Fund, being a balance of a loan of 1,000 *l.*		150 – –
Interest due on debentures to, 29 September 1831		30 – 2
DEBTS £.		5,164 12 6
Credit:—Cash in Treasurer's hands, 5 January 1832		808 14 9¾
